FOREWORD

The prime essence of the Mouza Census is to update the district wise administrative setup in the country along with the present condition of socio-economic development in the rural areas through collection of rural statistics. The rural statistics provide on the one side, a basis for planning of various projects required for rural development in the country, while on the other side to gauge the progress and results of past plans implemented to improve the living facilities and standards in the rural areas. Therefore, the availability of reliable, comprehensive, and updated data on different socio-economic development indicators, is prerequisite for the formulation and implementation of effective development policies and programmes. The current Mouza Census provides data to fulfill the needs of updating the frame of Mouzas for the next Agricultural Census as well as to monitor and evaluate the ongoing plans for effective supervision and evidence-based decision making for future projects.

The Mouza Census is a regular activity of the Agricultural Census Wing of the Pakistan Bureau of Statistics (PBS). The latest in-hand report for Mouza Census 2020 is a sole document to portray the socio-economic framework available for farming community living in rural areas of the country. Data produced in this report would contribute towards effective policy formulation for the development of rural areas ultimately targeting the growth of the agriculture sector in Pakistan as rural community mostly depends upon agriculture for their livelihood. The current rural statistics available in this report can be used by policymakers, planners, researchers, academia, and the public at large. These data can also be used for ranking various areas, districts, and provinces based on facilities available to the rural community to support future planning.

I am grateful to the Provincial Governments that their various departments provided full support and cooperation to the PBS for data collection in addition to their regular official duties. I must also appreciate the team of PBS for their endeavors and hard work even during the difficult timing of the COVID-19 pandemic and lockdown situation that they made it possible to collect and process the data for Mouza Census 2020.

Dr. Naeem uz Zafar
Chief Statistician

PREFACE

Pakistan has 64 percent rural population related directly or indirectly to agricultural activities. The development of rural infrastructure can facilitate and improve the living standards of rural population ultimately causing the development of the agriculture sector. Therefore, the data concerning the socio-economic development of rural areas is of special interest for decentralized planning, policy formulation, implementation, and examining the infrastructure and services available to the farming community living in rural areas. Keeping in view the importance of rural statistics, the Agricultural Census Wing of the Pakistan Bureau of Statistics (PBS), has been conducting Mouza Censuses since 1971. The in-hand report of Mouza Census 2020 is the 9th in its series.

The Mouza Census initially was started to prepare the list of Mouzas to be used as a sampling frame for sample selection of Mouzas for the Agricultural Census while later on, the same exercise was adopted to collect information about rural statistics. The scope of the Mouza Census was expanded to cover the socio-economic development indicators in rural areas so that the facilities available to the farming community could be assessed. The information about rural infrastructure has been collected through a well-designed questionnaire and all possible facilities have been included in the statistics gathered from each rural Mouza of the country while information about urban Mouzas is not covered in this census.

The data collection was performed by the Provincial Revenue and other departments like Education, Local Government, Agriculture, Forest, and Livestock. All steps of the census were completed even during the peak times of the COVID-19 pandemic and lockdown situation in the country. The provincial reports present data at Tehsil, district, and provincial levels while country reports at provincial and country levels. The data in usable form are aggregated for all districts and Tehsils in a specific province, showing that how many Mouzas have a specific facility. Now the actual challenge is to use the data in true spirit.

At last but not least, I acknowledge the active participation and cooperation of Provincial Governments for the successful execution of this exercise. The services of officers and staff of the Pakistan Bureau of Statistics are appreciated for the timely completion of this gigantic task during the COVID-19 pandemic.

Suggestions for improvement in the report will be warmly appreciated.

Dr. Amjad Javaid Sandhu
Agricultural Census Commissioner

INTRODUCTION

General Statistics (Reorganization) Act 2011, clause 37 empowers the Pakistan Bureau of Statistics (PBS) to conduct Agricultural Census in the country to collect information on land, crops, livestock, poultry, agricultural machinery, irrigation, forestry, and other related indicators. Agricultural Census Wing (defunct Agricultural Census Organization) has been conducting Agricultural Census since 1960. The sample based decennial Agricultural Census was conducted in Pakistan in 1972 for which sampling frame comprising of Mouza lists by administrative units was prepared through first ever Mouza Census 1971. Later on, sampling frames of Mouzas were updated for every agricultural as well as livestock census through quinquennial Mouza Censuses conducted in 1979, 1983, 1988, 1993, 1998, 2003, and 2008. ***The current Mouza Census 2020, is a Golden Jubilee number, being conducted at the 50th year of the first Mouza Census conducted in 1971.*** It has been conducted with the slogan of “***Data for Development***”.

It is pertinent to mention that Mouza Census had been conducted only in settled areas till 1998, while since 2003 its coverage was extended up to the unsettled areas of the country. However, over time, the scope of the Mouza Census could not remain limited to the preparation and updating of Mouza lists for sampling purposes but was expanded to collect information about development indicators at the Mouza level. After 2008, the next Mouza Census was due in 2013 which could not be conducted due to the administrative reasons emerging as a result of the merger of three sister organizations i.e. Agricultural Census Organization (ACO), Federal Bureau of Statistics (FBS), and Population Census Organization (PCO) due to promulgation of the Act 2011. However, in the 7th meeting of PBS Governing Council held on 10th January 2015, it was decided that Agricultural Census will be conducted quinquennially by merging three censuses viz Agricultural, Livestock, and Agricultural Machinery Census. For the merged Agricultural Census, a new sample design along with an updated sampling frame of Mouzas is required.

For the preparation of the next Agricultural Census, Mouza Census is the primary necessity to provide a sampling frame comprising of latest lists of Mouzas along with cultivated area for sample selection of Mouzas as primary sampling units (PSUs) from rural areas. Therefore, PBS Governing Council in 2019 decided to conduct the Mouza Census first as preparatory work for the next Agricultural Census. The ninth Mouza Census 2020 was planned and conducted not only to update the sampling frame of Mouzas but also to produce the rural statistics in the country according to the guidelines of the Food and Agriculture Organization (FAO) of the United Nations provided in the World Census of Agriculture (WCA) Programme 2020. The WCA 2020 recommend to collect community level statistics to know about the facilities available to the farming community in rural areas.

This exercise provides an idea, whether the farming community has access to medical facilities within the Mouza or at some distance, educational facilities for their kids, veterinary health facilities for livestock, roads, transport, electricity, telephone, internet, market, availability of seeds and fertilizer, irrigation facilities, credit facilities, online banking, repair workshop for their machinery, government procurement center, etc., etc. The Mouza Census 2020 also works as a core module as advised by the FAO (WCA 2010) in a modular approach scheme, having information about main indicators at the community level. The core module will be used to select a sample for further studies of agricultural land and crops, livestock, agricultural machinery, poultry, animals slaughtered, milk production, etc. using supplementary modules through sampling techniques. Although it was planned by PBS to conduct the Mouza Census 2020 first as a preparatory step towards the successful conduct of the next Agricultural Census, the sudden outbreak of the COVID-19 pandemic during December 2019 shook the whole world when PBS was ready to go for field operation. However, the commitment of PBS authorities made it possible to complete the enumeration of the current Mouza Census even during the COVID-19 pandemic. The questionnaires (Form-11) were mainly filled by the staffs of Provincial Governments, but the data processing was completed by the technical personnel of Agricultural Census Wing and experts from Data Processing Centre, PBS by adopting the strategy of “work from home” during lockdown times. The information depicted by the census provided a foundation for the comparison of the past with the present for development indicators in rural areas and facilities provided to the farming community living away from urban amenities. These statistics can also be used for future development plans in rural areas at district and even at Tehsil levels so that the farming community could be provided better means to support and boost the agriculture sector. The Mouza Census 2020 has been conducted to fulfill the certain objectives.

OBJECTIVES

The main objectives of Mouza Census 2020 are as follows:

- i) To update the complete list of Mouzas, Dehs, Killis, Basties, and villages by administrative units, to be used as a sampling frame for the next Agricultural Census.
- ii) To generate data on socio-economic development indicators and facilities available at the Mouza level for the farming community by administrative units.
- iii) To provide information about distances of those facilities from the Mouza, which are not available in the Mouza, to assess the difficulties of farming community by administrative units.
- iv) To furnish useful rural statistics for national and international agencies, planners, and policymakers for evidence-based decision making regarding the provision of infrastructure and services, to excel the change in living standards of masses in rural areas.

To meet the objectives of the Mouza Census 2020, PBS covered all the areas of the country so that exhaustive data could be provided to the data users. The details of the geographic coverage are highlighted for the interested readers.

GEOGRAPHIC COVERAGE

Pakistan has settled as well as unsettled areas which have been covered in the current Mouza Census 2020. The settled areas are those which are properly measured and recorded by the provincial revenue departments wherein, Mouza or Deh is the smallest and gross root level revenue state. While unsettled areas are not properly measured by the provincial revenue departments and lands are approximately known and owned though claimed by the local tribes. The village, Killi, Basti, in unsettled areas are commonly known names equivalent to the Mouza or Deh in settled areas of the country. The unsettled districts are North Waziristan, South Waziristan, Kohistan, Lower Kohistan, Kurram, Orakzai, Bajaur, Malakand, Lower Dir, Upper Dir, Lower Chitral, Upper Chitral, Khyber, and Mohmand in Khyber Pakhtunkhwa province, Cholistan in Punjab province including de-excluded areas of D. G. Khan and Rajan Pur districts, while districts of Awaran, Kalat, Khuzdar, Mastung, Gawadar, Kech, Panjgur, Kharan, and Shirani in Balochistan province.

All the settled and unsettled Mouzas, Dehs, villages, Killies, Basties of Khyber Pakhtunkhwa, Punjab, Sindh, Balochistan provinces including Islamabad Capital Territory (ICT) as well as Gilgit Baltistan and Azad State of Jammu & Kashmir have been covered in the present Mouza Census 2020. It is worth mentioning that areas of erstwhile FATA have now been covered in Khyber Pakhtunkhwa province. All the Mouzas, Dehs, Killies have been enumerated irrespective of their status viz rural, urban, partly urban, forest, or unpopulated. However, rural statistics about development indicators relating to populated Mouzas, Dehs, Killies having the status of rural, partly urban, and forest populated, have been presented in tabular form in this publication. The completely urban, forest unpopulated, and Bechiragh (un-inhabited) Mouzas are counted but not tabulated for development indicators considered logically redundant information. However, to decide about the coverage, scope, and methodology, the role of the Advisory Committee cannot be ruled out.

ADVISORY COMMITTEE

The role of the Advisory Committee is very important according to the international practices for such an important and gigantic data collection exercise. The technical guidance was sought from the Advisory Committee constituted for the Mouza Census 2020. The Advisory Committee was comprised of technical and professional experts from Federal and Provincial organizations and departments. The draft questionnaire and methodology of the Mouza Census were presented in the meeting of the Advisory Committee convened at the PBS, Head Quarters, Islamabad during 2019. Both the documents

were updated in the light of comments by the members of the Advisory Committee and used for the census after incorporating the input and suggestions of the participants.

REFERENCE PERIOD

The reference period is the period during which statistical information or data are collected in a census or survey. The reference time for the current Mouza Census was January to March 2020 as all the information was collected from January to March 2020 which is also shown in the time frame. The information regarding cultivated area was retrieved from the provincial revenue record for the year 2019-20 while the rest of the indicators were recorded at the position of enumeration day. Further details of the time frame are provided for interested readers.

