SUMMARY OF FINDINGS

The Labour Force Survey provides data on (a) age, sex, marital status, literacy, level of education and migration of the population, (b) dimensions of country's labour force, viz (i) employed labour force classified by, industry, formal & informal sectors, occupation, employment status, hours worked and level of education, (ii) occupational safety and health information of the employed persons, and (iii) unemployed labour by level of education and previous experience. **In comparison with the LFS 2007-08, some of the main findings of LFS 2008-09 are outlined as under:**

1. Literacy and Employment

1(a) **Literacy rate** shows improvement (56.2%, 57.4%) by area and gender equivalently. This notwithstanding, rural-urban and male-female disparities do not seem to be changing significantly.

1(b) **Participation rate** suggests fractional improvement (32.2%, 32.8%) across the area and gender. However, improvement is more of urban than rural and female than male provenance.

1(c) **Employment by Major Industries** indicates increase in the share of *agricultural and allied activities* (44.6%, 45.1%) of masculine origin. As for non-agricultural employment, the comparative figures are close to each other. However, *construction* bespeaks a sort of increase while *services* seem to be trending down.

1(d) **Employment Status** shows marginal changes-decrease in the comparative profiles of employees and *own account workers* while increase in the case of employers. *Unpaid family workers* also increase (29%, 30%) due mainly to males.

1(e) **Unemployment Rate** (5.5%) is higher than that of the previous survey (5.2%). The change is more due to female than male and urban than rural unemployment rates.

1(f) **Formal Sector** employment recedes in size (27.2%, 26.7%) during the comparative periods. The decline is of male (27.2%, 26.6%) and rural origin (24.9%, 23.8%). Formal sector activities are more concentrated in urban areas (29.4%) as compared to in rural areas (23.8%).

2. Informal Sector

2(a) **Informal Sector** accounts for more than seven-tenth (73.3%) of the employment in main jobs outside agriculture, more in rural (76.2%) than in urban areas (70.6%). Informal employment shows increase (72.8%, 73.3%) of male and rural origin during the comparative periods.

2(b) **Employment by Major Industry Divisions** is mainly comprised of *wholesale & retail trade* (35.2%), *manufacturing* (21.5%), *community/social & personal services* (14.9%), *construction* (15.5%) and *transport* (10.9%). Comparative Labour Force Surveys indicate a mixed trend of changes.

2 (c) **The Employment Status** constitute *employees* (45%), *own account workers* (41%), *unpaid family workers* (12%) and *employers* (2.6%). Marginal changes-increase in the comparative profiles of *employees* and *employers* while decrease in the case of *own account* and *unpaid family* workers is observed.

3. Occupational Safety & Health

3(a) **Percentage of Employed** reporting some sort of occupational injury/disease in the past twelve months that resulted in the loss of working time or doctor's consultation are about one in thirty three (2.7%). Male workers are more vulnerable (3.1%) relative to female workers (1.1%). Same is the case for rural workers (3.1%) compared to urban workers (1.8%). The profile of vulnerability during the comparative periods seems to be trending up.

3(b) **Major Industry Divisions** puts sufferers mainly in the activities of *agriculture* (50.4%), c*onstruction* (14.5%), *manufacturing* (14%), *wholesale & retail trade* (8.5%) and *transport/storage & communication* (8.1%). The comparative risk profile of *agriculture*, *manufacturing* and *wholesale & retail trade* deteriorate, *community/ social & personal services* improves while that of *construction* and *transport/storage & communication* remains at the same level approximately.

3(c) **Major Occupational Grouping** finds the largest group of the sufferers (44.9%) in *skilled agriculture & fishery activities.* Comparative figures of the two surveys indicate deterioration over time more for males than females, though three-fourth (76.1%) of female sufferers belong to this group. The next major groupings are *craft & related trade workers* (22.1%) and *elementary occupations* (19.8%). Risk profile of the former is increasing while the latter's decreasing, more for females than males in either case. As for the masculine groups of *plant/machine operators & assemblers* and *legislators/senior officials & managers,* the former indicates deterioration while the latter improvement during the comparative periods.

3(d) **Employment Status** puts majority of sufferers either *own account workers* (38.8%) or *employees* (38.3%). In comparison with the respective estimates of the LFS 2007-08 (38.6%, 40.1%), the former group gets a bit riskier while the latter betokens improvement. *Unpaid family worker* (22.7%) indicate deterioration as compared to LFS 2007-08 (20.5%), while *employers* allude to a sort of improvement in their risk profile.

SECTION-II

CONCEPTS AND DEFINITIONS

A brief explanation of the key concepts and definitions follows.

1. ***Sex Ratio*** is the average number of males per 100 females.

2. ***Literacy rate*** expresses all those persons ten years of age and above who could read and write in any language with understanding, as percentage of the population ten years and above.

3. ***Level of education*** is categorized as follows:

   i) ***Below Matric*** comprises less than ten (10) years of schooling

   ii) ***Matric but less than intermediate*** encompasses ten (10) to eleven (11) years of education.

   iii) ***Intermediate but less than Degree*** entails twelve (12) to thirteen (13) years of education.

   iv) ***Degree & above*** comprises fourteen (14) or more years of education.

4. ***Household*** constitutes all those persons who usually live together and share their meals. A household may consist of one person or more who may or may not be related to each other.

5. ***Migration*** means the population's movement from one administrative district to another administrative district at any time of their lives and excludes the ones moved within the current district.

6. ***Economically Active Population*** comprises all persons of either sex who provide labour services for the production of goods and services as defined by the United Nation System of National Accounts, during the reference period. The production of goods and services includes:

   i) all production and processing of primary products whether for the market, barter or, own consumption,

   ii) the production of all other goods and services for the market,

   iii) the households which produce such goods and services for the market and own consumption, and

   iv) own account construction

7. ***Currently Active Population*** or labour force comprises all persons ten years of age and above who fulfill the requirements for including among employed or unemployed during the reference period i.e. one week preceding the date of interview.

8. ***Crude activity rate*** is the currently active population expressed as a percentage of the total population in Pakistan.

9. ***Refined activity rate*** is the currently active population expressed as a percentage of the population 10 years and above. This rate enables international comparison by factoring in the effect of age composition.

10. ***Augmented activity rate*** is based on probing questions from the persons not included in the conventional measure of labour force, to net-in marginal economic activities viz subsistence agriculture, own construction of one's dwelling etc. Conventionally, persons 10+ aged reporting housekeeping and other related activities are considered out of labour force. However, from the perspective of time use, they are identified as employed if they have spent time on a specific set of marginal economic activities mentioned afore.

11. ***Employment*** comprises all persons ten years of age and above who worked at least one hour during the reference period and were either "paid employed" or "self employed". Persons employed on permanent/regular footings have not worked for any reason during the reference period are also treated as employed, regardless of the duration of the absence or whether workers continued to receive a salary during the absence. The survey obtains information on the duration of absence as well as on other formal job attachment characteristics of workers in paid and self employment. In line with augmented participation rates, a loose upper bound of employment can be drawn up by including the persons engaged in marginal economic activities.

12. ***Occupation*** refers to the type of work done during the reference period by the persons employed (or the kind of work done previously if unemployed), irrespective of the industry or the status in employment of the person. It provides description of a person's job. Occupation is classified according to the Pakistan Standard Classification of Occupations based on the International Standard Classification of Occupations, ISCO-88.

13. ***Industry*** means the activity of the firm, office establishment or department in which a person is employed or the kind of business, which he/she operates. The activity is defined in terms of the kind of goods produced or services supplied by the unit in which the person works. Industry is classified according to Pakistan Standard Industrial Classification (PSIC) 2007.

14. ***Self-employment job*** is a job where the remuneration is directly dependent upon the profits, or the potential profits, derived from the goods and services produced.

15. ***Status in Employment*** refers to the type of explicit or implicit contract of employment of the person with other persons or organization. Status of an economically active individual

with respect to his employment i.e. whether he/she is an employer, own account worker, employee or unpaid family worker is defined as follows

16. ***Employee*** is a person who works for a public or private employer and receives remuneration in wages, salary, commission, tips, piece rates or pay in kind. Employees are divided into

- *Regular paid employees with fixed wage*
- *Casual paid employee*
- *Paid worker by piece rate or work performed*
- *Paid non-family apprentice*

17. ***Employer*** is a person working during the reference period, on own-account or with one or a few partners at a "self-employment job" with one or more employees engaged on a continuous basis.

18. ***Own account worker*** is a person working during the reference period, on own-account or with one or more partners at a "self-employment job", without any employee engaged on a continuous basis; but, possibly, with one or more contributing family workers or employees engaged on an occasional basis. It includes owner cultivator, share cropper and contract cultivator.

19. ***Unpaid family worker*** is a person who works without pay in cash or in kind on an enterprise operated by a member of his/her household or other related persons.

20. ***Other*** includes member of a producer's cooperative, etc.

21. ***Informal Sector*** in Pakistan is formulated in terms of household enterprise and size of employment. For statistical purpose, the provenance of employment in informal sector is given as follows:

- All household enterprises owned and operated by own-account workers, irrespective of the size of the enterprise (informal own-account enterprises),

- Enterprises owned and operated by employers with less than 10 persons engaged. It includes the owner (s) of the enterprise, the contributing family workers, the employees, whether employed on an occasional or a continuous basis, or as an apprentice, and

- Excluded are all enterprises engaged in agricultural activities or wholly engaged in non-market production.

22. ***Household Enterprise*** or equivalently, an unincorporated enterprise, is a production unit that does not have a separate legal entity independent of the household(s) or household members that own it. It is neither a corporation nor has a complete set of accounts that would permit a clear distinction between the production activities of the enterprise from the other activities of the owner(s) i.e. it is not a quasi-corporation.

23. ***Underemployment (Time-related)*** comprises all employed persons who during the reference period satisfied the following two criteria simultaneously:

i) Worked less than 35 hours per week,

ii) Sought or were available for alternative or additional work.

24. ***Underemployment (Time-related) Rate*** is the time related underemployed population expressed as a percentage of the currently active population.

25. ***Unemployment*** in Pakistan comprises all persons ten years of age and above who during the reference period were:

i) **"Without work"** i.e. were not in paid-employment or self-employment; and

ii) **"Currently available for work"** i.e. were available for paid employment or self-employment: or

iii) **Not currently available** for the following reasons: illness, will take a job within a month, is temporarily laid off, is an apprentice and is not willing to work: or

iv) **Seeking work** during last week.

26. ***Unemployment rate*** is the unemployed population expressed as a percentage of the currently active population.

27. ***Multiple job holders*** relates to persons who during the reference period carried out more than one economic activity. The survey obtains information about the occupation, industry, status in employment and informal sector characteristics of secondary jobs.

28. ***Hours actually worked*** relates to the number of hours worked in the main and secondary jobs during the reference period, including any overtime and excluding any absence from work.

29. ***Population not currently active*** or "persons not in the labour force" comprises all persons who were not employed or unemployed during the reference period and hence not currently active. They are classified into the following categories:-

a) Attending educational institutions,

b) Engaged in household duties,

c) Retired or old age,

d) Too young to work,

e) Unable to work/handicapped,

f) Agricultural landlord and/or property owner; nature of ownership includes land, commercial/residential buildings, cinemas, hotels, petrol pumps, power looms, etc. (given on rent or lease). They are owners but they do not work for their properties,

g) Others (persons who derive their income solely from royalties, dividends, etc; engaged in immoral pursuits such as prostitutes, beggars, thieves and smugglers etc; voluntary social workers doing work outside the family enterprise, living entirely on charity, etc.)

30. ***Occupational Injury/Disease*** refers to any personal injury or disease resulting from an occupational accident/ disease which occurs to employed person (s) i.e. an individual occurrence or event arising out of or in the course of work. Some occupational injuries are serious enough to need treatment, either at hospital, or by a doctor, nurse or some other kind of medical professional, and may mean that the injured person is unable to work, or to work normally, for some time, i.e. they have to take time off work. Other injuries may be less serious/incapacitating, so that the injured person may be able to return to work quickly. All such occupational injuries are taken into consideration. An injury should only be considered as an occupational injury if it was received at the person's work place or in the course of the person's work. Injuries received on the way to or from work are also considered to be occupational accidents. For the purpose of statistics of occupational injuries, the following terms and definitions are used:

a) ***Occupational accident*** is an unexpected and unplanned occurrence, including acts of non-consensual violence arising out of or in connection with work which results in personal injury, disease or death;

b) ***Commuting accident*** is an accident occurring on the habitual route between the place of work and: i) the worker's principal or secondary residence; ii) the place where the worker usually takes his/her meal; iii) the place where he/she usually receive his/her remuneration; or iv) the place where he/she receives training, which results in death or personal injury involving loss of time; travel, transport or road traffic accidents in which workers are injured and which arises out of or in the course of work, i.e. while engaged in an economic activity, or at work, or carrying on the business of the employer.

c) ***Occupational injury*** is any personal injury, disease or death resulting from an occupational accident;

d) ***Case of occupational injury*** is the case of one person incurring an occupational injury as a result of one occupational accident;

e) ***Occupational disease*** is a disease contracted as a result of an exposure to risk factors arising from work activity;

f) ***Incapacity for work*** means inability of the injured person to perform normal duties of work;

g) ***Fatal occupational injury*** is one which leads to death within one year of the day of the occupational accident causing the injury;

h) ***Loss of working time*** means the count of time started from the day of accident to the day prior to the day of return to work measured as calendar days, week days or working days in accordance with the severity of the injury. In the case of recurrent absences due to a single case of occupational injury, each period of absence should be measured and the resulting number of days lost for each period summed to arrive at the total loss of working time for the case of injury. Temporary absence from work of less than one day for medical treatment should not be included in time lost.

