About Us |

Pakistan Bureau of Statistics (PBS) is the prime official agency of Pakistan, responsible for the collection, compilation and dissemination of reliable and timely statistical information to the policy makers, planners and researchers. It publishes a variety of reports, based on primary and secondary data.

Vision Statement |

Our vision is to lead as the premier statistical agency on the national stage, dedicated to the meticulous collection, compilation, analysis, and dissemination of statistical data across various sectors of the economy. We strive to be the trusted source for accurate, relevant, and timely information on social, economic, demographic, and environmental activities. With a steadfast commitment to professionalism, transparency, and integrity, we envision providing high-quality statistical products and services that play a pivotal role in advancing the social and economic development of our nation. Our vision encapsulates a future where the Pakistan Bureau of Statistics is synonymous with excellence, setting the gold standard for accuracy and user-friendly accessibility in the field of statistical data.

Mission Statement |

At the Pakistan Bureau of Statistics, we focused on developing a skilled workforce and a dynamic organization, implementing proactive planning, and gathering data with enhanced sophistication and integrity. Simultaneously, we prioritize user-friendly statistical outputs, ensuring accessibility for all stakeholders. Additionally, our commitment extends to providing timely, reliable statistics to facilitate evidence-based decision-making, all while upholding ethical standards and international norms in our processes. This holistic approach reflects our dedication to excellence, innovation, and integrity in advancing the field of statistics to meet diverse stakeholder needs.

JUNE 2026

MESSAGE

Agriculture remains the backbone of Pakistan's economy, employing a significant share of the population and serving as a vital source of food security, livelihood, and export earnings. In this context, the 7th Agricultural Census 2024, conducted by the Pakistan Bureau of Statistics (PBS), marks a transformative step forward in evidence-based agricultural planning and policy-making.

This census holds special significance as it is the first-ever integrated digital census of agriculture in Pakistan's history building on the success of the digital 7th Population and Housing Census 2023. Unlike previous rounds, which separately covered agricultural, livestock, and agricultural machinery censuses on paper, this integrated digital exercise combines all three domains. It provides comprehensive, timely, and geo-tagged data for use by policymakers, researchers, development partners, and the private sector.

The 7th Agricultural Census Report delivers rich insights into farm holdings, land tenure patterns, cropping practices, agricultural credit, irrigation methods, livestock ownership, and the use of modern machinery. Such data are critical to devising evidence-informed policies for raising productivity, enhancing climate resilience, increasing rural incomes, and aligning with our international commitments including the Sustainable Development Goals (SDGs).

Importantly, this census supports the broader development vision of the Government URAAN Pakistan and 5Es National Economic Transformation Plan, which aims to unleash the economic potential of all sectors through innovation, inclusion, and institutional reforms. Reliable and granular agricultural statistics are indispensable for transforming agriculture into a high-value, technology-driven, and sustainable enterprise.

Despite resource constraints, PBS through strong collaboration with provincial governments successfully completed this massive exercise across all regions, including Gilgit-Baltistan and Azad Jammu & Kashmir. I commend the dedication of the PBS team, field staff, and stakeholders who ensured the

quality and timely execution of this national endeavor.

I am confident that the findings of this census will serve as a cornerstone for policy formulation, investment planning, and rural transformation, paving the way for a prosperous and food-secure Pakistan. I would particularly like to thank and appreciate the efforts of Dr. Naeem uz Zafar (SI), Chief Statistician, PBS, and Mr. Muhammad Sarwar Gondal (SI), Member (SS/RM), for their unwavering commitment and invaluable contributions to this national initiative. Their leadership and hard work are instrumental in supporting the country's development through evidence-based planning.

PROF. AHSAN IQBAL

Federal Minister for
Planning, Development & Special Initiatives
Government of Pakistan

FOREWORD

diversity of irrigation methods employed across the country. The availability of such detailed, digitally collected data will play a transformative role in enhancing agricultural productivity, boosting the national economy, reducing poverty, expanding agricultural exports, ensuring food security, and advancing progress towards the agriculture-related Sustainable Development Goals (SDGs).

This organization, in close collaboration with the provincial administrations, undertook extensive measures for smooth execution of the 7th Agricultural Census. Special emphasis was placed on the effective training of field staff, meticulous organization of field operations, and rigorous monitoring and supervision at all stages of the census activities. Despite constraints in manpower, material, and financial resources, PBS succeeded in the timely completion of this monumental national exercise across the entire country.

It is earnestly expected that the results of the 7th Agricultural Census, will be effectively utilized by policymakers, planners, and stakeholders in the agriculture sector. As a foundation for designing evidence-based and data-driven policies, this report will not only contribute to the advancement and modernization of Pakistan's agriculture but also foster national progress, economic prosperity, and social well-being at large.

AWAIS MANZUR SUMRA
Secretary, PD&SI

Agricultural Census stands as one of the flagship activities of Pakistan Bureau of Statistics (PBS), forming the cornerstone of agricultural quality data collection in the country. Over the years, PBS has successfully conducted six Agricultural Censuses, four Livestock Censuses, and five Agricultural Machinery Censuses, thereby establishing a tradition of providing reliable statistical insights to support national development. The 7th Agricultural Census represents a landmark achievement, distinguished not only by its integration of agricultural, livestock, and agricultural machinery domains into a single comprehensive exercise, but also by its pioneering adoption of digital methodology. This initiative, recognized as the first-ever "Integrated Digital Count" of agriculture in Pakistan, follows the resounding success of the 7th Population and Housing Census 2023 and symbolizes a new era of innovation, transparency, and efficiency in national data systems.

This Report presents the most recent comprehensive statistical profile of Pakistan's agriculture sector. It encompasses a wide spectrum of vital indicators, including farm structures, land utilization, tenure classifications, cropping patterns, livestock population with age distribution, and the adoption of modern farming practices such as tunnel farming and the use of sprinkler and drip systems as modern irrigation techniques. Among its salient features is the provision of up-to-date information on the area under

different crops, access to agricultural credit, the scale and distribution of orchards, and the

PREFACE

Pakistan Bureau of Statistics (PBS) conducted the 7th Agricultural Census 2024 (Integrated Digital Count) through an integrated approach, combining data on Agricultural Lands, Crops, Livestock, and Agricultural Machinery. The previous efforts of The Agricultural Census Organization (defunct) included the 6th Agricultural Census in 2010, the 4th Livestock Census in 2006, and the 5th Agricultural Machinery Census in 2004, all focused on collecting detailed insights of the farming practices for agricultural lands, livestock formations, agricultural machinery to assess the modern agricultural practices by the farming community of Pakistan. Building on the foundation of earlier censuses, the latest initiative employs advanced technologies for data collection. The 7th Agricultural Census 2024 was completed in two phases. 1st Phase was completed in September- November 2024 in cold and snowbound areas and the 2nd Phase was completed in January-February 2025 in the rest of country.

The census aims to provide detailed insights into Pakistan's agrarian structure, cropping patterns, livestock demographics, and mechanization trends, which are crucial for addressing challenges such as food security, climate resilience, and rural development particularly with reference to the 2030 agenda of SDGs.

This report covers six chapters, where the first three belong to the introduction, new digital aspects, and the sample design of the 7th Agricultural Census 2024, while the rest of three chapters are dedicated to key indicators about agriculture, livestock, and agricultural machinery.

The 7th Agricultural Census 2024 embraced advanced digital technologies to streamline processes and enhance the reliability of outcomes. Features included tablet-based data collection, geo-tagging of agricultural households, real-time dashboards for monitoring, digital maps, and task management systems. Publicity campaigns utilized social media, while a hotline complaint management system ensured transparency. Various software modules, like the GIS-based dashboard monitoring system and Computer-Assisted

Personal Interviewing (CAPI) applications were developed to improve efficiency, accuracy and validity. PBS leveraged its upgraded in-house data center to support operations, reducing costs and ensuring round-the-clock IT support and data security.

The Pakistan Bureau of Statistics has collaborated with provincial administrations to ensure effective field operations, monitoring, and supervision. Extensive training programs were conducted for enumerators and supervisors, ensuring high-quality data collection Which was not possible without dedication and devotion.

I would like to extend my profound appreciation to my entire team, including provincial governments as well as Gilgit Baltistan and Azad State of Jammu & Kashmir administrations, for their remarkable contributions and unwavering commitment throughout this journey. I am especially grateful to Mr. Muhammad Sarwar Gondal (SI), Member (SS/RM), whose exceptional leadership and generous dedication have been pivotal in steering this project towards a groundbreaking new dimension in digital census.

I hope that the 7th Agricultural Census will leave a significant mark on national progress and prosperity by facilitating data-driven policy-making and implementation in the future.

DR. NAEEM UZ ZAFAR (ستارہ امتیاز)
Chief Statistician

INTEGRATED DIGITAL COUNT

A SUCCESS STORY

Pakistan Bureau of Statistics (PBS) successfully conducted the 7th Population and Housing Census 2023 (First Ever Digital Count) and achieved a historic milestone by making it South Asia's 1st ever digital census. Through this groundbreaking initiative, PBS gathered demographic data for more than 241 million individuals and geo-tagged 40 million structures, ensuring accurate and comprehensive insights to support data-driven policy-making and development planning.

Following the Population and Housing Census 2023, PBS recognized the urgent need to conduct an Agricultural Census to address food security challenges and guide data-centric policies for its growing population. Agriculture, being the 2nd largest sector in the national economy, contributes around 24% to its GDP and employs about 35.1% of labor force, therefore, there was a dire need to conduct an agricultural census.

The digital census was conducted on international standards by using tablet-based technology for real-time monitoring through GIS dashboards and advanced analytics to identify trends while enhancing stakeholders' engagement. It sets a foundation for future agriculture surveys, emphasizing inclusivity, accessibility, and efficiency. PBS developed a comprehensive two-tier training program, training of Census Master Trainers (CMTs) from PBS along with stakeholders' Agriculture Extension, Crop Reporting Service, Livestock & Dairy Development Department, Education and Revenue Department, who then trained district-level Enumeration and supervisory staffs.

This comprehensive initiative digitized the entire process, introducing systems like HR and Task Assignment Web Portal, Inventory Management Applications, Complaint Management System, CATI Support Module, and Monitoring dashboards. Equipped with tablet devices and advanced software for data collection, the project revolutionized census operations and has been a remarkable success for PBS.

I would like to extend my sincere appreciation for the outstanding efforts of Mr. Ayazuddin, Member (Census & Surveys), Dr. Amjad Javaid Sandhu, Director General (Admn/ACPMU), Ms. Rabia Awan, Deputy Director General (CPMU), Dr. Naveed Iqbal, JACC, all Directors and their teams. They played a pivotal role in designing and implementing the Integrated Digital 7th Agricultural Census 2024. The unwavering commitment and collaboration of the Support Services, DP Centre, GIS staff, Field Services/Operations, and Subject Matter teams ensured the project's success despite challenging circumstances. Their dedication is truly commendable.

I am genuinely hopeful that this groundbreaking initiative will transform agriculture policy-making and implementation in the years to come.

CHAPTER 1: NUMBER, AREA AND TENURE OF FARMS		
1.0	Important Agricultural Census Items	68
1.1	Number and Area of Farms (Acres)	75
1.2	Number and Area of Farms (Hectares)	76
1.3	Tenure Classification of Farms and Farm Area	77
1.4	Number and Area of Owner Farms	78
1.5	Number and Area of Owner-Cum-Tenant Farms	79
1.6	Number and Area of Tenant Farms	80
1.7	Farm Area by Tenure	81
1.8	Classification of Farms by Number of Associated Households	82
1.9	Number and Area of Farms by Gender	83
CHAPTER 2: FRAGMENTATION AND MARKETING OF LAND		
2.1	Classification of Farms by Number of Fragments	84
2.2	Farms Area Classified by Number of Fragments	85
2.3	Fragmentation of Farms and Area by Tenure	86
CHAPTER 3: LAND UTILIZATION		
3.1	Land Utilization	87
3.2	Completely Uncultivated Farms	88
3.3	Cultivated Area (Net Sown and Current Fallow)	89
3.4	Un-Cultivated Area Distribution	90
CHAPTER 4: IRRIGATION		
4.1	Irrigation Status of Farms and Farm Area	91
4.2	Cultivated Area Classified by Mode of Irrigation	92
4.3	Irrigation Status of Cropped Area by Crop Seasons	93
CHAPTER 5: LAND USE AND CROPPING INTENSITIES		
5.1	Farms by Land Use Intensity	94
5.2	Average Intensity of Land Use by Tenure	95
5.3	Average Cropping Intensity by Tenure	96
5.4	Comparison of Cropping Intensity of Irrigated and Unirrigated Farms	97
CHAPTER 6: CROPS		
6.1	Classification of Cropped Area by Crop Season	98
6.2	Farms Reporting and Cropped Area by Crop Season	99
6.3	Farms Reporting Orchards and Orchard Area by Tenure	100
6.4	Fruit Trees And Number of Fruit Trees	101

Table No.	TITLE	Page No.
6.5	Share of Different Crops Area in Total Cropped Area	123
6.6	Share of Different Crops in Total Cropped Area by Tenure	124
6.7	Share of Different Kharif Crops Area in Total Kharif Crops	128
6.8	Share of Different Rabi Crops Area in Total Kharif Crops	129
6.9	Wheat Area Irrigated and Unirrigated and farms Reporting Wheat	130
6.10	Paddy Areas By Varieties and Farms Reporting Paddy	131
6.11	Cotton Area And Farms Reporting Cotton	132
6.12	Maize (For Grain) Area Irrigated and Unirrigated and Farms Reporting Maize	133
6.13	Sugarcane Area and Farms Reporting Sugarcane	134
6.14	Potato Area Irrigated and Unirrigated and Farms Reporting Potatoes	135
6.15	Oilseeds Area Irrigated and Unirrigated and Farms Reporting Oilseeds	136
6.16	Fodders Area Irrigated and Unirrigated and Farms Reporting Fodders	137
6.17	Vegetables (Including Potatoes) Area Irrigated and Unirrigated and Farms Reporting Vegetables	138
6.18	Number of non-Fruit Trees	139
6.19	Farms Reporting Use of Greenhouse Technology (Tunnel Farming)	140

CHAPTER 7: LIVESTOCK

7.1	Livestock Population by Administrative Unit	142
7.2	Households Reporting Number of Cattle by Sex and Age	143
7.3	Households Reporting Number of Buffaloes by Sex and Age	144
7.4	Households Reporting Number of Sheep by Sex and Age	145
7.5	Households Reporting Number of Goats by Sex and Age	146
7.6	Households Reporting Number of Camels by Sex and Age	147
7.7	Households Reporting Number of Horses by Age	148
7.8	Households Reporting Number of Mules and Asses by Age	149
7.9	Households Reporting Number of Milch Cows and Buffaloes	150
7.10	Households Reporting Number of Cattle by Sex, Age and Breed	151
7.11	Households Reporting Number of Buffaloes by Sex, Age and Breed	173
7.12	Households Reporting Number of Sheep by Sex, Age and Breed	178
7.13	Number of Goats by Sex, Age and Breed	200
7.14	Households Reporting Number of Yaks by Sex and Age	222

CHAPTER 8: AGRICULTURAL MACHINERY

8.1	Tractors By Type of Ownership	224
8.2	Tractors By Make and Horsepower	225
8.3	Massey Ferguson Tractors by Model	236
8.4	New Holand and Fiat Tractors by Model	237
8.5	Ford/Euro Ford Tractors by Model	238

Table No.	TITLE	Page No.

