PAKISTAN BUREAU OF STATISTICS
Islamabad

FOREWORD

Islamabad, January, 2023

Pakistan Bureau of Statistics (PBS) is responsible to collect and compile the socio and economic statistics of the country which plays a vital role in data driven policies of the country. It publishes a variety of reports, based on primary and secondary data, especially on economics and social aspects of the country. PBS has made commendable efforts to improve and update statistical methodology in general and trade statistics in particular.

Broad Economic Categories (BEC) aims to analyse international trade statistics by economic classes of goods and services, based on the main outputs of corresponding industries, to facilitate interactive analyses of trade and production. It is used to identify end-use dimensions as per SNA2008 such as intermediate consumption, gross fixed capital formation and final consumption. It is also used to facilitate broad analyses of import items and trade services and therefore refers to products rather than goods. It also identifies end-use as a separate dimension.

The fifth revision of the BEC (BEC Rev.5) is the outcome of a review process that spanned over several years and resulted in a structure which is more detailed and more logical than the previous version. It responds to the need for more relevant economic categories, and more clearly distinguishes the end-use of products. BEC Rev-5 also includes categories such as “Mining and Energy”, “Construction and Housing”, “Textile and Footwear”, “Information and Communication” and “Health and Education”.

Effort has been made to make this report comprehensive, informative and a useful document for researchers, planners, economists and other beneficiaries at large. Further questions, clarifications, comments, feedback and suggestions on this report are welcomed.

I would like to congratulate the PBS Trade Statistics team who worked with full dedication for the successful completion of this important task.

DR. NAEEM UZ ZAFAR
Chief Statistician, PBS

Annex-4 Structure of the BEC Rev.5	167

Trade statistics helps the government to formulate the policies for improving the trade balance. Economic category of imports is the major component in such policies. During last five years Pakistan is facing huge trade deficit. Our imports accelerated significantly but increase in export remained on the lower side. Textile has been major component of exports and is less diversified in the region.¹ However a huge import of intermediate goods is observed.

This document is about shifting the basis of economic categories from BEC-Rev-4 to BEC-Rev-5 which is more comprehensive as compared to earlier version and will serve the end use with more details. The Broad Economic Category Rev-5 actually presents a high level of aggregation of product category which is based on the detailed commodity classifications in the Standard International Trade Classification (SITC), the Harmonized Commodity and Coding System (HS) and the Central Product Classification (CPC). The First revision was launched in 1976 that conformed the BEC to changes in SITC Revision 2. The second was in 1984 that confirmed the BEC to changes in SITC Revision 3. The Third revision was in 1986 that corrected some oversights in Revision 4. The fourth revision was in 2002 that provided more details of commodities description by taking into account the 2002 edition of the HS classification.

The new structure of BEC clearly defined the end-use within each of the broad categories. Capital formation, intermediate consumption and consumer goods can be clearly identified within economic categories. Defining the broad economic category on the basis of underlying products instead of mixing with end use category provide greater international comparability because products included in a given economic category is concordance with classifications agreed by the members of global community i.e. Harmonized coding (HS) for goods and Central Product Classification (CPC) for services.

BEC Rev-5 also gives detail description about the dual use of the products. They could be exchanged and could be used for various purposes as inputs in the production and as a final consumption. It also defines the specification of the dimension of a good that could be a generic which is consumed across a wide range of industries or could be specified which is consumed only in certain industries.

Dissemination of external trade data classified on the Harmonized Commodity and Coding System (HS) with BEC-5 end-use categories will be meaningful within the framework of the National Accounts. BEC Rev-5 will be helpful in developing policies for industrial growth of Pakistan. In this report the following main features are highlighted.

- This report is of its first kind in the history of trade statistics compilation of Pakistan Bureau of Statistics.
- Economic Category of imports are updated as per United Nations Statistics Division (UNSD) standards.
- Broad Economic Category (BEC-5) which is in detailed commodity classifications, Standard International Trade Classification (SITC), the Harmonized Commodity and Coding System (HS) and the Central Product Classification (CPC) will help in policy making for industrial growth of the country.