31. ***Range of data*** includes, generally, the information about the number of persons employed who suffered an injury or disease in the 12 months prior to the reference period that caused the worker to take time off and/or consult a doctor. In addition, for each injury or disease suffered, it also obtains information about

(i) the act that caused the accident or disease,
(ii) whether time off was taken or treatment was received as a result
(iii) the conditions that caused the accident or injury
(iv) the time of recovery

32. ***Income from paid employment*** relates to the amount of money earned by persons in paid employment in their main job. The income may be earned in cash or in kind, and is reported net of security contributions and, deductions for pensions and income tax. It includes the value in rupees of income in kind as well as regular or adhoc bonuses. The information on earnings is recorded per week or month and the information on bonuses is recorded per year, to convert it later on monthly basis. The survey does not obtain information on the income of self employed persons.

33. ***Entitlement to annual leave and sick leave*** relates to the number of days in the year that workers in paid employment are entitled to obtain and sick leave.

34. The questionnaire adopted for the Survey is given at Annexure-II.

FOREWORD

The labour force statistics are pivotal for manpower planning, human resource development and, economic growth. Federal Bureau of Statistics has been conducting Labour Force Surveys (LFS) since 1963. The Survey data is extensively used by the government, researchers and other stakeholders at large. This report presents annual estimates of the LFS 2008-09.

Detailed information on labour force characteristics has been collected from representative sample of 36,400 households to produce gender disaggregated national and provincial level estimates with urban/rural breakdown. The Survey also provides for quarterly representative results at national, rural/urban level. For this purpose, total sample size is evenly distributed into four sub samples, each to be enumerated in a given quarter.

The Survey, along with the quantification of core variables, also estimates important associated attributes of literacy, migration, occupational safety, etc in accordance with Pakistan Standard Classification of Occupation (PSCO) 1994 revised in the light of International Standard Classification of Occupation (ISCO) 1988.

Effort has been made to make this report a comprehensive, informative and useful document for decision-makers, researchers, planners, economists and other beneficiaries at large. The report is based on the methodology reviewed with the technical assistance of ILO Mission of Oct 2006. The suggestions are however welcome for its further improvement.

SUMMARY OF FINDINGS

The Labour Force Survey provides data on (a) age, sex, marital status, literacy, level of education and migration of the population, (b) dimensions of country's labour force, viz (i) employed labour force classified by, industry, formal & informal sectors, occupation, employment status, hours worked and level of education, (ii) occupational safety and health information of the employed persons, and (iii) unemployed labour by level of education and previous experience. **In comparison with the LFS 2007-08, some of the main findings of LFS 2008-09 are outlined as under:**

1. Literacy and Employment

1(a) **Literacy rate** shows improvement (56.2%, 57.4%) by area and gender equivalently. This notwithstanding, rural-urban and male-female disparities do not seem to be changing significantly.

1(b) **Participation rate** suggests fractional improvement (32.2%, 32.8%) across the area and gender. However, improvement is more of urban than rural and female than male provenance.

1(c) **Employment by Major Industries** indicates increase in the share of *agricultural and allied activities* (44.6%, 45.1%) of masculine origin. As for non-agricultural employment, the comparative figures are close to each other. However, *construction* bespeaks a sort of increase while *services* seem to be trending down.

1(d) **Employment Status** shows marginal changes-decrease in the comparative profiles of employees and *own account workers* while increase in the case of employers. *Unpaid family workers* also increase (29%, 30%) due mainly to males.

1(e) **Unemployment Rate** (5.5%) is higher than that of the previous survey (5.2%). The change is more due to female than male and urban than rural unemployment rates.

1(f) **Formal Sector** employment recedes in size (27.2%, 26.7%) during the comparative periods. The decline is of male (27.2%, 26.6%) and rural origin (24.9%, 23.8%). Formal sector activities are more concentrated in urban areas (29.4%) as compared to in rural areas (23.8%).

2. Informal Sector

2(a) **Informal Sector** accounts for more than seven-tenth (73.3%) of the employment in main jobs outside agriculture, more in rural (76.2%) than in urban areas (70.6%). Informal employment shows increase (72.8%, 73.3%) of male and rural origin during the comparative periods.

2(b) **Employment by Major Industry Divisions** is mainly comprised of *wholesale & retail trade* (35.2%), *manufacturing* (21.5%), *community/social & personal services* (14.9%), *construction* (15.5%) and *transport* (10.9%). Comparative Labour Force Surveys indicate a mixed trend of changes.

2 (c) **The Employment Status** constitute *employees* (45%), *own account workers* (41%), *unpaid family workers* (12%) and *employers* (2.6%). Marginal changes-increase in the comparative profiles of *employees* and *employers* while decrease in the case of *own account* and *unpaid family* workers is observed.

3. Occupational Safety & Health

3(a) **Percentage of Employed** reporting some sort of occupational injury/disease in the past twelve months that resulted in the loss of working time or doctor's consultation are about one in thirty three (2.7%). Male workers are more vulnerable (3.1%) relative to female workers (1.1%). Same is the case for rural workers (3.1%) compared to urban workers (1.8%). The profile of vulnerability during the comparative periods seems to be trending up.

3(b) **Major Industry Divisions** puts sufferers mainly in the activities of *agriculture* (50.4%), c*onstruction* (14.5%), *manufacturing* (14%), *wholesale & retail trade* (8.5%) and *transport/storage & communication* (8.1%). The comparative risk profile of *agriculture*, *manufacturing* and *wholesale & retail trade* deteriorate, *community/ social & personal services* improves while that of *construction* and *transport/storage & communication* remains at the same level approximately.

3(c) **Major Occupational Grouping** finds the largest group of the sufferers (44.9%) in *skilled agriculture & fishery activities.* Comparative figures of the two surveys indicate deterioration over time more for males than females, though three-fourth (76.1%) of female sufferers belong to this group. The next major groupings are *craft & related trade workers* (22.1%) and *elementary occupations* (19.8%). Risk profile of the former is increasing while the latter's decreasing, more for females than males in either case. As for the masculine groups of *plant/machine operators & assemblers* and *legislators/senior officials & managers,* the former indicates deterioration while the latter improvement during the comparative periods.

3(d) **Employment Status** puts majority of sufferers either *own account workers* (38.8%) or *employees* (38.3%). In comparison with the respective estimates of the LFS 2007-08 (38.6%, 40.1%), the former group gets a bit riskier while the latter betokens improvement. *Unpaid family worker* (22.7%) indicate deterioration as compared to LFS 2007-08 (20.5%), while *employers* allude to a sort of improvement in their risk profile.

SECTION-I

METHODOLOGY

Introduction

Federal Bureau of Statistics has been carrying out Labour Force Survey (LFS) since 1963. Along the way, the questionnaire and methodology of the survey have been undergoing pertinent improvements to keep current with best practices. The questionnaire was revised in 1990 to include probing questions on marginal economic activities, likely to be carried out mostly by women and tend to go unrecorded with conventional questions. The questionnaire was further improved in 1995 to reckon with the size and composition of migration and informal sector. The scope of the survey was extended in 2001-02 to take the stock of occupational safety and health of employed persons. The questionnaire was further articulated for undertaking 1st quarterly LFS 2005-06. This practice has since been continuing. The surveys conducted so far are given at Annexure-I.

2. This report presents annual results of LFS 2008-09. The pertinent information has been collected from a sample of 36,400 households divvied up into four distinct, nationally representative samples, each enumerated in a given quarter.

Objectives

3. The major aim of the survey is to collect a set of comprehensive statistics on the various dimensions of country's civilian labour force as a means to pave the way for skill development, planning, employment generation, assessing the role and importance of the informal sector and, sizing up the volume, characteristics and contours of employment. The broad objectives of the survey are as follows:

- To collect data on the socio-demographic characteristics of the total population i.e. age, sex, marital status, level of education, current enrolment and migration etc;
- To acquire current information on the dimensions of national labour force; i.e. number of persons employed, unemployed, and underemployed or out of labour market;
- To gather descriptive facts on the engagement in major occupational trades and the nature of work undertaken by the institution/organization;
- To profile statistics on employment status of the individuals, i.e. whether they are employers, own account workers, unpaid family workers or paid employees (regular/casual);
- To classify non-agricultural enterprises employing household member(s) as formal and informal;
- To quantify the hours worked at main/subsidiary occupations;
- To provide data on wages and mode of payment for paid employees;
- To make an assessment of occupational health and safety of employed persons by causes, type of treatment, conditions that caused the accident/injury and time of recovery; and

- To collect data on the characteristics of unemployed persons i.e. age, sex, level of education, previous experience if any, occupation, industry, employment status related to previous job, waiting time invested in the quest for work, their availability for work and expectations for future employment.

Reference Period

4. Reference period is week i.e. seven days before the date of enumeration.

Field Operation

5. FBS is the national statistical organization responsible for collection, processing, compilation and dissemination of statistics. It has 34 Regional/Field Offices located all over Pakistan. These offices are equipped and manned with regular and trained field staff for the collection of data from the field.

6. In order to evolve dynamics of field enumeration in line with the survey's objectives, training is imparted to the concerned staff on interviewing techniques and other procedure to be used in the enumeration. For quality control, supervisors from Regional/Field Offices and headquarter, make frequent field visits to keep the collection process on track.

Data Processing and Editing

7. Soon after data collection, the supervisors edit, check and clean the filled-in questionnaires manually for consistency and completeness and refer back to field where necessary.

8. Editing and coding is done at headquarter by the subject matter section. Computer edit checks are applied to get even with errors identified at the stage of data entry. The relevant numerical techniques are used to eliminate erroneous data resulting from mistakes made during coding. The survey records are further edited and rectified through a series of computer processing stages.

Sampling Plan

9. ***Universe:*** The universe for Labour Force Survey consists of all urban and rural areas of the four provinces of Pakistan defined as such by 1998 Population Census excluding FATA and military restricted areas. The population of excluded areas constitutes about 2% of the total population.

10. ***Sample Design:*** A stratified two-stage sample design is adopted for the survey.

11. ***Sampling Frame:*** Federal Bureau of Statistics (FBS) has developed its own sampling frame for urban areas. Each city/town is divided into enumeration blocks. Each enumeration block is comprised of 200 to 250 households on the average with well-defined boundaries and maps. The list of enumeration blocks as updated through Economic Census 2003-04 and the list of villages/mouzas/dehs of 1998 Population Census are taken as sampling frames. Enumeration blocks & villages are considered as Primary Sampling Units (PSUs) for urban and rural domains respectively.

Stratification Plan

12. ***Urban Domain:*** Karachi, Lahore, Gujranwala, Faisalabad, Rawalpindi, Multan, Sialkot, Sargodha, Bahawalpur, Hyderabad, Sukkur, Peshawar, Quetta and Islamabad are considered as large cities. Each of these cities constitutes a separate stratum, further sub-stratified according to low, middle and high income groups based on the information collected in respect of each enumeration block at the time of demarcation/ updating of urban area sampling frame.

13. ***Remaining Urban Areas***: In all the four provinces after excluding the population of large cities from the population of an administrative division, the remaining urban population is grouped together to form a stratum.

14. ***Rural Domain:*** Each administrative district in the Punjab, Sindh and NWFP is considered an independent stratum whereas in Balochistan, each administrative division constitutes a stratum.

15. ***Selection of primary sampling units (PSUs):*** Enumeration blocks in urban domain and mouzas/dehs/villages in rural are taken as Primary Sampling Units (PSUs). In the urban domain, sample PSUs from each ultimate stratum/sub-stratum are selected with probability proportional to size (PPS) method of sampling scheme. In urban domain, the number of households in an enumeration block as updated through Economic Census 2003 and village population of 1998 Census for rural domain is considered as measure of size.

16. ***Selection of secondary sampling units (SSUs):*** The listed households of sample PSUs are taken as Secondary Sampling Units (SSUs). A specified number of households i.e. 12 from each urban sample PSU, 16 from rural sample PSU are selected with equal probability using systematic sampling technique with a random start.

