Foreword

**Professor Ahsan Iqbal
Minister for Planning, Development
and Special Initiatives**

The 7th Population and Housing Census-2023, in pursuance of the decisions made in 49th meeting of Council of Common Interests (CCI), was conducted digitally in the country during March to May, 2023. The exercise was accomplished by the Pakistan Bureau of Statistics with the assistance of national agencies, NADRA, NTC and SUPARCO, and cooperation of provincial and district administration in providing all kind of administrative and human support and Armed Forced for providing security during the whole census process including the Pilot Census and Post Enumeration Survey of the Digital Census. I extend my sincere gratitude to the officers and staff of Provincial Government Departments, as well as the personnel of the Armed Forces, who played a pivotal role in the success of this

operation. Their dedication and involvement were truly commendable.

I would also like to extend my congratulations to the entire staff of PBS for their untiring efforts. Their motivation and efforts are truly praiseworthy as they worked passionately to accomplish this challenging task.

PBS has done a commendable job by conducting the huge exercise in a transparent way, which has led to approval of this Census in CCI by Consensus. Thus this Census has helped in strengthening the Federation. This Census gets us the population count and status of access the basics. Now it is upto relevant stakeholders to use this information for inclusive development of population by using this granular data. I urge upon PBS to continue working with Federal and Provincial stakeholders for informing public policy and programs for inclusive development.

Lastly, I am grateful to the officers and staff of the Ministry of Planning, Development and Special Initiatives for their exceptional cooperation with the PBS staff. Together, they worked tirelessly to efficiently finalize the results of Census-2023 in a remarkably short period of time, thus enabling us to reach this significant milestone.

Preface

**Dr. Naeem uz Zafar
Chief Statistician
Sitara-i-Imtiaz March 2024**

Population and Housing Census is a crucial national undertaking which serves as a comprehensive data collection exercise to gather information on various aspects of the population and housing conditions. It provides essential demographic information such as population size, age distribution, gender ratio, and other demographic indicators, as well as data on various socioeconomic factors such as education, employment, disability/ functional limitation, and household amenities. This information is crucial for policymakers to formulate development plans and policies that address the specific needs of different segments of the population. The census data is also used for electoral representation. It is a major source for resource allocation, both at the national and local levels, and helps in determining distribution of funds for development projects, social welfare programs, and infrastructure development based on the population's needs.

PBS was asked to do very complex huge task of digital census in early 2022 in very challenging timelines. At the outset the journey was unvarying and milestone looked unachievable but thanks to already embarked upon journey of digital transformation for data collection and dissemination. PBS conceived, designed, planned, processed, tested and implemented the system to do census in a transparent and inclusive way, thus paving the way for acceptance of results. Successful achievement of these milestones have significantly boosted management and technical capabilities of PBS officials both at headquarter and in field offices.

I would like to thank and congratulate Mr. Muhammad Sarwar Gondal, Member (Support Services/RM) (Project Lead Digital Census), Mr. Ayazuddin, Member (Census & Surveys), Ms. Rabia Awan, Deputy Director General (Census Planning and Coordination/ CPMU) and their whole team for their tireless dedication and efforts for successful completion of the census operation under challenging circumstances. I would also like to render my thanks to the provincial and district administrations for their active participation in providing administrative and human support; the agencies, NADRA, NTC and SUPARCO for timely arrangements of all the necessary hardware and software, and other stakeholders for their active and valuable support. I also thanks to Armed Forces for their untiring efforts without which success of this task was not possible. And finally, I would also like to thank the enumerators without dedicated field work this would not have been possible, for which I express my deep appreciation and admiration.

Digital Census – A Success Story

Muhammad Sarwar Gondal
Member (Support Services/ RM)
Project Lead Digital Census
Sitara-i-Imtiaz

In 49th meeting of the Council of Common Interests (CCI), held on January 13, 2022, where conduct of the 7th Population & Housing Census in a digital format was approved. The CCI also approved the Census Work Plan, Census Questionnaire, and Census Monitoring Committee (CMC) in the meeting along with the recommendation of Census Advisory Committee (CAC).

PBS accordingly started work for 7th Population and Housing Census by digitizing the whole census process starting from HR and Task Assignment Web Portal to Inventory Management, Communication Application, Complaint Management System, CATI Support Module and provision of Dashboards at provincial and census district level for monitoring and complete coverage. For census data collection, tablet devices equipped with various software applications, including house/structure listing and household enumeration software, were utilized. Many of the Modules envisioned for the Digital Census were

thoroughly checked and their performance and output were verified during the pilot census conducted in 33 administrative districts across Pakistan during 20th July, 2022 to 3rd August, 2022. The main aim of the pilot census was testing of validity and suitability of the entire census plan and its organization.

Despite many impediments and challenging timelines, PBS completed main census related activities on time including training of 300 Master Trainers at Islamabad, training of 3460 Trainers at Divisional level and training of 120,000 Enumerators at Census District level on both subject matter and IT related aspects of the Digital Census. Similarly, PBS and its stakeholders achieved major milestones, including, digitally updating of census blocks; acquisition of 126,000 tablets and their hardening; development of ERP system and acquisition of latest imagery of Pakistan prior to start of the main census field operation. The Digital Census also implemented a distinctive feature of self-enumeration through a web portal, thus enabling 2.6 million households to conveniently submit their census related information online.

The Digital Census project has proven to be a resounding success, and I would like to extend my heartfelt appreciation and congratulations to Mr. Ayazuddin, Member (Census & Surveys), Dr. Amjad Javaid Sandhu, Director General Administration, Ms. Rabia Awan, Deputy Director General (Census Project Management Unit/Census Planning and Coordination) and the whole team of Support Services, GIS, Field Services/Operations and the Subject matter for their untiring efforts and dedication throughout the entire census operations. Their devotion and commitment was truly commendable, especially considering the challenging circumstances.

Core team of Pakistan Bureau of Statistics
Dr. Naeem uz Zafar, Chief Statistician/Chief Census Commissioner

S.No.	Name	Designation	Area of work
1	Mr. Muhammad Sarwar Gondal	Member (Support Services / Resource Management)	Team lead/Focal person for Digital Census
2	Mr. Ayazuddin	Member (Census & Surveys)	Coordination/ PES and finalization of preliminary results
3	Dr. Amjad Javed Sandhu	Director General Administration	Coordination/Admin & Logistics Support
4	Ms. Rabia Awan	DDG(CPMU/CP&C)	Procurement, Coordination, Reporting, documentation, Analysis & Report writing

Chapter 1: Introduction

— برفیڈ ہے ملت کے مقدار کا ستارا —

Chapter 1: Introduction

1.1 Background

Pakistan Bureau of Statistics (PBS), in accordance with the General Statistics (Reorganization) Act 2011, is responsible for conducting population and housing censuses in the country. Alongside its other data collection activities, PBS conducted censuses in the years 1951, 1961, 1972, 1981, and 1998. Following the 1998 census, the 6th Population and Housing Census, which was originally scheduled for the year 2008, was delayed and eventually conducted from March to May in 2017. The provisional summary results of Census-2017 were released after the requisite approval from the Council of Common Interests (CCI) in its meeting held on August 25, 2017. These results were made available to government officials, academia, researchers, and the general public through press releases and the PBS website.

There were reservations on Census 2017 results from Sindh. As a result, census which was completed in 2017 got approved by the CCI in its 45th meeting held on 12th April, 2021. CCI alongside directed PBS to start the process of the next census as early as possible according to the international best practices by using latest technology.

In compliance to the CCI decision, PBS initiated preparatory work to conduct the 7th

Population and Housing Census in Pakistan. To achieve this end, the Government of Pakistan established Census Advisory Committee

consisting of distinguished demographers and experts with the aim of formulating recommendations to implement the latest technology and adopt international best practices, as well as to devise strategy to build confidence among all the stakeholders, guarantee smooth completion of census operation and improve credibility and reliability of the census results. The Committee conducted several meetings and after detailed deliberations finalized the recommendations to carry out the census "digitally" with real-time monitoring for transparency and broader acceptability.

The main recommendations of Census Advisory Committee are given as under.

- Census must be conducted Digitally with real-time online monitoring & geo-tagging of all structures
- Ensure Universality: Counting of whole population residing in country at the time of the census irrespective of its Status/ Holder of CNIC or not
- De-jure Method of enumeration is recommended (person is enumerated at usual place of residence). This method is the widely used method internationally and used in all previous Censuses in Pakistan.
- Single Census questionnaire may be administered which should be strictly in relevance to the Objectives of Census.

Figure 1.1: Clips from Meetings of Census Advisory Committee

- Law enforcement agencies may be used for security but not for enumeration / verification.
- Field Data collection / Monitoring may be carried out by Provincial Government staff. Comprehensive trainings and involvement of graduate students in the enumeration process is recommended.
- Involvement of Stakeholders (especially provinces / political parties) from start to end (Planning to Finalization of results)
- Establishment of National Census Coordination Center (N3C) with representation of Provincial Governments for effective monitoring, coordination and policy decisions.
- Effective publicity campaign with effective use of social media for clarity regarding the primary objective of Census which may begin early and extend right up to the release of the first initial results
- Conduct of Pilot Census for checking the whole process and conduct of Post Enumeration Survey for assessing reliability of data and coverage

The Federal Cabinet in its meeting held on 5th October, 2021 approved the recommendations of the Census Advisory Committee for forwarding to the CCI. The CCI in its 49th meeting held on 13th January, 2022 approved the recommendations of Census Advisory Committee for the conduct of 7th Population and Housing Census, along with census work plan with timelines, census questionnaire, Census Monitoring Committee (CMC) and its TORs. The CMC was constituted with representation of all Chief Secretaries, relevant Provincial Secretaries (Education, Health, Local Government etc.), Senior Members of Board of Revenue, Secretary IPC, DG Military Operation and others for prompt decision making and coordinated efforts for the successful conduct of the census.

1.2 Requirements of Digital Census

Technological developments and subsequent access to modern technology has largely eased the way in which the business of a population census is undertaken. Modern technology permits end-to-end embedding of processes in the census value chain. This possibility ranges from planning, monitoring and implementation to evaluating outcomes. Many facets of census activities can benefit from the use of technology.

