

FOREWORD

Federal Bureau of Statistics (FBS) has been conducting Census of Electricity Establishments on annual basis since 1962-63. The last report published in the series relates to the year 1999-2000.

2. This report presents results of the Census conducted during the year 2003-04 and includes data on fixed assets, installed capacity, electricity generation, electricity consumption, number of consumers, fuel consumption, industrial cost, gross value of production and value added at national and provincial levels. WAPDA and KESC the biggest sources of energy generation and distribution. Pakistani as well as the Independent Power Plants have been covered in the census report.

3. The compilation of this document has been possible only with the cooperation of data source organizations, which provided us requisite information. Federal Bureau of Statistics is thankful to the Management of Water & Power Development Authority (WAPDA), Karachi Electric Supply Corporation (KESC), Independent Power Plants and Captive Units for furnishing the requisite information.

4. I hope that this publication will be of use as a reference document for researchers and policy makers on power sector in Pakistan. Suggestions for improvement of contents and presentation for future issues of this publication are welcomed.

CONTENTS

		<u>PAGE</u>
Chapter-I	Introduction, objectives and data collection	1
Chapter-II	Concepts and definitions	2
Chapter-III	Main findings	3
	Installed capacity	4
	Electricity generation	5
	Installed capacity and electricity generation by type of plant	6
	Electricity consumption	7
	Number of consumers	8
	Electricity consumed in auxiliaries and system losses	9
	Value of electricity sold, industrial cost and value added	9