17. ***Sample Size and Its Allocation:*** A sample of 36400 households is considered appropriate to provide reliable estimates of key labour force characteristics at National/Provincial level. The entire sample of households (SSUs) is drawn from 2576 Primary Sampling Units (PSUs) out of which 1204 are urban and 1372 are rural. The overall sample has been distributed evenly over four quarters independently. As urban population is more heterogeneous therefore, a higher proportion of sample size is allocated to urban domain. To produce reliable estimates, a higher proportion of sample is assigned to NWFP and Balochistan in consideration to their smallness. After fixing the sample size at provincial level, further distribution of sample PSUs to different strata in rural and urban domains in each province is made proportionately. The distribution of sample PSUs and SSUs in the urban and rural domain of the four provinces is as under: -

SAMPLE SIZE AND ITS ALLOCATION

	Urban	Rural	Total	Urban	Rural	Total
Punjab	524	612	1136	6288	9792	16080
Sindh	344	320	664	4128	5120	9248

Pakistan	**1204**	**1372**	**2576**	**14448**	**21952**	**36400**

Reliability of Estimate

18. Notwithstanding complete observance of the requisite codes to ensure reliability of data, co-efficient of variations, computed in the backdrop of 5% margin of error exercised for determining sample size, are also given below to affirm the reliability of estimates.

COEFFICIENT OF VARIATION (CVs) OF IMPORTANT VARIABLES

Characteristics/ Variables	Coefficient of Variation (Cvs) in Percentage

Household Size	0.5	0.6	0.4	0.5	0.7	1.0	1.0
Sex Ratio	0.4	0.8	0.5	0.6	0.8	1.2	1.2

Method of Data Collection

19. Data are collected by direct interview method. Generally, the head of household is chosen to provide information about all members of the household. In case of his non-availability at the time of interview, some other informed member of the household down the line is interviewed. The total sample for the year is evenly distributed for enumeration on quarterly basis to offset the effect of seasonal variations. The information collected however relates to the week preceding the date of enumeration.

Coverage

20. The survey covers all urban and rural areas of the four provinces of Pakistan defined as such by 1998 Population Census, excluding Federally Administered Tribal Areas (FATA) and military restricted areas. The population of excluded areas constitutes about 2% of the total population.

21. All sample enumeration blocks in urban areas and mouzas/dehs/villages in rural areas are enumerated. The number of sample households 36253(99.6% of the total sample) enumerated is less than the estimated sample size 36400 due to non-contact and refusal cases in urban and rural areas.

SECTION-II

CONCEPTS AND DEFINITIONS

A brief explanation of the key concepts and definitions follows.

1. ***Sex Ratio*** is the average number of males per 100 females.

2. ***Literacy rate*** expresses all those persons ten years of age and above who could read and write in any language with understanding, as percentage of the population ten years and above.

3. ***Level of education*** is categorized as follows:

   i) ***Below Matric*** comprises less than ten (10) years of schooling

   ii) ***Matric but less than intermediate*** encompasses ten (10) to eleven (11) years of education.

   iii) ***Intermediate but less than Degree*** entails twelve (12) to thirteen (13) years of education.

   iv) ***Degree & above*** comprises fourteen (14) or more years of education.

4. ***Household*** constitutes all those persons who usually live together and share their meals. A household may consist of one person or more who may or may not be related to each other.

5. ***Migration*** means the population's movement from one administrative district to another administrative district at any time of their lives and excludes the ones moved within the current district.

6. ***Economically Active Population*** comprises all persons of either sex who provide labour services for the production of goods and services as defined by the United Nation System of National Accounts, during the reference period. The production of goods and services includes:

   i) all production and processing of primary products whether for the market, barter or, own consumption,

   ii) the production of all other goods and services for the market,

   iii) the households which produce such goods and services for the market and own consumption, and

   iv) own account construction

7. ***Currently Active Population*** or labour force comprises all persons ten years of age and above who fulfill the requirements for including among employed or unemployed during the reference period i.e. one week preceding the date of interview.

8. ***Crude activity rate*** is the currently active population expressed as a percentage of the total population in Pakistan.

9. ***Refined activity rate*** is the currently active population expressed as a percentage of the population 10 years and above. This rate enables international comparison by factoring in the effect of age composition.

10. ***Augmented activity rate*** is based on probing questions from the persons not included in the conventional measure of labour force, to net-in marginal economic activities viz subsistence agriculture, own construction of one's dwelling etc. Conventionally, persons 10+ aged reporting housekeeping and other related activities are considered out of labour force. However, from the perspective of time use, they are identified as employed if they have spent time on a specific set of marginal economic activities mentioned afore.

11. ***Employment*** comprises all persons ten years of age and above who worked at least one hour during the reference period and were either "paid employed" or "self employed". Persons employed on permanent/regular footings have not worked for any reason during the reference period are also treated as employed, regardless of the duration of the absence or whether workers continued to receive a salary during the absence. The survey obtains information on the duration of absence as well as on other formal job attachment characteristics of workers in paid and self employment. In line with augmented participation rates, a loose upper bound of employment can be drawn up by including the persons engaged in marginal economic activities.

12. ***Occupation*** refers to the type of work done during the reference period by the persons employed (or the kind of work done previously if unemployed), irrespective of the industry or the status in employment of the person. It provides description of a person's job. Occupation is classified according to the Pakistan Standard Classification of Occupations based on the International Standard Classification of Occupations, ISCO-88.

13. ***Industry*** means the activity of the firm, office establishment or department in which a person is employed or the kind of business, which he/she operates. The activity is defined in terms of the kind of goods produced or services supplied by the unit in which the person works. Industry is classified according to Pakistan Standard Industrial Classification (PSIC) 2007.

14. ***Self-employment job*** is a job where the remuneration is directly dependent upon the profits, or the potential profits, derived from the goods and services produced.

15. ***Status in Employment*** refers to the type of explicit or implicit contract of employment of the person with other persons or organization. Status of an economically active individual

with respect to his employment i.e. whether he/she is an employer, own account worker, employee or unpaid family worker is defined as follows

16. ***Employee*** is a person who works for a public or private employer and receives remuneration in wages, salary, commission, tips, piece rates or pay in kind. Employees are divided into

- *Regular paid employees with fixed wage*
- *Casual paid employee*
- *Paid worker by piece rate or work performed*
- *Paid non-family apprentice*

17. ***Employer*** is a person working during the reference period, on own-account or with one or a few partners at a "self-employment job" with one or more employees engaged on a continuous basis.

18. ***Own account worker*** is a person working during the reference period, on own-account or with one or more partners at a "self-employment job", without any employee engaged on a continuous basis; but, possibly, with one or more contributing family workers or employees engaged on an occasional basis. It includes owner cultivator, share cropper and contract cultivator.

19. ***Unpaid family worker*** is a person who works without pay in cash or in kind on an enterprise operated by a member of his/her household or other related persons.

20. ***Other*** includes member of a producer's cooperative, etc.

21. ***Informal Sector*** in Pakistan is formulated in terms of household enterprise and size of employment. For statistical purpose, the provenance of employment in informal sector is given as follows:

- All household enterprises owned and operated by own-account workers, irrespective of the size of the enterprise (informal own-account enterprises),

- Enterprises owned and operated by employers with less than 10 persons engaged. It includes the owner (s) of the enterprise, the contributing family workers, the employees, whether employed on an occasional or a continuous basis, or as an apprentice, and

- Excluded are all enterprises engaged in agricultural activities or wholly engaged in non-market production.

22. ***Household Enterprise*** or equivalently, an unincorporated enterprise, is a production unit that does not have a separate legal entity independent of the household(s) or household members that own it. It is neither a corporation nor has a complete set of accounts that would permit a clear distinction between the production activities of the enterprise from the other activities of the owner(s) i.e. it is not a quasi-corporation.

23. ***Underemployment (Time-related)*** comprises all employed persons who during the reference period satisfied the following two criteria simultaneously:

i) Worked less than 35 hours per week,

ii) Sought or were available for alternative or additional work.

24. ***Underemployment (Time-related) Rate*** is the time related underemployed population expressed as a percentage of the currently active population.

25. ***Unemployment*** in Pakistan comprises all persons ten years of age and above who during the reference period were:

i) **"Without work"** i.e. were not in paid-employment or self-employment; and

ii) **"Currently available for work"** i.e. were available for paid employment or self-employment: or

iii) **Not currently available** for the following reasons: illness, will take a job within a month, is temporarily laid off, is an apprentice and is not willing to work: or

iv) **Seeking work** during last week.

26. ***Unemployment rate*** is the unemployed population expressed as a percentage of the currently active population.

27. ***Multiple job holders*** relates to persons who during the reference period carried out more than one economic activity. The survey obtains information about the occupation, industry, status in employment and informal sector characteristics of secondary jobs.

28. ***Hours actually worked*** relates to the number of hours worked in the main and secondary jobs during the reference period, including any overtime and excluding any absence from work.

29. ***Population not currently active*** or "persons not in the labour force" comprises all persons who were not employed or unemployed during the reference period and hence not currently active. They are classified into the following categories:-

a) Attending educational institutions,

b) Engaged in household duties,

c) Retired or old age,

d) Too young to work,

e) Unable to work/handicapped,

f) Agricultural landlord and/or property owner; nature of ownership includes land, commercial/residential buildings, cinemas, hotels, petrol pumps, power looms, etc. (given on rent or lease). They are owners but they do not work for their properties,

g) Others (persons who derive their income solely from royalties, dividends, etc; engaged in immoral pursuits such as prostitutes, beggars, thieves and smugglers etc; voluntary social workers doing work outside the family enterprise, living entirely on charity, etc.)

30. ***Occupational Injury/Disease*** refers to any personal injury or disease resulting from an occupational accident/ disease which occurs to employed person (s) i.e. an individual occurrence or event arising out of or in the course of work. Some occupational injuries are serious enough to need treatment, either at hospital, or by a doctor, nurse or some other kind of medical professional, and may mean that the injured person is unable to work, or to work normally, for some time, i.e. they have to take time off work. Other injuries may be less serious/incapacitating, so that the injured person may be able to return to work quickly. All such occupational injuries are taken into consideration. An injury should only be considered as an occupational injury if it was received at the person's work place or in the course of the person's work. Injuries received on the way to or from work are also considered to be occupational accidents. For the purpose of statistics of occupational injuries, the following terms and definitions are used:

a) ***Occupational accident*** is an unexpected and unplanned occurrence, including acts of non-consensual violence arising out of or in connection with work which results in personal injury, disease or death;

b) ***Commuting accident*** is an accident occurring on the habitual route between the place of work and: i) the worker's principal or secondary residence; ii) the place where the worker usually takes his/her meal; iii) the place where he/she usually receive his/her remuneration; or iv) the place where he/she receives training, which results in death or personal injury involving loss of time; travel, transport or road traffic accidents in which workers are injured and which arises out of or in the course of work, i.e. while engaged in an economic activity, or at work, or carrying on the business of the employer.

c) ***Occupational injury*** is any personal injury, disease or death resulting from an occupational accident;

d) ***Case of occupational injury*** is the case of one person incurring an occupational injury as a result of one occupational accident;

e) ***Occupational disease*** is a disease contracted as a result of an exposure to risk factors arising from work activity;

f) ***Incapacity for work*** means inability of the injured person to perform normal duties of work;

g) ***Fatal occupational injury*** is one which leads to death within one year of the day of the occupational accident causing the injury;

h) ***Loss of working time*** means the count of time started from the day of accident to the day prior to the day of return to work measured as calendar days, week days or working days in accordance with the severity of the injury. In the case of recurrent absences due to a single case of occupational injury, each period of absence should be measured and the resulting number of days lost for each period summed to arrive at the total loss of working time for the case of injury. Temporary absence from work of less than one day for medical treatment should not be included in time lost.

31. ***Range of data*** includes, generally, the information about the number of persons employed who suffered an injury or disease in the 12 months prior to the reference period that caused the worker to take time off and/or consult a doctor. In addition, for each injury or disease suffered, it also obtains information about

(i) the act that caused the accident or disease,
(ii) whether time off was taken or treatment was received as a result
(iii) the conditions that caused the accident or injury
(iv) the time of recovery

32. ***Income from paid employment*** relates to the amount of money earned by persons in paid employment in their main job. The income may be earned in cash or in kind, and is reported net of security contributions and, deductions for pensions and income tax. It includes the value in rupees of income in kind as well as regular or adhoc bonuses. The information on earnings is recorded per week or month and the information on bonuses is recorded per year, to convert it later on monthly basis. The survey does not obtain information on the income of self employed persons.

33. ***Entitlement to annual leave and sick leave*** relates to the number of days in the year that workers in paid employment are entitled to obtain and sick leave.

34. The questionnaire adopted for the Survey is given at Annexure-II.

SECTION- III

RESULTS

The Survey's estimates are based on the data of 36,400 sample households enumerated through July 2008 to June 2009. Findings are presented in the form of proportions and percentages to provide for all-purpose employability. The population of Pakistan as per Planning & Development Division's projection is estimated at 163.76 millions on 1st January 2009. The same has been used in arriving at absolute numbers in the report.

2. In comparison with that of the preceding LFS 2007-08, a brief account of the survey's main annual estimates follows.

Marital Status

3. Marital status is categorized as *never married, married, widowed and divorced*. The composition of marital status does not seem to be changing with the passage of time. Nevertheless, small offsetting changes are indicated in the proportion of *married* and *never married.* Detailed information is given at Statistical Appendix Tables-4.