However, it is of utmost importance to comprehend the significance of technology and carefully choose the most appropriate option. Introducing technology can be an expensive and risky endeavor if not aligned with the unique circumstances of the country. Hence, in order to guarantee successful implementation of electronic data collection technology in the census process, it was imperative to precisely identify all the essential requirements and formulate comprehensive plans for integrating this technology at an early stage of the census life cycle. Figure 1.2 gives a schematic representation of the hardware and IT-related requirements envisaged for DigitalCensus-2023.

Figure 1.2: Hardware and IT Related Requirements of Digital Census

The 7th Population and Housing Census marked a significant milestone in Pakistan as it became the first-ever digital census in the country. The implementation of this census posed unique challenges that required careful planning and preparation from the very beginning. These challenges included development of step-by-step procedures for the entire process, creation of high-resolution digital maps, acquisition of tablet devices, development of specialized census software to perform various tasks such as structure listing, enumeration, real-time monitoring, and field coordination, as well as establishment of data infrastructure and storage facilities. Additionally, extensive efforts were made to ensure transparency and reliability of the census by addressing key processes, some of which will be discussed in the subsequent sections. It is important to highlight that the recommendations of the Census Advisory Committee for the Digital Census were thoroughly taken into account during both the planning and execution stages of these processes.

1.2.1 Consultative and Sensitization Process

One of the main recommendations of

Census Advisory Committee approved by the CCI in its 49th meeting was involvement of stakeholders through the entire census process. To accomplish this objective, PBS conducted various rounds of engagement sessions with provincial administrations, civil society organizations, and academia. In this regard, five meetings were conducted with provinces from 6th September, 2021 to 16th September, 2021, whereas six sensitization workshops were held at provincial capitals from 24th December, 2021 to 10th January, 2022. Additionally, another round of sensitization process was commenced on 23rd May, 2022, with workshops conducted by the PBS team at all the provincial and regional headquarters.

The purpose of these sessions was to inform about the transparent data collection of census digitally and role and responsibilities of all federal and provincial stakeholders. Additionally, stakeholders were made aware of their access to GIS-enabled monitoring, which facilitated tracking progress of the census. It is worth noting here that the representatives of the provincial governments remained actively engaged from the planning phase of the census until its completion in the field.

Figure 1.3: Clips from Workshops Held at Provincial Capitals

⁵ "Principles and Recommendations for Population and Housing Censuses" (Revision 3), Department of Economic and Social Affairs, Statistics Division, United Nations, New York, 2017. (Emphasis added)

1.2.2 Role of Consulting Agencies

After approval of the recommendations of Census Advisory Committee and work plan of 18 months to conduct 7th Population and Housing Census-2023 by the CCI in its 49th meeting, PBS, keeping in view the challenging timelines, engaged for the Government to Government (G2G) solution National Database and Registration Authority (NADRA), Space and Upper Atmosphere Research Commission (SUPARCO) and National Telecom Corporation

(NTC) for provision of software, hardware, latest high resolution imagery and allied services required for successful completion of the digital census field operation.

The following Table 1.1 summarizes the role of consulting agencies, NADRA, SUPARCO and NTC regarding provision of hardware and software during the conduct of 7th Population and Housing Census-2023.

Table1. 1: Role of Consulting Agencies during the Digital Census 2023.

Task	Description	Responsibility
Tablet device and allied accessories	Provision of 126000 tablet devices and allied accessories Provision of 126000 secure data SIMs Hardening and preparation of tablet devices Dispatching and retrieval of tablet device	NADRA
Datacenter and Infrastructure	Compute storage and network resources Two sites, one primary site at NTC Islamabad and one disaster recovery site at NTC Lahore Intranet and internet connectivity of sites Software licenses required for the datacenter	NTC
Census Support Centers	IT support to field staff Provision of internet devices	NADRA NTC
Call center	Establishment of call center at PBS HQ Operationalization of call center for 6 months Technology transfer to PBS	NTC
Census Software	Provision of complete turnkey solution	NADRA

Table1. 1: Role of Consulting Agencies during the Digital Census 2023.

Task	Description	Responsibility
	Hosting of census software solutions at infrastructure provided by NTC Syncing of data and data security	
GIS imagery	Provision of GIS imagery	SUPARCO

1.2.3 Census Software

For the Digital Census-2023, initially eighteen software modules were considered to facilitate various tasks in a digital format. However, upon careful internal discussions and considerations, it was determined that some of these modules shared similar features. As a result, the Supervisor Dashboard and Data Synchronization modules were combined with the Indicator and Trend Analysis and Android House Listing and Enumeration Data Collection modules, respectively. The final list of modules, comprising sixteen in total, can be seen in Table 1.2.

Table 1.2: Software Modules Finalized for Digital Census-2023

S.No.	Software Modules	S.No.	Software Modules
1	Self-enumeration web portal	9	GIS based Dashboard Monitoring System
2	HR & Task Assignment Web Portal	10	Dashboard for Trend Analysis
3	Training Web portal	11	Data Cleaning Module
4	Inventory Management	12	Complaint Management System
5	Android House listing App	13	Reporting Module
6	Android Enumerator Data Collection app	14	Public Data Dissemination Portal
7	Communication application	15	CATI support module
8	Area Frame Updation Application	16	MDM

1.2.4 Census Hardware and IT Infrastructure

The digital infrastructure, PBS already have, was not reliable enough to support the extensive census operation. As a result, it was necessary to upgrade the entire Data Center to meet the necessary standards for power backups, precision cooling, network and server security, environmental monitoring and control, fire suppression systems, and access control systems. Additionally, a secondary site with disaster recovery capabilities had to be introduced. However, given the tight schedule for the census, procuring and completing the necessary upgrades for the datacenter was not feasible. Therefore, the well-established tier-111 Datacenter Infrastructure of National Telecom Corporation (NTC) suitable for this exercise was utilized to provide round-the-clock support, with multiple active sites including a dedicated disaster recovery site.

The hardware and IT related requirements chalked out for the Digital Census 2023 included 126000 tablet devices with allied accessories, hardening and preparation of tablet devices, internet SIMs from Telco's, compute storage and network resources, two sites one primary site and one disaster recovery

site, intranet and internet connectivity of sites, data security, IT support to field staff from Census Support Centers, and establishment of call centers. PBS accordingly engaged National Database and Registration Authority (NADRA) for provision of 126000 tablets with allied accessories (secured, hardened devices), Census Software Solution (Enterprise Resource Planning - ERP), Data SIMs and secure data connectivity, and census field support services.

Figure 1.4: The Digital Architecture Used in the Population and Housing Census-2023

1.2.5 Acquisition of High Resolution Imagery

Digital maps of area frame are at the crux of digital enumeration. PBS had already digitized its area frame, which consisted of approximately 182,000 blocks and conducting surveys through tablets using the digitized block boundaries. However, due to the sensitivity and magnitude of the census project, PBS decided to acquire the latest satellite imagery accurate to a level that does not affect the accuracy of geotagging of structures. For this purpose, PBS held several meetings with SUPARCO, the National Space Agency of Pakistan specializing in GIS and Space Science research, to discuss and determine the imagery and GIS requirements. After extensive discussions between the technical experts from both sides, the following services were decided to be acquired from the SUPARCO.

- High resolution digital satellite imagery of 0.3-meter resolution for 18 districts and 0.98-meter resolution for remaining areas for reconciliation and ground reference (not more than 6 months old).
- Support in terms of infrastructure and human development for hosting of Digital Enumeration Area Maps on PBS server.

1.2.6 Provision of Call Center Services

A call center by the NTC was established at the PBS headquarters to facilitate smooth

communication between the public and the Census administration during and after the census exercise. This call center served as a central hub of information, handling not only general complaints but also inquiries from the public regarding the census process, on-field activities, and frequently asked questions about the census. Additionally, it was utilized for Computer-Assisted Telephone Interviewing (CATI) approach after the census field operation.

A call center was set up by the NTC within the premises of PBS headquarter to serve as an information hub for a seamless interface between Public and Census administration, during and after the census exercise. It was used not only for general complaint resolution, but also for enquiries generated by the public for PBS about the census process, on-field activities and other census frequently asked questions. It was also used for Computer-assisted telephone interviewing (CATI) approach after the census field operation.

1.2.7 Deployment of Census Field Staff

As per the previous practices, the field operation of 7th Population and Housing Census was conducted and supervised through the respective provincial government's machinery. The Provincial Chief Secretaries being the administrative heads of the provinces implemented the census plan prepared by the Federal Government, and all the orders and instructions in this respect were issued from their offices down to the level of Divisional Commissioners, Deputy Commissioners and Assistant Commissioners.

Similarly, from administrative and organizational point of view, Census Districts were established all over the country, including Gilgit-Baltistan and Azad Jammu & Kashmir, for effective coordination and implementation of Digital Census activities. In Punjab, Sindh and Khyber Pakhtunkhwa, tehsils were declared as Census Districts, whereas in the rest of the country including Gilgit-Baltistan and Azad Jammu & Kashmir, Admn. districts were declared as Census Districts. The respective

administrative heads of the admn. districts and tehsils were notified as Census District Officers (CDOs). These Census Districts were divided into Census Charges, Census Circles, and Census Blocks.

PBS ensured effective coordination with provincial and regional administration by deploying its own staff members, including Statistical and Geographical assistants, to work alongside Census District Officers at 495 Census Districts. These staff members acted as a crucial link between PBS administrations, provincial and regional administration, and local field staff. They facilitated timely and efficient communication regarding census instructions, complaints and suggestions, as well as logistic support.

1.2.8 Establishment of Census Support Centers

Since the Digital Census was being carried out first time in the country, therefore, to keep the process smooth and ensure availability of system alive 24/7, dedicated Census Support Centers on the recommendation of Census Advisory Committee were established at the Tehsil/Census District level. These centers played a vital role in facilitating the census field operation. They were responsible for a range of tasks, including the distribution and collection of tablet devices, as well as installation and configuration of census applications. Moreover, they performed as Control Room and Complaint Inquiry Office in each Census District. These centers were equipped with all the necessary IT equipment, furniture, fixtures, and technical staff. The technical staff, mostly from PBS, were assigned to provide support to the technical field staff, enumerators, and supervisors.