¹ <https://www.adb.org/sites/default/files/publication/768386/pakistan-economy-trade-global-value-chains.pdf>

- This report will be a useful document for industrial community of the country concerning the trade policies connected to industrial growth.
- Earlier some of imports items which were classified as capital goods in BEC 4 are shifted to Intermediate Consumption (IC) in BEC 5.
- In historical prospective intermediate goods share is almost 52-56%, which shows the import behavior of the industrial sector.
- A huge demand of intermediate goods is generated, which designate Pakistan as an emerging economy with growing economic activities

1. INTRODUCTION

External Trade Statistics of Pakistan is being compiled regularly since 1947. Pakistan is using methodology/guidelines contained in the United Nations Statistics Division (UNSD) manual for compilation of *“International Merchandise Trade Statistics, concepts and definitions in ESCAP region”*

Pakistan adopted United Nations Statistics Division’s (UNSD) **“Harmonized Commodity Description and Coding System”** for compilation and dissemination of external trade statistics, from July, 2002. Pakistan Bureau of statistics updates the structural data compilation which includes the classification and categories through its rebasing process. Recently rebasing of trade statistics with base year 2017-18 which is seventh in series is implemented in March 2022. Pakistan Bureau of Statistics compiles the External Trade Statistics by region, commodity and economic categories according to the Harmonized Commodity Description and coding System (HS) of UNSD into three main economic categories capital, intermediate and consumer goods.

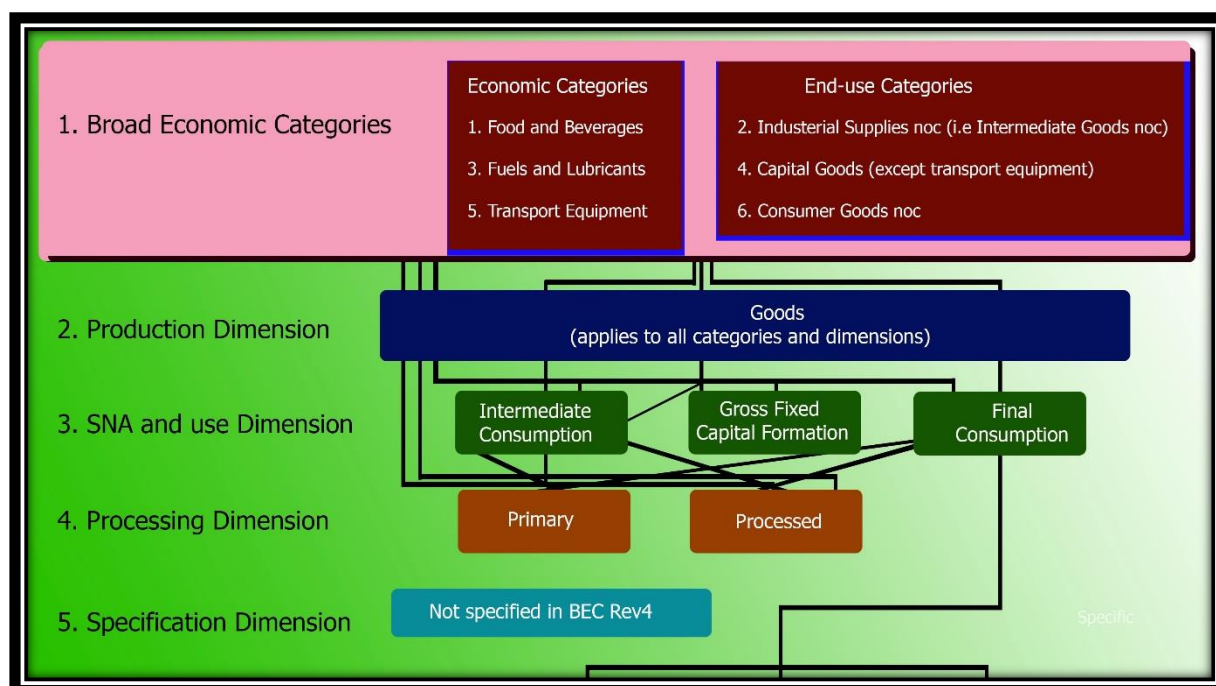

The Broad Economic Category Rev-5 actually presents a high level of aggregation of product category which is based on the detailed commodity classifications in the Standard International Trade Classification (SITC), the Harmonized Commodity and Coding System (HS) and the Central Product Classification (CPC). The First revision was launched in 1976 that conformed the BEC to changes in SITC Revision 2. The second was in 1984 that confirmed the BEC to changes in SITC Revision 3. The Third revision was in 1986 that corrected some oversights in Revision 4. The fourth revision was in 2002 that provided more details of commodities description by taking into account the 2002 edition of the HS classification .

