

GOVERNMENT OF PAKISTAN PAKISTAN BUREAU OF STATISTICS ISLAMABAD

CENSUS OF MANUFACTURING INDUSTRIES 2015-16

It is obligatory to provide the requisite information collected under General Statistics (Reorganization) Act, 2011. As provided in the Act the information supplied will be treated confidential and be used to provide aggregate statistics and not made available to any individual, government agency/department for tax or any other purpose.

EXPLANATORY NOTES

CENSUS OF MANUFACTURING INDUSTRIES 2015-16

MANUFACTURING:

It is defined as physical or chemical transformation of materials, substances, or components into new products. Also substantial alteration, renovation or reconstruction of goods is generally considered to be manufacturing. The output of manufacturing process may be finished in the sense that it is really for utilization or consumption, or it may be service furnished in the sense that it is to become an input for further manufacturing.

Assembly of component parts of manufactured products is considered manufacturing. This includes the assembly of manufactured products from either self product or purchased components. The manufacturing of new final products even from the use of most products as inputs is classified in manufacturing. For example production of silver from film waste is manufacturing.

Specialized maintenance and repair of industrial commercial and similar machinery and equipment is, in good manufacturing. Similarly repair of motor vehicles is also not manufacturing.

The return should exclude commercial trading activity, sales offices, retail stores and administrative offices, if they are operated as separate establishments.

ACCURACY: Reply to questions should be as accurate as possible. If audited accounts are not available at the time of filling of return, un-audited figures or careful estimates may be used instead.

QUANTITY: Whenever reported should be in Metric system.

- a. If an establishment is engaged in more than one manufacturing activity at the same location and separate accounts are available for such activity, a separate return for each activity should be furnished. Additional return for this purpose may be obtained from the office of respective regional and field offices.
- b. For establishments working on seasonal basis, the period will cover whole year covering full twelve months including the season as well as non-season months. If an establishment operated for a part of reporting year, the return should cover the portion of the year during which it operated.

SECTION 4: EMPLOYMENT

REGULAR EMPLOYEE: A paid employee who has worked at least one month at a stretch during 12 months is considered as a regular employee.

CONTRACT EMPLOYEE: Those employees who are employed on contract basis whether written or unwritten for some period by establishment.

CASUAL EMPLOYEE: A paid employee who has worked for period less than one month at a stretch during last 12 months considered as casual employee.

WORKING PROPRIETOR AND ACTIVE PARTNER:It includes those persons who manage, supervise or participate in the control or management of the establishment, excluding members of the employer's family not receiving any pay and those business partners who do not take part actively and directly in the business.

SKILL EMPLOYEES: Those employees who have attained full skill of working in the relevant field after training experience.

UNSKILLD EMPLOYEES: Those employees who are fresh recruited having not any experience and knowledge of work in the relevant field.

EMPLOYMENT COST:

WAGES AND SALARIES: It includes wages and salaries, payments for leave and sick leave etc.

OTHER CASH PAYMENTS: All payments made by the establishment to its employees other than wages & salaries are included in this category. These include bonus, gratuities and allowances which are received once or twice a year such as Eid bonus etc.

PAYMENT IN KIND (NON-CASH PAYMENTS): It is defined as the net cost of the employer of those goods and services furnished to employees free of charge or a markedly reduced cost which are clearly and primarily of benefit to the employees as consumers. The item include food, beverages, tobacco and clothing provided free of charge or at a markedly reduce cost.

SECTION 5: TAXES, SUBSIDIES, DEPRICIATION:

SALES TAX: Tax imposed by the government at the point of sale on retail goods and services.

EXCISE DUTY: A percentage levied on manufacturer, sale or use of locally produced goods. It is an indirect tax as the manufacturer can shift it to the customer.

SUBSIDY: Economic benefit (such as tax allowance or duty rebate) or financial aid provided by government to reduce the market price of an item below its cost of production.

DEPRICIATION: It is the allocation of the cost of physical asset over its useful life. For accounting purpose depreciation indicates how much as asset's value has been used. It also covers the wear and tear of the fixed assets however it should be reported according to the accounting rules adopted by the establishment in its books.

SECTION-6 OUTPUT

VALUE OF THE FIXED ASSETS PRODUCED FOR OWN USE: This item covers the value of new fixed assets and additions and improvements to existing fixed assets made by the establishment of its own use during the enquiry period. The valuation should include labour costs and the costs of materials used during the reference period, and should represent value entered in the establishment's capital account

RECEIPTS FOR CONTRACT, COMMISSION, and REPAIR AND INSTALLATION WORK DONE FOR OTHERS:

This item includes the value at actual invoice prices, including taxes, of contract and commission work done for others on material owned by them during the reference year. Contract and commission work consists of the processing, transforming or assembly of materials supplied by the units, which order the work. Similar work done for other establishments of the same enterprise should be included and if practicable, valued at an estimated market price. If this is not feasible the actual cost, including overhead charges, should be reported. Excluded is the value of materials supplied to other establishments doing the contract work.

