NOTES:

- 1. Quintiles: Quintiles are based on per capita consumption expenditure of 15453 households. For details on how the quintiles were derived, please refer to Appendix C.
- 2. The 1st quintile contains individuals with the lowest consumption level, whereas the 5th quintile contains individuals with the highest consumption level.
- 3. Children attending primary level in a private school expressed as a percentage of all children attending primary level in the quintile indicated. Only private, for-profit schools are included in this measure; children enrolled in NGO schools, deeni madrassa and other non-government schools are excluded from the numerator. Enrolment in katchi class is included.