UN Statistics Commission developed Broad Economic Category (BEC Rev-5) in 2016 with above detail classification. BEC Rev-5 defined separately the HS 2012 sub-headings and CPC 2.1 classes for goods and services, respectively. It differs from Rev-4 due to addition of services and also redesigned the top-level broad economies and new variables which are based on main output of the corresponding industries.

Figure: 1 illustrates that in BEC Rev-4 a very complex relationship between the categories where as in BEC Rev-5 there is clear relationship between the economic and end use categories. Rev-5 also introduces the new variable (Specification dimension) which helps in global value chain analysis.

“BEC Rev.4 relied on a confusing hybrid approach that defined some broad economic categories on the basis of the product characteristics (food and beverages, fuels and lubricants and transport equipment), with further links to their end-use categories, while others were defined on the basis of their end-use and included as top-level broad categories (industrial supplies, capital goods, and consumer goods). In other words, end-use appeared in BEC Rev.4 as both top-level categories and as subcategories of other top-level economic categories” (BEC Rev-5, UN 2018).

FIGURE :1 ILLUSTRATION OF BEC 4 STRUCTURE.

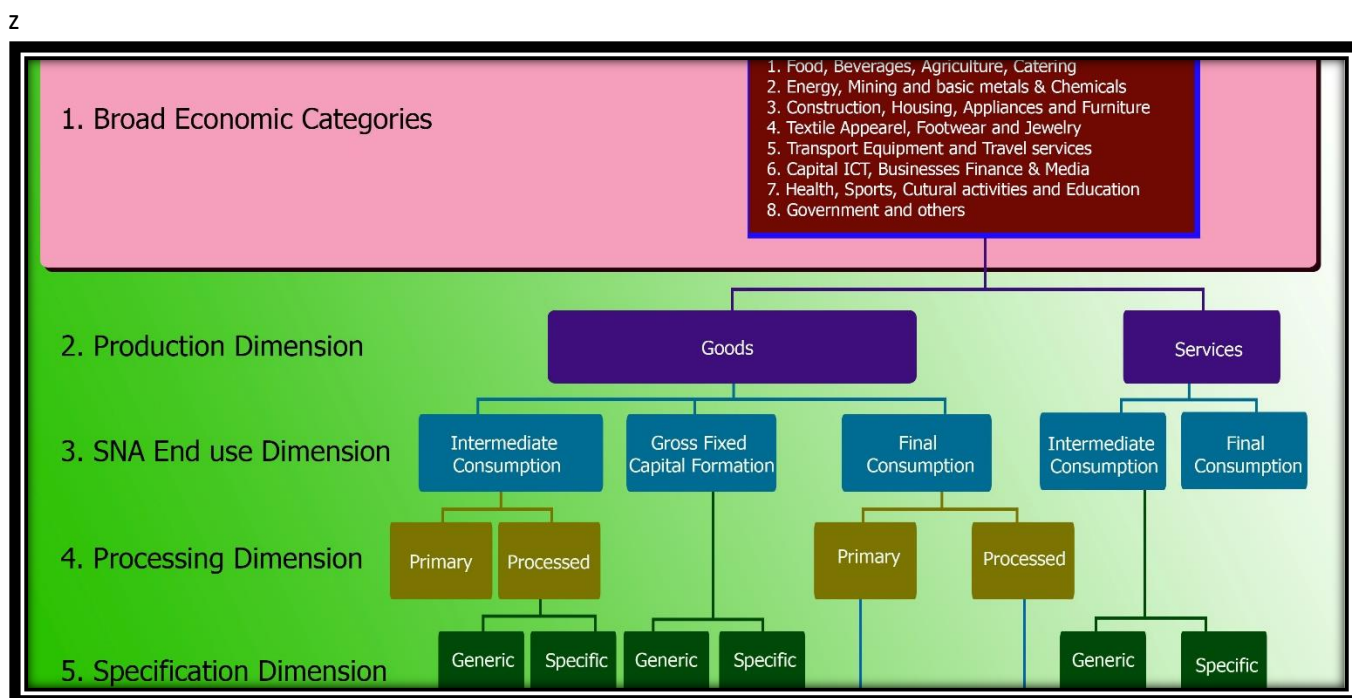

Source: UN Statistics Division

Figure: 2 shows that in BEC-5 International Industrial classification (ISIC) is main basis for the development of economic class. Establishments that have the same principal activity are grouped into industries according to the International Standard Industrial Classification of all Economic Activities Revision 4 (ISIC, Rev.4) (United Nations, 2008a).