Repair and Installation covers the value at actual invoice prices, including taxes of repair maintenance and installation work rendered to other enterprises or to other establishment of the same enterprise or to individual customer. The invoice price should include, in addition to labour and overhead costs, charges for materials supplied by the establishment in the course of the work.

SECTION -6 (PART-C) PRODUCTS MANUFACTURED

These include all goods produced and sold by the establishment or by other organization from materials supplied by the establishment. Included are transfers from the producing establishment to another establishment of the same enterprise, including transfers to wholesale and retail selling organization under the same ownership.

These should be measured in producer's prices. That is the establishment price charged to the customer. The valuation should include all duties and taxes, which fall on products when they leave the establishment. Sales tax should be excluded and given separately. Price rebates and discounts and allowances on returned goods allowed to the customer should be deducted.

SECTION-7 INPUTS

PAYMENTS MADE FOR REPAIR, MAINTENANCE, CONTRACT AND COMMISION WORK DONE BY OTHERS: This covers the total cost to the establishment of current repair and maintenance services on buildings and other fixed assets of the establishment provided by others, including other establishments of the same enterprise, during the year. Current repair and maintenance services are those required to make good any breakage or to keep fixed assets in proper working condition. In the case of buildings, outlays on painting, replacing damaged gutters and plumbing, or repairing lights or heating systems should be included.

SECTION-7 PART (A) ENERGY

FUEL AND ELECTRICITY CONSUMED: Contract and Commission covers payments (including freight out and in) made by the establishment for contract and commission work done by others during the year on materials controlled by the establishments. The cost of similar work carried out by other establishments of the same enterprise should be included. Payments to home workers should also be included in this item.

SECTION-7 PART (B) RAW MATERIALS (OTHER THAN FUEL):

The valuation of all items should be in terms of current purchasers' prices. That is the valuation of goods purchased should be at the delivered value at the establishment, including the purchase price, charge for transport, the cost of insurance, the value of packing materials charged for taxes and duties on the goods. Discounts rebates allowed to the purchaser and the value of packing material returned to suppliers should be deducted. Purchaser's prices are equivalent to producer's prices plus the trade and transport charges incurred in delivering the commodities from the producer to the purchaser. Goods received by the establishment from other establishments of the same enterprise should he valued as purchased. The data obtained for this item should cover:

- (a) All raw-materials fabricated parts, components physically incorporated into the products of the establishment (Fuels that directly enter the product should also be included here, including fuels used for the generation of electricity.)
 - (b) Auxiliary materials consumed during the production process, such as lubricants, explosives, polishes and office supplies.
- (c) Purchased ready-made containers and packaging material, as well as raw materials for their manufacture by the establishment.

SECTION - 8 CHANGE IN INVENTORIES

VALUATION OF STOCKS: The data should comprise the value of all inventories owned by the parent enterprise and held by, or under the control of the establishment (at the establishment itself or in ancillary replacement warehouse. In principle, inventories of materials, fuels and supplies should be valued at current replacement cost, based on **purchaser's prices** as of the reference date. Work in progress, ideally, should reflect an imputed valuation in producer's prices, including an imputed margin for overhead costs and profits as well as the cost materials consumed and labour used. Inventories of finished products and goods for resale should he valued in the producer's prices at which goods have been sold immediately) prior to the reference date.

PURCHASERS' PRICE: The purchaser's price is the amount paid by the purchaser in order to take delivery of a unit of a good or service at the time and place required by the purchaser, the purchaser's price of a good includes any transport charges paid separately by the purchaser to take delivery at the required time and place.

- i. **RAW METERIAL MATERIALS:** This covers stocks of all materials, chemicals, and dyes etc. that enter into the products, fuels and repairs, maintenance office and other consumable supplies. These values should be reported separately for these items both at the beginning and end of the year as required in the questionnaire. The materials etc. supplied by others for their production should be excluded.
- ii. GOODS EXPLICITLY PURCHASED FOR RESALE: This item covers the value of any stocks of goods that the establishment has bought with the intention of reselling in the same form that is without further processing of manufacturing, stocks of materials and supplies to be resold without processing which were not originally purchased for that purpose should also be included
- iii. WORK IN PROGRESS: This item refers to the value of all materials which have been partially processed by the establishment, but which are usually sold without further processing. Generally it should include all work in progress for the account of others irrespective of the arrangements for financing the work. Work in progress on own account production of machinery and equipment should be included but own-account construction work should be excluded.
- vi. FINISHED PRODUCTS: This should include all goods made by the establishments which arc ready for sale as of the

reference date. Also included are finished goods held by other establishments that were processed by that establishment from material owned by the respondent establishment. Excluded are finished goods held by the respondent establishment, which were made from materials owned by others.