TIME FRAME

Planning and preparation require sufficient time to conduct the census efficiently. The work about planning and preparation for this census was performed from June to December 2019. The activities of census field operation were planned to be completed in three phases from January to March 2020. However, retrieval of filled-in questionnaires and auxiliary forms got delayed due to the outbreak of pandemic COVID-19 and completed in July 2020 as per the detail given below:

| Activities | Phase-I | | Phase-II | | Phase-III | |
|----------------------|------------|------------|------------|------------|------------|------------|
| | From | To | From | To | From | To |
| District Meetings | 15.12.2019 | 31.12.2019 | 01.01.2020 | 15.01.2020 | 01.02.2020 | 15.02.2020 |
| Field Operation | 01.01.2020 | 20.01.2020 | 01.02.2020 | 20.02.2020 | 01.03.2020 | 31.03.2020 |
| Documents Collection | 21.01.2020 | 31.01.2020 | 03.03.2020 | 15.06.2020 | 03.04.2020 | 15.07.2020 |

The Mouza Census 2020 was conducted in three phases as follows:

Phase -I

Complete Punjab and Sindh provinces were covered during January 2020. Islamabad was also covered along with Punjab province. The Cholistan was considered a separate district for census purposes.

Phase -II

Hot areas of Khyber Pakhtunkhwa province comprising of 14 districts (Swabi, Mardan, Nowshera, Charsadda, Mohmand, Peshawar, Khyber, Kohat, Hangu, Karak, Bannu, Lakki Marwat, Dera Ismail Khan, and Tank) and hot areas of Balochistan province having 17 districts (Jaffarabad, Dera Bugti, Naseerabad, Jhal Magsi, Sibi, Kachhi at Dhadar, Noshki, Chagai,

Kharan, Washuk, Panjgur, Kech at Turbat, Gawadar, Lasbella, Awaran, Sikandarabad, and Suhbatpur) were covered during February 2020.

Phase -III

Cold areas of Khyber Pakhtunkhwa province, 21 districts (Haripur, Abbottabad, Mansehra, Torghar, Batagram, Lower Kohistan, Upper Kohistan, Kolai-Palas, Shanglapar, Bunner, Swat, Malakand, Lower Dir, Upper Dir, Lower Chitral, Upper Chitral, Aurakzai, Kurram, North Waziristan, South Waziristan, and Bajour) and cold areas of Balochistan province, 16 districts (Quetta, Pishin, Killa Abdullah, Ziarat, Harnai, Mastung, Kalat, Khuzdar, Barkhan, Kohlu, Musa Khel, Loralai, Duki, Killa Saifullah, Zhob, and Sherani) were covered during March 2020.

Gilgit Baltistan and Azad State of Jammu & Kashmir were also covered with cold areas of Pakistan for this census.

QUESTIONNAIRE DESIGNING

There is only one questionnaire (Form-11) used for the Mouza Census which is improved in every census according to the new and latest requirements of the data users and main stakeholders. The guidelines of WCA 2020 provided important points to develop this questionnaire so that data about facilities available to the farming community in rural areas could not be ignored. The requirements of sample design are also considered vigorously to fulfill the primary objective of the census. The questionnaire of last Mouza Census 2008 was sent to the main stakeholders comprised of federal and provincial departments to get their views and comments. In the light of their comments, the questionnaire was improved regarding the development indicators at the Mouza level. The requirements of the sample design for the next Agricultural Census were also taken care of and approximate livestock numbers in the Mouza were included for the first time, while total agricultural land and cultivated area were included just like previous practice. The improved questionnaire along with methodology was presented in the meeting of the Advisory Committee and finalized accordingly. However, the main parts of the questionnaire are produced here, although the questionnaire is annexed at the end of the report.

It is two pages questionnaire considered appropriate to ascertain the required information about one Mouza, Deh, village, Basti, or Killi through nine parts and 56 questions. The questionnaire contained two types of information; one is for sampling frame updating, and the other for facilities available i.e. socio-economic development indicators and their status in a particular Mouza. The distance of any facility from the concerned Mouza is also reported for each indicator, in case of non-availability of that facility within the Mouza. In addition to the identification of the Mouza, information about the status of Mouza, the number of human settlements within the boundaries of the Mouza, total area,

cultivated and uncultivated area, and area under settlement(s) has been collected. Further questions are highlighted here

FACILITIES AVAILABLE IN MOUZA

- i. Important Crops
- ii. Sources of irrigation
- iii. Watercourse improvement scheme
- iv. Modern technology for irrigation
- v. Water table depth
- vi. Housing conditions (Pacca / Kacha)
- vii. Street's condition (Pacca / Kacha)
- viii. Waste management
- ix. Taste of underground water
- x. Sources of drinking water
- xi. Facility of toilet
- xii. Drains and sewerage facilities
- xiii. Playgrounds by gender
- xiv. Number of farms (poultry, livestock/dairy, fish)
- xv. Number of livestock
- xvi. Energy sources other than electricity
- xvii. Availability of fuel sources
- xviii. Condition of the road to Mouza
- xix. Media facilities
- xx. Community grazing area
- xxi. Community forest
- xxii. Faced disaster in last five years
- xxiii. Credit facility
- xxiv. Social organizations by gender
- xxv. Type of industries in Mouza
- xxvi. Sources of employment by gender

FACILITIES AVAILABLE IN MOUZA OR AT A DISTANCE FROM MOUZA

- i. Health facilities
- ii. Educational institutions by gender
- iii. Veterinary health facilities
- iv. Availability of electricity
- v. Bazar (retail shops) in Mouza
- vi. Cold storage for vegetables/fruit
- vii. Government procurement centre for agricultural production
- viii. Repair workshop for agricultural machinery
- ix. Diesel, petrol pump / depot /agency
- x. Transport facility
- xi. CNG / LPG availability
- xii. Cattle, grain & fruit/vegetable markets
- xiii. Agricultural input market (fertilizer /seed /pesticides)
- xiv. Telecommunication facilities
- xv. Internet facility
- xvi. Online commercial banks
- xvii. Dispute resolution mechanism
- xviii. Post office
- xix. Police station

METHODOLOGY

The Mouza Census 2020 was a joint effort of the Pakistan Bureau of Statistics (PBS) and the Provincial Governments. Both the settled and unsettled areas of the country have been covered in this census. The services for field enumeration were borrowed from provincial revenue departments while the Secretaries of the union councils, Local Government also coordinated during the field operation in the settled areas. Likewise, for unsettled areas, the staffs of provincial Education, Livestock, Agriculture Extension, Forest, and Local Government departments were acquired, wherever needed, for the fulfillment of the purpose.

The planning, preparation, questionnaire designing and printing, technical guidance, training to the enumeration staff and supervisors, and provision of census material were the responsibility of the PBS. The names of District, Tehsil, Qanungo Circle, Patwar Circle, and the Mouza/ Deh/ village/ Killi along with their permanent identification codes were recorded during the preparatory phase of the census on

each questionnaire by the Agricultural Census Wing's staff of Pakistan Bureau of Statistics, subsequently arranged by administrative order and accordingly packed in polythene bags. Necessary instructions for filling up the questionnaire were provided to the enumerators through a specially prepared instructions manual. The questionnaires and instructions manuals were printed in Urdu.

A series of consultative meetings were convened to conduct the Mouza Census 2020 successfully. In this regard, a high-level meeting was held on 4th October 2019 headed by the Secretary/Chief Statistician, Ministry of Planning Development and Special Initiatives (PD & SI); with Senior Members of Board of Revenues (SMBRs), the representatives of the Provincial Chief Secretaries of all Provinces as well as Gilgit Baltistan and Azad State of Jammu & Kashmir. The focus of the meeting was to seek the cooperation and coordination of provincial governments to conduct the Mouza Census along with the appointment of focal persons for smooth execution and completion of the census activities. Following that a meeting of all focal persons was conducted under the chair of Member (RM/SS), PBS for orientation regarding the census process and to devise a way forward for field operation. The process and field operation strategy was further communicated to the district and Tehsil management of each province to complete the census field operation in the country. District meetings were arranged by the PBS in every district of the country for the smooth execution of the Mouza Census 2020.

The Divisional Officers of PBS conducted district meetings in their assigned districts with the district administration. Every district meeting was chaired by the relevant Deputy Commissioner and was attended by the Assistant Commissioners, Tehsildars, Saddar Qanungo, Office Qanungos, and representatives of Forest and Local Government Departments. The PBS officers briefed the meeting about the objectives and procedures of the Mouza Census. During the meeting, the assignment of Enumerators was finalized and every Mouza, village, Basti, or Killi within the boundaries of the district was assigned to someone, Patwari or another official, who worked as an enumerator for the census. The training venues, dates, and timings were also mutually decided for each Tehsil in this meeting. After the district meeting, the concerned officers issue orders to the Enumerators and their immediate Supervisors to attend the training and do the enumeration work within their assigned areas.

Meanwhile, PBS also arranged Training of Trainers (ToT) and training of Census Master Trainers (CMT), as the training is considered most important aspect of any census or survey because good training can produce reliable results and faulty training can lead to misleading results. All the officers of AC Wing Lahore were trained first as the ToT phase of the training. These trainers were deputed to impart training to the clusters of PBS staff posted at regional and field offices throughout the country in due course of time at eight different training centres viz Islamabad, Lahore, Multan, Peshawar, Abbottabad, Hyderabad, Sukkur, and Quetta. The officers and officials of PBS were prepared as Census Master Trainers (CMTs) to train the enumerators regarding various concepts used in the Mouza Census for questionnaire filling and other technicalities as well as administrative issues. The trained CMTs from

PBS had delegated the responsibility to impart phase-wise training to the enumerators and supervisors at Tehsil levels within their respective assigned districts.

After the district meeting, the Assistant Commissioner and Tehsildars of each Tehsil called Enumerators at their respective Tehsil headquarters for training purposes as per the program finalized in the district meeting. The required census related material viz instructions manual, census questionnaires (Form-11), press release, kit bags, pens/pencils, control forms (for supply and retrieval), etc. were supplied through the control section of AC Wing, PBS to the respective Divisional Officers of PBS well before the day and time of the training. The Census Master Trainers from PBS imparted one day training to the Enumerators and their immediate Supervisors at each Tehsil. They also handed over blank census documents to the Field Qanungos for onward distribution to the Patwaris of their circles under intimation to the Office Qanungos. After training, the Enumerators were asked to complete the questionnaires in their assigned areas. The CMTs also monitored and checked the process of filling Questionnaire (Form-11) during the field operation and ensured the completeness and retrieval of census documents. There was no house-to-house enumeration but only one questionnaire was filled for one Mouza, Killi, or village. Fifteen days were committed for filling the Questionnaires in a district. The Patwaris completed Form-11 for all Mouzas under their jurisdiction and handed over the filled-in questionnaires to the Field Qanungos who handed over the same to the Office Qanungos of their respective Tehsils. The Office Qanungos again checked the filled-in census questionnaires and passed on the same to the Saddar Qanungo at district headquarters. The Saddar Qanungo verified the documents to ensure completeness before handing over the same to the Divisional Officers of PBS. The Divisional Officers of PBS ultimately deposited filled-in questionnaires and other auxiliary forms at AC Wing, PBS, Lahore. Detail of the number of training centres and trainees is given here.