MAP OF PAKISTAN

1. INTRODUCTION

The 7th Agricultural Census 2024 represents a landmark in Pakistan's history focused on the systematic collection, processing, and dissemination of structural data on Agriculture, Livestock and Agricultural Machinery sector. This includes essential information such as land use, crop areas, livestock numbers, agricultural machinery, with data primarily collected at the holding level. Agricultural Census 2024, conducted by the Pakistan Bureau of Statistics, represents a significant methodological advancement as Pakistan's first fully Integrated Digital Count. This innovative approach consolidates data collection across all agricultural sectors into a unified digital operation, utilizing advanced tools such as electronic tablets, Geographic Information System (GIS) mapping and real-time monitoring dashboards.

This digital integration ensures enhanced accuracy, efficiency, and transparency in the enumeration process. The resulting comprehensive data provides a crucial evidence base for formulating agricultural policies, enabling strategic resource allocation, and addressing national priorities including food security, sustainable development, and rural economic growth. The census represents a vital step toward modernizing Pakistan's agricultural sector and supporting informed decision-making for the nation's future.

2. HISTORICAL OVERVIEW OF CENSUSES

Agriculture Census Organization (ACO) of Pakistan has historically conducted six decennial Agricultural Censuses in the years 1960, 1972, 1980, 1990, 2000, and 2010. In parallel, four decennial Livestock Censuses were carried out in 1976, 1986, 1996, and 2006. Additionally, five decennial Agricultural Machinery Censuses were held in 1968, 1975, 1984, 1994, and 2004.

To support these operations, nine quinquennial Mouza/Village Censuses were conducted in 1971, 1979, 1983, 1988, 1993, 1998, 2003, 2008, and 2020. These were designed to update the sampling frame for agricultural and livestock censuses and to generate community level rural statistics in accordance with FAO guidelines.

The Agricultural Census 2024 marked seventh in the national series and is the first to integrate agricultural land, crops, livestock, and agricultural machinery data into a single enumeration. This integrated approach was formally approved by the Governing Council of the Pakistan Bureau of Statistics during its 7th meeting held on 10 January 2015, which resolved that future agricultural censuses would be conducted every five years by merging the three major components Agricultural, Livestock, and Agricultural Machinery Censuses.

This census is distinguished by its comprehensive scope and digital execution, aimed at producing accurate and reliable data essential for evidence-based agricultural planning and policy formulation. It was launched under the tagline:

“زراعت شماری بدلے قسمت ہماری”

Pakistan Bureau of Statistics remained the leading agency responsible for the execution of the Agricultural Census, with core responsibilities including planning, coordination, field operations, data processing, and dissemination of results.

3. ROLE OF AGRICULTURE IN PAKISTAN'S ECONOMY

Agriculture is a vital component of Pakistan's economy. It serves as the foundation for many Sustainable Development Goal (SDG) indicators, ensures food security, and provides raw materials to the industrial sector on one hand, while acting as a market for industrial products on the other. Agriculture also contributes significantly both directly and indirectly to the country's export earnings. Therefore, it is prudent to conclude that agriculture plays a multidimensional role in both the society and economy of Pakistan.

Agriculture sector contributes 23.44% to Pakistan's Gross Domestic Product (GDP). Approximately 40 million people earn their livelihood directly from agriculture, while 37.4% of the labour force is employed in the sector. Over 61% of Pakistan's population resides in rural areas and depends directly or indirectly on agricultural activities such as crop cultivation, livestock rearing, agricultural labour, input supply, and the transportation of produce to markets. Therefore, the development of agriculture is intrinsically linked to the development of the country

Livestock is a vital component of Pakistan's agricultural sector, contributing 63.6% to the agricultural value added, followed by crops at 32.6%, and forestry and fisheries at 3.6%. Overall, the livestock subsector accounts for 14.97% of the national GDP. Within the broader economy, the services sector is the largest contributor at 58%, followed by the industry sector at 18%.

4. RATIONALE FOR THE INTEGRATED DIGITAL COUNT

The shift to an integrated digital approach addresses both efficiency and quality concerns in agricultural data collection. Combining agriculture, livestock, and agricultural machinery censuses reduce duplication, lowers costs, and ease the burden on rural households. Using tablets and geo-referenced maps enhances accuracy and allows real-time monitoring, while automated checks reduce errors and improve data reliability. The integrated model is consistent with the best international practices promoted by the FAO, ensuring comparability and alignment with global standards. Most importantly, timely and reliable data generated through this census will enable evidence-based policy-making, effective resource allocation, and strategic planning to address Pakistan's agricultural challenges, including food security and adaptation to climate change. In short, an integrated census provides the reliable, complete information needed to effectively support Pakistan's farmers and agriculture sector.

5. OBJECTIVES

Main objectives of the 7th Agricultural Census 2024 are:

1. To generate comprehensive information on the agrarian structure of the country, serving as a reliable baseline for evidence-based policy formulation and planning.
2. To provide accurate estimates of crop and orchard areas for assessing agricultural production patterns and trends.
3. To compile detailed statistics on the livestock population by age, sex, and breed, supporting livestock development programs.
4. To produce area-specific estimates of milk and meat production for evaluating and enhancing the livestock sector's contribution to the economy.
5. To assess the availability and utilization of agricultural machinery and implements as indicators of farm mechanization and modernization in the country.

6. SCOPE OF THE CENSUS

The scope of the Agricultural Census 2024 as finally approved includes all the topics concerned with some restrictions mentioned as follows.

The Agricultural Census 2024 only focused on agricultural households involved in operating agricultural land, rearing livestock, and having agricultural machinery. The selection of Households to be interviewed was made on the basis of their involvement in agricultural activities segregating them after listing operation.

The scope refers to the range / subjects / items covered by the Agricultural Census 2024. For Agricultural Census 2024, the scope with reference to farm area was restricted to the Agricultural farm(s) / holding(s) held and or operated by the Government or by private household(s), individually or collectively or under joint arrangement at the time of census enumeration. Consequently, undistributed government lands other than government farms, undistributed portions of the land resumed by the Government under land reforms, built up areas, land under roads, rails, ravines, rivers, canals, government forests, parks, lakes, water bodies, shallow lands, hills and mountains, etc. falling under the category of non-farm areas were outside the scope of the census.

It included the collection of data on type, size, tenure and parcels of farms, land utilization, irrigation, area under crops and orchards, number of fruit and non-fruit trees, use of agricultural machinery, livestock population, loan and its sources, economic activities of household members and their main source of income.

It included all public and private tractors / bulldozers / combine harvesters used wholly or partly for agricultural purposes. Tractors / bulldozers which are nonfunctional and/or used entirely for non-agricultural purposes were not covered in the census. The farm implements normally pulled by or motivated with tractor and in possession of tractor owners were also enumerated. All public and private tubewells / wells with pump / lift pumps / submersible pumps used for irrigation purposes were also enumerated. The machines sunk only for drinking water fell outside the scope of this census. Ascertaining the extent and pattern of use of public and private owned farm machinery.

Moreover, the information regarding number of livestock holders possessing animals was ascertained. Livestock count was restricted to the head count of cattle, buffaloes, sheep, goats and camels by age, sex and breed distribution, whereas information about the horses, mules and asses was collected only by number. In addition, information about the total production of milk per day by the cows, Dzomo, buffaloes, goats (milking for human consumption) and female camels was also collected. The data on number of animals slaughtered inside the recognized slaughterhouses was collected through a specially designed survey

7. LEGAL BASIS

The General Statistics (Reorganization) Act, 2011 provides necessary legal support to conduct the Agricultural Census in the country including Gilgit Baltistan and Azad State of Jammu & Kashmir. The Act, 2011 provides legal support to do the census operations by authorizing the Federal Government to decide the census dates, formulate census questionnaires and engage any person as Census Officer for census taking to collect information from household members about agriculture holdings and livestock details and to disseminate the census data. The General Statistics (Reorganization) Act, 2011 deems suitable and provides protection to individuals not to compromise on their confidentiality. The Act also provides immunity to the Census Officers in so far as the secret nature of its record is concerned. It also provides backing for the imposition of penalties in respect of any person including Census Officer who refuses or neglects to use reasonable diligence in performing any duty imposed upon him/her or put intentionally any offensive or improper question or knowingly makes any false return or discloses any information, intentionally gives a false

answer or refuses to answer to questions asked from him/her by an Enumerator. Under such type of legal cover, the Agricultural Censuses have been conducting in Pakistan.

8. REFERENCE PERIOD

Reference period is very important for data collection during any census or survey. It refers to the time or specified period, for which the data is collected, and statistical results are compiled. The reference period may be a year, a quarter, a month, or even a day. For Agricultural Census 2024, some data was collected as on the day of enumeration or census day like land under operation, number of animals, number of machines etc., some data was collected for the last one year e.g., irrigated area during last one year, veterinary treatment during last one year etc., while crops data was collected according to the latest Rabi and Kharif seasons in Pakistan. Therefore, reference period for Agricultural Census 2024 is explained here.

Agricultural Year consists of last Rabi 2023-24 and current Kharif 2024.

Census Day was the day on which the selected household was enumerated.

Last Twelve Months were the last twelve months from the Census Day.

The Nomads / Gipsy / Migratory people found in the boundary of selected Mouza / Block were listed and enumerated at same time during household listing or enumeration.

9. GEOGRAPHICAL COVERAGE

In Agricultural Census 2024, the geographic coverage was extended to the entire rural and urban areas of Islamabad Capital Territory, Khyber Pakhtunkhwa, Punjab, Sindh and Balochistan.

The Census was conducted in two phases. The 1st Phase was conducted in September 2024 in cold and hilly areas, covering 24 districts of Gilgit Baltistan, Azad Jammu & Kashmir, Chitral, Upper Dir, and other northern high-altitude regions of Khyber Pakhtunkhwa. These areas were covered first to avoid harsh weather conditions, which could affect the data quality. Local administrations provided logistical support for access to remote and rugged terrains. Geographical coverage was also extended to Gilgit Baltistan and Azad Jammu & Kashmir, each as a separate entity.

The 2nd Phase of field operations was conducted in January 2025, with official inaugurations held across Pakistan and continued till 10th February 2025. During this phase, 136 districts of Pakistan were covered.

10. STAKEHOLDER ENGAGEMENT / CONSULTATION

Accurate and comprehensive agricultural data form the foundation of evidence-based policy-making, food security planning, and sustainable development. Recognizing this imperative, the Pakistan Bureau of Statistics undertook an extensive process of stakeholder consultations and engagements to ensure the successful execution of the Agricultural Census 2024. These consultations played a decisive role in aligning methodological approaches, refining census strategies, and equipping field staff for the challenges of data collection. The collaboration of stakeholders at the federal, provincial, and district levels not only facilitated the smooth implementation of this national exercise but

Meeting with Focal Persons from Federal Ministries & Provincial Departments

also significantly enhanced the reliability and credibility of the data. By fostering inclusivity and shared ownership, the engagement process strengthened institutional cooperation and ensured that the census outcomes would serve as a robust foundation for agricultural planning and development in Pakistan.

The involvement of key stakeholders proved pivotal in shaping both the design and execution of the Census. Through an inclusive process of consultation, government institutions, agricultural experts, researchers, and policymakers were actively engaged, thereby ensuring that diverse perspectives were incorporated into the census framework. Their valuable contributions refined the methodology and guaranteed that all critical dimensions of the agricultural sector were comprehensively captured. Equally important, the active participation of stakeholders greatly strengthened logistical coordination across federal, provincial, and district levels, enabling the seamless implementation of this monumental exercise. These engagements not only enhanced cooperation among various governmental tiers but also fostered a strong sense of ownership and institutional commitment, thereby minimizing implementation challenges and reinforcing the credibility of the entire census process.

10.1 Consultative Meeting with Senior Members Board of Revenue (SMBRs)

A high-level consultative meeting was held with the Provincial Senior Members, Boards of Revenue (SMBRs), to deliberate upon the integration of the Mouza Census framework with the Agricultural Census 2024. The discussions primarily focused on the legal and administrative guidelines essential for the smooth conduct of census operations. The outcome of this important consultation was the development of a well-structured framework that not only ensured legal clarity but also streamlined operational procedures, thereby facilitating the effective and transparent execution of the census.

10.2 Technical Committee Meetings for Questionnaire Finalization

A series of technical committee meetings were convened to finalize the indicators and design of the census questionnaire. The central objective of these deliberations was to standardize the questionnaire while ensuring the inclusion of essential agricultural parameters, such as landholding patterns, irrigation methods, livestock population, and modern farming practices. Through rigorous review and expert input, the committees ensured strict adherence to the best international practices, thereby shaping a questionnaire that was not only comprehensive and data-driven but also highly policy-relevant and aligned with the evolving needs of the agricultural sector.

10.3 Meeting with Focal Persons from Federal Ministries & Provincial Departments

A strategic meeting was convened with focal persons from federal ministries and provincial departments to deliberate on logistics, coordination mechanisms, and the adoption of technology for effective census implementation. This engagement proved instrumental in fostering inter-agency collaboration, ensuring that the census framework was strengthened through the incorporation of modern innovations such as digital data collection tools and real-time monitoring systems. These discussions significantly enhanced the operational efficiency of the census, minimized delays, and improved the accuracy and validation of the collected data, thereby reinforcing the credibility of the entire exercise.

10.4 Meetings with Provincial Governments

The provincial governments played a pivotal role in ensuring the smooth coordination of census operations at the provincial level. To this end, a series of consultative meetings were held during February and March 2024 to integrate provincial data collection efforts with the broader national framework. These deliberations focused on critical aspects such as field deployment strategies, data-sharing protocols, and execution mechanisms. The outcome was

the development of a well-coordinated and harmonized approach, which not only aligned provincial initiatives with national objectives but also enhanced the accuracy, credibility, and overall coverage of the census across the country.

10.5 Meetings with District Governments

The District Level Meetings were convened nationwide in June 2024 to comprehensively review the progress of census activities, address emerging challenges in data collection, and formulate strategies aimed at enhancing both accuracy and efficiency. These meetings, presided over by the Deputy Commissioners, served as vital platforms of coordination by bringing together the district heads of key provincial departments including agriculture, livestock, crop reporting services, education, and revenue alongside local stakeholders. This collaborative engagement ensured that operational challenges were addressed promptly and that district level efforts were seamlessly aligned with provincial and national objectives. The principal objectives of these district-level meetings were as follows:

- To ensure the availability of the requisite number of enumeration and supervisory staff for smooth field operations.
- To systematically address challenges encountered during data collection and devise practical solutions.
- To strengthen coordination among stakeholders, thereby fostering synergy in census implementation.
- To deliberate upon the integration of technological advancements in census activities, with particular emphasis on digital innovation.
- To outline future steps for the successful and timely completion of the census.
- To enhance community engagement through well-structured awareness and sensitization programs.
- To improve the training of enumerators with a focus on digital data collection methods and modern tools.
- To provide strengthened logistical support for field teams, ensuring efficiency and reliability in operations.
- To establish a helpdesk mechanism for prompt resolution of field-related issues.
- To conduct periodic review meetings for tracking progress and proactively addressing emerging challenges.

The extensive stakeholder engagement process proved instrumental in the successful planning and execution of the Agricultural Census. It not only fostered cross-sectoral collaboration but also promoted data standardization and ensured that the adopted methodology remained both robust and in alignment with international best practices. These consultative mechanisms further strengthened logistical coordination, minimized operational bottlenecks, and enhanced the overall efficiency of data collection. Ultimately, this collaborative and inclusive approach guaranteed the generation of high-quality, reliable, and policy-relevant data, thereby equipping policymakers with the necessary insights to advance the sustainable development of Pakistan's agriculture sector and to inform strategic decision-making at both national and sub-national levels.