- Agriculture, forestry, fishing, food, beverages, tobacco
- Mining, quarrying, refinery, fuels, chemicals, electricity, water, waste treatment
- Construction, wood, glass, stone, basic metals, housing, electrical appliances, furniture
- Textile, apparel, shoes
- Transport equipment and services, travel, postal services
- CT, media, computers, business and financial service
- Health, pharmaceuticals, education, cultural, sport
- Government, military and other
- Others

FIGURE :2 ILLUSTRATION OF BEC 5 STRUCTURE.

Source: UN Statistics Division

Further it describes the product as good and services. Goods and services which are the result of production activities could be further elaborated as input and output of the industry².

“Goods are physical, produced objects for which a demand exists, over which ownership rights can be established and whose ownership can be transferred from one institutional unit to another by engaging in transactions on markets.” (SNA2008, Pg-96)

“Services are the result of a production activity that changes the conditions of the consuming units, or facilitates the exchange of products or financial assets” (SNA2008, Pg-96)

BEC Rev-5 includes the services as services have become the focus of intense international competition and dynamic innovation and growing interest to policy-makers since last few years.

BEC Rev -5 defined three end use dimensions of a good in the context of SNA.

a) Intermediate Consumption:

“Intermediate consumption consists of goods and services used up in the course of production within the accounting period.” (SNA2008, Pg-8)

b) Final Consumption:

“Final consumption consists of goods and services used by individual households or the community to satisfy their individual or collective needs or wants.” (SNA2008, Pg-8).

c) Gross Capital Formation

² <https://unstats.un.org/unsd/nationalaccount/docs/sna2008.pdf>

“Fixed assets are produced assets (such as machinery, equipment, buildings or other structures) that are used repeatedly or continuously in production over several accounting periods (more than one year).” (SNA2008, Pg-8).

The use of a good determines intermediate consumption and gross capital formation. The goods and services which are completely used up in accounting period recorded as intermediate consumption if not it is an accumulation transaction recorded as capital.

BEC Rev-5 also gives detail description about the dual use of the products. They could be exchanged and could be used for various purposes as inputs in the production and as a final consumption. It also defines the specification of the dimension of a good that could be a generic which is consumed across a wide range of industries or could be specified which is consumed only in certain industries. This revision also determines the durability of a good.

“A durable good is one that may be used repeatedly or continuously over a period of more than a year, assuming a normal or average rate of physical usage” (SNA2008, Pg-184).

2. METHODOLOGY:

A. BROAD ECONOMIC CATEGORY REV-4

UNSD recognized in 1965 a high level of aggregation on existing product classification based on the detail of commodity classification in the Standard International Trade Classification (SITC) and Product Classification. Currently PBS using the composition of the three basic classes of goods of Broad Economic Category Rev-4 (2002)³ for trade statistics as below.

1. Capital goods

Sum of categories:

- 41* Capital goods (except transport equipment)
- 521* Transport equipment, industrial

2. Intermediate goods

Sum of categories:

- 111* Food and beverages, primary, mainly for industry
- 121* Food and beverages, processed, mainly for industry
- 21* Industrial supplies not elsewhere specified, primary
- 22* Industrial supplies not elsewhere specified, processed
- 31* Fuels and lubricants, primary
- 322* Fuels and lubricants, processed (other than motor spirit)
- 42* Parts and accessories of capital goods (except transport equipment)
- 53* Parts and accessories of transport equipment

3. Consumption goods

Sum of categories:

- 112* Food and beverages, primary, mainly for household consumption

³ https://ec.europa.eu/eurostat/ramon/other_documents/bec/BEC_Rev_4.pdf

122* Food and beverages, processed, mainly for household consumption
 522* Transport equipment, non-industrial
 61* Consumer goods not elsewhere specified, durable
 62* Consumer goods not elsewhere specified, semi-durable
 63* Consumer goods not elsewhere specified, non-durable