Total Number of Tehsils, Training Centers and Trainees (Supervisors + Enumerators) of Provincial Governments Engaged in Mouza Census 2020

| Administrative Unit | Number of districts | Number of tehsils / training centres | Number of trainees (supervisors & enumerators) |
|---------------------|---------------------|--------------------------------------|--|
| Khyber Pakhtunkhwa | 35 | 140 | 3,389 |
| Punjab | 38 | 149 | 6,419 |
| Sindh | 25 | 114 | 1,624 |
| Balochistan | 33 | 141 | 693 |
| Grand total | 131 | 544 | 12,125 |

Note: Cholistan is considered as one district in Punjab for census purpose and Islamabad is also included in Punjab for this table. Four districts of Karachi are not covered in Mouza Census being urbanized areas. Two Tehsils of Kech district in Balochistan were not covered due to unavoidable circumstances

DATA PROCESSING

After retrieval of filled-in questionnaires from the field, various steps for data processing were performed carefully. Due emphasis was given at all levels to maintain the accuracy and reliability of the collected data, particularly during data processing. To check and ensure the internal consistency of data within each filled-in questionnaire, manual coding and editing were performed by the technical staff of AC Wing, Lahore according to the instructions prepared for the purpose. After manual editing, the filled-in questionnaires were prepared to enter into the computers at Data Processing Centre.

A special team was constituted from Data Processing Centre (DPC) Lahore and Islamabad to develop software for data entry, online editing, and tabulation generation. The data from filled-in questionnaires were entered into the computers by the staff of DPC Lahore. Due to the COVID-19 pandemic situation, an additional application was also developed on war footings for data entry under the strategy of “work from home” by the DPC team. This strategy proved very useful and data was entered even from home by the staff of DPC during the peak time of COVID-19 and lockdown period. Similarly, another application for online data editing was developed by the DPC team which made it possible to check and edit the data on computers by the staff of AC Wing Lahore rather to adopt the traditional method of getting printouts along with errors codes and manual editing of prints. This strategy also created easement for data processing during the tuff timing of COVID-19. The devotion of the DPC team and technical staff and officers of PBS made it possible to complete the data processing during a critical time of the COVID-19 pandemic in 2020. Finally, the Mouza lists were updated and finalized to be used as the sampling frame for the next Agricultural Census. The information regarding development indicators in the rural populated Mouzas was tabulated in the shape of an already approved standardized tabulation plan for the Mouza Census 2020. The number of Mouzas having each type of facility within each district and even Tehsil have been provided in the tabulations part of provincial report(s). Publications of these tabulations have been arranged according to the standard format.

PUBLICATION OF CENSUS DATA

The entire data have been tabulated for each Tehsil, district, and the province as well as at the country level. These data depict the realistic factual position about the development of the respective administrative unit. The information presented in this report can be used for inter-Tehsil, inter-district, and finally the inter-provincial comparisons.

The outcome of this census is primarily of two types. Foremost is the updated list of Mouzas, Dehs, villages, Killies, and Bastis with some information of basic nature to be subsequently used as sampling frame for upcoming Agricultural Censuses which is not being published. The second outcome of this census relates to the socio-economic facilities available to the residents of rural Mouzas, Dehs, villages,

Killies, and Bastis which have been tabulated at Tehsil, district, province and finally at country levels and published in the following three reports.

1. **Pakistan Report:** It contains aggregated data at the country level which is segregated for each province for all the development indicators. Islamabad has been treated as a separate entity in this report.
2. **Provincial and Regional Reports:** These reports are six in number out of which four are for provinces, one for each province. Every provincial report presents aggregated data of all the census items separately for each district and Tehsil, while collectively for that province. In addition to four provincial reports, two separate regional reports for Gilgit Baltistan and Azad State of Jammu and Kashmir have also been published on the pattern of provincial reports. Islamabad Capital Territory (ICT) has been included in the Punjab report.

CAUTION FOR READERS

- a. The rural populated Mouzas have been tabulated showing facilities available for the rural community living in a particular Tehsil, district, or province. Therefore, tabulations depict the number of Mouzas having any particular facility within a specific administrative area.
- b. Footnotes have been given under the concerned tables, wherever it deemed necessary for further clarification.
- c. The data must be understood keeping in view the particular definition for that item as given in this publication.
- d. The information about distances of the Mouzas from any specific facility not available within the Mouza is based upon the know-how and approximation of the enumerators and respondents.
- e. The data given in this report are the responses of enumerators, local representatives, and Mouza's knowledgeable person(s). Therefore, data reported depends upon their knowledge about particular Mouza, Deh, village, Killi, etc.
- f. To assess a true picture of socio-economic parameters in rural areas, only rural populated Mouzas consisting of rural, partly urban, and populated forest Mouzas have been tabulated. The urban, unpopulated forest, without human settlement (Bechiragh) Mouzas, have been highlighted in the concerned tables only and are not tabulated for development indicators.
- g. In the Sindh province, Taluka stands for Tehsil, Supervisory Tapa for Qanungo Circle, Tappa for Patwar Circle, and Deh for Mouza.
- h. The Mouza Census 2020 could not be conducted in two Tehsils viz Mand and Tump, having 133 unsettled villages of district Turbat of Balochistan due to unavoidable circumstances.
- i. Information about Islamabad Capital Territory (ICT) has been published in the provincial report of Punjab province as well as in the country report.
- j. Cholistan is considered as a district in Punjab province just for Mouza Census 2020.

DEFINITIONS AND CONCEPTS

1. **Mouza or Deh:** It is a demarcated territorial unit for which a separate revenue record including a cadastral map is maintained by the provincial revenue departments. One Mouza / Deh may contain one or more population settlements or may have no settlement (Bechiragh). In settled areas, the whole area of the Mouza is measured and recorded in the revenue records. However, in unsettled areas, the alternate term of Mouza is the village, Killi, or Basti, and the area is not measured and maintained properly by the revenue department.
2. **Bazaar:** It means a street or place or area located within the boundaries of Mouza where at least about 20 shops of different types are trading commodities and services of various types.
3. **Bio Gas:** It is a type of biofuel that is naturally produced from the decomposition of raw materials such as agriculture waste, animal waste, manure, etc.
4. **CNG/LPG:** Means Compressed Natural Gas (CNG) and Liquefied Petroleum Gas (LPG) used as an alternative fuel for vehicles or other alternate energy purposes.
5. **Cold Storage:** The large refrigeration facility to store temporarily the vegetables and fruits within the boundaries of the Mouza.
6. **Credit Facility:** It is meant to cater for the loaning facilities to fulfill the needs of the Mouza's residents from various financial and lending agencies alike Banks, NGOs, Rural Support Programme (RSP), Government, etc.
7. **Depot/ Agency/ Shop:** It covers all the Depots/Agencies/Shops/ Sale points, for retail or wholesale, established for the sale of chemicals, fertilizers, seeds, and/ or any material(s) that is used for plant protection measures or treatment of stored grains, insecticides, pesticides, weedicides, etc.
8. **Diesel/ Petrol Pump:** The source to get Diesel or Petrol in the Mouza.
9. **Drainage and Sewerage System:** It covers all types and designs of "Pacca" drains and sewerage systems in working order in the Mouza.
10. **Drinking Water:** It refers to the water being used for drinking and cooking purposes with or without purifying or improving taste. Availability of drinking water in a Mouza round the year may be from a single source or combination of various sources. Different sources for drinking water are elaborated here.
 - a. **Water Filtration Plant:** Raw water contains undesirable sediments, colour, algae which can produce a taste and smell, and other harmful organisms. The water filtration plant is a designed plant to remove these harmful and undesirable matter

- from the water and to make water fit and safe for drinking through a process.
- b. **Reverse Osmosis (R.O.) Plant:** Reverse osmosis is a water purification process that uses a partially permeable membrane to remove ions, unwanted molecules, and larger particles from drinking water.
 - c. **Tap Water:** To carry water through pipes from the tubewell usually installed by the government or from the water tank to the houses within the Mouza.
 - d. **Private Hand or Electric Pump:** By using a hand pump or electric pump, water is carried out from the earth for drinking and cooking purposes.
11. **Educational Institutions:** These include all public, private, and NGO schools (of any level)/ colleges and technical vocational training institutions and Deeni Madrassas by gender. Private and NGO schools/ colleges/ institutions may belong to a person or a group of persons or an agency/corporate body etc. are also included in this facility.
12. **Electrified Mouza:** A Mouza is termed as electrified wherein electricity is available wholly, partially, or to some extent, to the residents for light and other domestic or commercial usages.
13. **Employment Sources by Gender:** Source to earn livelihood e.g. service, agriculture, trade, industry, self-employment/own business, etc. These are further elaborated here.
- a. **Service:** Means to serve in a private, semi-government, government institution / organization / department / armed forces, etc. to earn a livelihood.
 - b. **Agriculture:** Means to raise crops, rear livestock, or do any other type of farming, part time or full time, or to carry out any agricultural work against any remuneration.
 - c. **Employment Abroad:** This means any type of gainful employment in any foreign country.
 - d. **Self-Employment:** It includes economically beneficial engagements comprising of own business e.g., to drive a rickshaw / taxi, run a tuition centre, practice law, medical practicing, cobbling, pottering, carpentering, doing embroidery, running a beauty parlor, etc.
 - e. **Trade:** It refers to all direct or indirect engagements for buying and/or selling of goods and services e.g. shopkeeping, assisting, and/or doing trade relating to any single or more commodities in piecemeal or bulk like livestock, grains, vegetables, fruits, etc.
 - f. **Labouring:** It relates to any gainful work performed as skilled, semi-skilled, or unskilled labour for any construction activity, loading, unloading, domestic work, etc.
14. **Forest Land:** The forest land within the boundaries of the Mouza is covered mainly with

- trees and plants etc. for the common use of the Mouza residents.
15. **Health Facilities:** It refers to different types and levels of health facilities available to the population of Mouza either through Population Welfare Centre, Basic / Rural Health Centre, NGO Dispensary, Maternity Home, Private Doctor (MBBS), Hospital / Dispensary, Mid Wife, etc. The health facilities covered in the census relate only to the allopathic methods of treatments / cure. Homeopathic, Chinese, ancient Greek, and local / traditional methods of treatments / cure are excluded.
16. **Improved Water Course(s):** Many schemes for improving watercourses, wholly or partially, were launched by the government for efficient use of irrigation water in the country to improve the canal irrigation system. All the watercourses which have undergone improvement under any of such schemes are covered in this census. The data is concerning the Mouzas which have irrigation supplies from canals of any type.
17. **Industry:** It refers to economic activity for processing of raw material, any type of manufacturing or processing of goods, wherein people of the Mouza are directly or indirectly engaged for remuneration. The industrialists themselves are also included in this type of employment. Important industries are highlighted here.
- a. **Cottage Industries:** Any manufacturing or processing unit installed in any part of the house or compound associated with the house and operated by one or more family members. If the unit is operated by the salaried employee(s) then one or more family members must be working at the unit. The compound / part of the house where the unit is installed must also be utilized for other domestic usages.
 - b. **Large Scale Industries:** This means those manufacturing and/or processing units where at least about 250 or more salaried employees work on a full-time and regular basis.
 - c. **Medium Scale Industries:** It relates to the units where the number of full-time, regular, and salaried workers is more than 10 and less than 250.
 - d. **Small Scale Industries:** This means those units where the number of full-time, regular, and salaried workers is less than 10.
18. **Modern Irrigation Sources:** It refers to the source(s) utilizing which the cultivated and cropped area of a Mouza is irrigated partially or wholly. These Modern Irrigation Systems (MIS) save irrigation water as compared with flood irrigation. Two common MISs are briefly explained here.
- a. **Drip System:** It is a method of controlled irrigation in which water is slowly delivered to the root system of multiple plants. It is a method by which plants are irrigated with water supplied through drip and it helps to reduce water wastage by