Table-1
MARITAL STATUS - *DISTRIBUTION OF POPULATION 10 YEARS OF AGE AND ABOVE*

Marital Status	**2006-07**	**2007-08**	**2008-09**
Never Married	44.9	45.4	45.3
Married	50.9	50.5	50.6
Widowed	3.9	3.8	3.8
Divorced	0.3	0.3	0.3
Total	**100.0**	**100.0**	**100.0**

Sex Ratio

4. Comparative figures for the overall sex ratio are close to each other. Rural figures are proximate to overall pattern while urban ones make a higher trend line. Punjab is more in line with the national trend followed by NWFP, Balochistan and Sindh in the same order. Migration, as one of the main factor in determining the size and composition of population, may be viewed for possible explanation in this regard.

Literacy

5. Literacy rates form a rising time series. Overall *literacy rate* (57.4%) is higher than that of LFS 2007-08 (56.2%). Improvement is equivalent by area and gender. However, rural-urban and male-female disparity seems to be invariant. Provinces make two distinct groupings with narrowing inter provincial gaps. Sindh (59%) and Punjab (58.7%) are equally more literate as compared to Balochistan (51.5%) and NWFP (50%). Relevant information is given in Table-3.

Level of Education

6. The comparative surveys indicate marginal improvement in the profile of educational attainment in the descending order of *below matric* (36.5%, 37.1%), *degree and above* (4.0%, 4.4%) and *intermediate but less than degree* (4.6%, 4.7%). However, *matric but less than intermediate* remains at the same level (10.7%). Generally, both genders show improvement, though males are more educated compared to females. The comparative picture is given in table-4. Detail is available at Statistical Appendix Table-3.

Migration

7. Proportion of migrants and degree of populous-ness seem to be correlated positively. In this regard, provinces make a descending sequence of Punjab (63.7%), Sindh (25.1%), NWFP (10.7%) and Balochistan (0.5%). Gender disaggregated proportions form similar configuration. Further, the proportion of male migrants is higher than of female migrants except in Punjab.

8. ***Inter provincial migration*** appears to be positively associated with the level of urbanization and economic development. Thus, the proportions of inter provincial migrants is the highest in Sindh (41.5%) followed by Punjab (34.6%), NWFP (23.2%) and Balochistan (0.7%). Gender disaggregated proportions form similar pattern. The proportion of female migrants is higher than of male migrants except in NWFP.

9. The proportion of ***intra provincial migrants*** bespeaks positive nexus with the degree of populous-ness. Provinces form expected sequence in the order of Punjab (71.7 %), Sindh (20.6%), NWFP (7.2%) and Balochistan (0.5%). Similar pattern obtains by gender. Again, proportion of male migrants is higher than of female migrants in all provinces except in Punjab.

10. In comparison with LFS 2007-08, the proportions of migrants, both of between and among the provinces, pare down in all provinces except in Sindh. Relevant information is given in table-5 and 5.1. Detail is available at Statistical Appendix Tables-11 to 11.4.

Reasons of Migration

11. According to the size of the relevant proportions, the *marriage* (30%) and movement *with parents* (23.3%) constitute the foremost reasons for migration. The former is proffered more by females while the latter's calculus owes more to males than females. Migration *with spouse* (12%) and *homecoming* (10.1%) make the next important couplet. Again, the former is related more by females while the latter is determined more by males than females. Next is the triplet of reasons relating to *found the job* (5.6%), *searching for job* (4.8%) and assorted/*other* explanation (6%). All these reasons are related more by males than females.

12. *Job transfer* (2.4%) and pursuit of *business* (1.7%) are the fourth most important set of reasons, put forth more by males than females, for migration. *Education* (1.1%) and accompanying *with son/daughter* (1.2%) is the last couplet of reason. The former is proffered more by males while the latter is related more by females.

13. As for change during the period marked by the consecutive surveys, the comparative figures seem to be proximate to each other, characterized with marginal changes. Relevant information is given in table-6. Detail is available at Statistical Appendix Table-12.

Migrants Employed by Employment Status

14. Four in five (81%)of migrants are either *employees* (45.6%) or own *account workers* (35.2%). About one in six (16.7%) are *unpaid family workers* and one in forty (2.5%) are *employers.* More males than females are engaged as *employees* (48.8% vs 33.8%), *employers* (3.1%, 0.2%) and *own account workers* (39.7% vs 18.7%) while more females than males work as *unpaid family workers* (47.3% vs 8.4%). As for change during the comparative period, the 1st group gains a bit of female provenance, the 2nd group casts a smidgen off while the third-one puts on a fraction, of male origin. *Unpaid family worker* is pared down by some fractions of female provenance. Relevant information is given in Table-7. Detail is available at Statistical Appendix Table-13.

Labour Force Participation Rates: Crude

15. Crude participation rate (32.8%) suggests fractional improvement as compared to that of LFS 2007-08 (32.2%) across the area and gender. However, improvement is more of urban than rural and female than male provenance. Participation rates increase equivalently in the provinces of Punjab (33.8%, 34.5%), Sindh (32.3%, 33.0%) and NWFP (27.0%, 27.7%), more in urban than rural areas and for females than males. Participation rate in Balochistan remains at the same level (27.8%, 27.8%) due to comparative decline of rural and male provenance. Similar configuration is observed in the case of augmented participation rates. Table-8 (and figure-1) depicts crude participation rates for Pakistan by sex and area (table-8, figure-1). Detail is presented in Statistical Appendix Tables-14 to 14.4 and 15 to 15.4.

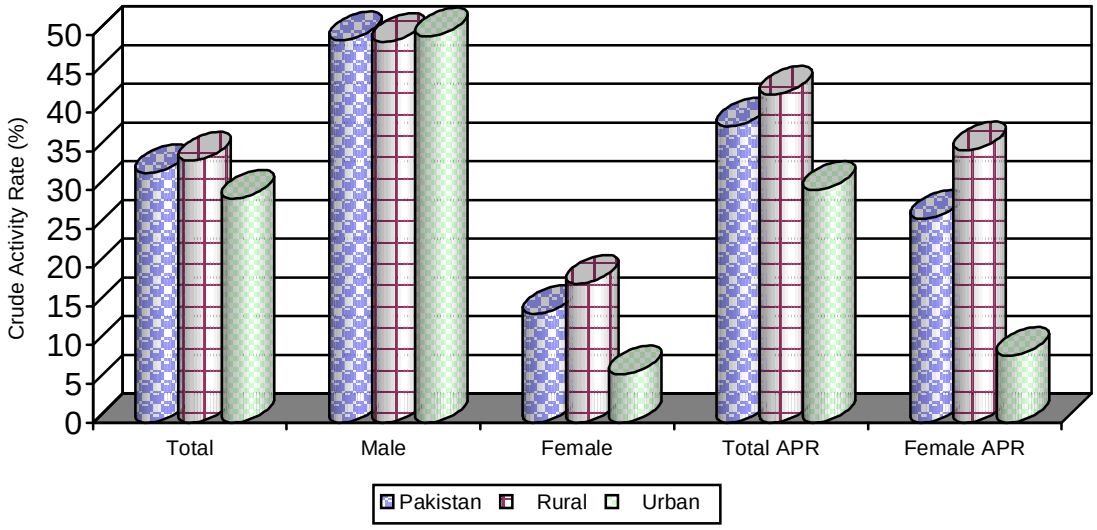
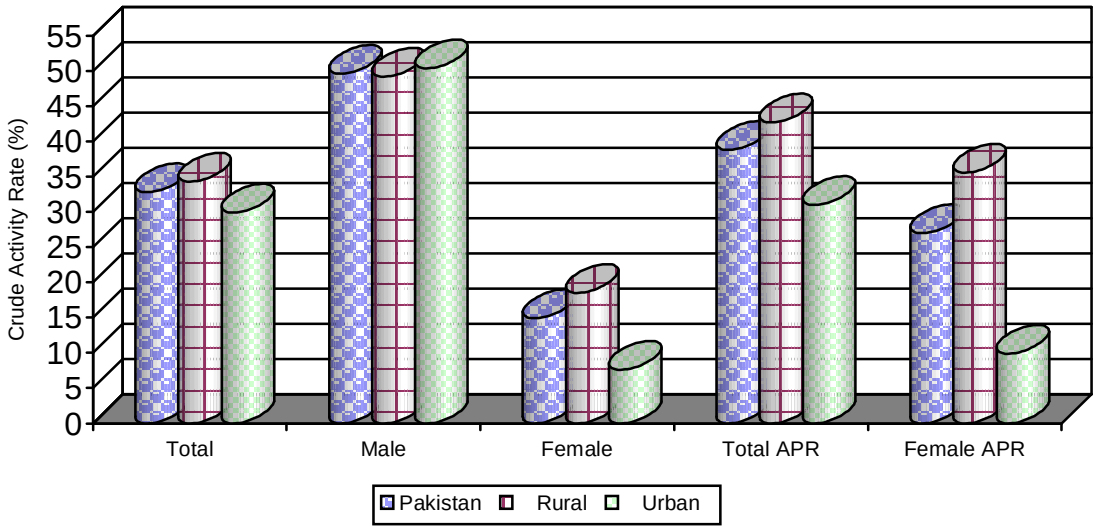
2007-08



2008-09



APR:- Augmented Participation Rates are based on additional probing questions asked from persons especially females engaged in housekeeping and other related activities.

Labour Force Participation Rates: Refined

16. Generally, refined activity rates follow the pattern of crude participation rates, though, with wider rural-urban and male-female disparity. Refined activity rate (45.7%) indicates a fractional gain as compared to that of LFS 2007-08 (45.2%). Gender specific rates indicate a sort of offsetting changes; male's participation rates lose a fraction while female's gain by a bit wider margin. Similarly, rural rates accrue fewer fractions in comparison with of urban ones due to changes in female's participation rates. Change in the participation rates is observed in the decreasing order of Punjab (46.6%, 47.2%), NWFP (39.8%, 40.2%) and Sindh (45.5%, 45.8%). The change in the foremost is female based and more urban than rural, middle one is rural and feminine while that of lattermost is more urban and feminine. Participation rates in Balochistan remain at the same level due to decline in rural as well as males participation rates which, due to their higher weight-age, more than offset the higher increase in the urban as well as female participation rates. The pertinent data is given in table-9. Detail is at Statistical Appendix Tables-14 to 14.4 and 15 to 15.4.

Labour Force Participation Rates: Age Specific

17. Table-10 (figure 2) presents comparative picture of age specific participation rates (ASPR). As expected, the age intervals between *twenties* and *fifties* (20-59) mark the most productive period of life. The comparative size of gender disparity, though, considerable in all age intervals, seems to be shrinking. Most of age groups post rising participation rates.

Similarly, most of the age groups indicate rise in female's participation rates while that of males make a mixed picture. Detailed information is at Statistical Appendix Table-14.

Labour Force: Absolute Figures

18. The absolute figure of labour force is the multiple of crude participation rate with mid-reference year estimate of the population. The numbers of employed and unemployed persons are the "labour force multiplied with their percentages". The labour force increases from

51.78 million in 2007-08 to 53.72 million in 2008-09. The volume of labour force in the provinces increases in descending order of Punjab (1.15 million), Sindh (0.51 million), NWFP (0.26 million) and Balochistan (0.02 million). The change in the provincial profile is more of rural origin in Punjab and NWFP, urban in Sindh while equivalently urban and rural in Balochistan. Changes owe more to males in all provinces except Balochistan where increase in female labour force more than offsets decrease in male labour force. Relevant information is given in Table-11.

19. The number of employed increases from 49.09 million in 2007-08 to 50.79 million in 2008-09. Change in the volume of employed persons makes the expected sequence in the descending order of Punjab (0.98 million), Sindh (0.46 million), NWFP (0.24 million) and Balochistan (0.02 million). The change is more of rural than urban provenance and owes more to males in Punjab & Sindh while equivalently to both genders in NWFP and Balochistan. The detail is given in Table-12.

20. Employment share of *agricultural and allied activities* (45.1%) puts on some fractions of masculine provenance as compared to the respective estimate of LFS 2007-08 (44.6%). As for non agriculture, it is now classified on PSIC 2007 and as such, not readily comparable with that of LFS 2007-08. However, an attempt is made to exclude the most visible impact of classification from the relevant figures for the purpose of comparison; the figures as such are given in the brackets. Thus, in comparison with the relevant estimates of LFS 2007-08, *manufacturing* and *wholesale & retail trade* remain at the same level, masculine activity of *construction* bespeaks a sort of increase while *services* seem to be trending down with more than offsetting decline in the share of male employees. Comparative information is given in table-13 (Figure-3). Detail is at Statistical Appendix Table-16.

21. *Skilled agriculture & fishery workers* constitute the largest group (38%) of the total employed in 2008-09 followed by *elementary occupations* (18%), *craft & related trades workers* (15%), *legislator/senior officials & managers* (12%), *service works* (5%), *technician & associate professionals* (5%), *plant/machine operators & assemblers* (4%), *professional* (2%) and *clerks* (1%). Females preponderate in *farming activities* (61%) and *elementary occupation* (17%) while males seem to be distributed a sort of proportionately in all activities. Comparative labour force surveys present a mixed picture of marginal changes over time. A sort of increase is indicated in the *elementary occupations, skilled agricultural & fishery workers, professional, technicians & associate professionals* and *plant/machine operators & assemblers* in the same order. Change in the foremost and the lattermost group is more of masculine provenance, second last's and the middle one's is feminine while the 2nd one changes gender equivalently. *Legislators/senior officials & managers, craft related trade workers and clerks* show marginal decline more for males while *service workers/shop & market sale workers* remain at the same level for both genders. Relevant information is given in table-14 (Figure -4). Detail is provided at Statistical Appendix Table-17.