1.2.9 Training of Census Staff

In order to provide comprehensive training both on the subject matter and IT related aspects of the Digital Census to the census field staff, supervisors and enumerators, a three-tiered plan was devised. The first tier involved training Master Trainers in Islamabad; the second tier

consisted of training Trainers at the Divisional level; and finally, the third tier involved training supervisors and enumerators at the Tehsil level. The training for 328 Master Trainers took place at NIBAF in 5 batches during 5th - 15th December, 2022. These Master Trainers then imparted training to 3460 Trainers in 94 batches during 18th - 23rd December, 2022.

Subsequently, the Trainers trained a total of 121,000 census field staff in 2000 batches during 7th - 20th January, 2023. To provide a glimpse of the master training sessions, a selection of photos is shown in Figure 1.5.

Figure 1.5: Training of Master Trainers for the Digital Census Field Activities

1.3 Pilot Census of Digital Census-2023

Pilot census serves as a thorough assessment of all the census procedures. Its primary objective is to evaluate effectiveness and suitability of the complete census plan and its organizational framework by conducting a trial run. This entails ensuring comprehensive coverage of both geographic areas and population segments. More specifically, pilot census aims to test the accuracy of cartography, methodology, data collection methods, questionnaires, logistical planning, as well as the interaction and coordination among all the resources involved in the census.

The pilot census of Digital Census-2023 encompassed twelve specific objectives aimed at rigorously testing the following aspects.

- I. Effectiveness and comprehensibility of training materials and procedures to impart trainings to the master trainers and enumerators.
- ii. Capabilities of enumerators to comprehend the census concepts within a short span of time and implement in the field with maximum efficiency and accuracy.
- iii. Applicability and suitability of census questionnaire, clarity of its wording, sequence of questions, and response biases.
- iv. The enumeration workload and time required to carry out the enumeration.
- v. Suitability of coordination mechanism for logistic support in the field and necessary communication to and from PBS representatives in the field and other field staff such as enumerators/ supervisors etc. to devise effective strategy to deal with day to day issues.
- vi. Census tablets and other hardware for their suitability in the field, especially durability of tablet battery and charge banks to keep tablets alive during the whole enumeration time of a day.
- vii. Census software and GIS for their reliability, accuracy, efficiency and security.

- viii. Digital block maps with high-resolution imagery and capability to properly identify to the enumerators their assigned blocks and to help recognize block overlapping/ non-coverage etc.
- ix. Compatibility between the hardware and different census software and to sort out issues prior to start of full scale census enumeration.
- x. Network availability and proper and easy log-in capability of the devices.
- xi. Proper, effective and secure data synchronization and transmission to the central database.
- xii. Real-time monitoring in the field and at PBS headquarter to deal with block identification/ overlapping, non-coverage and other issues requiring regular and immediate action from the concerned in the field and at PBS headquarter.

In light of the objectives of the pilot census, which was to thoroughly test all the new technologies adopted for the Digital Census, the PBS Technical Committee decided that instead of utilizing a representative sample, the main focus should be on evaluating the entire process of the Digital Census under diverse conditions. In order to accomplish this, a study was conducted on the block-wise information and after detailed deliberation it was decided to select a sample of around 500 blocks from clusters of districts keeping in view factors such as density, accessibility, and topography of the area. Consequently, a total of 417 blocks were selected from 33 administrative districts for the pilot census. The selected administrative districts for Pilot Census can be seen in Figure 1.6, whereas breakdown of the selected blocks, both by province/district and rural-urban areas, is given in Table 1.3 and Figure 1.7, respectively.

Field operation of the pilot census was carried out from July 20, 2022 to August 3, 2022 in 33 selected Administrative Districts across Pakistan, including Azad Jammu & Kashmir and Gilgit Baltistan. For the pilot census field operation, a three-day training session for the Master Trainers was held at the PBS

headquarters from July 5 to July 7, 2022. The Master Trainers then imparted training to the enumerators in the field at the selected 27 stations from July 13 to July 17, 2022. The district administration of each province/district provided the enumeration and supervisory staff. The enumerators were selected from various provincial departments, and the enumeration was conducted under the supervision of the tehsil and district administration in their respective jurisdictions. As the pilot census was digital, tablet devices were used, and two software modules were developed and utilized for this purpose.

Several key issues were identified during the pilot census. Firstly, the tablets used during the process experienced fast battery drainage, resulting in frequent interruptions. The SIM cards provided did not always match the local network, causing connectivity problems. Another challenge was the technical deficiency

of the staff deputed at the Census Support Centers in each census district. This hindered smooth execution of the data collection process. Moreover, the enumeration blocks in Balochistan and Khyber Pakhtunkhwa were situated far away from the Census Support Centers, leading to delays and logistic difficulties. Furthermore, there were delays in resolving technical problems that arose during the enumeration. Adverse weather conditions also posed a challenge in conducting the field operation effectively. Lastly, there were compatibility issues between the SUPARCO satellite imagery and PBS maps, which impacted accuracy of the data collection process.

The issues identified during the pilot census were assessed thoroughly and appropriate corrective measures were taken prior to commencement of the main census activities and field operation for the census data collection.

Figure 1.6: Map Showing Admn. Districts Selected for the Pilot Census

Table 1.3 Province/ District-wise Blocks Selection for the Pilot Census

Figure 1.7: Rural/ Urban Breakdown of the Blocks Selected for Pilot Census

1.4 Enumeration Method and Field Operation

The 6th Population and Housing Census-2017 of Pakistan, similar to earlier censuses, was conducted using a mixed approach, defacto cum dejure. The census mainly followed the dejure concept, which considers the usual place of residence for counting the population. However, only the "homeless" population was counted using a defacto basis. This mixed approach is also commonly used in other countries of the sub-continent.

The Census Advisory Committee after detailed deliberations on the advantages and disadvantages of both defacto and de-jure methodologies, taking into account the practical realities on the ground, evaluating effectiveness of the de-jure method, as well as considering the significant financial and human resource requirements of the defacto method, recommended the de-jure method of enumeration for the 7th Population and Housing Census 2023. The de-jure method of enumeration involves counting individuals based on their usual residence, which was

defined as the place where they have continuously lived for at least six months (excluding temporary absences for holidays or work). Additionally, the intention to live in a particular place for at least six months was also considered when determining usual place of residence. Individuals who were temporarily residing in a place were not counted, as they were enumerated at their usual places of residence. Likewise, individuals who were temporarily out of the country or city to attend religious events, weddings, or trainings for less than six months were counted at their usual places of residence.

The data collection process of the Digital Census-2023 began with the deployment of a web portal for self enumeration on 20th February, 2023. This marked a significant milestone, as only a few countries worldwide have attempted and achieved such an endeavor for their population. Around 2,600,000 individuals submitted their data through the self-enumeration portal till its closing date on 10th March, 2023. The process of listing houses and structures took place between 1st – 10th March, 2023, while the census field enumeration began on 12th March, 2023, with an initial completion date of 4th April, 2023. However, based on the

requests from provincial governments for complete enumeration, the field operation was extended four times by the Census Monitoring Committee until 30th April, 2023. In certain districts, the census field operation was further extended until 21st May, 2023, mainly due to under-enumeration.

1.5 Post Enumeration Survey

One of the main recommendations made by the Census Advisory Committee was to conduct Post Enumeration Survey (PES) of the 7th Population and Housing Census-2023. The recommendation was approved by the CCI during its 49th meeting held on 13th January, 2022. Moreover, during the census field operation, PBS constituted two Committees: Technical/ Expert Committee on Census 2023 for periodic review with provincial and district stakeholders to ensure credible census field operation and committee on Trend Analysis of Census Data for 7th Population and Housing Census (Digital Census) to analyze trends and determine suitability of the census data prior to placing it before the competent forum for approval. The Committee held several meetings and after detailed review of the census data recommended to conduct Post Enumeration Survey to address the issues of over- or under-enumeration identified through demographic techniques in certain areas of the county.

Therefore, during the 15th meeting of the Census Monitoring Committee chaired by the Minister for PD&SI on 7th June, 2023, it was decided that Post Enumeration Survey may be conducted in order to assess accuracy and the coverage extent of the Digital Census-2023. The methodology for conducting the PES and incorporating its findings into the final Digital Census-2023 results was approved in the subsequent 16th meeting of the Census Monitoring Committee held on 27th June, 2023. Accordingly, the Post Enumeration Survey (PES) of Digital Census 2023 was conducted from 8th to 19th July, 2023, in accordance with the decision made in the 49th meeting of CCI and 15th-16th meetings of Census Monitoring Committee.

For the PES, a sample of 2500 Enumeration Blocks was selected from 48 administrative districts (overall level) with relative margin of error (RMOE) of 1.1%. The sample was selected using stratified random sampling where strata within provinces were made on the basis of similar characteristics like growth rates, population etc. Each stratum represented distinct districts. The 48 selected districts represented their respective stratum from which the sample was selected. The sample size was further proportionally allocated to urban and rural part of each district. Provincial and rural/urban breakdown of the PES sample is given in Table 1.4.

Table1.4: PES Sample Allocation with Provincial and Rural/Urban Breakdown

Province	Rural	Urban	Total
Khyber Pakhtunkhwa	287	93	380
Punjab	471	586	1057
Sindh	313	538	851
Balochistan	124	43	167
Islamabad	23	22	45
Total	1218	1282	2500

Figure 1.8: Training of Enumerators for the PES Field Activities

The PES field operation lasted for a total of 12 days. On the 8th of July 2023, the PES field operation was commenced with clear instructions to the enumerators to conduct listing and enumeration as separate activities. The initial three days of the PES field operation were dedicated to listing, while the remaining nine days were allocated for enumeration. To ensure comprehensive and accurate coverage, SUPARCO maps of the blocks were provided to the enumerators in both electronic form on their Tablets and in hard copy. Enumerators were instructed to assign a unique PES number to each structure within the selected block, regardless of the numbering used in the census. For example, structures were labeled as PES 001, PES 002, and so forth. Each enumerator was required to enumerate only one PES block.

During the PES field activities, it was crucial to ensure safety and trust of the enumerators, as they faced resistance from respondents who were skeptical due to isolated incidents reported in the media. To address this, man-to-man security was provided to the enumerators, not only for their protection but also to encourage better response rates. The main census field operation had previously suffered from non-response and less coverage, largely attributed to the lack of security measures. Recognizing this, it was imperative to prioritize the provision of man-to-man security for the field staff during the PES, in order to achieve more accurate and reliable results.