- evaporation as well as irrigating nonplanted soil. It is usually used in orchards for long-term plants / trees.
- b. **Sprinkler System:** A kind of irrigation system similar to rain that consists of pipes along with a ceiling that contains water under pressure with a source for a constant flow of water. Attached to the pipes, automatic sprinkles water at the selected location(s).
19. **Market:** It means a specified trading place or area relating to buying/selling animals, grains, fruits, vegetables, etc.
20. **Mass Communication (Media):** It covers different means of mass communication available to inhabitants of the Mouza / Deh, i.e. audio, video, and print media.
21. **Natural Disaster:** A natural calamity such as flood, earthquake, storm, disease (locust attack, etc.), drought, and hurricane, etc. that causes great damage or loss of human lives, animals, and crops or physical destruction of land and structure. These are further elaborated here.
- a. **Earthquake:** Sudden shaking of land due to the eruption of magma, jostling of tectonic plates, or due to folding of faulting in the earth crust or due to relocation action.
 - b. **Flood:** An overflow of a large amount of water of a river, canal, dam, Band, etc. beyond its normal limits resultantly cause disaster and displacement of population and destruction of crops, livestock, and infrastructure.
 - c. **Drought:** Shortage of water for a long period due to fewer rains or any other reason for agriculture purpose resultantly dry rivers and other water reservoirs.
22. **Non-Governmental Organizations (NGOs):** There are different types of organizations, not owned by the government, working for the welfare and socio-economic development of the population in rural areas. These organizations are termed differently e.g., NGO, Community Organization (CO) and Citizen Community Board (CCB), etc.
23. **Online Commercial Banking:** All commercial banks either public or private fall under the purview of the census. The online banking facility, if available at the commercial bank located in the respective Mouza, has also been accounted for in the census.
24. **Pacca Streets:** This means those pavements which are made up of cement (lenter), blacktop (charcoal), or soling (bricks).
25. **Pasture:** Land covered with grass and small plants suitable for grazing animals like cattle, buffaloes, sheep, goats, camel, etc.
26. **Play Grounds:** It refers to the playgrounds meant to play any game by either sex. The

ground(s) of a school or college or any other institution located in the Mouza also be considered as a facility for that Mouza. One playground is considered for one game mainly played there.

27. **Police Station/Chowki:** It means a Levies / Police Check Post / Station or Patrolling Check Post at any point of road, highway, or motorway established to maintain law and order situation in the Mouza /Area.
28. **Procurement Centre:** It means any institution or department centre in the Mouza to purchase grains and other agricultural produce from the farmers.
29. **Telephone / Internet:** All types of telephones, cell phones, internet are included under this facility like landline, mobile, wireless, PCO phones/internet, etc.
30. **Transport:** Means any type or form of engine-driven public and/or private vehicle e.g., bus, wagon, rickshaw, etc. Animal-driven vehicles are not included.
31. **Veterinary Facility:** It refers to the availability of veterinary health facilities for the livestock of the Mouza. This facility may be provided by either public or private qualified veterinarian (Doctor/Assistant). Herbal or any other types of veterinary facilities are excluded from the scope of a veterinary facility.

KEY FINDINGS

1. STATISTICS REGARDING MOUZAS

Mouza Census 2020 reveals that there are a total of **49,463** Mouzas in Pakistan comprising of four provinces and Islamabad Capital Territory (ICT) which is Federal Capital, as compared with **52,376** Mouzas in 2008. The reasons for the reduced number of Mouzas are; changes occurred in villages of unsettled areas which are abolished as well as established over time according to seasonal variations and other unavoidable reasons, many big Mouzas in settled areas were bifurcated by the Provincial Revenue Departments for easement of management which were counted as separate Mouzas in past but this time these have been merged and considered as one Mouza after confirmation from the Revenue Department and the GIS Lab of PBS, and villages of two Tehsils from Kech district are not included in the rural statistics as the census could not be conducted there. Now the number of Mouzas have been finalized in the light of the frame of Population Census 2017 to prepare a Master Sampling Frame. This is an implementation step for the devised strategy of Master Sampling Frame in the National Strategy for the Development of Statistics (NSDS 2021-30) by PBS that a Master Sampling Frame of Mouzas has been finalized which will be used for future activities. Details of Mouzas are highlighted in Table 1.1 while rural statistics reported for rural populated Mouzas have been discussed from section 2 onwards.

Table 1.1: - Number of Mouzas with Status in Pakistan

| Census Year | Number of Mouzas | | | | | | |
|--------------------------|------------------|--------------|------------------|--------------------|-------|-------------|--------|
| | Rural | Partly Urban | Forest Populated | Forest Unpopulated | Urban | Unpopulated | Total |
| Mouza Census 2020 | 43,205 | 1,149 | 52 | 170 | 2,400 | 2,487 | 49,463 |
| Mouza Census 2008 | 45,906 | 1,576 | - | 439 | 1,099 | 3,356 | 52,376 |

Table and Figure 1.1 reveal that rural Mouzas are **87 percent** while remaining are either forest, unpopulated, partly urban, or urbanized. The total rural populated Mouzas (rural, partly urban & forest populated) in overall Pakistan are **44,406** i.e., **90 percent**. It is worth noting that the number of Mouzas that are either partly urban, forest, or unpopulated has declined in 2020 while urbanized Mouzas have been increased although the total number of Mouzas have been decreased. It indicates that urbanization may be increasing due to population growth while deforestation may be another reason for these trends. The data indicates that **87 percent** Mouzas are rural in 2020 have a slight decrease from 2008, while **5 percent** are urban which have been increased from **2 percent** in 2008 where policy intervention is required to reduce urbanization in the country.

Figure 1.1: - Percentage of Mouzas with Status

The province-wise break up of Mouzas is given in Table 1.2 which highlights that **94 percent** of Mouzas are rural in Khyber Pakhtunkhwa, **85 percent** in Punjab, **87 percent** in Sindh, and **88 percent** in Balochistan. It indicates that Khyber Pakhtunkhwa has the highest percentage of rural Mouzas while Punjab has the lowest percentage of the same category on Mouzas. These percentages are further elaborated in Figure 1.2 along with the comparison of 2008.

Figure 1.2 uncovers the fact that the percentage of rural Mouzas decreased in Khyber Pakhtunkhwa, Punjab (by including Islamabad), and Sindh from 2008 to 2020 which indicates increased urbanization.

Table 1.2: - Province and Status Wise Number of Mouzas

| Province | Number of Mouzas | | | | | | |
|--------------------|------------------|--------------|------------------|--------------------|-------|-------------|--------|
| | Rural | Partly Urban | Forest Populated | Forest Unpopulated | Urban | Unpopulated | Total |
| Khyber Pakhtunkhwa | 9,200 | 221 | 18 | 2 | 213 | 119 | 9,773 |
| Punjab | 22,508 | 608 | 14 | 117 | 1,371 | 1,844 | 26,462 |
| Sindh | 5,211 | 199 | 18 | 42 | 298 | 208 | 5,976 |
| Balochistan | 6,223 | 100 | 2 | 1 | 415 | 316 | 7,057 |
| Islamabad | 63 | 21 | - | 8 | 103 | - | 195 |

Figure 1.2: - Percentage of Mouzas by Province and Status

It is pertinent to mention here that all tabulations in subsequent sections are based on **44,406** rural populated Mouzas (**rural + partly urban + forest populated**) as the farming community is living in populated Mouzas where policy implications are required for the benefits of the rural population.

2. MAJOR CROPS AND IRRIGATION SOURCES IN RURAL POPULATED MOUZAS

2.1. Important Crops

This section provides information about the number of Mouzas wherein major crops are cultivated in rural areas of Pakistan viz wheat, rice, cotton, sugarcane, and maize. Table 2.1 and Figure 2.1 unfold that out of 44,406 total rural populated Mouzas in 2020, wheat was cultivated by the maximum number of Mouzas i.e., **93 percent** as compared with **92 percent** in 2008. These data supported the fact that wheat is our major food crop and every farmer in every Mouza or village grows wheat, in any case, to fulfill the basic food requirements throughout the year. However, it is pertinent to note that maize for grain is taking place of other main crops like rice, sugarcane, and cotton which is a change observed in the cropping pattern adopted by the farmers as **50 percent** Mouzas reported in 2020 as compared with **46 percent** Mouzas in 2008. There might be a reason that enumerators mixed the concept of maize for grain and fodder as the fodder of maize crop is very popular for animals. Anyhow, rice also remains the important crop in rural areas as **44 percent** of Mouzas reported in 2020 as compared with **41 percent** Mouzas in 2008. Cotton and sugarcane being cash crops are at equal par as reported by **33 to 35 percent** Mouzas in both the Mouza Censuses of 2008 and 2020 respectively.

Table 2.1: Major Crops in Rural Populated Mouzas in Pakistan

| Census Year | Rural Populated Mouzas | Number of Mouzas Reporting | | | | |
|-------------------|------------------------------|----------------------------|--------|--------|-----------|--------|
| | | Wheat | Rice | Cotton | Sugarcane | Maize |
| Mouza Census 2020 | 44,406 | 41,165 | 19,454 | 15,074 | 14,515 | 22,180 |
| Mouza Census 2008 | 47,482 | 43,700 | 19,530 | 15,748 | 17,002 | 22,045 |

Figure 2.1: Percentage of Rural Populated Mouzas Cultivating Major Crops

2.1.1: Major Crops in Rural Populated Mouzas by Provinces

This subsection highlights the major crops reported in how many Mouzas in each province. Table and Figure 2.1.1 uncovers that wheat remains the popular crop in four provinces. It is worth mentioning that

Table 2.1.1: Major Crops by Province

| Province | Rural Populated Mouzas | Number of Mouzas Reporting Crop | | | | |
|--------------------|------------------------------|---------------------------------|--------|--------|-----------|--------|
| | | Wheat | Rice | Cotton | Sugarcane | Maize |
| Khyber Pakhtunkhwa | 9,439 | 7,772 | 1,320 | 66 | 905 | 7,734 |
| Punjab | 23,130 | 22,896 | 15,262 | 10,909 | 11,064 | 12,357 |
| Sindh | 5,428 | 4,738 | 2,473 | 2,995 | 2,415 | 1,289 |
| Balochistan | 6,325 | 5,677 | 399 | 1,104 | 131 | 721 |
| Islamabad | 84 | 82 | - | - | - | 79 |

every Mouza can report every crop therefore, number of Mouzas for each crop could be equal or less than the total number of rural populated Mouzas. It can be seen that **82 percent** of Mouzas are reporting wheat as well as maize in Khyber Pakhtunkhwa province while rice is reported in **14 percent** Mouzas. Punjab has reported wheat in **99 percent** Mouzas, rice in **66 percent**, and maize in **53 percent** Mouzas.