22. *Employees* constitute the largest group (35.8%) followed by *own account workers* (33.3%), *unpaid family workers* (29.7%) and *employers* (1.2%). More female workers are engaged as *unpaid family workers* (65%) compared to male workers (20.2%). Contrarily, more males are *own account workers*, *employees* and *employers*. Marginal changes-decrease in the comparative profiles of *employees* and *own account workers* while increase in the case of *employers* is observed. *Unpaid family workers* also increase (29%, 30%) mainly the share of males. Comparative data are given in table-15. Detail is at Statistical Appendix Table-18.

Employed: Number of Hours Worked During the Week

23. About one in two hundreds (0.5%) of the currently employed persons constitute the group of people who had a job attachment but did not work last week due to certain reasons. On the other end, more than one-fourth (28%) worked 56 hours or more a week. More than eight in ten (84%) worked more than "35 hours a week"– the duration representing full (time related) employment. As for provinces, the proportion of "not worked" ranges from minimum in Sindh to maximum in NWFP with Punjab and Balochistan lying in between, in the same order. As for those worked more the 56 hours a week, Punjab's share is the maximum and NWFP's minimum with Sindh and Balochistan bridging the extremes in the same order. Generally, the profile of comparative surveys is almost similar. Relevant information is given in table-16. Detail is provided at Statistical Appendix Tables-18 to 18.4.

Employed: Informal Sector

24. Informal sector accounts for more than seven-tenth (73%) of the employment in main jobs outside agriculture, more in rural (76%) than in urban areas (71%). On the other hand, formal sector activities are more concentrated in urban areas (29%) as compared to in rural areas (24%). Females in comparison with respective share of males fare more numerous in urban formal and less in rural formal. On the contrary, males are more numerous in urban informal while less in rural informal as compared to respective shares of females. During the comparative periods, formal activities seems to be shrinking while informal unfurling mainly for males. Similar configuration obtains in rural areas while urban areas betoken a sort of enervation in both formal and informal activities. Relevant information is given in table-17. Detail is available at Statistical Appendix Table-20.

Major Industry Divisions: Informal Sector

25. It is instructive to mention that non-agriculture, categorized as formal and informal, is now classified on PISIC 2007 and as such, not readily comparable with that of LFS 2007-08. However, an attempt is made to exclude the most visible impact of classification from the relevant figures for the purpose of comparison; the figures as such are given in the bracket. The largest part (35.2%) goes to *wholesale and retail trade* followed by *manufacturing* (21.5%), *community, social and personal services* (14.9%), *construction* (15.5%) and *transport* (10.9%). The *other* category (comprising of *mining & quarrying*; *electricity, gas & water* and *finance, insurance, real estate & business services),* accounts for two percent. *Manufacturing,* with near three-fifth (57.2%) of females as compared to about one-fifth (17.6%) of males is the most feminine while the *wholesale and retail trade* with near five-tenth (37.8%) of males compared to about one-tenth (8.4%) of females, is the most masculine group. The former trends up while latter remains unchanged. C*ommunity/ social & personal services* decrease, c*onstruction* seems rising while *transport, storage & communication* and *other* category are, more or less, on the same level. Comparative Labour Force Surveys indicate a mixed trend though indication of structural shift is not discernable. Relevant information is given in table-18. Detail may be seen at Statistical Appendix Table-21.

26. About three in ten (30%) are reported as *Craft & related trade workers*, over a quarter (27%) are *Legislator/senior officials & managers* and above one-fifth (21%) are engaged in *elementary (unskilled) occupations*. *Services workers/shop & market sales workers* come fourth (9%) followed by *plant/machine operators & assemblers* (7%), *technicians & associate professionals* (5%) and *professionals* (2%). About six–tenth (58%) of females compared to over three-tenth (27%) of males are engaged in *craft & related trade activities. Technicians and associate professionals* are also female-intensive while males dominate in rest of occupations though, s*killed agriculture & fishery workers* do exhibit gender even composition. *Plant/machine operators & assemblers* and l*egislators/senior officials and managers* are exceptionally male-intensive in the same order. There is mixed scenario of marginal changes during the comparative periods. Main information is given in table-19. Detail may be seen at Statistical Appendix Table-22.

Employment Status: Informal Sector

27. The employment status chiefly consists in the categories of employees (45%) and *own account workers* (41%). The former, with majority of females (52%) and latter, containing better part of males (42%), are opposite in gender composition. About one in ten workers (12%) is reported as *unpaid family workers* and one in thirty three (3%) are comprised of *employers.* Female *unpaid family workers* (18%) are more than one and half of males (11%) while *employers* are predominantly male intensive. As far change in the comparative periods, *own account workers* and *unpaid family workers* indicate a sort of enervation, male led in the former case and female driven in the latter's. *Employees* and *employers* betoken a sort of increase for both genders. Relevant information is given in Table-20. Detail is provided at Statistical Appendix Table-23.

Unemployment Rates: Overall

28. The social security net in Pakistan is far from exhaustive. The distribution of assets is highly skewed and something to fall back on in rainy season is simply not available to most of the populace. Thus, a miniscule minority can afford to remain off the work. Further, employment scene is preponderated by agriculture, and informal activities with low threshold of entry, exit and paraphernalia of requisites. As such, most of the people tend to get engaged into some sort of economic activities irrespective of any considerations regarding size of reward and working age, in order to make both the ends meet. Thus, unemployment rate in Pakistan tends to be estimated lower than perceived.

29. Unemployment rate (5.5%) is higher than that of the previous survey (5.2%). The change owes more to females than males and urban than rural unemployment rates. The relevant figures are presented in Table-21.

Unemployment Rates: Age Specific

30. The comparative age specific unemployment rates of *below forties* (15-39) age intervals as well as, *early fifties* (50-54) and, *beyond sixties,* tend to rise up while that of *forties* (40-49) and *latter fifties* (55-59) age interval seem to on decline. Calculus of age specific rates seems to be determined more by changes in females than males unemployment rates. Relevant data may be seen in Table-22 and figure 5. Detail is given at Statistical Appendix Table-14.

Unemployed: Absolute Figures

31. The volume of unemployed persons increases from 2.69 million in 2007-08 to 2.93 million in 2008-09. Areas and gender wise, the increase is more of urban and female provenance. Volume of unemployed persons increases in Punjab, Sindh and NWFP, more in urban than rural areas while Balochistan's unemployed persons remain at the same level due

to offsetting changes in the area wise number of unemployed. As for gender specific unemployment, the changes in the comparative profile of Punjab and NWFP is more in the case of males while Sindh's of females. Balochistan's gender-specific numbers undergo offsetting changes to remain at the same level.

Underemployment Rates: Time-related

32. Underemployment rates increases from 1.1% in 2007-08 to 1.44% in 2008-09. Gender wise, the increase is beholden more to females than males underemployment. Further rural underemployment rate posts higher increase as compared to urban's. Similarly, change in the area wise underemployment rates owes more to females than males. Given the stagnating scenario of employment, the rise in the underemployment rates seems to signify increasing recourse to any job to help grapple with the rising cost of living. Relevant information is given in Table-24.

Employed: Occupational Safety and Health

33. Questions on occupational safety and health are asked from the employed persons. About one in thirty three (3%) employed persons report some sort of occupational injury/disease in the 12 months preceding the date of enumeration that resulted in the loss of working time or the consultation with a practitioner. The percentage suffered finds male workers more vulnerable (3.1%) relative to female workers (1.1%). Same is the case for rural workers (3.1%) compared to urban workers (1.8%). Vulnerability seems to be rising during the comparative period, more for males than females and, higher in rural than urban areas. Comparative data sets are given in Table-25.

Major Industry Divisions: Occupational Safety and Health

34. Mainly, the sufferers belong to *agriculture* (50.4%), *construction* (14.5%), manufacturing (14%), *wholesale & retail trade* (8.5%) and *transport/storage & communication* (8.1%). Females are about two times (85.9%) as exposed to risk as males (47.1%) in *agriculture*. Contrarily, males versus females are more vulnerable in *manufacturing* (14.3%, 10.2%) and *community/social & personal services* (3.3%, 2.5%). The activities of *construction, wholesale & retail trade* and *transport/storage & communication* are entirely masculine in the composition of sufferers. The comparative risk profiles of *agriculture, manufacturing* and *wholesale & retail trade* deteriorate, *community/ social & personal services* improves while that of *construction* and *transport/storage & communication* remains at the same level approximately. Relevant information is given in table-26. Detail is at Statistical Appendix Table-29.

Major Occupational Groups: Occupational Safety and Health

35. The largest group of the sufferers (44.9%) is found in *skilled agriculture & fishery activities.* Comparative figures of the two surveys indicate deterioration over time more for males than females, though three-fourth (76.1%) of female sufferers belong to this group. The next major groupings are *craft & related trade workers* (22.1%) and *elementary occupations* (19.8%). Risk profile of the former is increasing while the latter's decreasing, more for females than males in either case. As for the masculine groups of *plant/machine operators & assemblers* and l*egislators/senior officials & managers,* the former indicates deterioration while the latter improvement. Relevant information is given in table-27. Detail is provided at Statistical Appendix Table-30.

Employment Status: Occupational Safety and Health

36. About seven out of nine sufferers (77.1%) are either *own account workers* (38.8%) or *employees* (38.3%). In comparison with the respective estimates of the LFS 2007-08 (38.6%, 40.1%), the former group gets a bit riskier due to male sufferers while the latter betokens improvement gender evenly. *Unpaid family worker* (22.7%) indicate deterioration as compared to LFS 2007-08 (20.5%) more due to female than male sufferers. *Employers* do allude to a sort of improvement in their risk profile. Relevant information is given in table-28. Detail is available at Statistical Appendix Table-31.

Types of Treatment Received: Occupational Safety and Health

37. Majority (51%) of the sufferers is reported to have *consulted a doctor* or other medical professionals, one-in-ten (11%) get *hospitalized* and one-fourth (26%) *take time off work*. Vulnerability declines in the 1st while levels off in the 2nd category during the comparative period. This is due to more than offsetting changes in the percentage of male sufferers as compared to that in female sufferers. The last one (i.e took time off work) gets riskier due to male sufferers exclusively though profile of female sufferers do indicate a sort of improvement during the comparative period. In the context of rising incidence of taking time off work, it can be argued that affordability to pursue treatment is decreasing. Males (51%) are more inclined to get doctor's advice compared to females (49%). Similarly, males seem in better position to get *hospitalized* (12%) compared to females (5%). The remaining, more than one-tenth (12%) did not avail themselves of any of the aforementioned options also increase over time which alludes to a sort of increasing marginalization at the workplace. Relevant information is given in Table-29. Detail in available at Statistical Appendix Table-32.

Wages

Major Industry Division: Wages

38. Generally, size of wage seems to higher in tertiary activities followed by secondary and primary assignments. The size of wage also appears to be influenced positively by the element of white-collar ness of an industry/division. The gender differential in wages seems to be influenced by the gender composition of group. Arguably, the nominal wage is trending up during the comparative period. Relevant information is given in Table-30. Detail is available at Statistical Appendix Table-39.

Major Occupation Group: Wages

39. Generally, wages seem to be associated positively with the element of "white-collar ness" in an occupation. The gender differentials in the wages bespeak nexus with the gender

composition of an occupational group. The more a group in masculine, the less it is likely to find females in high paid assignments and thus higher is the average wage of males as compared to that of females. The feminine group of *skilled agriculture & fishery workers* bears this observation out in the contrary perspective. However, the feminine group of *elementary occupations* seems to be an exception though its anomalous position can be explained in term of the greater number of in and out door chores the males are likely to perform as compared to females, in our socio-cultural setting. As for changes during the comparative periods, nominal wages seem to be trending up arguably. Relevant information is given in Table-31. Detail is available at Statistical Appendix Table-40.

FOREWORD

The labour force statistics are pivotal for manpower planning, human resource development and, economic growth. The Federal Bureau of Statistics has been conducting Labour Force Surveys (LFS) since 1963. The Survey report is extensively used by the government, researchers and other stakeholders at large.

The Survey is the 2nd one to provide for quarterly representative results at national, rural/urban level after LFS 2005-06. For this purpose, total sample size is evenly distributed into four sub samples, each to be enumerated in a given quarter. This report presents annual estimates for the reference period 2006-07.

Detailed information on labour force characteristics has been collected from representative sample of 32,778 households to produce gender disaggregated national and provincial level estimates with urban/rural breakup. The Survey, along with the quantification of core variables, also estimates important associated attributes of literacy, migration, occupational safety, etc in accordance with Pakistan Standard Classification of Occupation (PSCO) 1994 revised in the light of International Standard Classification of Occupation (ISCO) 1988.