11. SAMPLING PLAN

Pakistan Bureau of Statistics successfully conducted Agricultural Census by merging three censuses i.e. Agricultural Census, Livestock Census and Agricultural Machinery Census. Previously, three separate censuses on Agriculture, Livestock and Machinery were conducted on different points of time on old sample designs that were different and independent to each other. Pakistan has vast experience of carrying out separate censuses for Agriculture (sample based), Livestock (sample-based) and Agricultural Machinery (a mixture of complete counting and sample based detailed interviewing).

Agricultural Census 2024 being merger of all three types of censuses conducted in one go, under the same logistic operation. In the light of discussion between PBS technical team and FAO International sampling expert: Sample design of Agricultural Census developed in 2021. The sample design increase efficiency on targeting the three sub-populations of interest, crop producers, livestock holders, and agricultural machinery owners, in a sample-based census.

11.1 Universe

The universe of the census consists of all urban and rural areas of Pakistan. Results are representative at overall district level.

11.2 Sampling Frame

To prepare the sampling frame of the Agricultural Census (AC), the Mouza Census 2020 was conducted. Each mouza also contains Enumeration Blocks (EBs)/block; the mouza may consist of one or more blocks. After the conduct of the latest Population & Housing Census (P&HC) 2023, updated information is used in the framework of the Agricultural Census. Therefore, the mapping of Mouza Census Frame 2020 and P&HC 2023 has been carried out. The latest information on EBs against each mouza of the Mouza Census Frame has been updated. Later, the Mouza Census Frame 2020 was mapped with the updated sampling frame of 7th Population and Housing Census 2023 for the Agricultural Census 2024.

11.3 Sample Size Estimation

Sample size estimation has been carried out at the district level using 15% Margin of Error at 95% confidence interval. The previous sample size of the Agricultural Census and Livestock Census in each district has been considered along with information of cultivated land and livestock concentration based on the Mouza Census 2020. Initially, the sample size of a total of 11,054 mouzas/blocks was estimated; however, later, it was enhanced with the addition of 53 mouzas/blocks/Gawala colonies, as detailed below:

Table 1: Summary of Estimated Sample Size

Sr. #	Name of Province	No. of Mouza	No. of Blocks	Total
1	Khyber Pakhtunkhwa	1999	179	2178
2	Punjab	3624	879	4503
3	Sindh	1474	767	2241
4	Balochistan	1341	129	1470
5	Islamabad	27	25	52
	Total-I	8,465	1,979	10,444
1	Azad Jammu & Kashmir	360	39	399
2	Gilgit-Baltistan	212	28	240
	Total-II	572	67	639
	Grand Total (I+II)	9,037	2,046	11,083

11.4 Stratification

Various stratification strategies have been adopted for the Agricultural Census 2024 according to the ground realities in Pakistan. First of all, two strata have been identified as already mentioned in frames i.e.

- National Certainty Holdings (NCH):** national level big agriculture holdings or agriculture households (HHs) having at least 100 acres of agricultural land or 50 cows / buffaloes or both or 200 goats / sheep or both or 25 camels. These HHs were enumerated on 100% enumeration basis throughout the country. Complete enumeration of big holdings was an important strategy and part of sample design to control the variation for the Agricultural Census.
- Mouza Certainty Holdings (MCH):** was another stratum within the selected Mouzas / block. The agriculture HHs having at least 20 acres of agricultural land or 20 cows / buffaloes or both or 50 goats / sheep or both or 20 camels. These HHs are enumerated on 100% count basis within the selected Mouza / block.
- Other Holdings:** the stratum of other than NCH & MCH agriculture households were comprised of less than limits of NCH holdings. These HHs are enumerated through sample selection of Mouzas / blocks and then households.

For selection of Mouzas and blocks in stratum (c), further stratification has been made out of rural and urban areas independently.

A. Stratification in Rural Areas

In sampling frame, rural Mouzas are classified into settled and unsettled areas. Two way classification has been developed based on agricultural information in each Mouza on the basis of Mouza Census Frame 2020.

- Cultivated land in the Mouza
- Livestock concentration in the Mouza

In first way stratification, Mouzas without and with cultivated land are stratified as Z1, and Z2 respectively as shown below.

Table 2: Stratification of Rural Mouzas

Area	Mouza Status	First Way Stratification
Settled and Unsettled Areas	Without cultivated land	Z1
	With cultivated land	Z2

Livestock Concentration: The second way stratification is based on livestock concentration in stratum Z2 against each Mouza as per the Mouza Census Frame 2020. Rural area frame in each district is stratified keeping in view the livestock concentration in each Mouza, according to the information about livestock category, collected in Mouza Census Frame 2020. Detailed stratification is explained below.

Table: 3: Categories based on Livestock Concentration

Types of Animals / Categories	Category with Livestock Concentration			
	1	2	3	4
Cows/ Buffaloes	Nil	1-100	101-250	251 more
Sheep/Goats	Nil	1-200	201-500	501 more
Camels	Nil	1-25	26-100	101 more

Mouzas classified with category code 1 present no livestock, Mouzas classified with category code 2 have animals between 1 and 25 heads of camels, between 1 and 100 heads of cows/buffaloes, or between 1 and 200 sheep/goats and so on. Four strata are created as:

Stratum L1: Mouzas having at least one type of animals in category 4.

Stratum L2: Mouzas having no animal in category 4 but at least one type of animals in category 3.

Stratum L3: Mouzas that have neither category 4 nor category 3 but having at least one type of animals in category 2.

Stratum L4: Mouza without livestock as indicated category 1.

Strata L1, L2 and L3 are target livestock holders, also having auxiliary information regarding cultivated land whereas, L4 do not have livestock information but Mouzas will also be selected from this stratum as they are from Z2 having cultivated land. Proportional allocation will be used for number of Mouzas to be selected from each stratum. Stratification is devised considering the larger category for each Mouza on the basis of Table-5 and is illustrated below.

Table: 4: Stratification of Rural Mouzas based on Livestock Concentration

Mouza (Village)	Cow/ Buffalo	Sheep/ Goat	Camel	Stratum classification
Chak No. 039/12-L	4	2	1	"Max"=4 L1
Chak No. 021/11-L	2	3	1	"Max"=3 L2
Chak No. 037/12-L	4	4	1	"Max"=4 L1
Chak No. 038/12-L	4	4	1	"Max"=4 L1
Chak No. 040/12-L	2	2	1	"Max"=2 L3
Chak No. 034/12-L	4	4	1	"Max"=4 L1
Chak No. 041/12-L	4	4	1	"Max"=4 L1

B. Stratification in Urban Areas

The P&HC 2023 provided PBS an overall idea about the agricultural activities in urban areas. This information at block level is not only used to identify urban blocks having agriculture activities but also used for block selection from selected Mouzas in rural areas. Therefore, various strata were constituted using livestock rearing and self-agriculture activities in urban areas.

Stratum 1: 1-9 livestock rearing households in a block.

Stratum 2: 10 and above livestock rearing households in a block.

Stratum 3: 1-9 households in a block reporting self agriculture.

Stratum 4: 10 and above households in a block reporting self agriculture.

Stratum 5: It includes blocks having absence of livestock from which no block was selected.

11.5 Allocation Plan

Sample of rural Mouzas has been proportionally allocated according to number of Mouzas falling in strata Z1 and Z2 and afterwards within the Z2 according to each of the four stratum L1, L2, L3, and L4. The stratum 5 in urban areas has been allocated with zero blocks being absence of agricultural HHs while rest of the four strata i.e., St-1, St-2, St-3, and St-4 have been considered and sample blocks have been allocated by using power allocation using 0.5 alpha quotient.

11.6 Sample Design

A. First Stage Selection of Rural Mouzas and Urban Blocks

Mouzas have been selected in the first stage by using various sampling techniques through proportional allocation for each stratum.

- Mouzas in stratum Z1 have been selected using Simple Random Sampling (SRS) in the first stage as these Mouzas have no cultivated land.
- The remaining Mouzas having cultivated land greater than zero in stratum Z2 have been selected using Pareto sampling technique with cultivated area as measure of size through Probability Proportional to Size (PPS) design.
- Urban Blocks have also been selected using Simple Random Sampling (SRS) in the first stage and a single stage design have been proposed for urban areas being low agricultural activities. All the agricultural HHs will be enumerated in selected urban blocks.

B. Second Stage Selection of Blocks from Selected Big Rural Mouzas

From selected big size Mouzas having two or more blocks already identified through P&HC 2023, a single block has been selected through Multivariate Probability Proportional to Size (MPPS) method using livestock rearing households and self-agriculture households as measure of size with Systematic Random Sampling.

C. Third Stage Selection of Households from Selected Rural Mouzas and Blocks

Complete listing of all the households in selected Mouzas and / or Blocks has been prepared showing variables to be used for HHs selection at third stage viz HHs having agricultural land, livestock, and machinery. After completion of HHs lists in each Mouza or Block, following categories of HHs have been identified:

- i. Households under National Certainty Holdings (NCHs).
- ii. Households under Mouza Certainty Holdings (MCHs).
- iii. Households reporting Agricultural land under occupation with or without livestock and machinery
- iv. Only Livestock Householders with or without machinery.
- v. Households showing ownership of only Agricultural Machinery.
- vi. Nomads and Gypsy was also listed and enumerated at any stage of listing or enumeration, founded in the boundary of selected Mouza or Block.

The households in categories NCH, MCH, only machinery, and nomads/gypsy (i, ii, v, & vi) had been enumerated on 100% count basis with certainty. However, certain number of HHs from categories iii & iv had been selected using Systematic Random Sampling for detailed interviews to get the data for development of estimates for various indicators.

12. QUESTIONNAIRE DESIGNING

The comparative study conducted for the Agricultural Census examined key methodological aspects to ensure accuracy and efficiency while maintaining alignment with global best practices. The study assessed various census modules, sampling methods, questionnaire designs, and data collection techniques. It ensured that the overall census methodology and questionnaires adhered to international standards, allowing for reliable data collection and analysis. The adoption of modern data collection techniques was a critical focus, facilitating the transition from traditional paper-based methods to digital tools while improving validation mechanisms. The comparative analysis also played a crucial role in strengthening stakeholders' collaboration at federal, provincial, and local levels, ensuring the smooth implementation of the census and the credibility of the collected data.

A crucial part of the comparative study was the evaluation of main questionnaire design and

standardization across different census modules. Developed countries have refined their questionnaire frameworks to include detailed farm structure data, production trends, and sustainability metrics. Regional countries, while following similar frameworks, often include additional modules tailored to local agricultural conditions, such as smallholder farming challenges and climatic impacts. The Agricultural Census questionnaire was designed to incorporate lessons from both developed and regional models, ensuring it captured comprehensive, reliable, and policy-relevant data.

13. METHODOLOGY

Agricultural Census 2024 used a very strong and modernized approach to achieve accuracy, reliability, and efficiency in data collection. This was based on a hybrid methodology, where total enumeration was done in the major areas and sample data collection was done to ensure coverage and economize on resources. This approach was cost effective but ensured a comprehensive data collection process. To make the census more credible, wide stakeholder consultations and engagements were done with the provincial governments, agricultural experts and livestock agencies. They influenced the methods of the census to make them more precise, so that the information gathered is applicable, all-inclusive, and meets the national and regional agricultural demands.

The major characteristic of this census is the incorporation of new hi-tech technology including the use of tablets in data collection, geo-tagging, and real time tracking. These computer-based tools enhance the accuracy of data, minimize errors and are capable of processing and analysis. Besides, strict quality control was ensured, with automated validation, real-time control, and separate control teams, to ensure the integrity and reliability of the data during the census.

Moreover, the combination of the Mouza Census 2020 and process reengineering National Certainty Holdings (NCH) data contributed to the improvement of the accuracy of land and farm enumeration. Questionnaire reviews by Stakeholders also guaranteed extensive data gathering, and sophisticated digital applications such as GPS mapping and automated validation, enhanced reliability and efficiency of data. There are nationwide training courses that prepare field workers to work with standard data collection, public involvement measures such as helplines and grievances redressal management system increase the transparency. All these attributes made the census a credible source of informed agricultural planning and development.

13.1 Training

The Agricultural Census trained its staff at different levels in a two-tier training program to guarantee the effective preparation of the staff.

A. First Level- Master Trainers Training (July 2024)

- Technical training was done at the National Institute of Banking and Finance (NIBAF) in July 2024.
- Approximately 352 Master trainers were provided with profundity in the methodology of census, digital data collection tools, and statistical validation methods.
- The training entailed workshops, practical activities, and discussion sessions on best practices in agricultural data collection and conducted by experts.

Inauguration of ToT at NIBAF Islamabad

Table: 5: Number of Trainers trained at NIBAF, Islamabad

Department	No. of Participants
Pakistan Bureau of Statistics (PBS)	320
Crop Reporting Services (CRS)	7
Agriculture Extension (AE)	13
Agriculture Research (AR)	1
Education Department (ED)	6
Information Technology (IT)	1
Livestock (LS)	1
Provincial Bureau of Statistics (BoS)	3
Total	352

B. Second Tier – Field Staff Training Sep-2024 (Phase-I), Dec-2024 (Phase-II)

Following the training of Census Master Trainers, 1st phase training of enumerators and supervisors in September while 2nd phase training was conducted in December, 2024 at district levels.

- Total 7686, field staff were trained by master trainers to ensure uniform understanding and execution of census protocols.
- The training covered field data collection techniques, ethical considerations, digital tool usage, and troubleshooting common challenges in data gathering.
- Role-playing and simulated interviews were conducted to enhance enumerators' interaction skills with farmers.

The Agricultural Census Training served as a crucial platform for evaluating the census progress, the accuracy and efficiency of the census process.

13.2 Field Operations

The Agricultural Census of Pakistan was conducted in two distinct phases to account for varying climatic conditions across the country. This comprehensive national exercise was aimed to collect up-to-date and accurate agricultural data to support policy formulation and strategic planning for the agricultural sector.

13.3 Inaugurations

Formal launch ceremonies were held at federal and provincial levels, marking the nationwide rollout of census activities. The Minister of Planning, Development and Special Initiatives, Mr. Ahsan Iqbal, oversaw the inauguration events and Inaugurated the Field Operations at National Level. In Khyber Pakhtunkhwa, the Minister of Agriculture, Major (Retd.) Sajjad Barkwal, inaugurated the field operations. In Balochistan, the Chief Minister, Sarfaraz Bugti, inaugurated the event, while in Punjab, the Finance Minister, Mian

Inauguration of field operation of 7th Agricultural Census 2024 in Islamabad

Mujtaba Shujaar-Rehman, inaugurated the field operation on behalf of the Chief Minister. In Sindh, Mr. Nasir Hussain Shah, Minister for Local Government, Forests, and Religious Affairs, led the inauguration. Senior officials from the Pakistan Bureau of Statistics in the respective provinces also attended the ceremonies. At District level the field operations were inaugurated by the respective Deputy Commissioners.

The census enumeration was carried out in two phases across 160 districts of Pakistan.

Phase I was conducted from 2nd September to 31st October 2024, covering 24 districts including selected areas of Khyber Pakhtunkhwa, Balochistan, Azad Jammu and Kashmir & all districts of Gilgit Baltistan.

Phase II was conducted from 1st November to 31st December 2024, covering the remaining 136 districts, including Islamabad Capital Territory, Punjab, Sindh, Khyber Pakhtunkhwa, Balochistan & Azad Jammu and Kashmir. In total, 160 districts were enumerated. Additionally, nomads, gypsies, and migratory populations were listed and enumerated whenever they are found within the boundaries of any selected Mouza or block during household listing or enumeration.

14. ESTIMATION OF THE CENSUS RESULTS

14.1. Sample Design (Rural Part)

Agricultural Census in rural part employs a stratified multi-stage sampling design with the following stages:

A. First Stage: Selection of Rural Mouzas

- **Stratum Z1** (Mouzas without cultivated land): *Simple Random Sampling (SRS)*
- **Stratum Z2** (Mouzas with cultivated land): *Probability Proportional to Size (PPS) using cultivated area as Measure of Size (MoS)*

B. Second Stage: Selection of one block from selected big Mouzas using Multivariate PPS (MPPS), with:

- Livestock-rearing households
- Self-agriculture households as measures of size (MOS).