1.6 Finalization and Approval of Final Results

Census is the 9th subject of the Federal Legislative List Part-II and according to the Article 154 of the Constitution of the Islamic Republic of Pakistan, the Council of Common Interests (CCI) is entrusted with the responsibility of formulating and regulating policies pertaining to matters in Part-II of the Federal Legislative List. Additionally, the CCI is also responsible for exercising supervision and control over the relevant institutions.

Accordingly, the final summary results of the 7th Population and Housing Census 2023 were compiled by factoring in the findings of the Post Enumeration Survey and submitted for the approval of CCI on 2nd August, 2023. In its 50th meeting held on 5th August, 2023, the CCI considered the final summary results and unanimously approved the results of 7th Population and Housing Census-2023, as follows:

"The CCI considered the Summary titled "Results of 7th Population and Housing Census 2023 (The Digital Census)" dated 2nd August, 2023, submitted by Ministry of Planning, Development and Special Initiatives and unanimously approved the results of 7th Population and Housing Census 2023 (The Digital Census), as mentioned in Annex V of the Summary and reproduced at para 7 above, for publication and for use / information of general public."

Figure 1.9: Clips from 50th Meeting of CCI Held on 5th August, 2023

The official announcement for the final results of the Digital Census-2023 was made on 7th August, 2023 through the gazette notification. Table 1.5 below provides a breakdown of the population and average annual growth rates for each province, as well as a comparison of Digital Census-2023 with the previous censuses

conducted during 1998 and 2017. Similarly, for a further comparison purpose, Figure 1.10 depicts the average annual growth rates observed for Pakistan, the four provinces and Islamabad Capital Territory (excluding FATA) during the last six censuses held in the country.

Table 1.5: Population and Annual Growth Rates for Census-1998, 2017 and 2023

Region/ Province	Population (In Million)			Annual Growth Rate (%)		
	1998	2017	2023	1998	2017	2023
Pakistan	132.35	207.68	241.49	2.69	2.40	2.55
Khyber Pakhtunkhwa	20.92	35.50	40.85	2.72	2.82	2.38
Punjab	73.62	109.98	127.68	2.64	2.13	2.53
Sindh	30.44	47.85	55.69	2.80	2.41	2.57
Balochistan	6.57	12.34	14.89	2.47	3.37	3.20
Islamabad	0.81	2.01	2.36	5.19	4.91	2.81

Figure 1.10: Average Annual Growth Rates Observed During the Last Six Censuses

It is pertinent to mention here that in this census there due to access issues in the sensitive restricted areas and some collective residences only head counts were provided, therefore the detailed tables except gender, urban/ rural will for 240,458,089 as detailed characteristics were not provided for 1,041,342.

⁶ In Pakistan, since the country gained independence in 1947, six population and housing censuses have prior been conducted at various intervals. These censuses took place in 1951, 1961, 1972, 1981, 1998, and 2017.

Figure 1.11 portrays the population share trends at the provincial level and for Islamabad Capital Territory during all the Population and Housing censuses conducted in the country. It is evident that the share of Punjab has consistently declined over the years. For instance, in the 1951 census, Punjab accounted for 60.9% of the population, but this figure decreased to 52.9% during the Digital Census 2023. The decline in Punjab's share can be attributed towards the historic relatively higher population growth observed in Sindh and Balochistan provinces. During this period, the population share of Sindh increased from 17.9% to 23.1%, while Balochistan's share grew from 3.5% to 6.2%. On the other hand, Islamabad Capital Territory experienced a moderate increase in its share, approximately 0.7% during the same period.

Figure 1.11: Trends observed in Provincial Shares (Percent of Total Population)

1.7 Engagement of Media

In regards to communication strategy for 7th Population and Housing Census-2023, the Census Advisory Committee reviewed previous practices in Pakistan, as well as other developed and developing countries. Based on their findings, they recommended initiation of an early and impactful awareness campaign during the census implementation process. This campaign was to be designed to ensure clear communication regarding the importance of the census, comprehensive description of the entire census process, duration of the census field enumeration, and to address any lingering ambiguity, particularly among groups who had not agreed with the previous census results. The ultimate goal was to foster cooperation and seek their participation in the census.

Figure 1.12: PBS's Social Media Platforms

Furthermore, over the past decade or so, the rise of popular social media platforms like Twitter, Facebook, LinkedIn, Instagram, and YouTube has paved the way for a new era of global digital interaction. These platforms have revolutionized the way people connect and communicate, breaking down geographical barriers. They have become instrumental in the rapid dissemination of information, enabling widespread sharing of news, trends, and ideas on an unprecedented scale. Additionally, the social media is also providing platform for individuals to express their opinions, share experiences, and engage in discussions, thereby fostering a sense of community and inclusivity.

PBS, in conjunction with a comprehensive print and electronic media campaign, engaged based on their impressive presentation and creative work expertise of a social media advertising firm. Since the beginning of the Digital Census activities, the firm has successfully handled PBS's online presence across six prominent social media platforms, including Facebook and X (previously known as Twitter), and consistently excelled in effective spreading of census-related news and information to a wider audience.

Chapter 2: Demographic Information

— برفدجی ملت کی مقدار کا ستارا —

Chapter 2: Demographic Information

Chapter 2 presents the country's population and its dynamics, growth rate, density, and other demographic statistics generated from Population and Housing Census 2023.

Table 2.1: Population of Census Years 1951-2023

Area	POPULATION						
	1951	1961	1972	1981	1998	2017	2023
Pakistan	33,740,167	42,880,378	65,309,340	84,253,644	132,352,279	207,684,626	241,499,431
Khyber Pakhtunkhwa	5,888,550	7,578,186	10,879,781	13,259,875	20,919,976	35,501,964	40,856,097
Punjab	20,540,762	25,463,974	37,607,423	47,292,441	73,621,290	109,989,655	127,688,922
Sindh	6,047,748	8,367,065	14,155,909	19,028,666	30,439,893	47,854,510	55,696,147
Balochistan	1,167,167	1,353,484	2,428,678	4,332,376	6,565,885	12,335,129	14,894,402
Islamabad	95,940	117,669	237,549	340,286	805,235	2,003,368	2,363,863

Table 2.1 shows the total population of Pakistan recorded in seven censuses, from 1951 to 2023. According to the latest census, the total enumerated population is 241,499,431. In the country's first census in 1951, the enumerated population was 33,740,167, that has increased more than seven times in the last 77 years and stands at 241,499,431 in 2023.

**Population of
Census-2023 is
Seven times
higher than
Census-1951**

Figure 2.1: Census Year-Wise Population (In Million)

Table 2.2: Average Annual Growth Rate of Population by Provinces

PROVINCE/AREA	AVERAGE ANNUAL GROWTH RATE (%)						
	1951	1961	1972	1981	1998	2017	2023
Pakistan	-	2.45	3.69	3.06	2.69	2.40	2.55
Khyber Pakhtunkhwa	-	2.58	3.16	2.37	2.72	2.82	2.38
Punjab	-	2.19	3.41	2.75	2.64	2.13	2.53
Sindh	-	3.33	4.63	3.56	2.80	2.41	2.57
Balochistan	-	1.50	5.16	7.09	2.47	3.37	3.20
Islamabad	-	2.08	6.23	4.34	5.19	4.9	2.80

Table 2.2 shows the average annual growth rate of the population during 1961 to 2023. It is noted from the table that in 1961, the growth rate of population in Pakistan was 2.45%. It has increased to 3.69% in 1972 and decreased to 3.06% in 1981, then decreased to 2.69% and 2.41% in 1998 and 2017 respectively before increasing to 2.55% in 2023. The current growth rate is highest in the

region. World's ranking in terms of Population Growth Rate, Pakistan Stands at 191, only 27 countries mostly of Sub Saharan Africa have growth rates higher than Pakistan. It is pertinent to mention that if this growth rate persists, Population of Pakistan will be doubled by 2050. The highest rate is evident in Balochistan (3.20%) and the lowest in Khyber Pakhtunkhwa (2.38%).

If Population Growth Rate of Pakistan i.e. 2.55% persists than the Population will be doubled by 2050

Figure 2.2: Average Annual Growth Rate of Population by Provinces

Table 2.3: Population Share by Provinces

PROVINCE/AREA	POPULATION SHARE (%)						
	1951	1961	1972	1981	1998	2017	2023
Pakistan	100	100	100	100	100	100	100
Khyber Pakhtunkhwa	17.5	17.7	16.7	15.7	15.8	17.1	16.9
Punjab	60.9	59.4	57.6	56.1	55.6	53.0	52.9
Sindh	17.9	19.5	21.7	22.6	23.0	23.0	23.1
Balochistan	3.5	3.2	3.7	5.1	5.0	5.9	6.2
Islamabad	0.3	0.3	0.4	0.4	0.6	1.0	1.0

Table 2.3 shows the population share in terms of percentage among provinces in all censuses. Punjab has the highest share with 52.9% in 2023, however it is continuously decreasing since 1951. Balochistan has the lowest share of Population among provinces

however it is continuously increasing since 1951 from 3.5% to 6.2% in 2023. Similarly, though smallest by area, the share of Population of Islamabad, the Federal Capital is also increasing since 1951.

Punjab has the Highest Share with 53% of population

Figure 2.3: Population Share by Provinces (%)

Table 2.4: Inter-Censual and Commulative Increase

PROVINCE/AREA	INTER-CENSUAL AND COMMULATIVE INCREASE						
	1951	1961	1972	1981	1998	2017	2023
POPULATION (In Million)	33.7	42.9	65.3	84.3	132.4	207.7	241.5
Inter-Censual Increase %		27.09	52.31	29.01	57.09	56.92	16.28
Commulative Increase %		27.09	93.56	149.71	292.27	515.54	615.76
Average per Year Increase %		2.71	4.76	3.22	3.36	2.99	2.71

Figure 2.4 (a): Inter-Censal Increase (%)

Table 2.4 shows the percentage increase in population between census. It is evident the time difference between the censuses was not constant as the 1998 census was conducted after seventeen (17) years, the 2017 census was conducted after nineteen (19)

years and the 2023 census was conducted after six (6) years, therefore the average annual increase shows better picture. It reveals that the average increase of population is decreasing since 1998 (Figure 2.4(b)).