B. BROAD ECONOMIC CATEGORY REV-5

Broad Economic category needs to be improved for re-defining BEC structure to better reflect current economic reality, extending the BEC's scope to include services as well as goods, while giving extra attention to the definition of intermediate goods, improving explanatory materials to help both compilers and users of data disseminated according to BEC and providing updated correspondence tables to link BEC with other statistical classifications

Pakistan Bureau of Statistics using the BEC-Rev4 in the compilation of economic category of imports. There is need of updation to fulfill the needs of users. Mostly countries adopted the Broad Economic Category Rev-5 that provides an overview of international trade based on the detailed commodity classifications in the Standard International Trade Classification (SITC), the Harmonized Commodity and Coding System (HS) and the Central Product Classification (CPC). Broad Economic Category Rev-5 for trade statistics as below.

Improvement of Broad Economic Category helps to introduce simplify and clarity in the structure of BEC compilation. There is complex relationship of categories in BEC Rev-4 as compare with the BEC-Rev-5. In BEC Rev-5 economic categories are clearly separated based on under lying products and end use categories and easier to interpret. BEC Rev-4 defined some economic categories on the basis of product characteristics that are further linked with the end use categories while others were defined on the basis of their end use. In BEC Rev-4 end use appeared both in top level categories and as sub categories of other top level economic categories.

The new structure of BEC clearly defined the end-use within each of the broad categories. Capital formation, intermediate consumption and consumer goods can be clearly identified within economic categories. Defining the broad economic category on the basis of under lying products instead of mixing with end use category provide greater international comparability because products included in a given economic category is concordance with classifications agreed by the members of global community i.e Harmonized coding (HS) for goods and Central Product Classification (CPC) for services.

PBS after the rebasing of trade 2017-18 now propose to implement BEC-5(2018)⁴ to facilitate the data users summarized in the following format

⁴ https://unstats.un.org/unsd/trade/classifications/SeriesM_53_Rev.5_17-01722-E-Classification-by-Broad-Economic-Categories_PRINT.pdf

* Capital Goods

** Consumer Goods

*** Intermediate Goods

Total HS codes are 5387 in the trade database and highest number of codes are in the industry “Construction, wood, glass, stone, basic metals, housing, electrical appliances, furniture” which are 1177.

4. COMPILATION AND DATA ANALYSIS.

External Trade import data for the financial year 2020-21 is utilized to observe the impact of end-use category between BEC-4 and BEC-5. Variation observed between capital goods, intermediate goods and consumption goods due to shifting items from one end use category to another. A huge decrease observed in capital goods which is 58% in BEC-5 if compared to BEC-4. In response, increase

observed in consumption goods (52 %) and in intermediate goods (12%) in BEC-5. In BEC 5, some import items are allocated to Not Else Classified (NES) as well.

Source: Pakistan Bureau of Statistics

Comparing BEC Rev-4 with BEC Rev-5 as shown in figure 2, the capital items in Rev-4 are shifted to intermediate items and consumer items. The intermediate goods are higher in both BEC Rev-4 and BEC-Rev-5. However, in last three years a significant increasing trend observed in the intermediate goods in both BEC Rev-4 and BEC Rev-5. The higher share of intermediate consumption is in the industry of Mining, quarrying, refinery, fuels, chemicals, electricity, water, waste treatment.