C. Third Stage: Selection of households within selected Mouza/block:

- Certainty enumeration for NCH, MCH, machinery-only households, and nomads/gypsy
- Systematic Random Sampling (SRS) for:
 - Agricultural land operator households
 - Livestock-only households

2. Notation

Let:

- $h = 1, 2, \dots, H$ denote rural strata
- $i = 1, 2, \dots, N_h$ denote Mouzas in stratum h
- $b = 1, 2, \dots, B_{hi}$ denote blocks within Mouzas i
- $j = 1, 2, \dots, M_{hib}$ denote households in i^{th} Mouza of h^{th} stratum

Study variable:

y_{hibj} = value of interest (land area, livestock count, machinery count)

**Selection probabilities:**

π_{hi} = First stage inclusion probability of Mouza in stratum h

$\pi_{b|hi}$ = Second stage inclusion probability of block within Mouza in stratum h

$\pi_{j|hib}$ = Third stage inclusion probability of household in block of stratum h

Overall inclusion probability:

$$\pi_{hibj} = \pi_{hi} \times \pi_{b|hi} \times \pi_{j|hib}$$

Sampling weight:

$$W_{hibj} = \frac{1}{\pi_{hibj}}$$

3. First-Stage Inclusion Probability (Mouza)**(a) Stratum Z1 – SRS**

$$\pi_{hi} = \frac{n_h}{N_h}$$

where:

- N_h = total number of Mouzas in stratum h
- n_h = selected number of Mouzas in stratum h

(b) Stratum Z2 – PPS (Pareto Sampling)

Let,

X_{hi} = cultivated area of Mouza i ,

then

$$\pi_{hi} = \frac{n_{h*} X_{hi}}{\sum_{i=1}^{N_h} X_{hi}}$$

4. Second-Stage Inclusion Probability (Block Selection)

For big size Mouzas with multiple blocks, one block is selected using MPPS sampling technique.

Let:

- $Z_{hib}^{(1)}$ = livestock-rearing households in block b of mouza i in stratum h
- $Z_{hib}^{(2)}$ = self-agriculture households in block b of mouza i in stratum h

Block selection probability:

$$\pi_{b|hi} = \max\left(\frac{Z_{hib}^{(1)}}{\sum_b Z_{hib}^{(1)}}, \frac{Z_{hib}^{(2)}}{\sum_b Z_{hib}^{(2)}}\right)$$

For Mouzas with only one block:

$$\pi_{b|hi} = 1$$

5. Third-Stage Inclusion Probability (Households)

(a) Certainty Households

(NCH, MCH, Machinery-only, Nomads/Gypsy)

$$\pi_{b|hi} = 1$$

(b) Sampled Households (Systematic Sampling)

Let:

- $N_{hib}^{(c)}$ = total households in category c
- $n_{hib}^{(c)}$ = selected households in category c

$$\pi_{j|hib} = \frac{n_{hib}^{(c)}}{N_{hib}^{(c)}}$$

where:

- c=3 for Agricultural land operators
- c=4 for Livestock-only households

6. Estimator of Rural Population Total

The Horvitz–Thompson estimator for any rural characteristic is:

$$\hat{Y}_R = \sum_{h=1}^H \sum_{i \in sh} \sum_{b \in shi} \sum_{j \in shib} w_{hibj} y_{hibj}$$

7. Decomposition into Certainty and Sample Components

$$\hat{Y}_R = \sum_{k \in C} y_k + \sum_{h,i,b,j \in S} w_{hibj} y_{hibj}$$

- k= 1 to N_c for Certainty Strata (e.g., NCH, MCH)

8. Rural Estimates for Key Census Aggregates

(a) Total Operated Land

$$\hat{A}_R = \sum w_{hibj} A_{hibj}$$

(b) Total Livestock Population

$$\hat{L}_R^t = \sum w_{hibj} L_{hibj}^t$$

Where,

L_{hibj}^t = number of livestock of type t

(c) Total Agricultural Machinery

$$\hat{M}_R^m = \sum w_{hibj} M_{hibj}^m$$

Where,

M_{hibj}^m = number of machinery of type m

9. Aggregation

District estimate: Sum of rural Mouza estimates

Provincial estimate: Sum of district estimates

National estimate: Sum of provincial estimates

Estimation of Census Estimates – Urban Areas

10. Sample Design (Urban Part)

The urban component of the Integrated Agricultural Census follows a single-stage stratified sampling design, reflecting the relatively low incidence of agricultural activities in urban areas. Brief sample design of urban part described as,

Primary Sampling Unit (PSU): Urban Enumeration Block

Sampling Method: Simple Random Sampling (SRS) within urban strata

Ultimate Sampling Unit: Agricultural households

All agricultural households identified within a selected urban block are enumerated on a 100 percent basis, with no sub-sampling at household level.

11. Notation

Let:

- $h=1,2,\dots,H$ denote urban strata
- $i=1,2,\dots,N_h$ denote urban blocks in stratum h
- $j=1,2,\dots,M_{hi}$ denote agricultural households in block i of stratum h

Study variable:

y_{hij} = value of interest (land area, livestock, machinery)

Sampling parameters:

- N_h = total number of urban blocks in stratum h
- n_h = number of selected blocks in stratum h

12. Inclusion Probability and Sampling Weight

First-Stage (Block Selection)

Urban blocks are selected using Simple Random Sampling without replacement (SRSWOR).

$$\pi_{hi} = \frac{n_h}{N_h}$$

Household Inclusion Probability

As all agricultural households within selected blocks are enumerated:

$$\pi_{j|hi} = 1$$

Overall Inclusion Probability

$$\pi_{hij} = \pi_{hi} \times \pi_{j|hi} = \frac{n_h}{N_h}$$

Sampling Weight

$$w_{hij} = \frac{1}{\pi_{hij}} = \frac{N_h}{n_h}$$

13. Estimator of Urban Population Total

For any characteristic of interest, the Horvitz–Thompson estimator for the urban part is:

$$\hat{Y}_U = \sum_{h=1}^H \sum_{b \in s_h} \sum_{j \in shb} w_{hbj} y_{hbj}$$

where:

s_h denotes the set of sampled urban blocks in stratum h

14. Decomposition into Certainty and Sample Components

Since all agricultural households in selected blocks are fully enumerated, the urban estimate can be expressed as:

$$\hat{Y}_U = \sum_{k \in c} y_k + \sum_{j \in o} y_j$$

where:

- C = Certainty households (NCH, MCH, machinery-only, nomads/gypsy)
- O = other agricultural households (land operators and livestock holders)
- k= 1 to N_c for Certainty Strata (e.g., NCH, MCH)

All units contribute with the same block-level weight.

15. Urban Estimates for Key Census Aggregates

(a) Total Operated Land

$$\hat{A}_U = \sum w_{hbj} A_{hbj}$$

(b) Total Livestock Population

$$\hat{L}_U^t = \sum w_{hbj} L_{hbj}^t$$

Where,

L_{hbj}^t = number of livestock of type t

(c) Total Agricultural Machinery

$$\hat{M}_U^m = \sum w_{hbj} M_{hbj}^m$$

Where,

M_{hbj}^m = number of machinery of type m

16. National level -Total Estimates

The National Census estimate is obtained as:

$$\hat{Y}_{Total} = \hat{Y}_R + \hat{Y}_U$$

where:

- $\hat{Y}_R$ = rural estimate
- $\hat{Y}_U$ = urban estimate

17. Sampling Error (SE) and Coefficient of Variation (CV)

Sampling Errors measure the variability of Census estimates arising due to sample selection. For all census aggregates, sampling precision is assessed using the Coefficient of Variation (CV).

For any estimated total $\hat{Y}$

Variance

$$\hat{Var}(\hat{Y})$$

Standard Error (SE)

$$SE(\hat{Y}) = \sqrt{\hat{Var}(\hat{Y})}$$

Coefficient of Variation (CV)

$$CV(\hat{Y}) = \frac{SE(\hat{Y})}{\hat{Y}} \times 100$$

Sampling Error -Rural Areas

Rural estimates are obtained under a stratified multi-stage design

Rural Total Estimates

$$\hat{Y}_R = \sum_{h=1}^H \sum_{i \in sh} \sum_{b \in shi} \sum_{j \in shib} w_{hibj} y_{hibj}$$

Variance

$$\hat{Var}(\hat{Y}_R) = \sum_{h=1}^H N_h^2 \left(1 - \frac{n_h}{N_h}\right) \frac{S_h^2}{n_h}$$

Where, s_h^2 = variance of PSU totals in stratum h

Rural CV

$$CV(\hat{Y}_R) = \frac{\sqrt{\hat{Var}(\hat{Y}_R)}}{\hat{Y}_R} \times 100$$

**Sampling Error -Urban Areas**

Urban areas follow a single-stage stratified SRS of blocks with complete enumeration of agricultural households.

Urban Total Estimates

$$\hat{Y}_U = \sum_{h=1}^H \sum_{b \in sh} \sum_{j \in shb} w_{hbj} y_{hbj}$$

Variance

$$\hat{Var}(\hat{Y}_U) = \sum_{h=1}^H N_h^2 \left(1 - \frac{n_h}{N_h}\right) \frac{S_h^2}{n_h}$$

Where, S_h^2 = variance of PSU totals in stratum h

Urban CV

$$CV(\hat{Y}_U) = \frac{\sqrt{\hat{Var}(\hat{Y}_U)}}{\hat{Y}_U} \times 100$$

CV for Agricultural Land Households

Let:

$$A_{hibj} = \text{Operated agricultural land}$$

Total Agricultural Land Estimate

$$\hat{A} = \sum w_{hibj} A_{hibj}$$

CV of Agricultural Land

$$CV(\hat{A}) = \frac{\sqrt{\hat{Var}(\hat{A})}}{\hat{A}} \times 100$$

Computed separately for:

- Rural land household
- Urban land households
- Combined national estimates

CV for livestock households

Let:

$$L_{hibj}^{(t)} = \text{number of livestock of type } t$$

Livestock Total

$$\hat{L}^t = \sum w_{hibj} L_{hibj}^{(t)}$$

CV of Livestock estimates

$$CV(\hat{L}^t) = \frac{\sqrt{\hat{Var}(\hat{L}^t)}}{\hat{L}^t} \times 100$$

Calculated:

- By Livestock type (Cattle, Buffalo, Sheep, Goats etc.)
- Separately for rural, urban and national level

CV for Agricultural Machinery Households

Let:

$$M_{hibj}^m = \text{number of machines of type } m$$

Machinery Total

$$\hat{M}^m = \sum w_{hibj} M_{hibj}^m$$

CV for Machinery Estimates

$$CV(\hat{M}^m) = \frac{\sqrt{\hat{Var}(\hat{M}^m)}}{\hat{M}^m} \times 100$$

Domain Specific CVs

For any domain d (rural, urban, province, district):

$$CV(\hat{Y}_d) = \frac{\sqrt{\hat{Var}(\hat{Y}_d)}}{\hat{Y}_d} \times 100$$

15. DEVELOPMENT OF ERP SOLUTIONS AND DIGITAL INFRASTRUCTURE ARCHITECTURE

15.1 In-House Developed ERP Solution

The Pakistan Bureau of Statistics (PBS) developed a comprehensive in-house ERP solution for the Integrated Agriculture Census to digitize all census operations, including administration, monitoring, and data collection. The indigenous system significantly reduced costs by eliminating expensive licensing fees and enabling faster customization according to local requirements. Drawing upon experiences from the Digital Census, PBS enhanced operational efficiency, improved field monitoring, and addressed previous system deficiencies through locally tailored solutions. The components of the ERP Solution include:

Administrative Modules

PBS introduced digital administrative modules to systematically manage census activities, ensuring effective implementation, coordination, monitoring, and control of field operations.

Data Collection Applications (Android-Based)

- **Listing Application:** Used by enumerators to list households and geo-tag locations within assigned blocks.
- **Enumeration Application:** Used by enumerators for detailed data collection and by supervisors for quality verification and monitoring.

15.2 Features of Digital Data Collection

PBS implemented advanced digital mechanisms to improve data quality, accuracy, and operational transparency through real-time monitoring and supervisory systems. Key Features include:

Geo-tagging and GPS Tracking: Every interview was linked with GPS coordinates to verify field activities and coverage.

Route Monitoring: Supervisors tracked enumerator movements to identify suspicious patterns or incomplete coverage.

Timing Analysis: Monitoring time spent per section/question helped detect unusual behavior and improve efficiency.

Quality Alerts & Data Referral System: Backend-generated alerts identified suspicious or inconsistent data, enabling corrections through re-visits and re-verification.

WhatsApp-Based Coordination: District-level communication groups facilitated rapid issue resolution and implementation of instructions.

15.3 New Digital Innovations

The indigenous software introduced several innovative features for efficient online and offline census operations. The major digital features include:

- Online and offline functionality with automatic/manual synchronization.
- Geo-tagging, audit trails, and user/device tracking.
- Satellite imagery and map-based block identification.
- Offline map caching and polygon-based boundary visualization.
- Intelligent handling of sampled, listed, and selected households.
- Strong edit checks and validation controls.
- Version control with in-app updates similar to Play Store functionality.
- Intelligent duplication handling and post-sync data editing.

Strengthening the Supervisor and CDC Role

PBS deployed Census District Coordinators (CDCs) across districts to support logistics, supervision, IT troubleshooting, training management, and operational monitoring. Supervisors conducted field verification, daily reviews, productivity tracking, and enumerator support to ensure data quality and compliance.

15.4 Online Monitoring Dashboard

PBS developed a web-based real-time monitoring dashboard to track census progress and performance nationwide. Key Dashboard Features include:

- Real-time data synchronization and centralized monitoring.
- Interactive maps, charts, graphs, and KPI visualization.
- Automated validation checks and anomaly detection.
- User-based access controls and alert systems.
- Data filtering, drill-down analysis, and reporting/export functions.
- Monitoring coverage gaps, delays, missing information, and data quality indicators.

The dashboard significantly improved decision-making, operational oversight, and timely corrective actions during census activities.

15.5 NCH Re-engineering and Portal

PBS developed a web-based National Certainty Holdings (NCH) Portal to manage information on large livestock and land holdings. District focal persons coordinated with provincial departments to upload and update NCH data. Enumerators and supervisors used the portal to identify, locate, and collect information from major agricultural holdings before block-level data collection began.

15.6 Tier-3 Data Center (On-Premises)

To support the digital census infrastructure, PBS established a state-of-the-art Tier-3 Data Center at Statistics House, Islamabad. The facility provided secure, scalable, and highly

reliable hosting services for census operations. Key Contributions of the Data Center include:

- Ensured uninterrupted digital operations with 99.982% uptime and redundancy.
- Supported centralized storage, real-time synchronization, and secure remote access.
- Enabled large-scale data processing, analytics, AI, and big data capabilities.
- Incorporated disaster recovery, business continuity, and advanced cybersecurity measures.
- Utilized virtualization and scalable hosting to manage peak workloads efficiently.
- Facilitated centralized technical monitoring and rapid troubleshooting.

The Tier-3 Data Center served as the digital backbone of the 7th Agriculture Census, ensuring secure, efficient, and cost-effective execution of nationwide census operations.