Figure 2.4 (b): Average Per Year Increase (%)

Table 2.5: Population Change from 2017 to 2023 by Provinces

PROVINCE/AREA	Population Change	
	Population Change 2017-2023	% Change 2023
Pakistan	33,814,805	16.28
Khyber Pakhtunkhwa	5,354,133	15.08
Punjab	17,699,267	16.09
Sindh	7,841,637	16.39
Balochistan	2,559,273	20.75
Islamabad	360,495	17.99

Table 2.5 shows the percentage change in population in provinces from 2017 to 2023. The highest percentage increase is 20.75 in Balochistan and the lowest change is 15.08 in Khyber Pakhtunkhwa.

Figure 2.5: Population Change from 2017 to 2023(%)

Table 2.6: Density (Per Sq Km) by Provinces

PROVINCE/AREA	DENSITY (Per Square km)						
	1951	1961	1972	1981	1998	2017	2023
Pakistan	42.4	53.9	82.0	105.8	166.3	260.9	303.4
Khyber Pakhtunkhwa	57.9	74.5	106.9	130.3	205.6	348.9	401.6
Punjab	100.0	124.0	183.1	230.3	358.5	535.6	621.8
Sindh	42.9	59.4	100.5	135.0	216.0	339.6	395.2
Balochistan	3.4	3.9	7.0	12.5	18.9	35.5	42.9
Islamabad	105.9	129.9	262.2	375.6	888.8	2211.2	2609.1

Table 2.6 displays the population density per square km. It is observed that with the rapid increase in population the population density is constantly increasing from 42.4 person per sq km in 1951 to 303.4 person per square km in 2023.

Highest density (2609.1 per square kilometer) is observed in Islamabad showing the patterns of growth of Federal Capital, followed by Punjab with 622 persons per square km while the lowest is in Balochistan with 42.9 per square kilometer.

Figure 2.6: Density (Per Sq Km)

The Map 1 "Division wise Population Density" presents a snapshot of Pakistan's demographic landscape. Karachi Division in Sindh emerges as the most densely populated, with a density of 5779, followed by the Federal Capital Islamabad with 2609 persons per square km. Lahore Division in Punjab and Mardan Division in Khyber Pakhtunkhwa exhibit highest population density with 1942 and 1461 persons per square km, respectively. However, in Balochistan, majority divisions are less populated as compared to area. Rakhshan, Kalat, Zhob, Mekran, and Sibi, are thinly populated with density per sqkm ranging from 11 to 38, emphasizing the province's vast and varied terrain. This data provides a concise overview of the distribution and density of Pakistan's population, offering valuable insights into regional demographic patterns.

Map 2 delineates the district-wise population density. Among all districts, Karachi Central emerges with the highest population density at 55,396 persons per sqkm, followed by Korangi, Karachi East, and Karachi South in Sindh and Lahore in Punjab. On the other hand, districts Awaran and Chagai with 6 persons, Washuk with 9 person , Kharan with 17 persons and Zhob with 22 persons per sqkm in Balochistan, have the lowest density in the whole country .

***Balochistan
is biggest
Province by
Area but
Lowest by
Population
Density***

Map 3 provides insights into the population density distribution in the Punjab province and Islamabad. In Punjab, cities like Lahore, Gujranwala, Faisalabad, Sialkot, and

Multan exhibit high population densities at 7,339, 1,645, 1,550, 1,492, and 1,441, persons per sqkm respectively. In contrast, districts such as Bahawalpur, Rajanpur, Khushab, Bhakkar, and Chakwal show lower population densities at 173, 193, 231, 240, and 266 persons per sqkm respectively. The federal capital, Islamabad, stands out with a substantially high population density of 2,609 persons per sqkm reflecting the rapidly increasing population. This district-wise analysis provides a comprehensive overview of the demographic patterns in Punjab and Islamabad, essential for informed policymaking and development planning.

Map 4 unveils the district wise population density distribution in the Sindh province. In Sindh, all districts of Karachi being the economic hub are densely populated. Karachi Central has the highest density with 55,396 persons per sqkm, followed by Korangi, Karachi East, Karachi South, and Karachi West, with population densities of 28,972, 28,214, 19,096, and 7,242 persons per sqkm respectively. However, in contrast some of the districts of interior Sindh like Tharparkar, Sujawal, Jamshoro, Thatta, and Khairpur are sparsely populated with 91, 96, 100, 126, and 163, persons per sqkm respectively, reflecting a more dispersed demographic pattern in these districts.

Map 5 provides insights regarding district wise population density in Khyber Pakhtunkhwa province from the Digital Census of 2023. Peshawar emerges with the highest

density at 3135 persons per sqkm, reflecting its status as the capital and an economic hub. Charsadda and Mardan follow with notable densities of 1843 and 1682 persons per sqkm, respectively. In contrast, Upper Chitral, Lower Chitral, and Upper Kohistan show sparse populations, attributable to remote and challenging terrains. The tribal districts of South Waziristan and North Waziristan exhibit moderate densities (134 and 147), reflecting the impact of historical and security considerations on settlement patterns. Overall, this data provides a comprehensive overview of population distribution in Khyber Pakhtunkhwa, highlighting the diverse factors shaping density variations among its districts.

Map 6 provides district wise population density of Balochistan., Quetta emerges with the highest population density at 753, reflecting its role as the provincial capital and a significant urban center. Surab, Jaffarabad, and Chaman follow with densities of 366, 362, and 348 person per Sq Km respectively, in contrast the districts like Awaran, Chagai, Washuk, Kharan, and Zhob exhibits substantially lower densities ranging from 6 to 22, suggesting sparser populations likely influenced by geographical factors and a less-developed infrastructure.

Table 2.7: Population by Sex

PROVINCE/ AREA	Census-2017				Census-2023			
	All sexes	Male	Female	Trans gender	All sexes	Male	Female	Trans gender
Pakistan	207,684,626	106,318,220	101,344,632	21,774	241,499,431	124,324,406	117,154,694	20,331
Khyber Pakhtunkhwa	35,501,964	17,996,196	17,503,443	2,325	40,856,097	20,845,747	20,009,233	1,117
Punjab	109,989,655	55,909,774	54,067,446	12,435	127,688,922	65,448,376	62,226,589	13,957
Sindh	47,854,510	24,876,186	22,972,370	5,954	55,696,147	29,014,424	26,677,501	4,222
Balochistan	12,335,129	6,483,736	5,850,613	780	14,894,402	7,768,166	7,125,471	765
Islamabad	2,003,368	1,052,328	950,760	280	2,363,863	1,247,693	1,115,900	270

Figure 2.7: Population by Sex- Census 2023

Table 2.7 depicts the population with gender disaggregation, the percentage of male (51.48%) and female (48.51%) almost remained same during the census 2017 and census 2023. Highest percentage of male are reported in Islamabad and Balochistan, while highest percentage of females reported in Khyber Pakhtunkhwa and Punjab depicting the

migration patterns for economic and other reasons. Transgender constitute the nominal proportion, as census data is respondent based and due to cultural reasons these people may shy from sharing their identity and only those who are obvious by their physical looks, are clearly reported. Highest number of transgenders are reported in Punjab and lowest in Islamabad.

Table 2.8: Sex Ratio

PROVINCE/AREA	2017	2023
PAKISTAN	104.91	106.12
Khyber Pakhtunkhwa	102.82	104.18
Punjab	103.41	105.18
Sindh	108.29	108.76
Balochistan	110.82	109.02
Islamabad	110.68	111.81

Table 2.8 illustrates the sex ratio (number of males per 100 females) in census years 2017 and 2023. It is observed that sex ratio has increased from 105 in 2017 to 106 in 2023, predominantly due to increase in sex ratio in Punjab. Islamabad with 111.81 males per 100 females have the highest sex ratio while Khyber Pakhtunkhwa

with 104.18 has the lowest in the provinces clearly depicting the demographic patterns in the areas influenced by the economic and social factors. The Sex ratios in census 2023 as compared to census 2017 are illustrated in the Figure 2.8 below.

Figure 2.8: Sex Ratio

Table 2.9: Population by Rural/Urban

Province/Area	Census-2017			Census-2023		
	Total	Rural	Urban	Total	Rural	Urban
Pakistan	207,684,626	132,013,789	75,670,837	241,499,431	147,614,729	93,884,702
Khyber Pakhtunkhwa	35,501,964	29,626,670	5,875,294	40,856,097	34,724,801	6,131,296
Punjab	109,989,655	69,442,450	40,547,205	127,688,922	75,712,955	51,975,967
Sindh	47,854,510	23,021,876	24,832,634	55,696,147	25,639,408	30,056,739
Balochistan	12,335,129	8,928,428	3,406,701	14,894,402	10,282,574	4,611,828
Islamabad	2,003,368	994,365	1,009,003	2,363,863	1,254,991	1,108,872

Table 2.9 displays the distribution of population by location (rural/urban) and by Provinces. It is pertinent to mention here that PBS follows the definitions of rural/urban as defined by the Revenue departments and local governments. Therefore, the areas declared rural/urban by the

respective departments have been treated and reported as rural/urban in above tables. It is noted that urbanization is increasing gradually and in census 2023 almost 38.88% population is living in urban areas as compared to 36.44% in 2017 (Figure 2.9(a) & Table 2.10).

Figure 2.9 (a): Population by Rural/Urban (%)

Figure 2.9 (b): Population of Provinces by Rural/Urban (%)

Table 2.10: Urbanization

PROVICE/AREA	Urban Population (%) 2017	Urban Population (%) 2023
Pakistan	36.44	38.88
Khyber Pakhtunkhwa	19.83	15.01
Punjab	36.86	40.71
Sindh	51.89	53.97
Balochistan	27.62	30.96
Islamabad	50.37	46.91

Table 2.10 displays the urban population percentages for provinces in Pakistan with comparison with census 2017. Notably, Sindh maintains the highest urbanization rate at 53.97%, showing a continued upward trend. Conversely, Khyber Pakhtunkhwa experiences a decline from 19.83% in 2017 to 15.01% in 2023, mainly due to merger of Federally Administered Tribal Areas (FATA), which are predominately rural. Punjab has also shown significant urbanization trend, with the urban population rising from 36.86% to 40.71%. Balochistan also

experiences growth, reaching 30.96 % in 2023 as compared to 27.62% in 2017. Interestingly, Islamabad the Federal Capital has shown consistent decline in urban population share from 65.7% in 1998 to 50.37% in 2017 and 46.91% in 2023, Probably due to the city population is shifting to suburbs therefore increasing the percentage of population in rural areas.