SECTION - 9 FIXED ASSETS/GROSS FIXED CAPITAL FORMATION:

- 1. **FIXED ASSESTS:** Include all fixed assets, whether obtained from other enterprise, imported or produced by the establishment's own labour for its own use. All physical assets which are expected to have a productive life of more than one year are included.
- 2. VALUATION OF FIXED ASSETS: Fixed assets acquired from others should be included at the full cost incurred that is at the delivered price plus the cost of installation, including any necessary fees and taxes but excluding financing costs. Fixed assets produced by the establishment for its own use should be valued at the cost of all work put in place and overhead costs locatable to the work should also be included. Fixed assets produced by one establishment of a multi-establishment enterprise for the use of another establishment of the same enterprise should be valued by the receiving establishment as though purchased from outside the enterprise. Used fixed assets sold during the enquiry period should be valued at the actual amount realized.
- **3. PURCHASE DURING THE YEAR:** It covers the cost of fixed assets purchased during the year that have not been previously used in the establishment.
- 4. FIXED ASSETS AS ON JULY 1ST 2015: It means original costs minus accumulated depreciation.
- 5. LAND PURCHASED: Land and grounds whether covered or open, acquired during the year by the establishment should be included.
- **6. DWELLINGS:** Dwellings are buildings, or designated parts of buildings, that are used entirely or primarily as residences, including any associated structures, such as garages, and all permanent fixtures customarily installed in residences.

7. OTHER BUILDINGS AND STRUCTURES

Other buildings and structures comprise non-residential buildings, other structures and land improvements. Buildings other than dwellings include whole buildings or parts of buildings not designated as dwellings. Fixtures, facilities and equipment that are integral parts of the structures are included.

- **8. LAND IMPROVEMENT AND COST OF LAND TRANSFER:** Land improvements are the result of actions that lead to major improvements in the quantity, quality or productivity of land, or prevent its deterioration. Activities such as land clearance, land contouring, creation of wells and watering holes that are integral to the land in question are to be treated as resulting in land improvements. The costs of ownership transfer on all land are to be included with land improvements.
- **9. TRANSPORT EQUIPMENT** means all equipment mechanical or non-mechanical, used in transporting materials. Equipment used for official work inside and outside the plant, such as motor vehicles, cars and wagons, etc. are also to be included.
- **10. ICT:** Information, Communication and Telecommunications (ICT) equipment consists of devices using electronic controls and also the electronic components forming part of these devices. In practice, this narrows the coverage of ICT equipment mostly to computer hardware and telecommunications equipment.
- 11. OTHER MACHINARY AND EQUIPMENT: Other machinery and equipment consists of machinery and equipment not elsewhere classified.

Examples include products other than parts and items identified in other categories of fixed capital formation office, accounting and computing equipment;, electrical machinery and apparatus; radio, television and communication equipment and apparatus; and medical appliances etc.

- 12. FURNITURE & FIXTURES mean all furniture and fixtures such as all conditioners, electric fans, electric heaters, refrigerators etc. used for office purposes.
- 13. INTELLECTUAL POROPERTY PRODUCTS: Intellectual property products are the result of research, development, investigation or innovation leading to knowledge that the developers can market or use to their own benefit in production because use of the knowledge is restricted by means of legal or other protection.
- 14. RESEARCH AND DEVELOPMENT: Research and [experimental] development consists of the value of expenditures on creative work undertaken on a systematic basis in order to increase the stock of knowledge, including knowledge of man, culture and society, and use of this stock of knowledge to devise new applications. This does not extend to including human capital as assets within the SNA. The value of research and development (R&D) should be determined in terms of the economic benefits it is expected to provide in the future. This includes the provision of public services in the case of R&D acquired by government. In principle, R&D that does not provide an economic benefit to its owner does not constitute a fixed asset and should be treated as intermediate consumption. Unless the market value of the R&D is observed directly, it may, by convention, be valued at the sum of costs, including the cost of unsuccessful R&D, Should be recognized as part of capital formation.
- **15. COMPUTER SOFTWARE AND DATA BASE:** Computer software consists of computer programs, program descriptions and supporting materials for both systems and applications software. Gross fixed capital formation in computer software includes both the initial development and subsequent extensions of software as well as acquisition of copies that are classified as assets.

Databases consist of files of data organized in such a way as to permit resource-effective access and use of the data. Databases may be developed exclusively for own use or for sale as an entity or for sale by means of a licence to access the information contained. The standard conditions apply for when an own-use database, a purchased database or the licence to access a database constitutes an asset

- **16. OTHER INTELLECTUAL PROPERTY PRODUCTS:** Other intellectual property products include any such products that constitute fixed assets but are not captured in one of the specific items above.
- 17. OWN ACCOUNT CAPITAL FORMATION: It includes the expenditure incurred on assets produced for its own use (own constructed) if the expenses are large on purchase, development or extension of assets and expected to be used for more than one year will be mentioned here.

<u>SECTION – 10: INFRASTRUCTURES AND ENVIRONMENT:</u> This section covers data (approximating percentages) relating to infrastructure and environment aspect of industry along with identification of problem facing by industrial community.

Management and Organizational Practices Survey Jointly Conducted

by

Brief objective

Management practices change over time and those practices are directly linked to the performance of establishments / firms. This survey is a joint initiative of State Bank of Pakistan (SBP) and Pakistan Bureau of Statistics (PBS) that explores how management practices of establishments in the manufacturing sector industries have changed between fiscal year July-June 2010-11 (FY 2010-11) and July-June 2015-16 (FY 2015-16). Moreover, this survey is expected to help policy- makers analyze whether more structured management practices have any relationship with the efficiency of establishments.