16. QUALITY ASSURANCE FRAMEWORK, DATA VALIDATION PROTOCOLS, AND TREND ANALYSIS

16.1 Data Cleaning and Imputation Methodology

Pakistan Bureau of Statistics (PBS) adopted a robust hybrid methodology for data cleaning and validation during the 7th Agricultural Census 2024, known as the “Integrated Digital Count.” This methodology combined complete enumeration with sample-based approaches to ensure comprehensive coverage, accuracy, and efficient resource utilization. The entire process was centrally managed from PBS Headquarters, Islamabad, making data cleaning and imputation both cost-effective and time-efficient.

To strengthen data reliability, PBS integrated modern digital technologies, including tablet-based data collection, geo-tagging, digital boundary contouring, and real-time error correction mechanisms. A specialized committee of senior technical officers was constituted to design and implement online edit checks, imputation rules, and data quality assurance protocols through a dedicated IT-based monitoring system.

Identification of Data Anomalies and Discrepancies

To minimize errors during field operations, detailed data entry specifications and built-in validation checks were incorporated into tablet-based applications. Through automated queries and analytical review, PBS identified anomalies and inconsistencies at both block and household levels.

At the block level, issues such as missing or duplicate contact numbers, excessive reporting of nomadic households, unusually low listing times, repeated GPS locations, and blocks with no agricultural households were flagged for verification. At the household level, abnormal reporting of landholdings, livestock, machinery, irrigation equipment, and poultry were identified as outliers. Additionally, value occurrence analysis revealed digit preference bias, particularly the overuse of the digit “8,” which was largely attributed to typing mistakes caused by tablet keypad sensitivity and enumerator fatigue.

Several major discrepancies were detected during analysis. Over-reporting of nomadic households was observed, especially in Sindh, where migrant populations were mistakenly classified as nomads due to conceptual misunderstandings during training. Inconsistencies in the number of farms compared to previous census trends also required revalidation. Geographically improbable livestock reporting, such as Yak/Zomo entries in Punjab districts, and irregular reporting of draft animals and irrigation equipment in specific districts were identified and corrected through technical review and field verification.

16.2 Real-Time Monitoring through GIS-Based Dashboard

PBS developed a specialized GIS-based web dashboard for real-time monitoring of field operations. The dashboard provided live updates on data collection progress, enumerator movement, block coverage, and anomaly detection. This digital monitoring system enabled supervisors to verify whether enumerators were working within assigned boundaries and ensured complete geographic coverage during field operations.

Data Cleaning Procedure

To resolve identified discrepancies, PBS implemented a multi-stage data cleaning strategy involving both automated systems and human intervention. Initially, suspicious records triggered alerts through SMS gateways and notifications directly on enumerators' tablets. Enumerators were instructed to review and correct entries while remaining in the field.

Follow-up verification mechanisms included telephone calls to enumerators and household respondents through Computer-Assisted Telephone Interviewing (CATI), physical field verification, and centralized monitoring by district and headquarters teams. A dedicated call center with 50 trained agents was established at PBS Headquarters to provide round-the-clock technical support, complaint management, respondent verification, and quality assurance services. Before the completion of fieldwork, additional reminder messages were sent to enumerators emphasizing data validation and final verification procedures.

16.3 Data Cleaning, Imputation, and Validation

PBS developed comprehensive data cleaning specifications and rule-based imputation procedures to ensure high-quality census data. The process involved multiple iterative stages, including data inspection, removal of irrelevant or duplicate records, handling of missing values, management of outliers, and structural standardization of datasets.

Missing or incomplete data were addressed using statistical imputation techniques such as mean, median, mode, averages, and structural modeling, depending on the nature of the variables. Outliers and extreme values were carefully reviewed through consultative meetings with census experts before correction or removal. Structural errors such as inconsistent formatting, incorrect units, typographical mistakes, and classification issues were also standardized according to the approved tabulation plan.

The cleaned data then underwent rigorous validation and quality assurance checks to ensure consistency and analytical reliability. Automated cross-sectional validations, real-time supervision, and independent technical reviews by professional census teams ensured data integrity throughout the process. This integrated combination of digital tools and expert oversight significantly improved data accuracy and enabled PBS to produce reliable census outputs promptly.

16.4 Trend Analysis and Data Validation

To validate census findings and strengthen reliability, PBS conducted extensive trend analysis using multiple national and international data sources. Population and Housing Census 2023 data were used for sample frame development, household verification, and monitoring of coverage during field operations.

Comparisons were also made with agricultural statistics published by the Ministry of National Food Security and Research, including livestock projections, crop area and yield statistics, fodder production trends, and agricultural machinery estimates. Additional validation sources included vaccination records from provincial livestock departments, Household Integrated Economic Survey (HIES) data for milk consumption trends, and Pakistan's export-import data for livestock product comparisons.

PBS further consulted published studies and reports, such as *The State of Pakistan's Agriculture 2023*¹ by the World Bank Group and sector-specific livestock publications. Tractor manufacturers were also contacted directly to verify domestic production and import statistics related to agricultural machinery.

Following validation and analysis, PBS prepared a comprehensive tabulation plan consisting of three major volumes: Land & Crops, Livestock, and Agricultural Machinery. Cross-table consistency checks and quality control procedures were applied during tabulation to ensure coherence, reliability, and accuracy of the final results of the 7th Agricultural Census 2024.

17. FINALIZATION, APPROVAL, AND DISSEMINATION OF AGRICULTURAL CENSUS RESULTS

The finalization, approval, and dissemination of the 7th Agricultural Census 2024 represented a crucial stage in the census lifecycle, ensuring that the compiled data were methodologically sound, statistically reliable, and aligned with international standards recommended by organizations such as the Food and Agriculture Organization (FAO). The Integrated Digital Count approach simultaneously captured information related to crop-producing households, livestock-rearing households, and agricultural machinery users within a single census framework. Due to the complexity of integrating these sectors, special emphasis was placed on data consistency, validation, and elimination of anomalies before public release.

17.1 Data Validation and Finalization

After completion of data processing, PBS conducted an extensive validation exercise involving subject-matter specialists, sampling experts, and data processing teams. The validation process focused on verifying tabulated results against the approved tabulation plan, checking consistency across crops, livestock, and machinery indicators, and correcting anomalies through iterative statistical review. Estimation procedures and raising factors for sample-based data were also finalized to ensure methodological accuracy.

To further strengthen the reliability of results, census estimates were compared with several auxiliary data sources, including cropping patterns and acreage trends, import and export statistics, livestock vaccination records, feed and fodder indicators, and household consumption patterns. This triangulation approach enhanced confidence in the estimates and reduced the likelihood of inconsistencies between census findings and sectoral realities.

17.2 Development of Tabulation Plan and Key Indicators

A comprehensive tabulation plan was developed covering agriculture, livestock, and agricultural machinery sectors. Given the importance of timely dissemination, PBS adopted a phased release strategy. Initially, a Main Findings Report was prepared containing priority indicators and summary tables, while more detailed tabulations were planned for subsequent release.

The key indicators included information on the number and type of farms, farm ownership structures, gender of household heads, average farm size, irrigation sources, cropped area

¹ <https://www.pbc.org.pk/wp-content/uploads/The-State-of-Pakistans-Agriculture.pdf>

distribution, and adoption of greenhouse technology. In the livestock sector, major indicators included population estimates for cattle, buffaloes, sheep, goats, camels, horses, asses, mules, and yaks/dzo or dzomos. In addition, ten priority statistical tables were prepared for immediate dissemination to support policy formulation and planning activities.

17.3 Multi-Stage Consultation and Approval Process

To ensure transparency, credibility, and stakeholder ownership, PBS adopted a structured three-tier consultation mechanism before finalizing the census results.

PBS Internal Review

An internal technical review meeting was held on 24 July 2025 involving subject specialists, sampling experts, and data processing professionals. The meeting focused on reviewing preliminary tabulations, estimation procedures, and identifying inconsistencies or anomalies. Recommendations included a detailed comparison of census results with Crop Reporting Service (CRS) data, revalidation of livestock growth rates in Khyber Pakhtunkhwa and former FATA areas, reassessment of camel and horse populations, and further analysis of farm size distribution in Sindh. Based on these discussions, refinements were incorporated into the tabulations and indicators.

Federal and Provincial Stakeholder Consultation

On 30 July 2025, PBS conducted consultations with major stakeholders, including the Ministry of National Food Security and Research, Provincial Crop Reporting Services, Livestock Departments, and planning institutions. Stakeholders appreciated the integrated and digital methodology of the census, particularly the use of geo-tagging, GIS-based monitoring, and quality control mechanisms. Recommendations emphasized the timely dissemination of national and provincial results, the provision of detailed breed-wise and age-wise livestock statistics, and cross-validation of livestock growth trends using consumption, fodder, vaccination, and trade data.

Expert Consultation

A final consultation with renowned agricultural and livestock experts from academia, research institutions, and sectoral organizations was held on 31 July 2025. Experts reviewed methodological approaches and sectoral indicators, and their recommendations were incorporated into the final census estimates before official approval and release.

17.4 Workflow for Finalization and Dissemination

The workflow for finalization and dissemination followed a systematic sequence beginning with listing and data collection, followed by data processing, preliminary tabulations, validation checks, estimation procedures, and preparation of the tabulation plan. The process further included internal technical review, stakeholder consultation, expert review, final approval of results, preparation of the Main Findings Report, official launch, and public dissemination through reports, statistical tables, and digital platforms.

17.5 Official Launch of Census Results

The official launch of the 7th Agricultural Census results took place on 6 August 2025 at the auditorium of the National Agricultural Research Council (NARC). The report was formally released by the Federal Minister for Planning, Development, and Special Initiatives in the presence of representatives from federal ministries, provincial departments, research institutions, development partners, and national statistical stakeholders. The launch marked a historic milestone as it presented integrated statistics on crops, livestock, and agricultural machinery within a single census framework after nearly fifteen years.

17.6 Dissemination Strategy, Framework, and Statistical Products

Following the launch, PBS implemented a comprehensive dissemination strategy to maximize accessibility and utilization of census outputs. Dissemination measures included publication of the Main Findings Report, release of priority statistical tables up to district level, uploading reports and datasets on the official PBS website, circulation of reports to stakeholders, and provision of machine-readable datasets for researchers and analysts. Statistical tables were made available in both PDF and Excel formats to facilitate ease of use for policymakers, researchers, and development partners.

PBS prepared a variety of statistical products tailored to the needs of different users. These included the Main Findings Report containing summary indicators, priority statistical tables for agriculture and livestock, thematic reports with detailed tabulations, digital datasets for analytical purposes, and online dissemination through web portals. These products provided information at national, provincial, district, and thematic levels to support evidence-based planning and research.

17.7 Data Confidentiality and Statistical Disclosure Control

All dissemination activities adhered strictly to the principles of official statistics and the General Statistics Reorganization Act 2011. Census results were released only in aggregated statistical form to protect respondent confidentiality. Disclosure control measures included suppression of sensitive cells, removal of identifiable household-level information, and application of international confidentiality protocols. These safeguards ensured the privacy of respondents while maintaining the analytical usefulness of the data.

DEFINITIONS AND EXPLANATIONS

The definitions of different data items / variables on which data were collected in Integrated Agricultural Census 2024 are presented here. These definitions will help the data users to understand conceptual issues related to the data and are given in lexicographic order as below:

1. **Agricultural Census** is collection of information about Agriculture Sector, Livestock Sector and Agricultural Machinery Sector.
2. **Agricultural Households** include those households that are operating any farm area for agriculture purposes irrespective of its ownership they could be operating individually or jointly with other households, having livestock or machinery.
3. **Animal Died** refers to the animal which expired during the period under reference.
4. **Animal Fallen Sick** refers to the animals which have suffered from any disease / illness at least once during the period under reference.
5. **Animal Purchased** stands for the animal which has been bought during the period under reference. The animal(s) gifted in and taken for rearing on share or contract basis are also included.
6. **Animal Slaughtered** refers to the animal slaughtered on account of Eid ul Adha and other occasions.
7. **Animal Sold** means that animal which has been sold during the period under reference. The animal(s) gifted out, given for rearing on share basis and stolen are also included.
8. **Animal Treated** refers to the animal which have been treated during the period under reference at least once against one or more disease(s) / illness(es).
9. **Animal Vaccinated** refers to the animal which has been provided any preventive treatment against any of the disease(s) / worm(s) at least once during the period under reference.
10. **Area Owned** includes the total area owned by all members of a household irrespective of its location. It also includes the area held in owner-like possession; such as Inherited Land, Purchased Land, Mortgaged Land in Possession, Common/Shared Land in Possession, Allotted Land Equivalent to Ownership, Numberdari Land, Flood-Irrigated Land in Possession, Auctioned Land, Communal or Tribal Land and Religious/Trust Land.
11. **Asses** have been used as collective name of male asses and female asses.
12. **Banjar Jadeed** refers to the uncultivated area which was not sown / cultivated for the last two to four years.
13. **Banjar Qadeem** refers to the uncultivated area which was not sown / cultivated for more than last four years.
14. **Block** comprises of a cluster of approximately 250 to 350 households which can be identified within specified boundaries. In rural areas, each Mauza constitutes at least one block, even if it is uninhabited (Be-Chiragh). Mauzas with larger populations, comprised more than one block.
15. **Buffaloes** have been used as the collective name for male buffaloes, female buffaloes and their youngstock.

16. **Bull for Breeding** means the bullocks / male buffaloes kept primarily for breeding.
17. **Cows / Buffaloes / Goats In-Milk** stand for those cows / buffaloes / goats which are in-milk on the day of census enumeration.
18. **Canal Irrigated Area** refers to the area irrigated by canal.
19. **Cattle** is the collective name given to bovine animals including bullocks, cows and their youngstock.
20. **Census** means Agricultural Census 2024.
21. **Census Day** refers to the day on which an interview is conducted with a selected household. Past twelve months refers to the twelve-month period prior to the census day.
22. **Center pivot system or central pivot irrigation system** is a mechanical, pressurized method of irrigation. It sprinkles water in a circular pattern by rotating around a central point located in the middle of the field, making it one of the most common and effective irrigation methods.
23. **Cropping Intensity** Cropping intensity is a measure of the intensity of land utilization for agricultural cropping. It tells us how many crops are cultivated in the same field during a year. It is a ratio of total cropped area to net sown area, expressed as a percentage.
24. **Cultivated Area** is the farm area which was sown at least once during the census year i.e. 2023-24 or a year before.
25. **Current Fallow** is the cultivated farm area which was not sown during the census year for the purpose of regaining fertility and / or any other specific objective / reason but was cropped at least once during the preceding year.
26. **Drip system** refers to the method of irrigating soil by dripping water at a very slow rate through small plastic pipes having tiny outlets or drippers that release water directly onto selected spots in the field, ensuring precise and efficient irrigation.
27. **Dry Cows / Buffaloes / Goats** stand for those cows / buffaloes / goats which were reported dry after having been in-milk on the day of census enumeration.
28. **Fodder Area** includes the area under Rabi fodders as well as Kharif fodders.
29. **Fragment or Parcel** refers to any piece of land of a farm surrounded by land of other farm(s) and / or by land and / or water not forming part of that farm. One farm may have one or more fragments / parcels in it.
30. **Horses** have been used as collective name of horses and mares.
31. **House** means any type of structure / dwelling used for human inhabitation.
32. **Household** means a person or a group of people living together and could be having blood relationship with each other and eating from the same kitchen.
33. **Household under Debt** includes households reported under any type of debt at the time of census enumeration.
34. **Irrigated Area** includes the cultivated area irrigated at least once during the census year by artificial (man-made) sources of irrigation.
35. **Karez** is an irrigation system in which water is stored underground through wells and tunnels and then carried to the required areas when needed.