Sugarcane and cotton remained reported in **10 and 01 percent** Mouzas in Khyber Pakhtunkhwa while in **48 and 47 percent** Mouzas in Punjab respectively. Sindh and Balochistan also show a higher percentage of Mouzas reporting wheat crop while cotton in Sindh reported by **55 percent** Mouzas and in Balochistan by **17 percent** Mouzas. Rice, sugarcane, and maize are on the lower side in Sindh and Balochistan provinces as compared with wheat and cotton.

Figure 2.1.1: Percentage of Mouzas Reporting Major Crops by Provinces

2.2. Traditional Irrigation Sources

Table 2.2 shows the number of Mouzas and Figure 2.2 reveals the percentages of Mouzas reporting various sources of irrigation available for cultivation. Tubewell/well is the major source of irrigation through which the majority of rural areas have been cultivated partially or whole in Pakistan. **52 percent** of the Mouzas have reported tubewell / well as source of irrigation followed by canal with **49 percent** in 2020 which is increased as compared with 2008. It is pertinent to note that many canal irrigated Mouzas also use tubewells by mixing both types of water to fulfill the irrigation requirements. However, the

policy implication is required for **28 percent** arid/Barani Mouzas which are on the maximum side after canal and tubewell irrigation at the Pakistan level.

Table 2.2: Number of Rural Populated Mouzas Reporting Various Sources of Irrigation

| Census Year | Number of Mouzas Reporting Irrigation By | | | | | |
|-------------------|--|-------|----------------|---------------|---------------|--------|
| | Canal | River | Tubewell /Well | Spring /Karez | Arid (Barani) | Others |
| Mouza Census 2020 | 21,594 | 1,947 | 23,256 | 2,959 | 12,368 | 6,538 |
| Mouza Census 2008 | 21,660 | 1,790 | 24,077 | 4,125 | 12,459 | 8,204 |

Figure 2.2: Percentage of Mouzas Reporting Major Irrigation Sources in Pakistan

If we look into the provincial break up shown in Table and Figure 2.2.1 for sources of irrigation, the rain-fed Mouzas in Khyber Pakhtunkhwa and Balochistan provinces are **57 and 44 percent** respectively as compared to Punjab and Sindh which are comparatively low in this aspect. Mouzas showing canal and tubewell irrigations are **84 and 21 percent** in Sindh, followed by **63 and 78 percent** in Punjab, **22 and 14 percent** in Khyber Pakhtunkhwa, while **8 and 44 percent** in Balochistan. Balochistan also shows that **18 percent** of Mouzas are benefitting from Karez irrigation. The other sources are relatively less in percentages as compared to these explained here. This elaboration indicates that there is a dire need for irrigation projects for development in the agriculture sector.

Table 2.2.1: Sources of Irrigation in Rural Areas by Province

| Province | Number of Mouzas Reporting | | | | | |
|--------------------|----------------------------|-------|-----------------|----------------|---------------|--------|
| | Canal | River | Tubewell / Well | Spring / Karez | Arid (Barani) | Others |
| Khyber Pakhtunkhwa | 2,105 | 501 | 1,329 | 1,739 | 5,375 | 3,180 |
| Punjab | 14,466 | 988 | 17,979 | 109 | 3,726 | 1,039 |
| Sindh | 4,547 | 375 | 1,164 | - | 388 | 158 |
| Balochistan | 476 | 82 | 2,781 | 1,109 | 2,796 | 2,158 |

Figure 2.2.1: Percentages of Mouzas Reporting Sources of Irrigation by Province

2.3. Modern Irrigation Sources

Two modern irrigation systems are being used by the farming community for irrigation purposes viz drip irrigation and sprinkler irrigation, in Pakistan. It is observed from Table and Figure 2.3 that still the use of modern methods of irrigation in rural areas of Pakistan is minimal or nonexistent. Only **1.44**

percent of rural areas report usage of drip irrigation while **0.26 percent** Mouzas are using sprinkler irrigation system and **1.69 percent** Mouzas are using both systems at Pakistan level, which are the most economical regarding the safety of irrigation water as compared with flood irrigation.

Figure 2.3: Percentage of Mouzas Using Modern Irrigation Sources in Pakistan

Table 2.3: Rural Mouzas Reporting Modern Sources of Irrigation by Province

| Provinces | | Drip | Sprinkler | Both |
|---------------------------|---------|-------------|-------------|-------------|
| Khyber Pakhtunkhwa | Number | 270 | 10 | 280 |
| | Percent | 2.86 | 0.10 | 2.97 |
| Punjab | Number | 333 | 89 | 422 |
| | Percent | 1.43 | 0.38 | 1.82 |
| Sindh | Number | 20 | 8 | 28 |
| | Percent | 0.36 | 0.14 | 0.52 |
| Balochistan | Number | 15 | 7 | 22 |
| | Percent | 0.23 | 0.11 | 0.35 |
| Pakistan | Number | 638 | 114 | 752 |
| | Percent | 1.44 | 0.26 | 1.69 |

Usage of modern irrigation systems has almost the same pattern in provinces. Khyber Pakhtunkhwa reported almost **3 percent** Mouzas are using, Punjab **1.82 percent** followed by Sindh **0.52 percent** and Balochistan **0.35 percent** Mouzas are using these modern irrigation systems.

2.4. Depth of Water Table

It is found from the Table and Figure 2.4 that 13,550 Mouzas fall in the category of 51-100 feet regarding the depth of underground water, followed by 13,257 Mouzas under the category of up to 50 feet, while as the depth of water is going deep the number of reporting Mouzas is decreasing at Pakistan level. However, there are stark differences in provinces, wherein Punjab reported that **38 percent** of Mouzas are reporting each of the first two categories of the water table. Sindh has **56 percent** Mouzas reporting a depth of water table up to 50 feet while **32 percent** Mouzas are reporting water table in the category of 51-100 feet. Khyber Pakhtunkhwa and Balochistan are reporting low percentages in these two categories of the water table, however, as the water table depth is going deep more than 100 feet, the number of Mouzas in Sindh and Punjab are decreasing but the reporting Mouzas are increasing in Khyber Pakhtunkhwa and Balochistan provinces. For water table depth of 251-500 feet, there are **34 percent** Mouzas in Balochistan while for more than 500 feet category, there are **13 percent** Mouzas in Balochistan.

Policy implications are needed to improve the water table so that farmers could install tubewells easily for irrigation purposes. The introduction of new technology to suck out the water from deep areas of Balochistan is also required. Although water table is a natural phenomenon, the construction of water reservoirs can improve the underground water table which could improve the irrigation system to fulfill the basic need of the agriculture sector ultimately benefitting the farming community and country as a whole.

Table 2.4: Number of Mouzas Reporting Depth of Water Table in Pakistan by Province

| Administrative Unit | Number of Mouzas Reporting Depth of Water Table | | | | |
|---------------------|---|---------------|----------------|----------------|------------------|
| | Upto 50 feet | 51 – 100 feet | 101 – 250 feet | 251 – 500 feet | 501 & Above feet |
| Khyber Pakhtunkhwa | 1,165 | 2,163 | 4,159 | 1,605 | 347 |
| Punjab | 8,764 | 8,807 | 4,818 | 719 | 22 |
| Sindh | 3,024 | 1,715 | 511 | 144 | 34 |
| Balochistan | 300 | 842 | 2,069 | 2,150 | 964 |
| Pakistan | 13,257 | 13,550 | 11,602 | 4,630 | 1,367 |

Figure 2.4: Number of Mouzas Reporting Depth of Water Table by Province

3. HOUSING, SANITATION, AND HEALTH FACILITIES

3.1. Types of Housing Structures

Table and Figure 3.1 indicate that still the majority of houses are not made of bricks and shown under semi-pacca construction that is a mixture of bricks and other simple conventional material like mud, bamboos, etc. in rural areas of Pakistan. However, it is a good indicator that mud-made and semi-pacca houses are decreasing and converting to bricked houses. But still, there are 41 and 24 percent Mouzas reporting semi-pacca and mud made houses respectively in 2020 at Pakistan level.

Table 3.1: Type of Hosing Structures in Rural Areas of Pakistan

| Census Year | Number of Mouzas Reporting Housing Structure | | | |
|-------------------|--|----------|------------|--------|
| | Bricked | Mud Made | Semi-Pacca | Others |
| Mouza Census 2020 | 14,801 | 10,680 | 18,377 | 548 |
| Mouza Census 2008 | 8,423 | 13,559 | 24,490 | 560 |

Figure 3.1: Percentage of Rural Mouzas Reporting Housing Structures in Pakistan

When we look into the provincial details as depicted in Table and Figure 3.1.1, it can be observed that the material used for housing structures has wide variations among provinces. The majority of Mouzas reporting housing structures in Punjab are bricked with **59 percent**, while in Sindh and Khyber Pakhtunkhwa majority are Semi Pacca with **75 and 50 percent** respectively. However, in Balochistan majority of the housing structures i.e., **75 percent** are mud made. These data depict the true picture of development in the rural areas of all provinces highlighting the living facilities and standards of the rural population throughout the country that 64 percent of the population is living under what type of houses. The policymakers can assess the requirements of the rural population through these data that how can they improve the living conditions of people living in rural areas.

Table 3.1.1: Rural Mouzas Reporting Types of Housing Structures by Province

| PROVINCE | NUMBER OF MOUZAS REPORTING HOUSING STRUCTURE | | | |
|--------------------|--|----------|------------|--------|
| | Bricked | Mud Made | Semi-Pacca | Others |
| Khyber Pakhtunkhwa | 765 | 3,935 | 4,684 | 55 |
| Punjab | 13,682 | 966 | 8,360 | 122 |
| Sindh | 211 | 1,055 | 4,089 | 73 |
| Balochistan | 70 | 4,723 | 1,234 | 298 |

Figure 3.1.1: Percentage of Rural Mouzas Reporting Housing Structures by Province

3.2. Types of Streets in Rural Areas

Figure 3.2 reveals the number of rural populated Mouzas reporting the situation of their streets. The majority of Mouzas i.e., **54 percent** show kachi or mud streets in Pakistan, **20 percent** bricked or soling, while **17 and 10 percent** are metaled and concrete streets respectively. It is clear from the situation that still more than **50 percent** of streets need improvement for which proper planning is required.

Figure 3.2: Percentage of Rural Populated Mouzas Reporting Types of Streets in Pakistan

This situation is worrisome among provinces as the majority of streets in rural areas are still mud / Kachi and this percentage is highest in Balochistan with **91 percent**, followed by Sindh with **78 percent** and Khyber Pakhtunkhwa with **71 percent**. Punjab has reported the highest percentage of bricked streets with **36 percent** but still, one third of streets are Kachi / mud which requires further development in the rural areas. Table 3.2 and Figure 3.2.1 reveal that policy implication is required for the development of

rural areas throughout the country to prepare neat and clean streets for farming communities living in rural Mouzas.

