FORWARD

Socio-economic Indicators of Punjab at District level is an effort to provide a wide range of data on indicators like Population, Education, Agriculture, Health and Crime. The report will be particularly useful for Demographers, Economists and Sociologists as well researchers and policy makers. The present edition is the 2nd in the series following release of population and housing census 2017 results, the last report was published twenty years ago in 2002.

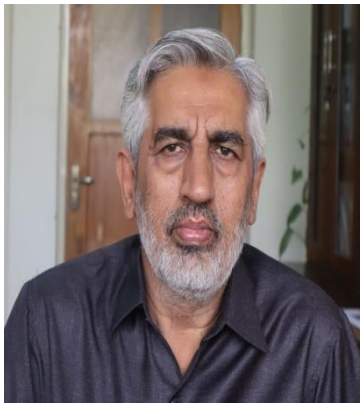

The socio-economic indicators of the Punjab provides the insights on Population, Housing, Health, Agriculture and Education at the district level for accessing the impact of policy programmes implemented during the reference period. The latest update of publication reveal success and failures of the programmes initiated purposefully for achieving targets of social change. The report will pave the way for future policy programmes at grassroot level for sustainable development and necessary amendments in the existing by keeping in view the preferences of masses and society as a whole. I must appreciate the endeavors of Pakistan Bureau of Statistics for providing such a useful and informative report. I would also like to offer my gratitude to the staff of Social Statistics Section for their hard work and untiring efforts for compilation of this document.

I hope that researchers, planners and economist would find this document useful for their specific pursuits. Comments/suggestions for improvement are welcomed, and will be highly appreciated.

PREFACE

This publication is the second attempt of collection, compilation and presentation of data on socio-economic indicators at district and provincial level. It contains indicators covering six major areas (1) Population (2) Housing (3) Agriculture (4) Education (5) Health and (6) Miscellaneous Indicators (Crime, ICT etc.).

Socio-economic Indicators report provides the comprehensive information on variety of social indicators, which provide the bases for the formulation of policy, future projections and comparisons with the outcomes of the past policies at the district level. Concerted effort has been made to include the latest available data to make this report comprehensive informative and useful document for planners, economist and researchers. Pakistan Bureau of Statistics appreciates all kind of the cooperation extended by the provincial departments/agencies as well as Federal Ministries for the timely supply of the requisite data.

I seize this opportunity to acknowledge the efforts of entire team of Social Statistics Section for preparation of the report. Finally, any suggestions to improve the coverage and contents of the future update of publication will be welcomed and highly appreciated.

GENESIS OF THE REPORT

The compilation of Socio Economic Indicators at District level of Punjab, 2023 owes to the untiring efforts of the following officers/officials of the Pakistan Bureau of Statistics.

Mr. Fazil Mahmood Baig,
Deputy Director General

Mr. Rizwan Bashir,
Director

Mrs. Aisha Khaliq,
Chief Statistical Officer

Mrs. Zahida Parveen
Statistical Officer

Mr. Muhammad Munir
Statistical Assistant

Mr. Inam-ul-Haq Abbasi
Statistical Assistant

Mrs. Shehla Nosheen
Statistical Assistant

Mrs. Munaza Jabeen
Statistical Assistant

Mr. Shabbir Ali
Steno Typist

Chapter - 1

Population

Punjab is the land of five rivers and the population wise largest province of Pakistan. Punjab province has 36 districts and 9 divisions. This chapter provides the detail information about population trend in terms of sex, growth, density, area, dependency ratio, marital status and distribution of population by economic activity.

Population Size and Growth

According to the 6th Population and Housing Census-2017, the population of Punjab is recorded as 109.99 million which shows an increase of 49.40% as compared to last Census conducted in 1998. Thus, average annual growth rate has been reported as 2.1% during the intercensal period of 1998 to 2017. Detail information about population and growth rate is given in table 1.1:-

Table: 1.1 Population and Growth Rate of Punjab Since 1951

Year	Population ("000")						Growth Rate (%)
	Overall	Urban	Rural	Male	Female	Transgender	
1951	20,541	3,568	16,973	11,050	9,587	-	
1961	25,464	5,476	19,988	13,643	11,938	-	2.2
1972	37,607	9,183	28,425	20,210	17,400	-	3.4
1981	47,292	13,052	34,241	24,860	22,432	-	2.8
1998	73,621	23,019	50,602	38,094	35,527	-	2.6
2017	109,990	40,547	69,442	55,910	54,067	12	2.1