Table 2.11: Cities with Population of 0.5 Million & Above

S.No.	NAME OF CITY	POPULATION 2017	POPULATION 2023	2017-2023 AVG. ANNUAL GROWTH RATE

22	RAHIM YAR KHAN	420,963	519,261	3.57
23	KASUR	358,296	510,875	6.11

Table 2.11 displays the twenty-two (22) cities with population of 0.5 million and above. Out of twenty-two big cities, fifteen 15 big cities belong to Punjab with highest population in Lahore. While Four (4) big cities belongs to Sindh with highest population concentration in Karachi, which also have highest population in the whole

country. Peshawar and Quetta are the highest population cities in Khyber Pakhtunkhwa and Balochistan respectively. Islamabad the Federal Capital is at the 10th Position in the twenty-two highly populated cities.

*Including rural and urban population of all 7 districts of Karachi division.

**Including urban population of all 7 districts and 6 cantonments of Karachi division.

*** whole district is urbanized.

Table 2.12: Percentage of Population by Age Groups

Table 2.12 presents the age sex distribution of the country. It is observed that highest population concentration is in the age group 0-4, which increased from 14.04 % in 2017 to 15.17% in 2023 depicting the high birth rate in the country. Further the concentration of population in younger age groups i.e. less than 15 is persistently highest with 40.56% population below 15 in census 2023 as compared to 40.31%

in census 2017. It is worth mention that almost 67% population is below 30 and almost 80 percent is below 40 years depicting the young Population country, a huge demographic dividend is available for policy and planning. The percentage of population 65 year and above is only 3.55% and it has almost same trend ascompared to census 2017.

The table presents marital status statistics of population 15 years & above by Provinces for the census 2023 and 2017 data. In 2023, at the national level, out of a total population of 240.5 million, 30% individuals are never married, 66% are married, and almost 4% are widowed, or divorced. Similar patterns are observed in the

Provinces. Highest percentage of never married in Islamabad with 31.44% and lowest in Khyber Pakhtunkhwa with 29%. Comparing to 2017, there is marginal decrease in the patterns of never married and increase in percentage of married persons.

Table 2.14 provides religious demographic information based on the 2023 and 2017 census data. In 2023, the majority i.e. 231.68 million with 96.35% reported as Muslim. Other significant religious groups include Christians (3.3 million) with 1.37%, Hindus (3.9 million) with 1.61% and Scheduled Castes (1.35 million) with 0.56%. The distribution varies across provinces where Khyber Pakhtunkhwa

and Balochistan are almost absolute Muslim majority provinces, while highest number of non-Muslims reside in Sindh, followed by Punjab. The trends are same as compared to census 2017, the only difference in improvement in reporting of scheduled caste by clear differentiation between Hindu and scheduled caste.

Figure 2.12: Population by Religion (%)

Table 2.15 (a): Nationality by Provinces

Province/ Area	Census-2017			Census-2023		
	Total	Pakistani	Non Pakistani	Total	Pakistani	Non Pakistani
Pakistan	207,684,626	206,287,447	1,397,179	240,458,089	238,332,010	2,126,079
Khyber Pakhtunkhwa	35,501,964	34,945,033	556,931	40,641,120	39,668,974	972,146
Punjab	109,989,655	109,768,552	221,103	127,333,305	126,959,469	373,836

Balochistan	12,335,129	11,872,340	462,789	14,562,011	14,049,619	512,392
Islamabad	2,003,368	1,966,926	36,442	2,283,244	2,227,199	56,045

Table 2.15(a) displays the Nationality of the Population for 2023 and 2017 census by provinces. In 2023, the total population of Pakistan is around 240.5 million, with over 238 million being Pakistani citizens i.e. 99% and about 2.1 million non-Pakistani residents i.e. 1%. The trend is almost same as in census 2017. The concentration of non-nationals is highest in Khyber Pakhtunkhwa, followed by Balochistan. It is worth mentioning that in census 2023 unlike 2017, non-nationals are further disaggregated into four categories, i.e. Afghani, Bengali, Chinese and others. This helped to identify the demographics of non-nationals with their concentration areas as depicted below in Table 2.15(b).

Table 2.15 (b): Nationality by Provinces Census-2023

Province/ Area	Census-2023					
	Total	Pakistani	Afghani	Bengali	Chinese	Others
Pakistan	240,458,089	238,332,010	1,923,453	26,900	3,568	172,158
Khyber Pakhtunkhwa	40,641,120	39,668,974	939,878	539	266	31,463
Punjab	127,333,305	126,959,469	310,832	1,224	1,843	59,937
Sindh	55,638,409	55,426,749	145,875	24,137	757	40,891
Balochistan	14,562,011	14,049,619	474,812	926	314	36,340
Islamabad	2,283,244	2,227,199	52,056	74	388	3,527

The above table shows that the majority of non-nationals are Afghanis i.e. 91%, while remaining are almost nominal. Highest number of Afghani are residing in Khyber Pakhtunkhwa, followed by Balochistan. The numbers of Bengali non-nationals are highest in Sindh and lowest in Khyber Pakhtunkhwa.

Table 2.16 displays the major languages spoken in different parts of Pakistan in 2023 and 2017. In 2023, nationally, around 9.25% of people speak Urdu, as compared to 7.08 percent in 2017. Highest proportion of Urdu speaking population is in Sindh followed by Islamabad with 15.72%. The most common language is Punjabi with 36.98% which has highest proportion in Punjab with 67% followed by

Islamabad with 50%. In Khyber Pakhtunkhwa, a majority (81.00%) speak Pushto, followed by Hindko with 9.39%. On the other hand, in Sindh the most spoken language is Sindhi with 60% followed by Urdu with 22.30%. In Balochistan, main language is Balochi, with 39.91% followed by Pushto with 34.30%. Islamabad uses a mix of Urdu, Punjabi and Pushto.

Figure 2.14: Percentage of Population by Mother Tongue (%)

Literacy

Literacy is an important indicator of education and it has significant impact on development of the country. According to Census-2023, (Figure 2.15) 61% population 10 years and above in Pakistan are literate. This is a slight increase from literate population 59% of census 2017. Further, the overall males have higher literacy rate with 68 percent as compared to females with 53percent.

There is disparity between male and

female literacy ratio across provinces while disparity being highest 28% in province Khyber Pakhtunkhwa and lowest 9% in Islamabad. Moreover, the provincial picture depicts that Punjab has the highest literacy rate with 66% among all provinces, followed by Sindh with 58 % and Khyber Pakhtunkhwa with 51% while Balochistan has the lowest literacy rate with 42%.

Literate Population of Pakistan is 171.71 Million. Punjab has Highest literacy Rate i.e. 66% among all four Provinces

Table 2.17: Literate Population 10 Years & Above

Figure 2.15: Percentage of Literate Population 10 years and above

Figure 2.16: Percentage of Literate Population by Rural/Urban

Out of School Children age (5-16) years

Out of school children 5-16 years are calculated from children who have never been to school and dropped from school. As per census-2023 there are 71 million population 5-16 years of age in Pakistan, out of which 25 million (36%) are out of school children, of these 36% there are 28% have never been to school and 7.5% are those who ever attended and then got dropped from

school and left afterwards. The overall regional comparison shows that the percentage of out of school children i.e 41% is higher in rural areas as compared to urban areas with 25%. The overall Punjab has the lowest out of School children with 27% followed by KP with 37% and Sindh with 46% while; Balochistan has the highest out of school children with 58%.

Figure 2.17: Out of School Children (5-16) Years in Pakistan

Figure 2.18: Province Wise Population (5-16) and Out of School Children (5-16) Years (in Million)

While considering the out of school children between age cohort like 5-10,11-13 and 14-16 years, data shows the alarming situation that Islamabad have the highest percentage with 4.34% of population age 5-10, years drop out from school followed by Sindh with 3.1% and dropout is increasing in the age group 14-16

where Punjab have the highest percentage of dropout student with 21.87% followed by Sindh with 16.46%. Balochistan have the higher percentage of never been to school in age cohort of 14-16 years i.e. 57.73% followed by Sindh with 39.22% while Khyber Pakhtunkhwa with 32.27% and Punjab with 18.12%.

Figure 2.19: Out of School Children (5-10) Years

Figure 2.20: Out of School Children (11-13) Years

Figure 2.21: Out of School Children (14-16) Years

Functional Limitation/Disability

In the previous census i.e. 1981, 1998, the question for gauging the exact nature of disability was asked in the long form which was enumerated on the sample based and according to them the percentage of disabled population was 0.49 and 2.38% respectively. However, this information could not be collected in census 2017 due to dropping of sampled enumeration based on Long form. During preparations of Census 2023, a technical committee was constituted for designing of questionnaire by Census Advisory committee, comprising of renowned demographers and experts. They thoughtfully considered the inclusion of questions regarding disability. After detailed deliberations with all the stakeholders including Community Based Inclusive Development Network (CBIDN), the technical committee recommended to include set of questions designed by Washington Group on Disability Statistics (WG). The WG promotes and coordinates international cooperation in the

area of health statistics focusing on the development of disability measures suitable for census and national surveys. These questions are designed to **ascertain functional limitations** in any of the activities like seeing, hearing, walking/climbing, in communication or remembering/concentration or washing/dressing/holding/writing etc. It is also pertinent to mention that the same set of questions has been used in recent censuses conducted in the majority of countries including UK, Maldives etc. It is pertinent to mention here that these questions only ascertain the severity of the issue to perform the said activity and cannot exactly gauge whether the people are disabled or otherwise. Disability statistics are measured through proxy as per guidelines provided by WG by combining two options i.e. **a lot of difficulty to perform the activity and cannot perform the activity at all.**

Table 2.18: Disabled Population Census-2023

Province/Area	Disability Census 2023		
	Total	Male	Female
Pakistan	7,448,574	4,088,899	3,359,675
Khyber Pakhtunkhwa	1,285,273	700,886	584,387
Punjab	4,487,038	2,488,776	1,998,262
Sindh	1,297,882	691,521	606,361
Balochistan	305,359	164,672	140,687
Islamabad	73,022	43,044	29,978

Figure 2.22: Percentage of Disabled Population

According to Census 2023, Table 2.18 (Figure 2.22) shows the percentage of disabled population measured through proxy stands at 3.10% (by adding a lot of difficulty to perform the activity and cannot perform the activity at all). In province Khyber Pakhtunkhwa, Punjab and Islamabad 3% population are disabled while in Sindh and Balochistan 2% are disabled population. The figure shows female population percentage is less disabled as compared to male population in all provinces and federal capital.