Table 3.2: Type of Streets in Rural Areas of Provinces

| Province | Number of Mouzas Reporting Streets | | | |
|--------------------|------------------------------------|----------|---------|------------|
| | Metaled | Concrete | Bricked | Mud/ Kachi |
| Khyber Pakhtunkhwa | 1,295 | 1,267 | 136 | 6,741 |
| Punjab | 5,009 | 2,738 | 8,270 | 7,113 |
| Sindh | 701 | 228 | 249 | 4,250 |
| Balochistan | 483 | 71 | 31 | 5,740 |

Figure 3.2.1: Percentage of Rural Populated Mouzas Reporting Types of Streets by Province

3.3. Toilet Facility

It is observed from Table and Figure 3.3 that now majority i.e., **74 percent** of rural Mouzas are reporting toilets inside the house as compared to 2008 where only **42 percent** of Mouzas have a toilet inside the house. It can be analyzed from the data that now people are converting to use the toilet within their houses which might be an impact of government policy to provide toilet parts and to educate the people to use proper toilets. However, there are large variations within provinces, Punjab has the highest percentage of areas with inside toilets, while still, **74 percent** of rural areas in Balochistan do not have

the facility of the toilet inside the house. It also requires policy intervention to improve the rural conditions in this regard.

Table 3.3: Number of Mouzas Reporting Toilet Facility in Pakistan

| Census year | Number of Mouzas Reporting Toilet Facility | |
|-------------------|--|--------------|
| | Inside House | Open Place |
| Mouza Census 2020 | 32,871 (74%) | 11,535 (26%) |
| Mouza Census 2008 | 20,040 (42%) | 27,442 (58%) |

Figure 3.3: Percentage of Rural Mouzas Reporting Toilet Facility by Province

3.4. Sewerage System in Rural Areas

Figure 3.4 shows that the majority of rural areas of Pakistan do not have concrete/paved drains i.e., **59 percent**, and there is no improvement in the situation since 2008. However, the percentage of Mouzas reporting whole Mouza has all drains made with concrete/paved, has been improved from **5 percent to 9 percent** from 2008 to 2020. If we look into the data for sewerage systems in rural Mouzas, the majority of rural Mouzas i.e., **90 percent** is without sewerage system in 2020 which reveals poor condition for this indicator. The sewerage system was reported by **87 percent** of Mouzas in 2008 which has been improved to some extent but overall, nothing has been done as a policy matter in this regard which is obvious from the reported data. Maintenance of sewerage system in Mouzas is a big problem as there is

no municipal committee etc. to maintain the system which might be a reason for no improvement in this indicator.

For provincial situations, Figures 3.4.1 and 3.4.2 depict the percentages of Mouzas reporting concrete/paved drains and percentages of Mouzas reporting sewerage systems respectively. Among Provinces, Balochistan has the highest percentage of rural Mouzas i.e., **96 percent** without concrete/paved drains followed by **78 percent** in Sindh and **72 percent** in Khyber Pakhtunkhwa, while Punjab remains with **36 percent** of Mouzas without this facility.

Figure 3.4.: Percentage of Rural Mouzas Reporting

Drains and Sewerage System

Figure 3.4.1: Percentage of Rural Mouzas Reporting Concrete / Paved Drains by Province

It is pertinent to mention here that the situation is quite alarming concerning the sewerage system in rural Mouzas of provinces, as a majority of rural areas do not have sewerage systems. Balochistan has the highest percentage of rural areas i.e. **98 percent** without the facility of sewerage system followed by Punjab with **90 percent**, Sindh with **89 percent**, and Khyber Pakhtunkhwa with **87 percent** which needs policy implication.

Figure 3.4.2: Percentage of Mouzas Reporting Sewerage System by Province

3.5. Health Facilities

Provision of health facilities for the farming community and others living in rural areas is a very important aspect to support them for the improvement of agriculture as still, **64 percent** population is living in rural areas of Pakistan. Figure 3.5 indicates that overall, **10 to 12 percent** of rural Mouzas have facilities like hospitals/dispensaries, basic health units, and rural health centers, etc.

Figure 3.5: Rural Populated Mouzas With Various Kinds of Health Facilities**Figure 3.5.1: Average Distance in (KM) to Access Health Facilities in Rural Areas of Pakistan**

Figure 3.5.2: Average Distance (KM) From Health Facilities in Rural Areas by Province

It is worth mentioning here that the population of rural areas has to travel long distances to reach the health facilities, as shown in Figure 3.5.1. However, the average distances have been in 2020 reduced as compared with 2008 for each health facility depicted in the figure. On average, the smallest distance is **13 km** to reach BHU and **16 km** to reach RHC and Hospitals/Dispensary, while the largest distance on average is **23 km** to reach NGO dispensary. It reveals that there is an utmost need for health facilities in every Mouza so that the farming community could easily access the Doctor in case of health issues.

The situation varies among provinces as the population of different provinces have health facilities at different distances as depicted in Figure 3.5.2. It is observed that the rural population of Balochistan have the facilities at long distances from their residential Mouzas wherever the facility is not available within the Mouza. For accessing facility of health services at Basic Health Unit, the rural population of Balochistan has to travel on average **31 km**, followed by Khyber Pakhtunkhwa with **15 km**, Sindh with **11 km**, and Punjab with **7 km** only. Similarly accessing health facilities at hospital/dispensary is very

difficult for the rural population as the average distance to reach this facility is reported as **40 km** in Balochistan, **18 km** in Khyber Pakhtunkhwa, **12 km** in Sindh, while in Punjab the average distance to reach the health facility of hospital/dispensary is **9 km**. The situation is quite worrisome for accessing the Mother & Child Health Center at an average distance of **51 km** in Balochistan, **24 km** in Khyber Pakhtunkhwa, **14 km** in Sindh, and **10 km** in Punjab, where the majority of roads are still mud/Kachi. Provision of private facilities like private Doctor or NGO dispensary is also not available in proximity in the majority of rural areas of four provinces, however, the largest average distance is **51 km** for availing private Doctor facility is reported in Balochistan, followed by **22 km** in Khyber Pakhtunkhwa, **12 km** in Sindh and **10 km** for Punjab.

In the light of the above discussion, we can say that there is a need to improve the health facilities in the rural areas of not only one area but throughout the country so that farmers and other villagers can get treatment for any health issue. The rural statistics depict the real picture of facilities available to the rural community. Now planners have to look into these data for policymaking and implementation.

3.6. Taste of Underground Water

The underground water is very important not only for drinking and cooking but also for cultivation as well as animal rearing. To study the taste of underground water in rural areas of Pakistan, Table and Figure 3.6 highlight that the overall taste of underground is sweet in more than **98 percent** of rural Mouzas in Pakistan. However, **96 percent** of rural Mouzas are reporting the sweet taste of underground water in Khyber Pakhtunkhwa, **84 percent** in Balochistan, **82 percent** in Punjab, and **68 percent** in Sindh.

Figure 3.6: Rural Populated Mouzas Reporting Taste of Underground Water in Pakistan

Table 3.6: Rural Populated Mouzas Reporting Taste of Underground Water by Province

| Province | Description | Taste of Underground Water | |
|--------------------|-------------|----------------------------|----------|
| | | Sweet | Brackish |
| Khyber Pakhtunkhwa | Number | 9,050 | 389 |
| | Percent | 96 | 4 |
| Punjab | Number | 18,877 | 4,253 |
| | Percent | 82 | 18 |
| Sindh | Number | 3,695 | 1,733 |
| | Percent | 68 | 32 |
| Balochistan | Number | 5,301 | 1,024 |
| | Percent | 84 | 16 |

4. EDUCATIONAL FACILITIES IN RURAL POPULATED MOUZAS

Educational facilities are also as important as health facilities in this era of science and research advancement. FAO advised collecting rural statistics so that we could assess the facilities available to the farming community living in rural areas of the country and are striving to boost the agriculture sector. For the benefit and welfare of the farmer, other villagers, and above all for the society and the country, it is of utmost necessity to have at least a basic education facility in each Mouza for kids. It is found from Table and Figure 4.1 that majority of rural Mouzas in Pakistan i.e., **78 percent** have boys' primary schools, however, this percentage is substantially lower for girls with only **64 percent**. Moreover, it is pertinent to mention here that almost one-third of areas have the provision of middle schools and this further declined to **16 percent** and **11 percent** for boys and girls respectively regarding high/higher secondary schools.

Figure 4.1: Percentage of Rural Mouzas Reporting Educational Facilities by Gender in Pakistan

Table 4.1: Rural Populated Mouzas Reporting Educational Facilities by Gender by Province

| Province | | Primary School | | Middle School | | High/Higer Secondary school | |
|---------------------------|---------|----------------|--------|---------------|--------|-----------------------------|--------|
| | | Male | Female | Male | Female | Male | Female |
| Khyber Pakhtunkhwa | Number | 6,718 | 5,150 | 3,213 | 2,337 | 1,927 | 1,161 |
| | Percent | 71 | 55 | 34 | 25 | 20 | 12 |
| Punjab | Number | 19,248 | 18,001 | 7,400 | 7,091 | 3,759 | 3,112 |
| | Percent | 83 | 78 | 32 | 31 | 16 | 13 |
| Sindh | Number | 4,919 | 3,308 | 1,699 | 1,120 | 795 | 495 |
| | Percent | 91 | 61 | 31 | 21 | 15 | 9 |
| Balochistan | Number | 3,874 | 2,109 | 1,135 | 668 | 567 | 294 |
| | Percent | 61 | 33 | 18 | 11 | 9 | 5 |

The provincial situation for educational facilities is not up to the mark for primary schools that 100 percent Mouzas should be provided at least primary schools facility. Female schools are everywhere less in numbers while females are approximately half of the population. The high/higher secondary schools are reported by **20 and 12 percent** Mouzas of Khyber Pakhtunkhwa, in **16 and 13 percent** Mouzas of Punjab, in **15 and 9 percent** Mouzas of Sindh, while in **9 and 5 percent** Mouzas of Balochistan province for males and females respectively which is not a good sign for school education as the kids have to travel even for high school education. Therefore, the policy implication is required for educational facilities in rural areas.

5. DIFFERENT FARMS AND VETERINARY FACILITIES IN RURAL AREAS

5.1. Farms in Rural Populated Mouzas

It is noticed that people living in rural areas are also focusing on commercial activities and livestock, poultry, and fish farms have been established in different Mouzas. It is found from Table 5.1 that 7380 Mouzas reported the existence of poultry farms, 2826 Mouzas have livestock/dairy farms, and 2509 Mouzas reported fish farms at the country level. Figure 5.1 tells us that majority of rural areas in Pakistan i.e., **79 percent** do not have any type of farm like poultry, livestock, or fish farm. However, **17 percent** of Mouzas are doing business in poultry farms, followed by livestock/dairy farming in **6 percent** Mouzas, and fish farming also by the same percentage of Mouzas i.e., **6 percent** at Pakistan level.

Table 5.1: Rural Populated Mouzas Reporting Different Farms in Pakistan

| Mouza Census 2020 | Number of Mouzas Reporting | | | |
|-------------------|----------------------------|-------------------------|------------|----------|
| | Poultry Farms | Livestock / Dairy Farms | Fish Farms | No Farms |
| | 7,380 | 2,826 | 2,509 | 34,860 |

Figure 5.1: Percentage of Rural Populated Mouzas Reporting Different Farms in Pakistan

Tables 5.1.1 and 5.1.2 reveal the provincial breakup for all types of farms reported in rural populated Mouzas. There are different trends in provinces according to their topographic conditions. Poultry farms are observed everywhere as a common practice in all the provinces and are more prevalent with the highest in Punjab having **21 percent** and lowest in Balochistan with **3 percent** only. Livestock/dairy farms are second most found farms, the highest in Punjab with **9 percent**. However, Fish farms are highest in Sindh with **11 percent** followed by Punjab with **7 percent** only.