Source: Pakistan Bureau of Statistics

Figure: 1.1 Populations by Area and Year 1951 to 2017

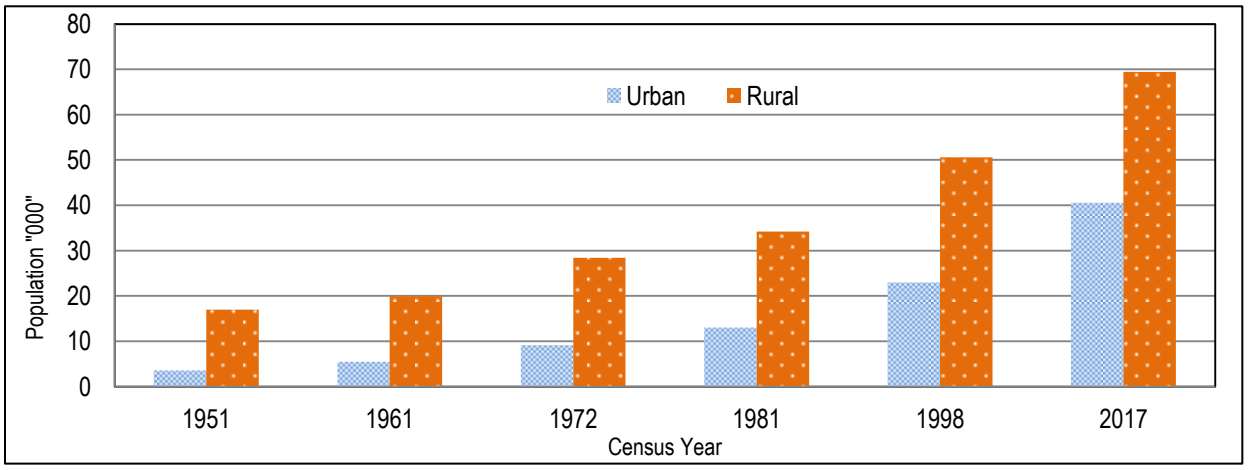

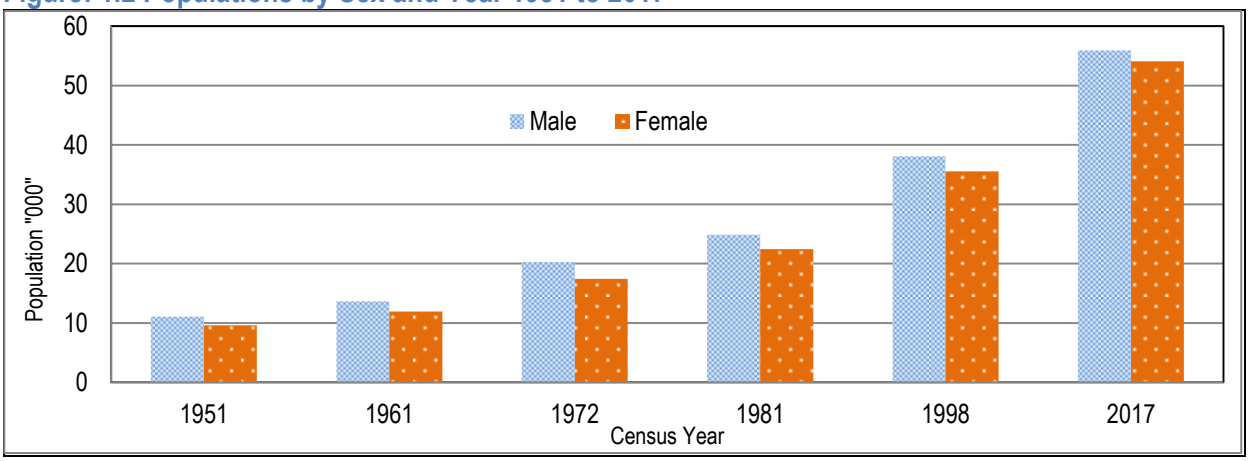

Figure: 1.2 Populations by Sex and Year 1951 to 2017

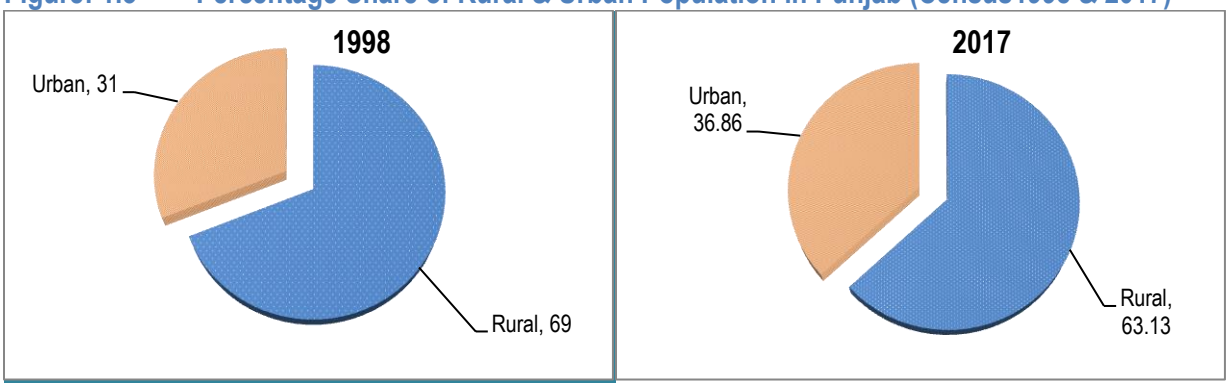

Urban - Rural Population

Rapid urbanization is one of the foremost hallmarks of the demographic shift in Pakistan. As Pakistan's resourcefulness does not concede ample space to prioritize infrastructural development, rapid urbanization is likely to lead to proliferation of slums to the detriment of physical, social and administrative matter of urban areas.

The urban population of Punjab is counted as 40,547,205 in Census 2017, which is 36.86% of the Punjab total population, while the share of rural population is 63.13 %. Thus, share of rural population decreased 6% from 69 % in Census 1998 to 63 % in Census 2017.

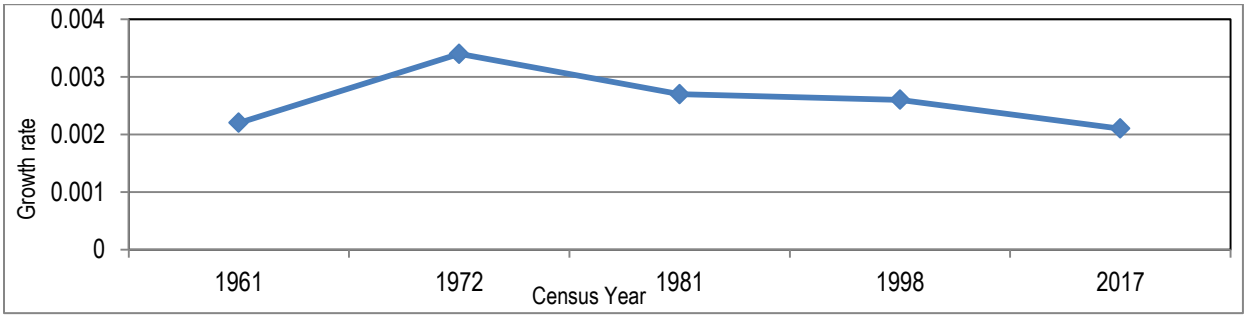

Figure: 1.3 Percentage Share of Rural & Urban Population in Punjab (Census1998 & 2017)

Growth Rate

The average annual growth rate has been reported as 2.6 % during the period of 1981 to 1998 and 2.1 % during the period 1998 to 2017. The data indicate a rapid increase in the population during the last two decades, however, small decline is observed in annual growth rate. According to NIPS population projection, if this trend continues Punjab population will cross 141,525,097 marks by 2035.

Figure:1.4 Average Annual Growth Rate of Punjab (Census Year 1961 to 2017)

Population Density