36. **Kharif Crops** are monsoon or autumn crops, sown in period from April to May and harvested in period from October to December.
37. **Land Tenure** refers to the rights / arrangements under which the land is operated. Land tenure may be of following types:
 - a. **Owner Farm:** An arrangement in which the entire land is owned by the operator himself.
 - b. **Tenant Farm:** An arrangement in which the entire land is taken from other household(s) against a fixed rent in cash/ kind/ share in the produce or against any other terms and conditions.
 - c. **Owner- Cum-Tenant Farm:** An arrangement in which a part of the land area is owned by the operator household and the remaining is taken from other household(s) against rent/ share of the produce or any other terms and conditions.
38. **Make:** refers to the term/ name by which a tractor / bulldozer / combine harvester is known such as Massey Ferguson, Fiat, Belarus, Jhon Deere, etc.
39. **Migratory Households** Migratory households are those that usually change their residence depending upon the seasons.
40. **Mixed Crops / Inter-planted Crops** is the phenomenon of sowing more than one crop in one field at the same time. The following methodology is adopted for recording area reported under such cases
 - a. **Crops Grown in Orchards:** If the orchard consists of fruit trees of non-bearing age orchard is reported as crop area. If the orchard consisted of fruit trees of bearing age, only half of the area of a particular crop grown in the orchard is recorded as crop area and rest of the area is considered as orchard area
 - b. **Crops Grown Together:** If the two crops grown together are harvested at the same time, one half of the total area in the crops grown together is reported for each of the crops. If the two crops grown together were harvested at different times, the entire area of the crops grown together was reported for each of the crops simultaneously.
41. **Model** is the number which is assigned to a Tractor / Bulldozer / Combine Harvester by the manufacturing firm such as Fiat-480, MF-240, Ford-4600, etc.
42. **Mouza Certainty Holdings (MCH)** is the table of important individual households owning farming/livestock at Mouza level (was generated automatically on tablet). MCH had the possession of 20 acres or more land, 20 or more cattle/buffaloes, 50 or more sheep/goats, 20 or more camels and 20 or more yaks. It is also considered that nomadic and migratory households are MCH. Households, which have only equipment of agricultural nature, are also considered as MCH.
43. **Mouza or Deh** is a demarcated territorial unit for which separate revenue records including a cadastral map is maintained by the provincial revenue departments. One Mouza / Deh may contain one or more population settlements or may have no settlement (Be'chiragh).
44. **National Certainty Holdings (NCH)** the list of nationally significant privately owned farming/livestock households was made with the help of the Provincial Agriculture Department and the Provincial Livestock Department. The households falling under the NCH list have 100 acres and above land, 50 and above cattle/buffaloes, 200 and above sheep/goats and 25 or above camels. The government farms are also termed as NCH regardless of their size. NCH are fully enumerated either in selected block or non-selected block.

45. **Net Sown Area** is the cultivated farm area which was sown at least once during the census year it also includes area under orchards.
46. **Nomadic Households** are those that do not settle permanently or for a long period in one place and generally live in huts.
47. **Orchard Area** is the farm area compactly planted with fruit trees.
48. **Other Area** includes area operated by a household, other than the area owned, without paying any rent in the usual form.
49. **Rabi Crops** are winter crops, sown in period from October to December and harvested in period from April to May.
50. **Reference Period** for the Agricultural Census 2024 will be the current agricultural year, which includes the previous Rabi 2023–24 and the current Kharif 2024 crops.
51. **Selected Mouza / Deh / Village / Killi / block** refers to the mouza or block that has been selected through a specific selection method. The houses included in the selected mouza refer to all houses located within the boundaries of that mouza, regardless of whether the residents own land outside the mouza or do not possess any land at all.
52. **Settled Areas** are those where the Revenue Department has formally carried out land measurements and maintains proper records.
53. **Sprinkler system** or spray irrigation is a method of watering crops that resemble natural rainfall. Water is distributed through a system of pipes, usually by pumping, and then sprayed into the air to fall on the crops like rain.
54. **Total Cropped Area** is the aggregate area of crops raised at a farm during the census year including the area under orchards.
55. **Tractor / Bulldozer / Combine Harvester** include wheel type tractors as well as crawler type bulldozers and combine harvesters.
56. **Tubewell** consists of all types of closed surface mechanized water lifting devices such as centrifugal water pumps and deep-well turbines meant for lifting sub-soil water generally for irrigation and drainage.
57. **Tunnel Farming/Greenhouse** is a modern method of cultivation in which crops are grown in long rows or square (blocks) formations under a roof made of plastic or fiber to protect crops from harsh environmental factors such as rain, hail, snow, wind, frost, and insects.
58. **Uncultivated area** is the farm area which is otherwise fit for cultivation but was not cropped during the census year or in the year before the census year due to the presence of any of the constraints like waterlogging, non-availability of irrigation water, salinity, unleveling of land, manpower and/or funds shortage, etc.
59. **Unsettled Areas** are those areas where the Revenue Department has not formally measured the land, nor does it maintain any official record of measured land.
60. **Youngstock** includes males/females below three years in case of cattle/ buffaloes/ camels/ horses/ mules/ asses, and below one year in case of sheep/goats.

MAIN FINDINGS

AGRICULTURE RESULTS

1. Farms and Farm Area

According to the estimates of Agricultural Census 2024, there were 3,576.6 thousand farms in the Khyber Pakhtunkhwa. These farms were operating on an area of 8,836.8 thousand acres. The highest number of farms were reported in Peshawar i.e. 1,433.0 thousand acres, whereas the highest average farm area size was reported in D. I. Khan i.e. 4.6 acres. The average size of farms in the province was 2.5 acres whereas the average size of cultivated area was 2.0 acres.

The distribution of all farms and farm area by division is given in table 1 and in fig: 1a to 1c below:

TABLE 1: NUMBER OF FARMS AND FARM AREA – BY DIVISION

(Number in Thousand & Area in Thousand Acres)

Administrative Unit	Number of Farms		Farm Area		Average Size (in Acres) of	
	Number	Percent	Total	Percent	Farm Area	Cultivated Area
Khyber Pakhtunkhwa	3,576.6	100	8,836.8	100	2.5	2.0
Bannu	293.2	8	1,189.1	13	4.1	3.1
D. I. Khan	287.5	8	1,333.3	15	4.6	4.2
Hazara	362.6	10	1,455.8	17	4.0	2.4
Kohat	290.0	8	960.6	11	3.3	2.7
Malakand	743.8	21	1,713.7	19	2.3	2.0
Mardan	166.5	5	578.6	7	3.5	3.2
Peshawar	1,433.0	40	1,605.7	18	1.1	1.0

Figure 1a: DISTRIBUTION OF AVERAGE SIZE OF FARM

Figure 1b: DIVISIONAL DISTRIBUTION OF NUMBER OF FARMS (3,576.6 THOUSAND)

Figure 1c: DIVISIONAL DISTRIBUTION OF FARM AREA (8,836.8 THOUSAND ACRES)

2. Cultivated Area

This census estimates revealed that Khyber Pakhtunkhwa has a Total Cultivated Area of 7,236.3 thousand acres, of which Net Sown area was 6,910.1 thousand acres while remaining area of Current Fallow is 326.2 thousand acres. Among divisions, Malakand has the largest cultivated area of 1,512.5 thousand acres and the efficiency 97%, making it the main agricultural hub of the province. Mardan 99% and Hazara 97% also demonstrate high land utilization with relatively smaller cultivated areas. In contrast, Peshawar and D. I. Khan has a lower utilization rate of 93% and a comparatively higher proportion of fallow land 95.2 and 83.2 thousand acres respectively, indicating underuse of agricultural potential.

The distribution of cultivated area, net sown area and current fallow amongst the divisions is given in table 2 and in fig: 2a to 2b below:

TABLE 2: CULTIVATED AREA – BY DIVISION

(Area in Thousand Acres)

Administrative Unit	Cultivated Area			Net Sown Area as % of Cultivated Area
	Total	Net Sown	Current Fallow	
Khyber Pakhtunkhwa	7,236.3	6,910.1	326.2	96
Bannu	903.3	862.9	40.4	96
D. I. Khan	1,196.3	1,113.1	83.2	93
Hazara	874.5	851.1	23.4	97
Kohat	781.1	745.7	35.4	96
Malakand	1,512.5	1,471.9	40.6	97
Mardan	538.9	530.8	8.0	99
Peshawar	1,429.7	1,334.5	95.2	93

Note: Figures may not add up exactly to their respective totals due to rounding effect.

3. Tenure Classification of Farms and Farm Area

The table provided classifies agricultural land and farms in Khyber Pakhtunkhwa by tenure. The data is measured in thousand for the number of farms and farm areas. Total number of farms counted as 3,576.6 thousand and total farm area counted as 8,836.8 thousand acres in Agricultural Census 2024. Most farms in Khyber Pakhtunkhwa are operated by their owners. Out of 3,576.6 thousand total farms, 3,335.2 thousand are "Owner" farms. Farm Area Owners manage 7,756.8 thousand acres out of 8,836.8 thousand acres which depicts the dominance.

Tenure classification of farms and farm areas division is given in table 3 and in fig: 3a to 3d below:

**TABLE 3: TENURE CLASSIFICATION OF FARMS AND FARM AREA – BY DIVISION**

(Number in Thousand & Area in Thousand Acres)

Administrative Unit	Number of Farms				Farm Area			
	Total	Owner	Owner-cum-Tenant	Tenant	Total	Owner	Owner-cum-Tenant	Tenant
Khyber Pakhtunkhwa	3,576.6	3,335.2	93.4	148.0	8,836.8	7,756.8	506.3	573.7
Bannu	293.2	285.2	3.4	4.6	1,189.1	1,146.0	21.3	21.8
D. I. Khan	287.5	275.9	3.5	8.1	1,333.3	1,184.2	53.4	95.7
Hazara	362.6	339.3	11.8	11.4	1,455.8	1,312.0	83.7	60.1
Kohat	290.0	277.8	6.9	5.3	960.6	883.1	55.4	22.0
Malakand	743.8	672.7	23.7	47.4	1,713.7	1,490.8	114.8	108.0
Mardan	166.5	124.9	5.4	36.2	578.6	381.3	39.0	158.3
Peshawar	1,433.0	1,359.4	38.6	35.0	1,605.7	1,359.3	138.7	107.7

Note: Figures may not add up exactly to their respective totals due to rounding effect.**Figure 3a: PERCENTAGE DISTRIBUTION OF TENURE CLASSIFICATION OF FARMS BY DIVISION**

Figure 3c: PROVINCIAL LEVEL TENURE CLASSIFICATION OF FARMS (3,576.6 THOUSAND)

Figure 3d: PROVINCIAL LEVEL TENURE CLASSIFICATION OF FARM AREA (8,836.8 THOUSAND ACRES)

4. Owner Operated and Tenant Operated Area

Census data indicated that Owner Operated Area and Tenants Operated Area of 8,008.9 thousand acres, and 827.9 thousand acres respectively, accounting for 8,836.8 thousand acres in Total Farm Area. Whereas, the 359.0 thousand acres were operated by tenants on shared cropping, 361.1 thousand acres on lease and 107.7 thousand acres area was operated by other tenants.

The distribution of owner operated, and tenant operated area amongst the divisions is given in table 4 and in Fig: 4a to 4b below:

TABLE 4: OWNER OPERATED AND TENANT OPERATED AREA – BY DIVISION

(in Thousand Acres)

Administrative Unit	Total Farm Area	Owner Operated Area	Tenant Operated Area			
			Total	Share Cropped	Leased	Others
Khyber Pakhtunkhwa	8,836.8	8,008.9	827.9	359.0	361.1	107.7
Bannu	1,189.1	1,157.0	32.1	23.5	7.4	1.2
D. I. Khan	1,333.3	1,208.4	124.9	98.2	21.0	5.7
Hazara	1,455.8	1,349.4	106.4	26.5	46.1	33.9
Kohat	960.6	912.8	47.8	16.3	14.7	16.8
Malakand	1,713.7	1,547.1	166.5	47.3	84.8	34.5
Mardan	578.6	394.5	184.1	89.6	91.4	3.1
Peshawar	1,605.7	1,439.7	166.0	57.7	95.9	12.5

Note: Figures may not add up exactly to their respective totals due to rounding effect.

Figure 4b: DISTRIBUTION OF TENANT OPERATED AREA (827.9 THOUSAND ACRES) AT PROVINCIAL LEVEL

5. Land Use Intensity

Land use intensity in the Khyber Pakhtunkhwa was 94 percent on average. It was highest (99 percent) in Mardan division and lowest (89 percent) in Hazara division. It was 97 percent in D.I. Khan division followed by Peshawar, Malakand, Bannu and Kohat division being 96, 95, 91 and 90 percent respectively. The intensity of land use in Khyber Pakhtunkhwa was higher for tenant operated farms being 98 percent while it was 94 percent for owner farms. Land use intensity was the lowest being 89 percent for owner-cum-tenant farms in Khyber Pakhtunkhwa.

The intensity of land use by tenure and by division is given in table 5 and in fig: 5 below:

TABLE 5: LAND USE INTENSITY BY TENURE – BY DIVISION

Administrative Unit	Average Intensity of Land Use (Percent)			
	All Farms	Owner Farms	Owner - cum- Tenant Farms	Tenant Farms
Khyber Pakhtunkhwa	94	94	89	98
Bannu	91	91	87	100
D. I. Khan	97	97	90	91
Hazara	89	89	83	98
Kohat	90	90	81	98
Malakand	95	96	89	98
Mardan	99	98	96	99
Peshawar	96	96	91	100

Figure 5: DISTRIBUTION OF LAND USE INTENSITY

6. Cropping Intensity

Cropping intensity is a measure of the intensity of land utilization for agricultural cropping. It tells us how many crops are cultivated in the same field during a year. It is a ratio of total cropped area to net sown area, expressed as a percentage. Cropping Intensity by tenure - by Divisions, provides a statistical breakdown of agricultural land usage efficiency across Khyber Pakhtunkhwa. The overall cropping intensity in the province was 145 percent. Malakand exhibited the highest cropping intensity at 173 percent. The lowest was in D. I. Khan being only 120 percent. Cropping intensity in Mardan was 170 percent followed by Hazara, Peshawar, Kohat, and Bannu division being 151, 142, 137 and 124 percent respectively. The intensity of cropping was 143 percent for owner farms, owner-cum- tenant farms was 150 percent and 166 percent for tenant farms.

The intensity of cropping by tenure and by division is given in table 6 and by division in fig: 6 below:

TABLE 6: CROPPING INTENSITY BY TENURE – BY DIVISION

Administrative Unit	Average Intensity of Cropping (Percent)			
	All Farms	Owner Farms	Owner - cum-Tenant Farms	Tenant Farms
Khyber Pakhtunkhwa	145	143	150	166
Bannu	124	124	118	130
D. I. Khan	120	119	129	117
Hazara	151	150	145	164
Kohat	137	139	104	146
Malakand	173	173	165	180
Mardan	170	165	170	180
Peshawar	142	137	164	180

Figure 6: DISTRIBUTION OF CROPPING INTENSITY

7. Cropping Pattern

Of the total cropped area of 10502.1 thousand acres in Khyber Pakhtunkhwa, Wheat alone occupied 50 percent, followed by Maize 18 percent, Fodders 6 percent, Rice 4 percent, Sugarcane 3 percent, Jawar/Bajra, Pulses and Orchards 2 percent each, Oilseeds 1 percent. The remaining 12 percent of the area was reported under Other Crops.

