## PREFACE

Pakistan Statistical Year Book is published by this office with the objectives of disseminating information useful for policy makers, research workers and the general public on various socio-economic aspects of the country. This year the year book is being published as "50 Years of Pakistan in Statistics" on the occasion of Pakistan's Golden Jubilee celebrations with effect from 14th August, 1997 to 23rd March, 1998.

This publication consists of four volumes Vol-I provides information on achievements and developments in statistical terms during 50 years of Pakistan while Volume-II provides historical data on climates, population, labour, education, health, social & culture whereas Volume-III contains data on National Accounts, Agriculture, Manufacturing, Energy & Mining, Transport & Communication and Development Planning. The Volume-IV provides data on public finance, Money & Banking, Insurance and Joint stock Companies, Cooperatives, Balance of Payments, Foreign Trade, Prices and Foreign Economic Assistance. These Volumes contain data which is collected and processed by Federal Bureau of Statistics and a number of other statistical series whose collection and processing is undertaken by other Federal, Provincial and Semi-government agencies.

It is hoped that this publication will serve the needs of policy makers, research workers, students and other interested groups.

The Federal Bureau of Statistics is grateful to all the agencies for their cooperation in supplying the required data and information well in time.

Suggestions for improvement would be welcome.

**FOREWORD**

Federal Bureau of Statistics has published 50 years of Pakistan in Statistics (1947-97) in four volumes on the occasion of Pakistan's Golden Jubilee Celebrations, to cater the needs of Researchers, Planners, Educationists, etc. and also to serve as a source of reference for other data users.

These volumes cover different periods of time for various sectors. Keeping in view the importance of the publication, in order to make available time series data, it was decided to re-organize these volumes into a complete series from 1947 to 1997 for each sector. This extensive documentation of data in its historical context may therefore serve as a data base for intertemporal, inter and intra sectoral analysis and review of socio-economic performance of the Pakistan Economy.

Suggestions for the improvement of contents and presentation for further issues of this publication would be welcome.