Effort has been made to produce this report as a comprehensive, informative and useful document for decision-makers, researchers, planners, economists and other beneficiaries at large. The report is based on the methodology reviewed with the technical assistance from ILO Mission of Oct 2006. The suggestions are however, welcome for its further improvement.

SUMMARY OF FINDINGS

The Labour Force Survey (LFS) 2006-07 provides data on (a) age, sex, marital status, literacy, level of education and migration of the population, (b) dimensions of country's labour force, viz (i) employed labour force classified by industry, formal & informal sectors, occupation, employment status, hours worked and level of education, (ii) occupational safety and health information of the employed persons, and (iii) unemployed labour by level of education and previous experience. **Some of the main findings of LFS 2006-07 in comparison with the previous LFS 2005-06 are outlined as under:**

1. Literacy and Employment

1(a) **Literacy rate** improves from 53% in 2005-06 to 55% in 2006-07. This improvement is relatively more for males (i.e. from 65% in 2005-06 to 76% in 2006-07) compared to females (i.e. from 40.6% in 2005-06 to 42.4% in 2006-07). It is also noted that gender and area differentials are narrowing down the comparative period.

1(b) **Participation rates** (31.8%) of 2006-07 are almost at par with that of 2005-06 (32%). Similar trend is also noted for both areas and genders. Augmentation of rates for marginal economic activities, captured through additional probing questions from the persons conventionally out of labour force, presents the same scenario.

1(c) **Employment by Major Industries** indicates share of *agriculture and allied activities* (43.6%) in 2006-07 slightly higher than that of 2005-06 (43.4%). Male employment decreases a bit from 37% in 2005-06 to 36% in 2006-07 while that of females increases by 3% from 69% in 2005-06 to 72% in 2006-07. Comparative figures for non agriculture are close to each other.

1(d) **Employment Status** shows the *employees* on the same level (37.3% in 2005-06 to 37.4% in 2006-07). *Unpaid family workers* increase by some fractions from 26.9% in 2005-06 to 27.3% in 2006-07 due to increase in the share of females. However, respective shares of *employers* and *own account workers* appear to be decreasing marginally from 0.9% & 34.9% in 2005-06 to 0.8% & 34.5% in 2006-07.

1(e) **The Number of Hours Worked** in a week shows over 80% of employed persons have worked more than "35 hours a week"-the duration representing (time related) full employment. 29% of these are reported to have worked "56 hours or more a week" in 2006-07 compared to 30% in 2005-06. The proportions for less than "35 hours a week" are at par in the comparative surveys.

1(f) **Unemployment Rate** decreases from 6.2% in 2005-06 to 5.3% in 2006-07. This declining trend has been noted for both genders and areas.

2. Informal Sector

2(a) **Size of Informal Sector** accounts for 72% of the employment in main jobs outside agriculture sector, more in rural (73%) than urban areas (71%). Contrarily, formal activities are more concentrated in urban (29%) than rural areas (27%). The comparative surveys show marginal decrease from 73% in 2005-06 to 72% in 2006-07.

2(b) **Employment by Major Industry Divisions** assigns largest part (35%) to *wholesale and retail trade* followed by *manufacturing* (20%), *community, social and personal services* (18%), *construction* (15%) and *transport* (11%). The other categories account for less than two percent. Comparative figures indicate a mixed trend, though increases are more frequent than decreases. *Construction* rises for both genders while *wholesale and retail trade* and *services* increase mainly for females. *Manufacturing* and *transport* shows marginal decrease for both genders.

2 (c) **The Employment Status** categorizes majority (45%) as *employees* followed by *own account workers* (42%). About one in ten workers (11%) are reported as *unpaid family workers* and one & a half percent as *employers*. As far changes in the comparative periods, *unpaid family workers* fall by some fractions, *employees* indicate some increase while *own account workers* and *employers* remain on the same level.

3. Occupational Safety & Health

3(a) **Percentage of Employed** reporting some sort of occupational injury/disease in the past twelve months that resulted in working time loss or doctor's consultation, are about one in fifty (2%). Male workers (2.4%) are more vulnerable than female (0.4%). Same is the case for rural (2.2%) in comparison with urban workers (1.6%). Nevertheless, urban females (99.7%) seem to be less vulnerable than rural and urban workers of both genders.

3(b) **Major Industry Divisions** put almost half (41%) of those suffered in *agricultural* sector. *Manufacturing* accounts for about one-sixth (15%), followed by *construction* (14.5%), *community, social and personal services* (11%), *wholesale & retail trade* (9%) and *transport, storage and communication* (8%). The risk profile of *agriculture, construction* and *community, social & personal services* deteriorates whereas that of *manufacturing, wholesale and retail trade* and *transport* improves a bit.

3(c) **Major occupational grouping** finds majority of suffered in *skilled agriculture and fishery activities*(37%) which, in comparison with the figure of previous survey (34%), indicates deterioration over time. Three-fifth of suffered females belongs to this group. Female's vulnerability decreases from 59% in 2005-06 to 57% in 2006-07 whereas that of males increases from 33% in 2005-06 to 36% in 2006-07. *Elementary occupations* (19%) and *craft & related trade activities* (24%) are the next major occupational groups. The former category is getting less, while the latter more, risky for males generally.

3(d) **Employment Status** finds majority (43%) of the suffered in the category of *own account workers* which is a bit higher in comparison with LFS 2005-06 (42%). The second important category is *employees* (42%) followed by *unpaid family workers* (15%). The first one shows improvement for both genders while the second one deteriorates more for females than males.

SECTION-I

METHODOLOGY

Introduction

Federal Bureau of Statistics has been carrying out Labour Force Survey (LFS) since 1963. For this purpose, the questionnaire and methodology of the survey have been undergoing pertinent improvements to keep current with best practices. The survey's questionnaire was revised in 1990 to include probing questions on marginal economic activities, likely to be carried out mostly by women and tend to go unrecorded with conventional questions. The questionnaire was further improved in 1995 to reckon with the size and composition of migration and informal sector. The scope of the survey was extended in 2001-02 to take the stock of occupational safety and health of employed persons. The questionnaire was further articulated for undertaking 1st quarterly LFS 2005-06. The surveys conducted so far are given at Annexure-I.

2. This report presents annual results of LFS 2006-07. The pertinent information has been collected from a sample of 32,778 households, divvied up into four distinct, nationally representative samples, each enumerated in a given quarter.

Objectives

3. The major aim of the survey is to collect a set of comprehensive statistics on the various dimensions of country's civilian labour force. As a means to pave the way for skill development, planning, employment generation, assessing the role and importance of the informal sector and, sizing up the volume, characteristics and contours of employment. The broad objectives of the survey are as follows:

- To collect data on the socio-demographic characteristics of the total population i.e. age, sex, marital status, level of education, current enrolment and migration etc;
- To acquire current information on the dimensions of Pakistan's labour force; i.e. number of persons employed, unemployed, and underemployed or out of labour market;
- To gather descriptive facts on the engagement in major occupational trades and the nature of work undertaken by the institution/organization;
- To profile statistics on employment status of the individuals, i.e. whether they are employers, own account workers, unpaid family workers or paid employees (regular/casual);
- To classify non-agricultural enterprises employing household member(s) as formal and informal;
- To quantify the hours worked at main/subsidiary occupations;
- To provide data on wages and mode of payment for paid employees;

- To quantify occupational health and safety of employed persons by causes, type of injuries/diseases occurred, parts of body injured, type of treatment received and period of absence from work; and

- To collect data on the characteristics of unemployed persons i.e. age, sex, level of education, previous experience if any, occupation, industry, employment status related to previous job, waiting time invested in the quest for work, their availability for work and expectations for future employment.

Reference Period

4. Reference period is week i.e. seven days before the date of enumeration.

Field Operation

5. FBS is the national statistical organization responsible for collection, processing, compilation and dissemination of statistics. It has 34 Regional/Field Offices located all over Pakistan. These offices are equipped and manned with regular and trained field staff for collection of data through censuses/surveys.

6. In order to evolve dynamics of field enumeration in line with the survey's objectives, training is imparted to the concerned staff on interviewing techniques and other procedure to be used in the enumeration. For quality control, supervisors from Regional/Field Offices and headquarter, make frequent field visits to spot-checking the collection process.

Data Processing and Editing

7. Soon after data collection, the supervisors edit, check and clean the filled in questionnaires manually for consistency and completeness and refer back to field where necessary.

8. Editing and coding is done at headquarter by the subject matter section. Computer edit checks are applied to get even with errors identified at the stage of data entry. The relevant numerical techniques are used to eliminate erroneous data resulting from mistakes made during coding. The survey records are further edited and rectified through a series of computer processing stages.

Sampling Plan

9. ***Sampling Frame:*** Federal Bureau of Statistics (FBS) has developed its own sampling frame for urban areas. Each city/town is divided into a number of enumeration blocks. Each enumeration block is based on 200 to 250 households on the average with well-defined boundaries and maps. The list of enumeration blocks as updated through Economic Census 1999-2000 and the list of villages/mouzas/dehs of 1998 Population Census are taken as sampling frame. Enumeration blocks and villages are considered as Primary Sampling Units (PSUs) from urban and rural domains respectively.

Stratification Plan

10. ***Urban Domain:*** Karachi, Lahore, Gujranwala, Faisalabad, Rawalpindi, Multan, Sialkot, Sargodha, Bahawalpur, Hyderabad, Sukkur, Peshawar, Quetta and Islamabad are considered as large cities. Each of these cities constitutes a separate stratum, further sub-stratified according to low, middle and high income groups based on the information collected in respect of each enumeration block at the time of demarcation/ updating of urban area sampling frame.

11. ***Remaining Urban Areas***: After excluding the population of large cities from the population of respective ex-administrative division, the remaining urban population of ex-administrative division from provinces is grouped together to form another stratum called other urban. Thus each ex-division in remaining urban areas in the four provinces constitutes a stratum.

12. ***Rural Domain:*** Each administrative district in the Punjab, Sindh and NWFP is considered an independent stratum whereas in Balochistan, each ex-administrative division constitutes a stratum.

13. ***Universe:*** The universe for Labour Force Survey consists of all urban and rural areas of the four provinces of Pakistan defined as such by 1998 Population Census.

Sample Design

14. ***Procedure:*** A stratified two-stage sample design is adopted for the survey.

15. ***Selection of primary sampling units (PSUs):*** Enumeration blocks in urban domain and mouzas/dehs/villages in rural are taken as Primary Sampling Units (PSUs). In the urban domain, sample PSUs from each ultimate stratum/sub-stratum are selected with probability proportional to size (PPS) method of sampling scheme. In urban domain, the number of households in an enumeration block as updated through Economic Census and village population of 1998 Census for rural domain is considered as measure of size.

16. ***Selection of secondary sampling units (SSUs):*** The listed households of sample PSUs are taken as Secondary Sampling Units (SSUs). A specified number of households i.e. 12 from each urban sample PSU, 16 from rural sample PSU are selected with equal probability using systematic sampling technique with a random start.

17. ***Sample Size and Its Allocation:*** Methodologically, a sample of 32864 households is considered appropriate to provide reliable estimates of key labour force characteristics at National/Provincial level. The entire sample of households (SSUs) is drawn from 2327 Primary Sampling Units (PSUs) out of which 1092 are urban and 1235 are rural. As urban population is more heterogeneous therefore, a higher proportion of sample size is allocated to urban domain. As a means to get reliable estimates, a higher proportion of sample is assigned to NWFP and Balochistan in consideration to their smallness. After fixing the sample size at provincial level, further distribution of sample PSUs to different strata in rural and urban domains in each province is made proportionately. The distribution of sample PSUs and SSUs in the urban and rural domain of the four provinces is as under: -

Reliability of Estimate

18. Notwithstanding complete observance of the requisite codes to ensure reliability of data, co-efficient of variations, computed in the backdrop of 5% margin of error exercised for determining sample size, are also given below to affirm the reliability of estimates.

COEFFICIENT OF VARIATION (CVs) OF IMPORTANT VARIABLES

Household Size	0.4	0.6	0.5	0.5	0.8	1.1	1.3

Method of Data Collection

19. Data are collected by direct interview method. Generally, the head of household is chosen to provide information about all members of the household. In case of his non-availability at the time of interview, some other informed member of the household down the line is interviewed. The total sample for the year is evenly distributed for enumeration on quarterly basis to offset the effect of seasonal variations. The information collected however relates to the week preceding the date of enumeration.

Coverage

20. The survey covers all urban and rural areas of the four provinces of Pakistan defined as such by 1998 Population Census, excluding Federally Administered Tribal Areas (FATA) and military restricted areas. The population of excluded areas constitutes about 2% of the total population.

21. All enumeration Blocks in urban areas and mouzas/dehs/villages in rural areas are enumerated. The number of sample households 32,778 (99.7% of the total sample) enumerated is less than the estimated sample size 32,864 due to non-contact and refusal cases in urban and rural areas.

SECTION-II

CONCEPTS AND DEFINITIONS

A brief explanation of the key concepts and definitions follows.

1. ***Sex Ratio*** is the average number of males per 100 females.