Table 5.1.1: Number of Rural Mouzas Reporting Different Farms by Province

| Province | Number of Mouzas Reporting | | |
|--------------------|----------------------------|-------------------------|------------|
| | Poultry Farms | Livestock / Dairy Farms | Fish Farms |
| Khyber Pakhtunkhwa | 1,145 | 431 | 188 |
| Punjab | 4,932 | 2,070 | 1,720 |
| Sindh | 1,067 | 238 | 574 |
| Balochistan | 204 | 63 | 26 |

Table 5.1.2: Percentages of Rural Mouzas Reporting Farms by Provinces

5.2. Availability of Veterinary Facilities in Rural Areas

The health of animals is as important as the health of human beings as livestock is contributing 60 percent in agriculture part of GDP. Table 5.3, 5.3.1, and Figure 3.1 depict the situation of veterinary facilities reported by the number of rural Mouzas in the country. Availability of veterinary services especially mobile veterinary services has increased considerably in rural Mouzas of Pakistan from **20 percent** in 2008 to **32 percent** in 2020 which is a good indicator.

Table 5.3: Rural Populated Mouzas Reporting Veterinary Facilities in Pakistan

| Census Year | Number of Mouzas Reporting | | |
|--------------------------|----------------------------|--------------------------------|--------------------|
| | Mobile Veterinary Facility | Veterinary Centre / Dispensary | Private Facility |
| Mouza Census 2020 | 14,378 (32%) | 4,261 (10%) | 6,802 (15%) |
| Mouza Census 2008 | 9,292 (20%) | 5,679 (12%) | 8,335 (18%) |

When we see the provincial situation, Balochistan has the lowest availability of veterinary services while Punjab has the highest availability of these services in all forms viz mobile, fixed, and private facilities. Punjab has **47 percent**, followed by Sindh **26 percent**, then Khyber Pakhtunkhwa **19 percent**, and the minimum is **5 percent** in Balochistan, the Mouzas reporting mobile veterinary health facility. Similarly, the other two categories also have approximately the same ranking of provinces.

Table 5.3.1: Rural Mouzas Reporting Veterinary Facilities by Province

| Province | Number of Mouzas Reporting | | |
|--------------------|----------------------------|--------------------------------|------------------|
| | Mobile Veterinary Facility | Veterinary Centre / Dispensary | Private Facility |
| Khyber Pakhtunkhwa | 1,769 | 924 | 1,436 |
| Punjab | 10,847 | 2,461 | 4,290 |
| Sindh | 1,435 | 470 | 782 |
| Balochistan | 309 | 393 | 284 |

Figure 5.3: Percentage of Rural Mouzas Reporting Veterinary Facilities by Province

6. COMMUNITY INFRASTRUCTURE AND SERVICES IN RURAL MOUZAS

Information regarding basic infrastructure and services available in rural populated Mouzas of Pakistan including the availability of electricity, fuel for cooking, roads, modes of communications, information & technology, etc. have been collected at the Mouza level.

6.1. Availability of Electricity

Availability of electricity to all parts of the Mouzas throughout the country has been significantly improved in 2020 as now **50 percent** of Mouzas have electricity in all parts as compared to **35 percent** in 2008 as indicated in Table and Figure 6.1. However, still, **16 percent** of rural Mouzas of Pakistan do not have electricity which needs policy implications.

Table 6.1: Rural Populated Mouzas Reporting Availability of Electricity in Pakistan

| Census Year | Number of Mouzas Reporting Availability of Electricity | | | |
|-------------------|--|--------|-------|-------|
| | All | Mostly | Some | None |
| Mouza Census 2020 | 22,225 | 10,170 | 5,124 | 6,885 |
| Mouza Census 2008 | 16,428 | 13,789 | 8,218 | 9,047 |

Figure 6.1: Percentage of Mouzas Reporting Availability of Electricity

Figure 6.1.1 reveals the provincial situation that Punjab with **65 percent** has the highest percentage of areas where electricity is available in all parts of rural Mouzas, followed by Khyber Pakhtunkhwa with **50 percent** completely electrified Mouzas, then Sindh with **22 percent** and Balochistan with **19 percent** completely electrified Mouzas. However, **50 percent** of rural Mouzas in Balochistan do not have electricity at all followed by **24 percent** in Khyber Pakhtunkhwa. Therefore, policy formulation and implementation are required to provide electricity in those rural areas which are still deprived of this important need of the society.

Figure 6.1.1: Percentage of Rural Mouzas Reporting Availability of Electricity by Province

6.2. Availability of Fuel for Domestic Use

It is important to have information about the usage of fuel for domestic use in rural Mouzas to know about the facilities available to the farming community. Different types of fuels for domestic use at the Mouza level are reported in Table 6.2 and Figures 6.2 and 6.2.1. It is found that the availability of fuel in terms of sui gas is increased from **4 percent** in 2008 to **12 percent** in 2020 and LPG increased from **8 percent** in 2008 to **17 percent** in 2020 which seems a considerable increase in rural Mouzas of Pakistan. However, still, a majority of the Mouzas are without the facility of gas and are using firewood, etc.

Figure 6.2: Percentage of Mouzas Reporting Availability of Fuel for Domestic Use in Pakistan

When we look into the situation of provinces, it is found that the provision of sui gas and LPG in rural Mouzas is still very low. Punjab has the highest percentage of rural areas with the provision of sui gas with **16 percent** and Balochistan has the lowest percentage of Mouzas with the facility of sui gas i.e., **3**

percent only. Availability of LPG is **22 and 23 percent** in Punjab and Sindh respectively, however, **98 percent** of rural Mouzas of Khyber Pakhtunkhwa and Balochistan still do not have the facility of LPG. The use of firewood is at the maximum in all provinces which needs policy implication as the use of firewood is causing deforestation ultimately generating climate issues.

Table 6.2: Availability of Fuel for Domestic Use in Rural Areas by Provinces

| Province | Number of Mouzas Reporting | | | | | |
|--------------------|----------------------------|--------|--------------|-----------|------|-----------|
| | Sui Gas | L.P.G. | Kerosene Oil | Fire Wood | Coal | Dung Cake |
| Khyber Pakhtunkhwa | 760 | 2,046 | 483 | 9,006 | 223 | 3,774 |
| Punjab | 3,741 | 5,380 | 1,544 | 20,883 | 560 | 13,060 |
| Sindh | 805 | 118 | 281 | 5,103 | 233 | 2,437 |
| Balochistan | 192 | 144 | 260 | 6,045 | 301 | 1,913 |

Figure 6.2.1: Percentage of Mouzas Reporting Availability of Fuel for Domestic Use by Province

6.3. Facility of Roads

The road is the most important component of communications in any country and rural areas need roads to access the market for timely marketing of agricultural produce. Rural development is not possible

without roads. Mouza level information about roads is depicted in Table and Figure 6.3 to have an idea about this important indicator of rural development. It is worth mentioning that **63 percent** of rural areas of Pakistan have the facility of metaled roads, however, still **30 percent** of the roads are mud/Kachi which needs policy implication for the development of these rural areas.

Figure 6.3: Percentages of Mouzas Reporting Facility of Roads by Type in Pakistan

Among Provinces, Punjab has the highest percentage of rural areas i.e., **80 percent** with the facility of metaled roads followed by Sindh with **56 percent**. The situation of Balochistan is quite unsatisfactory as still, **65 percent** of rural areas do not have the facility of metaled, concrete, or bricked road followed by Khyber Pakhtunkhwa with **52 percent** mud/Kachi roads.

Table 6.3: Rural Populated Mouzas Reporting Type of Roads by Province

| Province | | Metaled | Cemented | Bricked | Mud/ Kachi |
|--------------------|---------|-----------|-----------|----------|---------------|
| Khyber Pakhtunkhwa | Number | 4,001 | 458 | 89 | 4891 |
| | Percent | 42 | 5 | 1 | 52 |
| Punjab | Number | 18,559 | 684 | 1,406 | 2,481 |
| | Percent | 80 | 3 | 6 | 11 |
| Sindh | Number | 3,054 | 172 | 154 | 2,048 |
| | Percent | 56 | 3 | 3 | 38 |
| Balochistan | Percent | 2,100 | 43 | 76 | 4,103 |
| | Number | 33 | 1 | 1 | 65 |
| Federal Capital | Percent | 71 | 11 | 1 | 1 |
| | Number | 85 | 13 | 1 | 1 |

6.4. Medium of Information

It is found that now the main medium of information in rural areas in Pakistan is television with **71 percent** followed by Radio with **59 percent**, further cable has reached in a significant portion of rural areas with **21 percent** as depicted in Table and Figure 6.4. However, still **9 percent** of rural Mouzas do not have any source of information which needs policy implication.

Table 6.4: Rural Populated Mouzas Reporting Medium of Information in Pakistan

| Census Year | Number Of Mouzas Reporting | | | | |
|-------------------|----------------------------|------------|-------|-----------|-------|
| | Radio | Television | Cable | Newspaper | None |
| Mouza Census 2020 | 25,981 | 31,647 | 9,277 | 8,875 | 3,894 |
| Mouza Census 2008 | 43,032 | 31,927 | 2,420 | 12,953 | 2,266 |

Figure 6.4: Percentage of Mouzas Reporting Medium of Information in Pakistan

There are variations among provinces which are evident from Table and Figure 6.4.1, it is found that television is the highly used source for information in Punjab and Sindh with **90 and 74 percent** respectively, while Radio is a major source of information in Khyber Pakhtunkhwa and Balochistan with **77 and 60 percent** respectively. However, it is noticed with great concern that still **32 percent** of rural

areas in Balochistan do not have the facility of any mode of information followed by **8 percent** in Sindh and **7 percent** in Khyber Pakhtunkhwa.

Table 6.4.1: Rural Mouzas Reporting Medium of Information in Pakistan

| Province | Number of Mouzas Reporting | | | | |
|--------------------|----------------------------|------------|-------|-----------|-------|
| | Radio | Television | Cable | Newspaper | None |
| Khyber Pakhtunkhwa | 7,297 | 5,368 | 550 | 2,069 | 672 |
| Punjab | 11,539 | 20,909 | 8,179 | 4,547 | 714 |
| Sindh | 3,296 | 4,041 | 378 | 1,805 | 458 |
| Balochistan | 3,780 | 1,246 | 111 | 404 | 2,050 |

Figure 6.4.1: Percentage of Mouzas Reporting Medium of Information in Pakistan

32 percent rural areas in Balochistan do not have any medium of information followed by **8** percent in Sindh and **7** percent in Khyber Pakhtunkhwa while 3 percent in Punjab.

6.5. Modes of Communication

6.5.1. Telecommunication Facilities

Telecommunication plays a vital role in communication whether it is fixed-line telephone/PCO or mobile phone. It can be found from Table and Figure 6.5 that from 2008 to 2020, penetration of mobile phones has been considerably increased from **66 percent to 84 percent** in rural areas of Pakistan, resultantly the existence of facilities like PCO has been decreased. Fixed lines penetration is still almost the same at the country level.

