2010-11	2846	3747	1595	2139	2833

N.B: Area of wheat crop for the year 2010-11 shows a decrease of 2.53% over the previous year. Area decreased due to problems faced by the farmers in disposal of wheat produced last year, shifting of area to cotton & sugarcane crops in irrigated tract, late crushing by sugarmills and considerable increase in Potato (Autumn) crop. The production shows an increase of 8.16% over the last year, which is attributed to sowing in appropriate time and available moisture in barani tract, better weather conditions, recommended doze of inputs and use of high yielding varieties.