Functional limitation is measured by combining three options i.e. a) **Less difficulty to perform the activity** b) **a lot of difficulty to perform the activity and c) cannot perform the activity at all.** It is pertinent to mention here that; it is possible that an individual can face more than one difficulty in performing his daily functions.

Table 2.19: Functional Limitation Census 2023

Province/Area	Functional Limitation Census 2023		
	Total	Male	Female
Pakistan	23,170,373	12,239,992	10,930,381
Khyber Pakhtunkhwa	3,406,060	1,779,814	1,626,246
Punjab	13,507,697	7,142,499	6,365,198
Sindh	5,139,958	2,722,682	2,417,276
Balochistan	931,278	489,742	441,536
Islamabad	185,380	105,255	80,125

Figure 2.23: Functional Limitation by Provinces Census 2023

Figure 2.23 shows the percentage of population with functional limitation stands 9.64% (by adding all three i.e. some difficulty, a lot of difficulty to perform the activity and cannot perform the activity at all). This means almost 6.54% of population have some of the functional limitation in any of the activities like seeing, hearing, walking/climbing, in communication or

remembering / concentration or washing/dressing/holding/writing etc. The high percentage of functional limitations in males in all provinces of Pakistan. The Punjab has 10.61% population with functional limitations which is high among all provinces followed by Sindh 9.24%, Khyber Pakhtunkhwa 8.38% and Balochistan 6.40%.

Table 2.20: Percentage of Functional Limitations by Age Groups in Pakistan

Province/Area		Functional limitation Census 2023						
		Population	Seeing	Hearing	Walking/Climbing	Communication	Memorization/Focus	Self care etc
Pakistan	Number	240,458,089	4,314,433	4,778,218	7,493,240	2,584,399	3,538,180	2,611,695
	Percent	1.79	1.99	3.12	1.07	1.47	1.09	
Khyber Pakhtunkhwa	Number	40,641,120	657,696	687,790	1,170,285	421,225	562,712	361,553
	Percent	1.62	1.69	2.88	1.04	1.38	0.89	
Punjab	Number	127,333,305	2,463,045	2,759,390	4,337,871	1,511,716	2,037,298	1,548,468

	Percent	1.22	1.30	2.08	0.65	0.92	0.73	
Islamabad	Number	2,283,244	33,769	37,581	61,634	22,481	29,468	22,336
	Percent	1.48	1.65	2.70	0.98	1.29	0.98	

*Sum of functional limitations are not equal to total population as one person have more than one functional limitation

Table 2.20 depicts that in Pakistan the difficulty in walking/climbing is one of the most cited the functional limitation for performing the daily functions i.e. 3.12%. This pattern is same for all provinces and Punjab has the highest percentage

for walking/climbing 3.41% followed by Sindh 2.91%, Khyber Pakhtunkhwa 2.88% and Balochistan 2.08%. Second highest functional limitation is hearing and Punjab has the highest 2.17% in all Provinces.

Table 2.21: Functional Limitations by Age Groups

	Percent	0.06	0.11	0.09	0.06	0.29	0.45	2.92	3.86

Table 2.21 shows the population with functional limitations by age groups. The percentage is highest (3.88%) in the age group of 41-60 years in Pakistan as well as in all provinces. The Figure

2.24 shows the negatively skewed pattern of functional limitations which is also depicted in bar chart with the increase of age from 0 to 60.

Figure 2.24: Percentage of Functional Limitations by Age Groups in Pakistan

Chapter 3: Household Characteristics

— بر فرد بے ملت کے مقدار کا ستارا۔ —

Chapter 3: Household Characteristics

Table 3.1: Number of Households and Average Household Size

Province/Area	Number of Households		Average Household Size	
	2017	2023	2017	2023
Pakistan	32,185,605	38,340,566	6.39	6.30
Khyber Pakhtunkhwa	4,400,673	5,883,007	7.83	6.95
Punjab	17,107,953	19,855,902	6.38	6.44
Sindh	8,570,972	9,871,620	5.55	5.65
Balochistan	1,770,065	2,318,519	6.87	6.43
Islamabad	335,942	411,518	5.86	5.76

Table 3.1 presents the number of households and average household size in administrative units in Pakistan between the years 2017 and 2023. It is observed that number of households increased substantially in all provinces during this six-year period. The highest increase is in Khyber Pakhtunkhwa with 33%, followed by Balochistan with 31% and Islamabad with 22%. Between two censuses. This increase depicts the

general trend of increase in nuclear households resulting in decreasing household size in these areas. At the national level, household size has decreased slightly from 6.39 person in 2017 to 6.30 persons in 2023, (figure 3.1), however, there is slight increase in household size in Sindh and Punjab from 5.55 to 5.65 and 6.38 to 6.44, respectively, between 2017 to 2023.

Figure 3.1: Average Household Size

Table 3.2: Population by Type of Housing Units and Number of Households

Type of Housing Units	Census-2023				
	Number of Households	All Sexes	Population		
			Male	Female	Transgender
Pakistan	38,340,566*	240,458,089	123,824,681	116,613,077	20,331
Regular	38,312,137	239,674,734	123,243,622	116,411,937	19,175
Institutional	12857	585,067	445,592	139,341	134
Homeless	15572	198,288	135,467	61,799	1,022
Type of Housing Units	Census-2017				
	Number of Households	All Sexes	Population		
			Male	Female	Transgender
Pakistan	32,185,605	207,684,626	106,318,220	101,344,632	21,774
Regular	31,915,884	203,933,043	103,913,526	99,998,669	20,848
Institutional	259,675	3,713,168	2,380,347	1,331,927	894
Homeless	10,046	38,415	24,347	14,036	32

*Including 19581 households for which detailed housing characteristics are not available.

Table 3.2 displays the disaggregation of households by type, which reveals that almost 99% are regular households and there is very nominal percentages of collective residences and homeless. However number of homeless population slightly increase from 10,046 to 15,572 (0.03 to 0.04 percent) respectively.

Table 3.3: Main Fuel Used for Cooking by Provinces

Administrative Unit	Census-2023			
	Total Households	Gas/LPG/LNG	Fire Wood	Others
Pakistan	38,292,556	16,094,362	20,188,669	2,009,525
Khyber Pakhtunkhwa	5,861,457	1,492,279	4,184,082	185,096
Punjab	19,839,980	8,895,646	9,908,476	1,035,858
Sindh	9,862,870	4,863,981	4,418,445	580,444
Balochistan	2,317,256	489,635	1,623,565	204,056
Islamabad	410,993	352,821	54,101	4,071
Administrative Unit	Census-2017			
	Total Households	Gas/LPG/LNG	Fire Wood	Others
Pakistan	31,915,884	12082366	18652619	1180899
Khyber Pakhtunkhwa	4,360,013	982,970	3,295,113	81,930
Punjab	16,999,685	6,445,788	9,835,133	718,764
Sindh	8,478,047	4,017,385	4,197,054	263,608
Balochistan	1,745,994	419,172	1,252,959	73,863
Islamabad	332,145	217,051	72,360	42,734

Table 3.3 and Figure 3.2 (a) displays the number of households using specific fuel for cooking. It is pertinent to mention here that considering the increase of use of LPG/LNG as cooking fuel, separate categories have been added in Census 2023 questionnaire to observe the trend. Further, in census 2017 the LPG/LNG was covered as Gas. It is found that firewood is major source of fuel for cooking in overall Pakistan with 53% in 2023 as compared to 58% in 2017 followed by Gas/LPG/LNG with 42% as compared to 38% in 2017 and others with 5% in 2023 as compared to 4% in 2017.

Figure 3.2 (a): Percentage of Households by Main Fuel Used for Cooking 2017-2023

Figure 3.2 (b) presents the percentage of fuel used for cooking by Provinces. There is disparity in provinces and variations in use of fuel of cooking. Predominant percentage of households in Khyber Pakhtunkhwa and Balochistan with 71.38% & 70.06% respectively use Firewood as fuel for cooking followed by 49.94% households in Punjab. Gas/LPG/LNG is the fuel used by 85.85% of households in Islamabad followed by 49.32% households in

Sindh. In percentage terms, slight increase has been observed in use of GAS/LPG/LNG in Punjab and Sindh while Khyber Pakhtunkhwa remain stagnant. Decline of 3 percent in the use of GAS/LPG/LNG has been observed in Balochistan in Census 2023 as compared to Census 2017 while slight increase has been observed in Others in Balochistan that includes biogas, electricity, kerosene oil etc.