The cropping pattern as observed in various divisions is given in table 7 and in fig: 7 below:

**TABLE 7: PERCENT SHARE OF VARIOUS CROPS IN TOTAL CROPPED AREA- BY DIVISION**

Administrative Unit	Percent Share of Various Crops in Total Cropped Area										
	Wheat	Rice	Maize	Jawar/ Bajra	Cotton	Sugar-cane	Oil Seeds	Pulses	Orchards	Fodders	Others
Khyber Pakhtunkhwa	50.00	4.30	18.40	2.30	-	3.00	0.80	1.70	1.60	5.50	12.20
Bannu	48.30	11.60	12.00	2.20	-	0.90	0.70	6.00	0.90	8.70	8.60
D. I. Khan	63.10	10.40	3.80	0.50	0.10	5.60	1.30	3.00	1.90	4.30	6.10
Hazara	37.90	0.30	52.00	0.30	-	0.20	0.10	0.10	1.20	2.30	5.70
Kohat	60.70	7.60	4.30	3.30	-	0.10	4.20	5.50	0.80	2.00	11.50
Malakand	47.10	3.00	28.30	3.40	-	0.70	0.20	0.20	2.50	8.10	6.50
Mardan	39.40	1.20	20.10	1.10	0.20	10.20	0.40	-	0.90	3.20	23.20
Peshawar	52.20	0.10	4.60	3.70	-	5.30	0.20	0.10	1.80	6.20	25.80

Note: 1) Figures may not add up exactly to hundred due to rounding effect

2) “-” No Value

8. Area Under Major Crops

This table provides a breakdown of the agricultural area (in thousand acres) dedicated to five major crops in Khyber Pakhtunkhwa: Wheat, Rice, Cotton, Sugarcane, and Maize, categorized by divisions. Statistics showed that in the province total farm area of Wheat was 5,247.1 thousand acres depicting the dominance, Rice 453.5 thousand acres, Cotton 3.6 thousand acres, sugarcane 313.6 thousand acres and maize 1,938.8 thousand acres.

**TABLE 8: AREA UNDER WHEAT, RICE, COTTON, SUGARCANE AND MAIZE – BY DIVISION**

(Area in Thousand Acres)

Administrative Unit	Wheat		Rice		Cotton		Sugarcane		Maize	
	Area	%	Area	%	Area	%	Area	%	Area	%
Khyber Pakhtunkhwa	5,247.1	100	453.5	100	3.6	100	313.6	100	1,938.8	100
Bannu	541.0	10.3	129.6	28.6	0.2	5.5	10.4	3.3	134.5	6.9
D. I. Khan	902.7	17.2	148.5	32.8	0.8	22.2	79.5	25.4	54.6	2.8
Hazara	499.4	9.5	3.9	0.9	0.0	0.0	2.6	0.8	684.8	35.3
Kohat	649.7	12.4	80.8	17.8	0.0	0.0	0.9	0.3	46.1	2.4
Malakand	1231.3	23.5	78.1	17.2	-	-	18.4	5.9	740.6	38.2
Mardan	360.5	6.9	11.1	2.5	1.8	50.0	93.3	29.8	184.3	9.5
Peshawar	1,062.6	20.1	1.5	0.3	0.8	22.2	108.5	34.6	93.9	4.8

Note: 1) Figures may not add up exactly to their respective totals due to rounding effect.

LIVESTOCK RESULTS

9. Livestock Population

Agricultural Census 2024 revealed that during the reference period there were 13,508.9 thousand cattle, 3,935.5 thousand buffaloes, 7,639.2 thousand sheep and 22,491.5 thousand goats in Khyber Pakhtunkhwa. Besides that, there were 122.6 thousand camels, 176.1 thousand horses, 87.8 thousand mules and 781.5 thousand asses in Khyber Pakhtunkhwa. The division wise distribution of animals is given on the table below.

The table shows that cattle happened to be the dominant animal among large ruminants while goats were dominant among small ruminants in the province. Among the draught animals, the population of asses was reported far ahead of other types of animals. The population of livestock varied by division, however in the inter- divisional comparison the number of buffaloes, goats, horses, mules and asses exceeded in the Hazara while of sheep and camels in D. I. Khan. Whereas, the number of cattle is higher in Malakand division.

**TABLE 9: LIVESTOCK POPULATION AS PER AGRICULTURAL CENSUS 2024**

Province / Division	Cattle	Buffaloes	Sheep	Goats	Camels	Horses	Mules	Asses
In Thousand								
Khyber Pakhtunkhwa	13,508.9	3,935.5	7,639.2	22,491.5	122.6	176.1	87.8	781.5
Percent Distribution								
Bannu	7.61	2.43	8.46	9.30	8.16	2.01	8.30	18.33
D. I. Khan	16.13	13.00	46.68	23.32	58.87	4.58	9.03	14.12
Hazara	20.25	37.08	12.25	29.94	0.91	74.51	35.29	31.93
Kohat	9.59	1.52	7.30	9.91	24.88	2.50	6.98	13.01

Mardan	4.02	10.98	1.16	1.79	2.97	3.37	4.78	5.36
Peshawar	15.96	15.45	9.48	9.32	6.27	5.02	11.33	9.25

10. Cattle

The cattle population had increased by 126 percent from 5,967.9 thousand in 2006 to 13,508.9 thousand in 2024. The break-up regarding bullocks and cows, 3 years of age and above, and youngstock below 3 years of age is depicted in the table given. The population of bullocks, 3 years and above age, increased by 125 percent from 2006 to 2024 period, whereas the population of cows, 3 years and above age, increased by 158 percent, of in-milk cows by 184 percent and of youngstock by 79 percent.

TABLE 10: COMPARISON OF THE CATTLE POPULATION AS REPORTED IN LIVESTOCK CENSUS 2006 AND AGRICULTURAL CENSUS 2024

Cattle	Livestock Census 2006	Agricultural Census 2024	% Variation
Total	5,967,886	13,508,911	126
Bullocks (3 years & above)	959,925	2,164,010	125
Cows (3 years & above)	3,038,056	7,827,978	158
In-milk Cows	1,874,657	5,322,467	184
Youngstock (below 3 years)	1,969,906	3,516,924	79
Male	1,093,136	2,301,791	111
Female	876,769	1,215,132	39

11. Buffaloes

According to the Agricultural Census 2024, the population of buffaloes stood at 3,935.5 thousand at the provincial level, which is 104 per cent higher than that of Livestock Census 2006. Further break-ups of the animals have been given in the table below.

The male buffaloes, 3 years and above age, reportedly increased by 131 percent, the female buffaloes, 3 years and above age by 155 percent, in-milk buffaloes by 163 percent and the youngstock by 25 percent during the period from 2006 to 2024.

TABLE 11: COMPARISON OF THE BUFFALOES POPULATION AS REPORTED IN LIVESTOCK CENSUS 2006 AND AGRICULTURAL CENSUS 2024

Buffaloes	Livestock Census 2006	Agricultural Census 2024	% Variation
Total	1,927,495	3,935,516	104
Male Buffaloes (3 years & above)	97,267	224,705	131
Female Buffaloes (3 years & above)	1,089,957	2,782,453	155
In-milk Buffaloes	808,068	2,128,525	163
Youngstock (below 3 years)	740,269	928,358	25
Male	368,338	532,485	45
Female	371,931	395,872	6

12. Sheep

As shown in the table below, the population of sheep according to Agricultural Census 2024 stood at 7,639.2 thousand in Khyber Pakhtunkhwa which was 127 percent higher as compared to that of Livestock Census 2006. Similarly, the male sheep in Agricultural Census 2024 was higher by 230 percent, female sheep by 114 percent and youngstock by 85 percent in comparison with Livestock Census 2006.

TABLE 12: COMPARISON OF THE SHEEP POPULATION AS REPORTED IN LIVESTOCK CENSUS 2006 AND AGRICULTURAL CENSUS 2024

Sheep	Livestock Census 2006	Agricultural Census 2024	% Variation
Total	3,363,249	7,639,203	127
Male Sheep (1 year and above)	647,833	2,140,910	230
Female Sheep (1 year and above)	1,648,774	3,523,664	114
Youngstock (below 1 year)	1,066,643	1,974,629	85

13. Goats

The given table shows, the comparison of goats in Khyber Pakhtunkhwa as ascertained through the Agricultural Census 2024 and Livestock Census 2006. It is evident from the table that the population of goats increased by 134 percent during the inter-census period. Whereas the population of male goats observed an increase by 262 percent, female goats by 155 percent and youngstock by 55 percent during this period.

TABLE 13: COMPARISON OF THE GOATS POPULATION AS REPORTED IN LIVESTOCK CENSUS 2006 AND AGRICULTURAL CENSUS 2024

Goats		Livestock Census 2006	Agricultural Census 2024	% Variation
Total		9,599,017	22,491,511	134
Male Goat	(1 year and above)	982,507	3,553,083	262
Female Goat	(1 year and above)	5,548,226	14,168,160	155
Youngstock	(below 1 year)	3,068,288	4,770,268	55

14. Draught Animal

The Agricultural Census 2024 in comparison with Livestock Census 2006 is given in the table below. The table shows that population of camels have gone up by 92 percent from 63.9 thousand in 2006 to 1,226.2 thousand in 2024 while the number of horses increased by 131 percent from 761.7 thousand in 2006 to 1,760.5 thousand in 2024. Similarly, the mules' population increased by 32 percent in 2024 as compared to 2006 i.e. from 666.3 thousand to 877.5 thousand while the number of asses increased by 40 percent during the inter- census period from 5,598.5 thousand in 2006 to 7,815.1 thousand in 2024.

TABLE 14: COMPARISON OF THE DRAUGHT ANIMALS AS REPORTED IN LIVESTOCK CENSUS 2006 AND AGRICULTURAL CENSUS 2024

Draught Animal	Livestock Census 2006	Agricultural Census 2024	% Variation
Camels	63,952	122,620	92
Horses	76,174	176,052	131
Mules	66,630	87,750	32
Asses	559,853	781,513	40

AGRICULTURAL MACHINERY RESULTS

15. Tractors, Tubewells & Lift Pumps

According to Agricultural Census, 2024 the overall number of tractors in Khyber Pakhtunkhwa was 61.1 thousand, while the total number of tubewells and lift pumps was 61.1 thousand. Mardan reported the highest share of tractors i.e. 20.44 percent, whereas Hazara reported the lowest share i.e. 8.54 percent. In case of tubewells and lift pumps, Peshawar

reported the highest share with 30.42 percent, while Hazara reported the lowest share i.e. 3.19 percent during Agricultural Census, 2024.

TABLE 15: NUMBER OF TRACTORS AND TUBEWELLS & LIFT PUMPS WITH PERCENT SHARE IN PROVINCE– BY DIVISION

Administrative Unit	Tractors		Tubewells & Lift Pumps	
	Numbers	Percent Share	Numbers	Percent Share
Khyber Pakhtunkhwa	61,113	100	61,063	100
Bannu	5,562	9.10	3,890	6.24
D.I. Khan	10,053	16.45	7,058	11.56
Hazara	5,221	8.54	1,947	3.19
Kohat	8,290	13.57	9,241	15.13
Malakand	7,461	12.21	13,727	22.48
Mardan	12,490	20.44	6,626	10.85
Peshawar	12,036	19.69	18,574	30.42

16. Ownership of Tractors

This table presents the statistics for Tractors by type of Ownership in Khyber Pakhtunkhwa. Agricultural Census 2024 brings on record the ownership of tractors as well. Accordingly, the total tractors are counted to 61.1 thousand at the provincial level, out of which 53.86 thousand tractors are owned individually, 7.1 thousand owned jointly and the remaining tractors are owned by the co-operative societies. The relative proportion of owned individually tractors is very high in all the divisions, whereas the Mardan division has the highest number in all types of ownership except owned by co-operative societies. The division wise distribution of ownership as ascertained through this census is given in Table 16.

TABLE 16: NUMBER OF TRACTORS BY TYPE OF OWNERSHIP

Administrative Unit	Number of Tractors			
	All Tractors	Owned Individually	Owned Jointly	Owned By Co-Operative Societies
Khyber Pakhtunkhwa	61,113	53,860	7,085	168

Mardan	12,490	10,889	1,601	-
Peshawar	12,036	10,589	1,434	13

Note: “-” No Value

17. Power Source of Tubewells and Lift Pumps

This table shows the number of tubewells and lift pumps in Khyber Pakhtunkhwa, classified by power source (Electric, Solar, Diesel). Agricultural Census 2024 reveals that total number of tubewells and lift pumps is 61,063. Number of tubewells powered by Diesel is counted as 33,834 having the dominance. Similarly, number of Lift pumps powered by Diesel counted as 3,845 having the dominance.

TABLE 17: NUMBER OF TUBEWELLS AND LIFT PUMPS BY POWER SOURCE

Administrative Unit	Total Tubewells & Lift Pumps	Number of Tubewells			Number of Lift Pumps		
		Electric	Solar	Diesel	Electric	Solar	Diesel
Khyber Pakhtunkhwa	61,063	12,082	10,851	33,834	1,863	1,041	3,845

11. Total Number of Domestic Poultry & their Chicks:	
12. Total Number of Domestic Ducks (Male & Female Duckling):	

SUMMARY OF THE SELECTED MOUZA/BLOCK (Own Agricultural Machinery)

Name of Machine	Total Numbers
13. Tractor	
14. Tubewell / Pump	
15. Combined Harvester	
16. Bulldozer	

Copy No. _____

This part be filled by enumerator for all residential houses/buildings in the jurisdiction of selected Mouza/Block

**This part will be
filled by
representative of
Pakistan Bureau
of Statistics**

														1	Name of settlement, basti, goth, road, street, etc.	
														2	Building/House number	
														3	Number of households	
														4	Serial number of households	
														5	Name of head of the household, with father's name & caste/tribe	
														6	Contact number (Mobile)	
														7	Kanal	Total agricultural land under possession
															Acre	
														8	Serial number of households	
														9	Cattle, Buffaloes	Number of Own Livestock
														10	Camels	
														11	Sheep, Goats	
														12	Yak/Dzo/Dzomo	
														13	Horses, Asses, Mules	
														14	Serial number of households having livestock	Domestic poultry and ducks
														15	Poultry & their chicks	
														16	Male, Female Ducks & Ducklings	
														17	Number of tractors	Own Agricultural machinery
														18	Number of combine harvester	
														19	Number of bulldozer	
														20	Number of tubewell/pump	
														21	Serial number of households having agricultural machinery only	
														22	Demarcation of NCH & MCH	
														23	Serial number of selected households	

Part- 1		IDENTIFICATION & BASIC INFORMATION			
1. District		2. Tehsil/Taluka		3. Tehsil/Taluka Code	
4. Kanungo Circle/ Supervising Tapa		5. Patwar Circle/ Tapa		6. Selected Mouza/ Block Code	
7. Name of selected Mouza/Block				8. Serial No. of selected household (Form-1 Col .23)	
9. Name of head of household with father's name & caste/tribe			10. Contact no/Phone no:		
11. Gender of head of the household		① Male ② Female		12. Household category:	① NCH ② MCH ③ Govt. ④ Others
13. Operational Status of the household	① Individual Farming	② Joint farming	③ No Cultivation	14. If answer of Q-13 is "Joint farming" then number of households	

Part- 2		AGRICULTURAL LAND DETAILS						
Details of agricultural land under possession (Including cultivated & uncultivated area)	No	Total agricultural land		Land in this mouza		Land in other mouzas		
		Acre	Kanal	Acre	Kanal	Acre	Kanal	District
		1		2		3		
1. Total owned area by the household(s)	☐							
2. Owned area given to others on rent, contract, share cropping, lease or rent free basis	☐							
3. Balance of owned area (1-2)	☒							
4. Area taken on share cropping basis under possession	☐							
5. Area taken on contract or rent or lease basis under possession	☐							
6. Any other area under possession but not included above	☐							
7. Total area (cultivated and uncultivated) under possession (3+4+5+6)	☒							
8. Number of fragments of total area (cultivated and uncultivated) under possession (Q.7, col.1)								
NOTE: If the answer of Q.7 is "No" then skip Part-3 to Part-6 and go to Part-7 of the questionnaire.								