Figure 6.5: Mouza Percentages Reporting Availability of Telecommunication Services in Pakistan

Mobile signals are prevailing maximum in the rural areas of four provinces as compared with fixed-line phones and PCO. Provinces have varied levels of mobile signals facility, whereas the majority of rural Mouzas in all provinces have reported the presence of mobile phone signals. It is noted that Punjab has mobile signals in **90 percent** of rural Mouzas which is the highest among provinces, followed by Khyber Pakhtunkhwa with **83 percent**, Sindh with **80 percent**, and Balochistan with the lowest **66 percent** of Mouzas.

Table 6.5: Rural Mouzas Reporting Availability of Telecommunication by Province

| Province | Rural Populated Mouzas | Number of Mouzas Reporting Telecommunication | | |
|--------------------|------------------------|--|-------------|----------------|
| | | Fixed Line | P.C.O. | Mobile Signals |
| Khyber Pakhtunkhwa | 9,439 | 1,977 (21%) | 1,011 (11%) | 7,682 (83%) |
| Punjab | 23,130 | 5,011 (22%) | 3,943 (17%) | 20,861 (90%) |
| Sindh | 5,428 | 367 (7%) | 381 (7%) | 4,337 (80%) |
| Balochistan | 6,325 | 543 (9%) | 347 (5%) | 4,171 (66%) |

6.5.2. Information Communication Technology Facilities

It is observed that internet facility is now widely available in rural Mouzas and its usage is increasing due to the provision of internet services through mobile companies as shown in Figures 6.5.1 and 6.5.2. It is observed that **77 percent** of rural Mouzas have internet facilities through mobile net followed by **19 percent** with cable-net and **17 percent** with the fixed-line net.

Figure 6.5.1: Percentage of Rural Mouzas Reporting Availability of Internet in Pakistan

It is also found that Punjab has the highest percentage of rural areas i.e. **87 percent** with internet facility through mobile net and lowest in Balochistan with **51 percent**. The second medium of internet facility is through cable net with **30 percent** in Punjab and lowest in Balochistan with **5 percent**.

Figure 6.5.2: Percentages of Mouzas Reporting Different Types of Internet facilities by Province

6.6. Accessibility of Wholesale Markets (Mandi) and Agriculture Input Shops

The livelihood of rural areas largely depends upon the crops and livestock directly or indirectly. The availability and easy access to the wholesale markets/Mandi for sale and purchase is necessary for the

development of the agriculture sector as well as the wellbeing of the farmers. It is revealed from Figure 6.6 that wholesale markets are away from the Mouzas on an average distance of almost **30 kilometers** for each type of livestock, grains, and vegetable market.

Figure 6.6: Average Distance in Kilometers of Rural Mouzas from Various Markets in Pakistan

When we look into the provinces in Table 6.6, the largest average distance reported to access the livestock markets is **58 km** and **57 km** for Khyber Pakhtunkhwa and Balochistan respectively. However, it is found that the rural population of Sindh has to travel less as compared to other provinces to access the livestock market with an average distance of **19 km** while in Punjab people have to travel **21 km** on average to reach the market. A similar trend exists for grains and fruits/vegetables wholesale markets, where the population of Balochistan and Khyber Pakhtunkhwa have to travel far more than other provinces.

Table 6.6: Average Distance (KM) of Wholesale Market from the Rural Mouzas by Province

| Province | Average Distance in Kilometers from Markets | | |
|--------------------|---|---------------|----------------------------|
| | Livestock Market | Grains Market | Fruits / Vegetables Market |
| Khyber Pakhtunkhwa | 58 | 50 | 46 |
| Punjab | 21 | 18 | 16 |
| Sindh | 19 | 20 | 21 |
| Balochistan | 57 | 69 | 72 |

Agriculture input shops for seed, fertilizer, and pesticides are highlighted in Figure and Table 6.6.1 to show their availability and average distances in case of nonavailability in the Mouzas. It is observed that the majority of shops for seeds, fertilizers, and pesticides are on the average distance of **22-23 km** from the rural Mouzas in Pakistan. The average distance to avail of these services has been decreased as compared with 2008 which was **26 km** at Pakistan level. Only around **10 percent** of Mouzas have these facilities available within their areas which is slightly improved since 2008.

Figure 6.6.1: Availability and Average Distance of Agriculture Input Shops in Pakistan

| Average Distance | Availability of Facility | Average Distance | Availability of Facility | Average Distance | Availability of Facility |
|------------------|--------------------------|------------------|--------------------------|------------------|--------------------------|
| 23km | 9% | 26km | 9% | 22km | 11% |
| 2020 | 2008 | 2020 | 2008 | 2020 | 2008 |
| | | | | | |
| SEEDS SHOP | | FERTILIZERS SHOP | | PESTICIDES SHOP | |

While analyzing by provinces, it is again found that the rural population of Balochistan has to travel large distances to access the agriculture input services with an average distance of **58 km** followed by Khyber Pakhtunkhwa with an average traveling distance of **29 km**. In Punjab and Sindh, the average distances to reach these services are comparatively smaller. This is also a depiction of different terrains and the population concentration of all four provinces.

Table 6.6.1: Average Distance of Agriculture Input Shops from the Rural Mouzas by Province

| Province | Average Distance in Kilometers | | |
|--------------------|--------------------------------|------------------|-----------------|
| | Seeds Shop | Fertilizers Shop | Pesticides Shop |
| Khyber Pakhtunkhwa | 32 | 28 | 32 |
| Punjab | 10 | 10 | 10 |
| Sindh | 15 | 14 | 15 |
| Balochistan | 60 | 58 | 57 |

7. NATURAL DISASTERS IN RURAL POPULATED MOUZAS

Natural disasters badly affect the livelihood of people in general but are more devastating for rural population due to major dependence on agriculture and livestock activities. It is uncovered in Table 7.1 and Figures 7.1 and 7.2 that **74 percent** of rural Mouzas were not affected by any major natural disaster in the last five years. However, among the Mouzas which faced any disaster, the highest percentage is of drought with **14 percent** followed by flood with **8 percent**, and earthquake with **5 percent** within the last five years. The category of others, includes locust attack, any serious and prevailed disease for livestock and crops, any disease for human beings like COVID-19 pandemic, etc.

Figure 7.1: Number and Percentages of Mouzas Reporting Natural Disasters in Pakistan

However, within provinces, the situation varies and it is observed that rural Mouzas of Balochistan and Sindh has most affected by droughts with **58 percent** and **17 percent** of Mouzas respectively followed by rural areas of Khyber Pakhtunkhwa with **12 percent** Mouzas. In terms of floods, again rural Mouzas of Balochistan have been affected severely in the last five years with **14 percent** followed by Khyber Pakhtunkhwa with **11 percent** of Mouzas. However, natural disaster in terms of an earthquake is mainly faced by the rural population of Khyber Pakhtunkhwa with **20 percent** Mouzas followed by **4 percent** rural Mouzas affected in Balochistan. Here again, the topography of the provinces seems to make an impact. Rural areas of Punjab are the least affected by any natural disasters in the last five years.

Table 7.1: Number of Rural Populated Mouzas Reporting Natural Disasters by Province

| Province | Number Of Mouzas Reporting | | | | |
|--------------------|----------------------------|-------|------------|--------|--------|
| | Drought | Flood | Earthquake | Others | None |
| Khyber Pakhtunkhwa | 1,172 | 1,077 | 1,880 | 495 | 6,004 |
| Punjab | 532 | 1,172 | 74 | 683 | 20,790 |
| Sindh | 942 | 311 | 35 | 239 | 4,050 |
| Balochistan | 3,694 | 867 | 237 | 663 | 2,000 |

Figure 7.2: Percentages of Mouzas Reporting Natural Disasters by Province

8. INSTITUTIONS, BANKS, AND SOURCES OF CREDIT FOR RURAL MOUZAS

Availability of loans/credits to the farmers for efficient farming and livestock activities is necessary for the wellbeing of the rural population and the growth of the economy. Table 8.1 and Figures 8.1 and 8.2 provide the factual position of these facilities available in the rural Mouzas. The majority of rural Mouzas of Pakistan are availing services of Zari Tarqiati Bank Limited (ZTBL) with **58 percent**, the second most available source is commercial banks with **26 percent**. However, almost **47 percent** of rural Mouzas also avail other sources like NGOs, rural support programs, etc.

Figure 8.1: Percentage of Rural Mouzas Reporting Availability of Credit Sources in Pakistan

The trend is almost the same in all provinces except Balochistan, as in Balochistan the main source is “others” with **58 percent** followed by ZTBL with **28 percent**. While other provinces have maximum availability of ZTBL, and commercial banks, however, dominating facility for these provinces is also “others”. There is a need for policy implication to streamline the credit facilities for the farmers so that the farming community could access the credit easily particularly at the time of sowing of crops.

Table 8.1: Number of Rural Mouzas Reporting Availability of Credit Sources by Province

| Province | Number of Mouzas Reporting Credit Sources | | | | | |
|--------------------|---|------------------|-----------------|--------------------|--------------------------|--------|
| | ZTBL | Cooperative Bank | Commercial Bank | Micro Finance Bank | Commission Agent / Arthi | Others |
| Khyber Pakhtunkhwa | 3,345 | 118 | 1,027 | 157 | 870 | 5,570 |
| Punjab | 16,989 | 5,753 | 8,832 | 3,526 | 7,290 | 9,418 |
| Sindh | 3,612 | 206 | 1,317 | 891 | 1,157 | 2,076 |
| Balochistan | 1,790 | 9 | 96 | 86 | 1,315 | 3,649 |

Figure 8.2: Percentages of Rural Mouzas Reporting Availability of Credit Sources by Province

9. INDUSTRIES IN RURAL POPULATED MOUZAS

It is observed that the majority of rural Mouzas i.e., **92 percent** in Pakistan are devoid of any type of industry which is not a good sign for the development of rural areas and needs policy implication in this. Table 9.1 also reveals that large scale and medium scale industries are reported by minimum rural Mouzas, however, there is some concentration of small scale and cottage industries with approximately **4 percent** each. Among Provinces, rural areas of Sindh and Punjab have the highest prevalence of small industries with near about **5 percent** each. Rural areas of Sindh also have the highest concentration of cottage industries with about **6 percent** followed by **5 percent** in Khyber Pakhtunkhwa. Rural areas of Punjab have the highest concentration of medium-scale industries with more than **1 percent** Mouza as compared to other provinces, however, is not an encouraging sign in this regard. Therefore, policy formulation and implementation are required to boost up the industrial atmosphere in rural areas of the countries.

Table 9.1: - Number and Percentages of Mouzas Reporting Industries

| Administrative unit | | Large Scale | Medium Scale | Small Scale | Cottage | None |
|---------------------|---------|-------------|--------------|-------------|-------------|--------------|
| Khyber Pakhtunkhwa | Number | 32 | 66 | 302 | 446 | 8,631 |
| | Percent | 0.3 | 0.7 | 3.2 | 4.7 | 91.4 |
| Punjab | Number | 243 | 451 | 1,057 | 665 | 21,062 |
| | Percent | 1.1 | 1.9 | 4.6 | 2.9 | 91.1 |