2. ***Literacy rate*** expresses all those persons ten years of age and above who could read and write in any language with understanding, as percentage of the population ten years and above.

3. ***Level of education*** is categorized as follows:

   i) ***Below Matric*** comprises less than ten (10) years of schooling

   ii) ***Matrict but less than intermediate*** encompasses ten (10) to eleven (11) years of education.

   iii) ***Intermediate but less than Degree*** entails twelve (12) to thirteen (13) years of education.

   iv) ***Degree & above*** comprises fourteen (14) or more years of education.

4. ***Household*** constitutes all those persons who usually live together and share their meals. A household may consist of one person or more who may or may not be related to each other.

5. ***Migration*** means the population's movement from one administrative district to another administrative district at any time of their lives and excludes the ones moved within the current district.

6. ***Economically Active Population*** comprises all persons of either sex who provide labour services for the production of goods and services as defined by the United Nation System of National Accounts, during a specific reference period. The production of goods and services includes:

   i) all production and processing of primary products whether for the market, barter or, own consumption,

   ii) the production of all other goods and services for the market,

   iii) the households which produce such goods and services for the market and own consumption, and

   iv) own account construction

7. ***Currently Active Population*** or labour force comprises all persons ten years of age and above who fulfill the requirements for including among employed or unemployed during the reference period i.e. one week preceding the date of interview.

8. ***Crude activity rate*** is the currently active population expressed as a percentage of the total population in Pakistan.

9. ***Refined activity rate*** is the currently active population expressed as a percentage of the population 10 years and above. This rate enables international comparison by factoring in the effect of age composition.

10. ***Augmented activity rate*** is based on probing questions from the persons not included in the conventional measure of labour force, to net-in marginal economic activities viz subsistence agriculture, own construction of one's dwelling etc.

11. ***Employment*** comprises all persons ten years of age and above who worked at least one hour during the reference period and were either "paid employed" or "self employed". Persons employed on permanent/regular footings have not worked for any reason during the reference period are also treated as employed, regardless of the duration of the absence or whether workers continued to receive a salary during the absence. The survey obtains information on the duration of absence as well as on other formal job attachment characteristics of workers in paid and self employment. In line with augmented participation rates, a loose upper bound of employment can be drawn up by including the persons engaged in marginal economic activities.

12. ***Occupation*** refers to the type of work done during the reference period by the persons employed (or the kind of work done previously if unemployed), irrespective of the industry or the status in employment of the person. It provides description of a person's job. Occupation is classified according to the Pakistan Standard Classification of Occupations based on the International Standard Classification of Occupations, ISCO-88.

13. ***Industry*** means the activity of the firm, office establishment or department in which a person is employed or the kind of business, which he/she operates. The activity is defined in terms of the kind of goods produced or services supplied by the unit in which the person works. Industry is classified according to a national classification of industries used for national accounts and developed in 1970 on the basis of the International Standard Industrial Classification, ISIC, rev. 2.

14. ***Self-employment job*** is a job where the remuneration is directly dependent upon the profits, or the potential profits, derived from the goods and services produced.

15. ***Status in Employment*** refers to the type of explicit or implicit contract of employment of the person with other persons or organization. Status of an economically active individual with respect to his employment i.e. whether he/she is an employer, own account worker, employee or unpaid family worker is defined as follows

16. ***Employee*** is a person who works for a public or private employer and receives remuneration in wages, salary, commission, tips, piece rates or pay in kind. Employees are divided into

- *Regular paid employees with fixed wage*
- *Casual paid employee*
- *Paid worker by piece rate or work performed*
- *Paid non-family apprentice*

17. ***Employer*** is a person working during the reference period, on own-account or with one or a few partners at a "self-employment job" with one or more employees engaged on a continuous basis.

18. ***Own account worker*** is a person working during the reference period, on own-account or with one or more partners at a "self-employment job", without any employee engaged on a continuous basis; but, possibly, with one or more contributing family workers or employees engaged on an occasional basis. It includes owner cultivator, share cropper and contract cultivator.

19. ***Unpaid family worker*** is a person who works without pay in cash or in kind on an enterprise operated by a member of his/her household or other related persons.

20. ***Other*** includes member of a producer's cooperative, etc.

21. ***Informal Sector*** in Pakistan is formulated in terms of household enterprise and size of employment. For statistical purpose, the provenance of employment in informal sector is given as follows:

- All household enterprises owned and operated by own-account workers, irrespective of the size of the enterprise (informal own-account enterprises),

- Enterprises owned and operated by employers with less than 10 persons engaged. It includes the owner (s) of the enterprise, the contributing family workers, the employees, whether employed on an occasional or a continuous basis, or as an apprentice, and

- Excluded are all enterprises engaged in agricultural activities or wholly engaged in non-market production.

22. ***Household Enterprise*** or equivalently, an unincorporated enterprise, is a production unit that does not have a separate legal entity independent of the household(s) or household members that own it. It is neither a corporation nor has a complete set of accounts that would permit a clear distinction between the production activities of the enterprise from the other activities of the owner(s) i.e. it is not a quasi-corporation.

23. ***Underemployment (Time-related)*** comprises all employed persons who during the reference period satisfied the following two criteria simultaneously:

i) Worked less than 35 hours per week,

ii) Sought or were available for alternative or additional work.

24. ***Underemployment (Time-related) Rate*** is the time related underemployed population expressed as a percentage of the currently active population.

25. ***Unemployment*** in Pakistan comprises all persons ten years of age and above who during the reference period were:

i) **"Without work"** i.e. were not in paid-employment or self-employment; and

ii) **"Currently available for work"** i.e. were available for paid employment or self-employment: or

iii) **Not currently available** for the following reasons: illness, will take a job within a month, is temporarily laid off, is an apprentice and is not willing to work.

26. ***Unemployment rate*** is the unemployed population expressed as a percentage of the currently active population.

27. ***Multiple job holders*** relates to persons who during the reference period carried out more than one economic activity. The survey obtains information about the occupation, industry, status in employment and informal sector characteristics of secondary jobs.

28. ***Hours actually worked*** relates to the number of hours worked in the main and secondary jobs during the reference period, including any overtime and excluding any absence from work.

29. ***Population not Currently Active*** or "persons not in the labour force" comprises all persons who were not employed or unemployed during the reference period and hence not currently active. They are classified into the following categories:-

a) Attending educational institutions,

b) Engaged in household duties,

c) Retired or old age,

d) Too young to work,

e) Unable to work/handicapped,

f) Agricultural landlord and/or property owner; nature of ownership includes land, commercial/residential buildings, cinemas, hotels, petrol pumps, power looms, etc. (given on rent or lease). They are owners but they do not work for their properties,

g) Others (persons who derive their income solely from royalties, dividends, etc; engaged in immoral pursuits such as prostitutes, beggars, thieves and smugglers etc; voluntary social workers doing work outside the family enterprise, living entirely on charity, etc.)

30. ***Occupational Injury/Disease is*** any personal injury or disease resulting from an occupational accident/ disease which occurs to employed person (s) i.e. an individual occurrence or event arising out of or in the course of work. Some occupational injuries are serious enough to need treatment, either at hospital, or by a doctor, nurse or some other kind of medical professional, and may mean that the injured person is unable to work, or to work normally, for some time, i.e. they have to take time off work. Other injuries may be less serious or incapacitating, so that the injured person may be able to return to work quickly. All such occupational injuries are taken into consideration. An injury should only be considered as an occupational injury, if it was received at the person's work place or in the course of the person's work. Injuries received on the way to or from work are also considered to be occupational accidents. For the purpose of statistics of occupational injuries, the following terms and definitions are used:

a) ***Occupational accident*** is an unexpected and unplanned occurrence, including acts of non-consensual violence arising out of or in connection with work which results in personal injury, disease or death;

b) ***Commuting accident*** is an accident occurring on the habitual route between the place of work and: i) the worker's principal or secondary residence; ii) the place where the worker usually takes his/her meal; iii) the place where he/she usually receive his/her remuneration; or iv) the place where he/she receives training, which results in death or personal injury involving loss of time; travel, transport or road traffic accidents in which workers are injured and which arises out of or in the course of work, i.e. while engaged in an economic activity, or at work, or carrying on the business of the employer.

c) ***Occupational injury*** is any personal injury, disease or death resulting from an occupational accident;

d) ***Case of occupational injury*** is the case of one person incurring an occupational injury as a result of one occupational accident;

e) ***Occupational disease*** is a disease contracted as a result of an exposure to risk factors arising from work activity;

f) ***Incapacity for work*** means inability of the injured person to perform normal duties of work;

g) ***Fatal occupational injury*** is one which leads to death within one year of the day of the occupational accident causing the injury;

h) ***Loss of working time*** means the count of time started from the day of accident to the day prior to the day of return to work measured as calendar days, week days or working days in accordance with the severity of the injury. In the case of recurrent absences due to a single case of occupational injury, each period of absence should be measured and the resulting number of days lost for each period summed to arrive at the total loss of working time for the case of injury. Temporary absence from work of less than one day for medical treatment should not be included in time lost.

31. ***Range of data*** includes, generally, the information about the number of persons employed who suffered an injury or disease in the 12 months prior to the reference period that caused the worker to take time off and/or consult a doctor. In addition, for each injury or disease suffered, it also obtains information about

(i) the act that caused the accident or disease,
(ii) the type of injury or disease suffered
(iii) the time of the accident
(iv) whether the injury or disease was reported to a person responsible
(v) whether time off was taken or treatment was received as a result
(vi) the part of the body that suffered from the injury
(vii) the conditions that caused the accident or injury
(viii) the type of accident
(ix) who paid for the treatment
(x) the time of recovery
(xi) the number of deaths in the past 12 months as a result of an occupational accident or disease by occupation/industry.

32. ***Income from paid employment*** relates to the amount of money earned by persons in paid employment in their main job. The income may be earned in cash or in kind, and is reported net, after deductions for social security contributions and deductions for pensions and income tax. It includes the value in rupees of income in kind as well as quarterly, annual or adhoc bonuses. The information on earnings is recorded per week or month and the information on bonuses is recorded per year, and later converted to a monthly basis. The survey does not obtain information on the income of self employed persons.

33. ***Entitlement to annual leave and sick leave*** relates to the number of days in the year that workers in paid employment are entitled to annual leave and sick leave.

34. The questionnaire adopted for the Survey is given at Annexure-II.

SECTION- III

RESULTS

The Survey's estimates are based on the data of 32,778 sample households enumerated through July 2006 to June 2007. Findings are presented in the form of proportions and percentages to provide for all-purpose employability. The population of Pakistan as per Planning & Development Division's projection is estimated at 158.17 millions on 1st January 2007.

2. A brief account of the survey's main annual estimates in comparison with that of the preceding LFS 2005-06 follows.

Marital Status

3. Marital status is categorized as *never married, married, widowed and divorced*. The composition of marital status does not seem to be changing with the passage of time. Nevertheless, small offsetting changes are indicated in the proportion of *married* and *never married.* Detailed information is given at Statistical Appendix Tables 4 to 4.4.

Table-1
MARITAL STATUS - ***DISTRIBUTION OF POPULATION 10 YEARS OF AGE AND ABOVE***

Marital Status	**2003-04**	**2005-06**	**2006-07**
Never Married	44.4	44.6	44.9
Married	51.0	51.2	50.9
Widowed	4.3	3.9	3.9
Divorced	0.3	0.3	0.3
Total	**100.0**	**100.0**	**100.0**

Sex Ratio

4. Comparative figures for the overall sex ratio of 106 and 105 are close to each other. Area wise, rural are close to overall pattern while urban making a higher trend line. Punjab is more in line with the national trend as compared to other provinces. Migration, being the main factor in determining the size and composition of population, may be viewed to provide explanation in this regard.

Literacy

5. Literacy rates form a rising time series. Overall *literacy rate* (55%) is almost two points higher than that of LFS, 2005-06 (53.1%). The improvement is more for males than females. Similarly, rural literacy improves relatively more than urban during the comparative period. This notwithstanding, rural-urban and male-female disparity seems to be closing over time. Sindh (58%) and Punjab (56%) are more literate as compared to NWFP (49%) and Balochistan (44%) though, inter-provincial gap appears to be narrowing. The pronounced increases in the literacy rates of Balochistan and NWFP can partly be explained in terms of coverage made in the midst of recent population movements resulted by political/socio economic causes. Relevant information is given in table-3.

Level of Education

6. The profile of educational attainment improves particularly in the *below matric* category from 35% in 2005-06 to 36% in 2006-07 which indicates increasing access to basic education. *Post-degree* category is a little bit lower in the currant survey (3.7%) compared to 2005-06 (3.8%). Both genders show improvement, though, males are more educated compared to females. The comparative picture is given in table-4. Detail is available at Statistical Appendix Tables 3 to 3.4.

Labour Force Participation Rates: Crude

7. Crude participation rates of the current survey (31.8%) is a bit lower compared to that of LFS 2005-06 (32%) due to decline in male participation rate (table-5). The decline in urban participation rates is more pronounced relative to rural ones. Provinces are sequenced in descending order as Punjab (35%), Sindh(30%), Balochistan (29%) and NWFP(25%). Figure-1 depicts crude participation rates for Pakistan by sex and area. Detail is presented in Statistical Appendix Tables 11 to 11.4.