Part- 3		LAND USE			
Detail of land use during the current crop year	Acre	Kanal	Detail of land use during the current crop year	Acre	Kanal
1. Area sown during current crop year (net sown area including orchard area)			5. Other cultivable waste area		
2. Area remained fallow in current crop year but was cultivated for at least once during previous crop year.			6. Wood land area (farm forest)		
3. Total cultivated area (1+2)			7. Uncultivable area including area under buildings, roads, water channel, eroded by rivers/sea and other area not available for cultivation		
4. Cultivable waste area due to water logging and salinity			8. Total uncultivated area (4+5+6+7)		

Part- 4		IRRIGATION			
Detail of irrigated and unirrigated area during the current crop year	Acre	Kanal	Detail of irrigated and unirrigated area during the current crop year	Acre	Kanal
1. Area irrigated by canal only			8. Area irrigated by other sources		
2. Area irrigated by canal as well as tubewell / pump (mixed irrigation)			9. Total irrigated area (1+2+3+4+5+6+7+8)		
3. Area irrigated by tubewell or pump only			10. Out of total unirrigated area how much is flooded (<i>sailaba</i>)		
4. Area irrigated by ponds or small dams (<i>bandaf</i>) or rivulet only			11. Out of total unirrigated area how much is rain-fed (<i>barrani</i>)		
5. Area irrigated by spring or hill ravines only			12. Cultivated area having irrigation facility but not irrigated due to some reason(s) in the current crop year		
6. Area irrigated by karez only			13. Total unirrigated area (10+11+12)		
7. Area irrigated by modern irrigation systems (Sprinkle / Drip / Centre Pivot)					

Part- 5		ORCHARD AREA, FRUIT & NON FRUIT TREES											
1. Is there any orchard area under your possession? ① Yes ② No					2. If Q-1 is "Yes" then report the orchard area below:								
3. Total orchard Area			Acre _____		Kanal _____		4. Orchard Irrigated area			Acre _____		Kanal _____	
5. Are there any scattered fruit trees in the area under your possession? ① Yes ② No													
6. If answer to Q- 1 or 5 is "Yes" then write below fruit name and code, the number of fruit trees according to the type and age. Note: In case of Grapes and Banana write area only.													
Fruit tree name	Code No.	Number of fruit trees			Number of fruit trees of bearing age	Number of fruit trees of non-bearing age	Fruit Trees and their Codes for Q-6 01. Mango 17. Papaya 02. Guava 18. Cherry 03. Dates 19. Ber 04. Malta/Mosami 20. Loquat 05. Kino/Fruiter 21. Mulberry 06. Lemon 22. Percimen 07. Sweet Lime 23. Almond 08. Apple 24. Walnut 09. Plum 25. Olive 10. Peaches 26. Shereefa 11. Pomegranate 27. Falsa 12. Apricot 28. Fig 13. Pear 29. Other fruit tree 14. Jamun 30. Grapes 15. Litchi 31. Banana 16. Chikoo						
		In orchard	Scattered	Total									
1	2	3	4	5	6	7							
		Area											
		Acres	Kanal										
Grapes	30												
Banana	31												
7. Are there any non-fruit trees on the area under your possession? ① Yes ② No													
If the answer is "Yes" then record below the number of trees according to the type													
Type of tree	Sheshum	Kikar	Nim, Dhrek, Bakain	Cirus/Sarian	Simbal	Poplar, Euclyptus	Pine species (Chir, Parrtal, Kele, Dwedar)	Other Non-Fruit trees					
	1	2	3	4	5	6	7	8					
Numbers of tree													

Part- 6		CROPS IN THE CURRENT YEAR							
1. How much area covered with Tunnel Farming/ Green House Technology in last 12 Months? ① Yes ② No									
If answer is "Yes" then write the area Acre _____ Kanal _____									
Rabi Crops	2. Did you sow any crop during current "Rabi"? ① Yes ② No				Kharif Crops	3. Did you sow any crop during current "Kharif"? ① Yes ② No			
	If answer is "Yes" record below the name, code number and area of crops sown, otherwise skip to Q-3.					If answer is "Yes" record below the name, code number and area of crops sown, otherwise skip to Part-7			
Crop Name & Code	Total Crop Area		Irrigated Area		Crop Name & Code	Total Crop Area		Irrigated Area	
	Acre	Kanal	Acre	Kanal		Acre	Kanal	Acre	Kanal
1	2		3		1	2		3

	15. Bamboo								

Part- 7		OWNERSHIP AND USE OF AGRICULTURAL MACHINERY									
1. Did you use tractor, bullocks (or other animals) or both during last 12 months? (Marked relevant box)											
①	Only tractor	②	Only bullocks or other animals	③	Tractor and bullocks etc.	④	None	If Q1=2 or 4, skip to Q.10			
2. Do you own a tractor or use on rent? ① owned ② Rent ③ Both If Q2=2, skip to Q.9											
3. Number of owned Tractors (workable condition) Numbers:_____											
4.Name of tractor ? (Listed on page.7)		5. Model of tractor? (Listed on page.7)		6.Tractor's Horse Power ? (Listed on page.7)		7. Type of Ownership ① individual ② Joint ③ Cooperative		8. Did you rent out your tractor to other during last 12 months? ① Yes ② No			
9. Mark from listed below works, for which tractor used during last 12 months: (More than one options are possible)											
☐ Land Repair & leveling		☐ Crop sowing		☐ Hoeing		☐ Fertilizer spreading		☐ Crop threshing		☐ Used trolley for agriculture purpose	
☐ Ploughing		☐ Crop spraying		☐ Band making		☐ Crop cutting		☐ Tubewell/pump operating		☐ Other work(specify)	
10.Do you own Tubewell or use on rent?				① Own ② Rent ③ Both ④ None				If Q10=2 or 4, skip to Q.17			
11. Number of Tubewell/Pumps owned (workable condition)						Number:_____					
12: Types of tubewell				13. Operating Power:		14. Electric Motor/Engine Horse Power:		15. Type of Ownership:		16. Depth of underground water (in feet):	
Centrifugal Tubewell		Turbine Tubewell		Electricity		Diesel		Individual		_____ Feet(s)	
Submersible Pump		Pump Installed on Well		Solar		Petrol		Joint			
Lift Pump				Others (specify)				Cooperative			
17. Please indicate agricultural machinery and implements used during last 12 months: (List at Page No.8)											
Name of machine and implements			Code		On Rent (Number)			Owned (Number)			
1			2		3			4			

Part-8		Cattle, Buffaloes												
Cattle: 1- Does this household possess any cattle? ① Yes ② No														
If "Yes" then write number of animals in relevant breed column, If "No" skip to Q. 13.														
Type of Cattle Animals			Total Animals	Write below breed name & code and number of animals										Cattle breeds and their codes
			1	2	3	4	5	6	7	8	9	10		
Breed names and code														
Bullocks	2.Bulls 3 years and above for breeding only													01.Sahiwal 02.Red Sindhi 03.Thari 04.Bhag Nari 05.Rojhan 06.Dhanni 07.Kankrej 08.Lohani 09.Achai 10.Gabrali 11.Wilayti 12.Cross Breed 13.Cholistani 14.Dajal 15.Haryana 16.Balochistan 17.Nari Master 18.Others (Specify)
	3.Other bullocks 3 years and above													
Cows	4.Cows 3 years and above in milk													
	5.Dry cows 3 years and above													
	6.Cows 3 years and above not yet calved													
Youngstock Male	7. Male cattle under 1 year													
	8. Male cattle 1 year and above but less than 3 years													
Youngstock Female	9. Female cattle under 1 year													
	10.Female cattle 1 year and above but less than 3 years													
11. Total cattle (male, female & youngstock) (2+3+4+5+6+7+8+9+10)														
12. Total daily milk of cow(s) reported in Q.4.(in liters) (morning+evening) in 24 hours														

Buffaloes:13. Does this household posses any buffalo? ① Yes ② No		If “Yes” then write number of animals in relevant box, if “No” then skip to Part.9.				
Type of Buffalo Animals		Total Animals	Nilli Ravi	Kundi	AzaKhali	Others (Specify)
		1	2	3	4	5
Buffalo Bulls	14. Buffalo bulls 3 years & above for breeding only					
	15. Other buffalo bulls 3 years & above					
Buffaloes	16. Buffaloes 3 years and above in milk					
	17. Dry buffaloes 3 years and above					
	18. Buffaloes 3 years and above not yet calved					
Youngstock Male	19. Male buffaloes under 1 year					
	20. Male buffaloes 1 year and above but less than 3 years					
Youngstock Female	21. Female buffaloes under 1 year					
	22. Female buffaloes 1 year and above but less than 3 years					
23. Total buffaloes (male, female & youngstock) (14+15+16+17+18+19+20+21+22)						
24. Total daily milk of buffalo(s) reported in Q.16. (in liters) (morning+evening) in 24 hours						

Part-9

Sheep, Goats

Sheep: 1 Does this household possess any sheep? ① Yes ② No

If “Yes” then write number of animals in relevant col., If “No” skip to Q. 6.

Type of Sheep Animals	Total	Write below Breed name & code and number of animals										Sheep Breed and their codes		
		1	2	3	4	5	6	7	8	9	10			
Breed Name and code												01.Lohi	12.Hashtnagari	23.Kairi
2. Male sheep 1 year and above												02.Kajli	13.Balkhi	24.Madak
3. Female sheep 1 year and above												03.Thalli	14.Kaghani	Lashti
4. Youngstock under 1 year												04.Buchi	15.Rakhshani	25.Ramghani
5.Total Sheep (Male, Female& Youngstock) (2+3+4)												05.Becanery	16.Koka	26.Ariri/
												06.Harrnai	17.Kachhi	Kutta
												07.Balochi	18.Kail	27.Terahi
												08.Bibrik	19.Mundri	28.Ghalji
												09.Damani	20.Salt Range	29.Mazai
												10.Waziri	21.Sipli	30.Quraqul
												11.Awasi	22.Khadali	31.Dumbhi
														32.Machani
														33.Other
														(Specify)

Goats: 6. This household possess any goat? ① Yes ② No

If “Yes” then write number of animals in relevant col., If “No” skip to Part 10.

Type of Goat Animals	Total	Write below Breed name & code and number of animals										Goat Breeds and their codes	
		1	2	3	4	5	6	7	8	9	10		
Breed Name and code													
7. Male goats 1 year and above												01.Teddy	11.Lehrri
8. Female goats 1 year and above in-milk in human use												02.Beetal	12.Chaparr
9. Female goats 1 year and above in-milk												03.Kamori	13.Nukri
10.Dry Female goats 1 year and above												04.Kaghani	14.Makhi
11. Female goats 1 year and above and calved												05.Damani	Chinni
12. Youngstock under 1 year												06.Dera	15. Jattal
13. Total Goats (Male, Female& Youngstock) (7+8+9+10+11+12)												07.Nachi	16.Khurasani
14. Total daily milk of goats reported in Q.8 (morning+evening) in 24 hours (in human use)(in liters)												08.Jattan	17.Surgalai
												09.Barbari	18.Guddi
												10.Pateri	19.Angora
													20.Thari
													21.Others
													(specify)

Part- 10	Camels, Horses, Mules & Asses
-----------------	--

Camels- 1. Does this household possess any camel? ① Yes ② No If "Yes" then write number of animals in relevant col., If "No" skip to Part 9.

Types of Camel Animal	Total	Barhela	Marheca	Brahwi	Kharani	Laasi	Raidi	Kohi	Raigi	Galmani	Guddi	Maya	Khadeer	Others
	1	2	3	4	5	6	7	8	9	10	11	12	13	14
2. Male camels 3 years and above														
3. Female camels 3 years and above in milk														
4. Other dry female camels 3 years and above														
5. Male camels less than 3 years														
6. Female camels less than 3 years														
7.Total Camels (2+3+4+5+6)														
8. Total daily milk of female camel(s) reported in Q.3 in 24 hours (in Liters)														

Horses- 9. Does this household possess any horse? If "Yes" then write number of animals. If "No" skip to Q.13. ① Yes ② No	Types of Horses		Numbers
	10. Horses/mares 3 years and above		
	11. Horses/mares less than 3 years		
	12. Total horses/mares (10+11)		

MULES / ASSES 13. Does this household possess any mule or ass?

① Yes ② No

If "Yes" then write number of animals. If "No" skip to Part-11

Type of Mules	Number	Type of Asses	Number
14. Mules 3 years and above		17. Asses 3 years and above	
15. Mules less then 3 years		18. Asses less then 3 years	
16. Total Mules (14+15)		16. Total Asses (17+18)	

Part-11	Yak/Dzo/Dzomo
----------------	----------------------

1. Does this household possess any male or female Yak/Dzo? ① Yes ② No

If answer "Yes" then write number of animals. If "No" Skip to Part-12.

Type of Yak/Dzo/Dzomo Animal	Number			Type of Yak/Dzo/Dzomo Animal	Number		
	Total	Yak	Dzo/Dzomo		Total	Yak	Dzo/Dzomo
	1	2	3		1	2	3
2. Male Yak/Dzo 3 years and above				6. Female Yak/Dzomo less then 3 years			
3. Female Yak/Dzomo 3 years and above In-milk				7. Total Yak/Dzo/Dzomo (Male, Female) (2+3+4+5+6)			
4. Other Female Yak/Dzomo 3 years and above				8. Total daily milk of female Yak/Dzomo(s) reported in Q.3 (morning+evening) (in liters)			
5. Male Yak/Dzo less then 3 years							

Part-12**Changes & Veterinary Treatment of Animals During Last 12 Months**

Note: The following questions must be asked even if no animal is reported on the day of enumeration.

During Last 12 months		Bulls/ Bullocks	Cows	Cattle Youngstock Male	Cattle Youngstock Female	Male Buffaloes	Female Buffaloes	Buffalo Youngstock Male	Buffalo Youngstock Female	Sheep (male/female)	Sheep Youngstock	Goats (Male/Female)	Goat Youngstock	Camels (Male/Female)	Camel Youngstock	Yak Breed	Dzo Breed	Total Animals
		1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
1. Vaccinated																		
2. Fallen sick																		
3. Treated																		
4. Artificially Inseminated																		
Slaughtered	5. On Eid																	
	6. On other days																	
7. Sold																		
8. Purchased																		
9. Died																		
10. Born																		

Part-13**Agricultural loan and sources of income**

1. Did your household take any loan for agricultural/livestock purposes during the last 12 months

. ① Yes ② No

If answer of Q.1 is 2 then go to Q.4

2. If the answer of Q.1 is "Yes", then what was the purpose of the loan. (More than one answers are possible)

☐ A For Agricultural

☐ B For Livestock

☐ C For Agricultural Machinery

3. If Q.1 answer is "Yes" than tick the relevant box of debt source. (More than one answers are possible)

☐ A Commission agents

☐ B Other financial institutions

☐ C Zari Taraqiati Bank

☐ D Relatives/friends

☐ E All NGO's

☐ F All commercial banks

4. If any member of the household earn income from sources other than own agriculture or livestock, identify that source by marking the relevant box, otherwise mark box for "none".

☐ A Service/ Pension

☐ B Trade/sale/purchase/ shopkeeping / handicrafts

☐ C Agricultural labor

☐ D Non agricultural labor

☐ E Foreign remittances

☐ F Income from property (agri. land/house/shop rent)

☐ G Income from agricultural machinery

☐ H Poultry farming

☐ I Fancy birds

☐ J Ostrich farming

☐ K Fish Farming

☐ L Other sources

☐ M None

5. If any source of income is reported in Q-4, then indicate the basic source of income of this household.

① Own agriculture / livestock

② Select the possible answer from question No.4