Figure 3.2 (b): Percentage of Households by Main Fuel used for Cooking in Provinces

Table 3.4: Main Source used for Lighting by Households

Administrative Unit	Census-2023			
	Total Households	Electricity	Solar	Others
Pakistan	38,292,556	32,179,042	2,962,152	3,151,362
Khyber Pakhtunkhwa	5,861,457	4,683,337	765,777	412,343
Punjab	19,839,980	18,838,306	335,359	666,315
Sindh	9,862,870	6,936,738	1,240,276	1,685,856
Balochistan	2,317,256	1,323,303	611,685	382,268
Islamabad	410,993	397,358	9,055	4,580
Administrative Unit	Census-2017			
	Total Households	Electricity	Solar	Others
Pakistan	31,915,884	28,043,661	-	3,872,223
Khyber Pakhtunkhwa	4,360,013	3,691,859	-	668,154
Punjab	16,999,685	15,971,304	-	1,028,381
Sindh	8,478,047	6,820,056	-	1,657,991
Balochistan	1,745,994	1,237,000	-	508,994
Islamabad	332,145	323,442	-	8,703

Table 3.4 presents the number of households by provinces by main fuel used for lighting. Considering the ground realities, information regarding use of solar for the purpose of lightning fuel used by household has also been collected along with electricity and other possible sources including Kerosene oil, Gas lamp, generator, Biogas etc. Significant figure against solar has been observed at National

level that is around 8 percent (Figure 3.3 (a) & 3.3 (b)). Use of solar for lighting is 26% Balochistan is highest among all the provinces, followed by Khyber Pakhtunkhwa (13%) and Sindh (13%). Overall use of electricity (Grid and Non Grid) as source of lighting has been increased to 92 percent in census 2023 as compared to 88 percent in census 2017

Figure 3.3 (a): Percentage of Households by Main Source used for Lighting 2017-2023

Figure 3.3 (b): Percentage of Household by Main Source used for Lighting in Provinces

Table 3.5: Type of Kitchen by Households

Administrative Unit	Census-2023			
	Total Households	Separate Kitchen	Shared Kitchen	No Kitchen
Pakistan	38,292,556	23,129,761	6,646,654	8,516,141
Khyber Pakhtunkhwa	5,861,457	3,641,281	1,394,489	825,687
Punjab	19,839,980	12,452,043	2,130,135	5,257,802
Sindh	9,862,870	5,457,288	2,337,618	2,067,964
Balochistan	2,317,256	1,229,647	738,677	348,932
Islamabad	410,993	349,502	45,735	15,756
Administrative Unit	Census-2017			
	Total Households	Separate Kitchen	Shared Kitchen	No Kitchen
Pakistan	31,915,884	17,499,879	6,168,059	8,247,946
Khyber Pakhtunkhwa	4,360,013	2,660,751	1,079,942	619,320
Punjab	16,999,685	8,811,075	2,477,864	5,710,746
Sindh	8,478,047	4,761,528	2,083,091	1,633,428
Balochistan	1,745,994	993,342	482,118	270,534
Islamabad	332,145	273,183	45,044	13,918

Table 3.5 Presents information regarding type of kitchen in the households. Separate kitchen has increased from 55% in census 2017 to 60% in census 2023. Significant increase in separate kitchen has been observed in Punjab where separate kitchen increased to 62 percent in 2023 as compared to 52 percent in 2017 and significant decrease of 4 percent observed in no kitchen facility (Figure 3.4). This trend also

suggests concept of increase in nuclear families due to socio-economic factors. For other provinces, increase or decrease of 2-3 percent observed in separate kitchen and same is the observed for no kitchen facility.

Figure 3.4: Percentage of Households with Kitchen Facility (%)

Table 3.6: Number of Owned, Rented and Rent-Free Households

Administrative Units	Census-2023				
	Households	Owned House	Rented House	Rent Free	Others
Pakistan	38,292,556	31,365,719	4,544,810	1,608,893	773,134
Khyber Pakhtunkhwa	5,861,457	4,922,600	602,090	262,324	74,443
Punjab	19,839,980	16,727,114	2,093,074	684,936	334,856
Sindh	9,862,870	7,509,884	1,556,194	528,465	268,327
Balochistan	2,317,256	1,987,168	144,049	122,920	63,119
Islamabad	410,993	218,953	149,403	10,248	32,389
Administrative Units	Census-2017				
	Households	Owned House	Rented House	Rent Free	Others
Pakistan	31,915,884	26,215,418	3,681,007	2,019,459	-
Khyber Pakhtunkhwa	4,360,013	3,665,735	455,318	238,960	-
Punjab	16,999,685	14,371,998	1,719,264	908,423	-
Sindh	8,478,047	6,537,524	1,229,182	711,341	-
Balochistan	1,745,994	1,473,324	133,368	139,302	-
Islamabad	332,145	166,837	143,875	21,433	-

Table 3.6 displays the information regarding residential status of household, the trends observed in census 2023 are almost same as observed in 2017. In Census 2017 the residence provided by Government and Private employers were captured in rented house, but considering the ground realities, the codes of Government, non-Government has been included in 2023. As the percentage of Government & Non-

Government is nominal, around 2% therefore reported with others. 82% of the households in Pakistan owned their housing units, while 11.87% lives in rented houses, 4.20% lives in Rent free houses. Highest number of households (Figure 3.5) i.e. 86% in Balochistan owned their houses while Islamabad the Federal Capital has the lowest percentage of own house with 54%. Comparing the provincial trends slight deviation of around 1-2 % has been observed in Owned, Rented and Rent-free House.

Figure 3.5: Percentage of Owned, Rented and Rent-Free Households

Drinking Water Facilities

In the current Census exclusive information in detail has been collected regarding main source of drinking water. Keeping in view, the changed ground reality and advent of filtration plan and mineral water facility.

Table 3.7 (a): Inside and Outside Drinking Water Facility, Census 2023

Province	Total Households	Inside	Outside
Pakistan	38,292,556	25,451,605 (66%)	12,840,951 (34%)
Khyber Pakhtunkhwa	5,861,457	3,806,929 (65%)	2,054,528 (35%)
Punjab	19,839,980	14,160,104 (71%)	5,679,876 (29%)
Sindh	9,862,870	6,287,230 (64%)	3,575,640 (36%)
Balochistan	2,317,256	954,345 (41%)	1,362,911 (59%)
Islamabad	410,993	242,997 (59%)	167,996 (41%)

Table 3.7 (a) shows that the availability of inside drinking water facility is higher than outside in all provinces except Balochistan where it is only 41 % inside the house as compare to 59% drinking water facility outside of the house. In Punjab the inside drinking water facility is 42% higher than outside which is higher than all provinces.

Table 3.7 (b): Source of Drinking Water, Census 2023

Province		Total Households	Tap water	Motor Pump	Dug Well	Filtration Plant	Bottle Water	Others
Pakistan	Number	38,292,556	12,367,255	17,640,383	1,582,676	2,441,594	561,369	3,699,279
	Percent		32.30	46.07	4.13	6.38	1.47	9.66
Khyber Pakhtunkhwa	Number	5,861,457	2,043,804	2,189,647	599,848	18,300	4,800	1,005,058
	Percent		34.87	37.36	10.23	0.31	0.08	17.15
Punjab	Number	19,839,980	4,971,801	11,486,499	192,508	2,080,492	166,734	941,946
	Percent		25.06	57.90	0.97	10.49	0.84	4.75
Sindh	Number	9,862,870	4,515,277	3,366,721	350,219	293,399	371,449	965,805
	Percent		45.78	34.14	3.55	2.97	3.77	9.79
Balochistan	Number	2,317,256	736,886	395,086	425,825	3,384	7,497	748,578
	Percent		31.80	17.05	18.38	0.15	0.32	32.30
Islamabad	Number	410,993	99,487	202,430	14,276	46,019	10,889	37,892
	Percent		24.21	49.25	3.47	11.20	2.65	9.22

Table 3.7 (b) shows the different sources of drinking water. Motor pump has been cited the biggest drinking water facility in Punjab 58% followed by Khyber Pakhtunkhwa 37%, Sindh 34% and Balochistan 17%. Tap water facility is the main source of drinking water in Balochistan as compare to any other sources, Tap water facility is highest Sindh 46% followed by Balochistan 32% Khyber Pakhtunkhwa 35%, and lowest in Punjab 25%. The use of filtration plant has highest percentage in Punjab 11% while Dug well is higher in households of

Motor Pump has been cited the biggest drinking Water Source i.e. 46% among all Sources of Drinking Water available in Pakistan

Balochistan 18%. Bottled water has highest percentage in Sindh 4% households using this facility while it is lowest in Khyber Pakhtunkhwa 0.1%.

Figure 3.6 (a): Percentage of Inside and Outside Drinking Water Facility

*The numbers are based on the information for the cases for which all individual level information is collected including the restricted areas/collective households population where only headcounts were provided.

**Average household size is calculated on total households and population bases, whereas in NCR and PCR the household size is calculated on regular households and population bases.

Annex-II: Concepts and Definitions

Urban Area

All localities which were either Metropolitan Corporation, Municipal Corporation, Municipal Committee, Town Committee or Cantonments at the time of census were treated as urban areas as declared by the respective Provincial Government Departments.

Household

A household means a group of persons living together who have collective arrangements for cooking/eating. A person living alone was also considered to constitute a household. The distinguishing characteristics of a household is its common cooking arrangements.

Housing Unit

A Housing Unit means a separate and independent place of abode, inhabited by one household and, if vacant meant for habitation by one household. It does not necessarily mean a separate building. A building may have one or more housing units. Furthermore, any place not intended for habitation but occupied by a household at the time of census was also treated as a housing unit.

Room

A room is defined as a space in a housing unit having a roof and walls from roof to floor. This includes sleeping, dinning, drawing, study, children's and servant's room but excludes kitchen, bathroom, latrine, balcony, porch and motor garage. A store if being used as sleeping room is considered as a room otherwise not.

Age

Age is recorded as of the last birthday.

Marital Status

Marital Status has been classified into never-married, married, widowed and divorced. Nevermarried applies to persons who have never been married. Married includes all persons who are presently married and living as husband and wife as well as those married persons living apart but having a living wife/husband. Those couples, whose marriage (Nikah) had been solemnized but giving away ceremony had not taken place, were also treated as married. Widowed applies to a person whose husband or wife was dead but who had not married again. Divorced applies to both divorcer and divorcee. If not remarried.

Religion

Religion is recorded and tabulated as informed by the respondents.

Literate

A person who can read a newspaper and write a simple letter in any language with understanding and can make simple calculation is treated as literate.

General Education

It includes educational programme of Primary, Middle, Matriculation, Intermediate and Bachelor's degree in arts or science.

Economically Active Population

The economically active person means person of 10 years and above ages, of either sex, who are engaged in some work for pay or profit including unpaid family helpers as well as those not working but looking for work or laid off.

Disability

Disability refers to physical and organic handicap of a person due to natural deformity or deficient functioning of any limb resulting from accident, disease, etc. For census purposes it refers to visible malfunctioning of any organ of the body.