8. **Augmentation of the labour participation** for marginal economic activities not captured through conventional questions indicates female participation rates (28.5%) substantially higher than shown by the conventional methodology (13.5%) This raises the overall participation rates significantly from 32% to 39%. Same is the case for provinces as well. Statistical Appendix Tables 12 to12.4 is referred for detail.

Note:- *Conventionally, persons 10+ aged reporting housekeeping and other related activities are considered out of labour force. However, from the perspective of time use, they are identified as employed if they have spent time on a specific set of marginal economic activities. Males augmented activity rates fare insignificantly higher than the standard crude rates are therefore not shown in this table.

APR:- Augmented Participation Rates are based on additional probing questions asked from persons especially females engaged in housekeeping and other related activities.

Labour Force Participation Rates: Refined

9. As expected, refined activity rates follow the pattern of crude participation rates. However, male-female disparity in this case is wider comparatively. Similarly, **augmented rates** are substantially higher than conventional ones. Refined activity rates for Pakistan by province/area are given in table-6. Detail is at Statistical Appendix Tables 11 to 11.4 and 12 to 12.4.

Note:- *Conventionally, persons 10+ aged reporting housekeeping and other related activities are considered out of labour force. However, from the perspective of time use, they are identified as employed if they have spent time on a specific set of marginal economic activities. Males augmented activity rates fare insignificantly higher than the standard refined rates are therefore not shown in this table.

Labour Force Participation Rates: Age Specific

10. Table-7 (and figure 2) presents comparative picture of age specific participation rates (ASPR). As expected, the age intervals between twenties and fifties mark the most productive period of life. The size of gender disparity is considerable in all age intervals. Detailed information is at Statistical Appendix Tables 11 to 11.4.

Labour Force: Absolute Figures

11. The absolute figure of labour force is the multiple of crude participation rate with mid-reference year estimate of the population. The numbers of employed and unemployed persons are the labour force multiplied with their percentages. The labour force increases from 50.05 million in 2005-06 to 50.33 million in 2006-07. The volume of labour force expands in Punjab and Sindh and shrinks in NWFP and Balochistan in the same order. The change in more for rural than urban. Relevant information is given in table-8.

Employed: Absolute Figures

12. The number of employed increases from 46.94 million in 2005-06 to 47.65 million in 2006-07. The change is more pronounced for males as compared to females and rural vis-à-vis urban areas. Province wise, Punjab and Sindh show increase while NWFP and Balochistan indicate decrease in the number of employed persons. The detail is given in table-9.

13. Employment share of *agricultural and allied activities* (43.6%) is slightly higher than that of 2005-06 (43.4%). Male employment decreases by one percentage point from 37.2% in 2005-06 to 36.4% in 2006-07 while that of female increases by about 3% from 69% in 2005-06 to 72% in the current survey. As for non-agricultural employment, the comparative figures are close to each other. Relative information is given in table-10. Detail is at Statistical Appendix Tables 13 to 13.4.

14. Majority (36%) of the total employed in 2006-07 are engaged in *skilled agriculture and fishery workers* followed by *elementary occupations* (18%), *craft & related trades workers* (15%), *legislator, senior officials & managers* (12%), *service works* (6%), *technician*

& associate professionals (5%), *plant & machine operators & assemblers* (4%), *professional* (2%) and *clerks* (1%). More than 75% of the females work in *farming activities* (58%) and *elementary occupation* (18%) while males are distributed proportionately in all activities. Comparative labour force surveys present a mixed picture of marginal rises and falls. *Skilled agricultural & fishery workers, legislators, senior officials & managers* and *service workers and shop & market sale workers* increase in the same order. The rise in the first one is due to females mainly while that of the latter two groups is chiefly on account of males. *Technicians & associate professionals* and *clerks* remains at the same level, *craft and related trade workers* decrease more for females while *elementary occupations* decrease for both genders. Relevant information is given in table-11. Detail is provided at Statistical Appendix Tables 14 to 14.4.

15. Majority (37%) constitutes *employees* followed by *own account workers* (35%), *unpaid family workers* (27%) and *employers* (1%). More female workers are engaged as *unpaid family workers* (62%) compared to male workers (19%). Contrarily, more male workers are engaged in the category of *own account workers*, *employees* and *employers*. *Employers* and *own account workers* show marginal decrease respectively from 0.9% & 34.9% in 2005-06 to 0.8% & 34.5% in 2006-07 while *unpaid family workers* rise from 26.9% in 2005-06 to 27.3% in 2006-07, mainly for females. The employees also increase by a fraction due to males. Comparative data are given in table-12. Detail is at Statistical Appendix Tables-15 to 15.4

Employed: Number of Hours Worked During the Week

16. The profile of comparative surveys is almost similar. Less than 1% of the currently employed persons constitute the group of people who had a job attachment but did not work last week due to certain reasons. On the other end, a large proportion (29%) worked 56 hours or more a week. 15% of the employed persons worked less while over 80% more than "35 hours a week"-the duration representing full (time related) employment. Relevant information is given in table-13. Detail is provided at Statistical Appendix Tables-15 to 15.4.

Employed: Informal Sector

17. Informal sector accounts for 72% of the employment in main jobs outside agriculture. Area wise, percentage of employed in rural areas (73%) is higher as compared to urban areas (71%). Contrarily, formal sector activities are more concentrated in urban areas (29%) as compared to rural areas (27%). However, gender composition of employment is more even in rural than urban areas. The profiles of comparative surveys are similar however, some improvement is also visible. Informal employment decreases from 73% in 2005-06 to 72% in 2006-07 across the gender and area. Relevant information is given in table-14. Detail is available at Statistical Appendix Table-17.

18. The largest part (35%) goes to *wholesale and retail trade*. *Manufacturing* comes second (20%) followed by *community, social and personal services* (18%), *construction* (15%) and *transport* (11%). The other categories including *mining & quarrying*; *electricity, gas & water* and *finance, insurance, real estate & business services* account for less than two percent. Comparative Labour Force Surveys indicate a mixed trend though increases are more in number than decreases. *Construction* rises for both genders whereas *wholesale & retail trade* and, *services* rise mostly for females. *Manufacturing* and *transport* decrease marginally for both genders. Male employment (37%) is peaked in *wholesale and retail trade* while that of females in *manufacturing* (54%). The comparative data do not indicate any structural shift. 19. Majority (30%) are reported as *Craft and related trade workers*, closely a quarter (27%) are *Legislators, senior officials & managers* and about one-fifth (20%) are engaged in *elementary (unskilled) occupations. Services workers, shop and market sales workers* come fourth (10%) followed by *plant & machine operators & assemblers* (7%), *technicians & associate professionals* (4%) and *professionals* (2%). Males are more evenly distributed among activities as compared to females. Among the groups, the peak lies in the *craft & related trade activities* which engage three-fifth (57%) of female workers. *Technicians and associate professionals* are also female-intensive while *professionals* is evenly composed in terms of gender representation. Males dominate in all other occupations, though, *Plant and machine operators & assemblers* and *Legislators, senior officials and managers* are exceptionally male-intensive in the same order. Increase & decreases are evenly balanced during the comparative periods. Main information is given in table-16. Detail may be seen at Statistical Appendix Tables 19 to 19.4.

The former, with majority of females (53%) and latter, containing better part of males (43%), are opposite in gender composition. About one in ten workers (11%) is reported as *unpaid family workers* and one & a half percent as *employers. Unpaid*

family workers comprise two-time more females (20%) than males (10%) while *employers* are considerably high in number of males (1.6%) than females (0.5%). As far change in the comparative periods, *unpaid family workers* decrease from 11.9% in 2005-06 to 11.3% in 2006-07, *employees* gain a point, *employers* (45%) and *own account workers* (42%) remain on same level. Seemingly, unorganized activities tend to give way to organized ones during the referred periods. Relevant information is given in table-17. Detail is provided at Statistical Appendix Table-20.

Unemployment Rates: Overall

21. Unemployment rate decreases from 6.2% in 2005-06 to 5.3% in 2006-07. This declining trend has been noted for both genders and areas. The relevant figures are presented in table-18.

Unemployment Rates: Age Specific

22. Age specific unemployment rates decrease for both genders. However, early teens show rising unemployment, mainly for males from 9% in 2005-06 to 11% in 2006-07. This could partly be explained by male driven decrease in *unpaid family workers*. Relevant data may be seen in table-19 and figure 5. Detail is given at Statistical Appendix Tables 11 to 11.4.

Unemployed: Absolute Figures

23. The volume of unemployed decreases from 3.11 million in 2005-06 to 2.68 million in 2006-07 both areas and gender wise. Provinces follow the national pattern more for male than females.

Underemployment Rates: Time-related

24. Underemployment rates decreases from 1.9% in 2005-06 to 1.5% in 2006-07. As for gender and area are concerned, the decline is more for females and rural comparative to males and urban. Relevant information is given in table-21.

Employed: Occupational Safety and Health

25. Questions on occupational safety and health are asked from the employed persons. About one out of fifty (2%) employed persons reports some sort of occupational injury/disease in the 12 months preceding the date of enumeration that resulted in the loss of working time or the consultation with a practitioner. The percentage suffered finds male workers (2.4%) more vulnerable relative to female workers (0.4%). Same is the case for rural workers (2.2%) compared to urban workers (1.6%). Nevertheless, urban females (99.7%) appear to be more protected in comparison with rural and urban workers of same and opposite sex. Generally, vulnerability seems to be decreasing across the area and gender. Comparative data sets are given in table-22.

Major Industry Divisions: Occupational Safety and Health

26. Almost half (41%) of those suffered from occupational hazards belongs to *agricultural* sector. *Manufacturing* accounts for about one-sixth (15%), followed by *construction* (14.5%), *community, social and personal services* (11%), *wholesale & retail trade* (9%) and *transport, storage and communication* (8%). From the gender perspective, females are more than one and half times (64%) as exposed to risk as males in *agriculture* (40%) and about a half (22%) than males (15%) in *manufacturing*. Contrarily, vulnerability of males (15%) is more than two times higher compared to that of females (6%) in *construction*, three times (9% Vs 3%)) in *wholesale and retail trade* and four times (8% Vs 2%) in *transport, storage & communication*. The risk profile of *agriculture, construction* and *community, social & personal services* deteriorates whereas that of *manufacturing, whole sale and retail trade* and *transport* improves a bit. Relevant information is given in table-23. Detail is at Statistical Appendix Tables 27 to 27.4

Major Occupational Groups: Occupational Safety and Health

27. On the pattern of major industry divisions, majority of suffered (37%) is found in *skilled agriculture and fishery activities.* Comparative figures of the two surveys indicate deterioration over time from 34% in 2005-06 to 37% in 2006-07. Three-fifth of suffered females (57%) belongs to this group. Female's vulnerability decreases from 59% in 2005-06 to 57% in 2006-07 whereas that of males increases from 33% in 2005-06 to 36% in 2006-07. The next major grouping, *elementary occupations* (19%) are getting less risky while opposite is the case with *craft & related trade activities* (24%). The change in the former group is mostly for males while that of latter is of female's origin. Relevant information is given in table-24. Detail is provided at Statistical Appendix Tables 28 to 28.4.

Employment Status: Occupational Safety and Health

28. Majority (43%) of the suffered falls in the category of *own account workers* which is a bit higher in comparison with LFS 2005-06 (42%). It puts question mark on the availability of/access to safety regime at the work place. The second important category is *employees* (42%) followed by *unpaid family workers* (15%). The first one shows improvement for both genders while the second one deteriorates more for females than males. Relevant information is given in table-25. Detail is Statistical Appendix Table 29.

Types of Treatment Received: Occupational Safety and Health

29. Majority (61%) of the suffered is reported to have *consulted a doctor* or other medical professionals, 14% get *hospitalized* and 19% *take time off work*. The 1st two categories decline while the last one (i.e took time off work) rises from 15% in 2005-06 to 19% in 2006-07, more for females than males. Seemingly, affordability to pursue treatment is decreasing. Males (62%) are more inclined to get doctor's advice compared to females (57%). Similarly, males seem in better position to get *hospitalized* (14%) compared to females (10%). The *taking time off work* increases considerably and changes from male to female intensive in composition. The remaining 6% did not avail themselves of any of the aforementioned options also increase over time. Relevant information is given in table-26. Detail in available at Statistical Appendix Table 30.

Parts of Body Injured: Occupational Safety and Health

30. Majority of the workers (29%) report *general injuries* followed by *lower limb* (27%), *upper limb* (26%), *multiple locations* (9%) and *head injuries* (6%). During the comparative periods, the first two categories decline, steeply for female than male. It seems that, the burden of residual tasks lies more on males than females. The incidence of *upper limb* and *multiple locations injuries* are on rise more for females than males. Mercifully, the incidence of *head injury* decreases for both genders. Proportions for trunk and neck injuries also increase slightly. Relevant information is given in table-27. Detail is at Statistical Appendix Table 31.