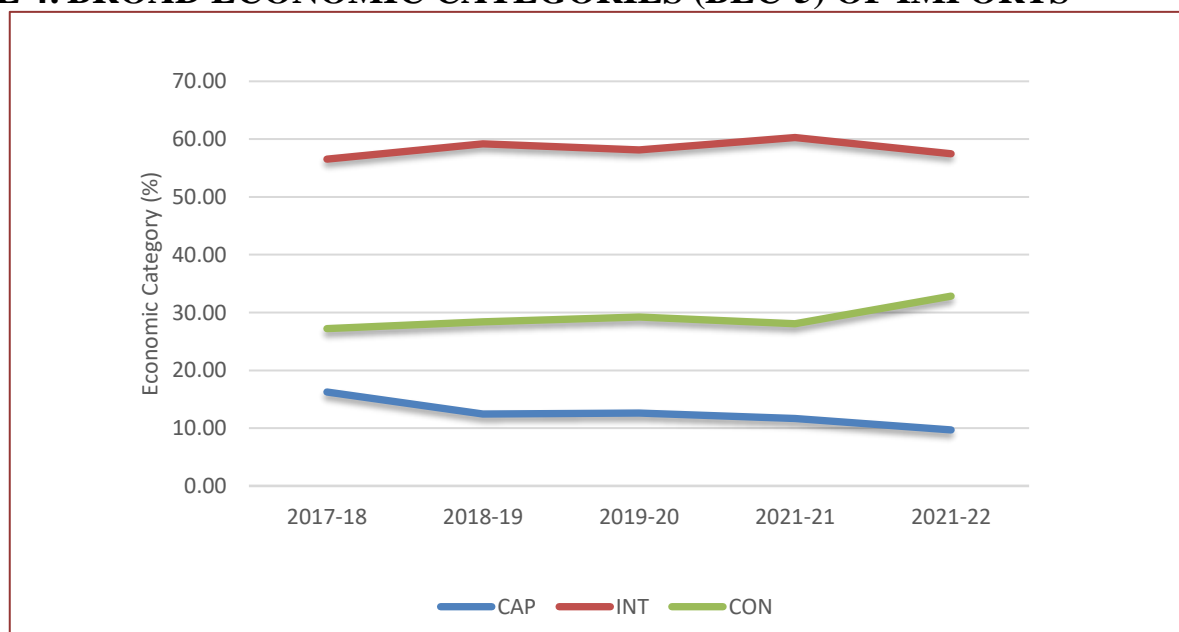

FIGURE :3 IMPACT OF BROAD ECONOMIC CATEGORY (BEC REV-5)

Source: Pakistan Bureau of Statistics

In the time series analysis of trade data from 2017-18 in figure 4 shows increasing trend in the consumption products of imports and showing the decreasing trend of capital products. The share of intermediate products is higher than consumption and capital products.

FIGURE 4: BROAD ECONOMIC CATEGORIES (BEC-5) OF IMPORTS

Source: Pakistan Bureau of Statistics

Pakistan imports and exports historical trend in figure 5 shows that imports increased tremendously of the country over the time. The imports are mostly intermediate and consumer goods used by households and industries.

FIGURE: 5 HISTORICAL TRENDS OF IMPORTS OF PAKISTAN

Source: Pakistan Bureau of Statistics

Figure 6 shows that highest intermediate and consumer imported goods are reported in the industry of Mining, quarrying, refinery, fuels, chemicals, electricity, water, waste treatment which are mostly intermediate and consumer goods.

FIGURE 6: IMPORTS OF PAKISTAN BY INDUSTRY 2021-22

Source: Pakistan Bureau of Statistics

By industry analysis in table 5 shows similar trend observed in past years imports of Pakistan. that major imports are in the industry of “Mining, quarrying, refinery, fuels, chemicals, electricity, water, waste treatment” which is 44.61 % in 2021-22 followed by Agriculture, forestry, fishing, food, beverages, and tobacco (13.62 %), Transport equipment and services, travel, postal services (13.04%) and Construction, wood, glass, stone, basic metals, housing, electrical appliances, furniture (8.53%). Though the number of HS Codes are fewer than the other.

TABLE: 5 BROAD ECONOMIC CATEGORY BEC REV-5 PERCENTAGES (%) SHARE BY INDUSTRY

Industry	2017-18	2018-19	2019-20	2021-21	2021-22
1.Agriculture, forestry, fishing, food, beverages, tobacco	13.42	13.70	15.40	17.65	13.62
2.Mining, quarrying, refinery, fuels, chemicals, electricity, water, waste treatment	39.88	42.72	39.93	36.62	44.61

Figure 7 shows major share of industries in imports during 2021-22. Mining, quarrying, refinery, fuels, chemicals, electricity, water, waste treatment has been the major industry followed by Agriculture, forestry, fishing, food, beverages, tobacco and Transport equipment and services, travel, postal services. The detail is given in Table 8.

FIGURE:7 IMPORTS BY MAJOR INDUSTRY 2021-22 (\$ '000')

Source: Pakistan Bureau of Statistics

Table: 6 Shows predominant category of imports data classified in the nine categories. The trend of last five years shows that major share of imports is reported in intermediate goods. In year 2021-22 the share of capital goods decreases while the consumption items increase. Further details are given in table 9.