The population density has increased to 536 persons per square kilometer as compared to 359 people per square kilometer reported in 1998. Lahore division is the most populated area having a population density of 1653.44 per square kilometer person followed by Gujranwala and Faisalabad divisions with 936.88 and 791.68, respectively. Bahawalpur division is the least densely populated division with a population density of 251.22 per square kilometer. The average household size in Punjab decreased from 6.9 in Census 1998 to 6.4 in Census 2017.

Table: 1.2 Population Density, Sex Ratio and Average Household Size of Punjab

Year	1998	2017
Population density (per sq.km)	359	536
Average household size	6.9	6.4
Sex ratio	107	106

Source: Pakistan Bureau of Statistics

Dependency Ratio

The distribution of the population by age, sex, and residence is a primary demographic classification. It also provides information about trends on population growth based on the size of age brackets, including dependency groups. According to Census 2017, 39 percent of the population is under the age of 15 and 4 percent is age 65 and above, with the bulk of the population falling in the 15-64 age bracket. Therefore, the age dependency ratio (the sum of the population under age '15' and the population age '65 and over' relative to the working-age population age "15-64") is 73 percent. The dependency ratio appears to be higher among males, and in urban areas.

Table: 1.3 Distribution of Population by Selected Age Groups Census 2017

("000")

Age Groups	Total				Urban				Rural			
	Total	Male	Female	Trans-gender	Total	Male	Female	Trans-gender	Total	Male	Female	Trans-gender

Source of Cooking Fuel Used

Wood 57.92%	Kerosene Oil 0.11%	Gas 37.92 %	Other 3.42

Chapter - 2

Housing

This chapter presents information about housing facilities such as sources of household drinking water, number of rooms, distribution of housing units by tenure, period of construction of owned housing unit, sources of fuel availability for cooking purposes and sources of lighting.

Household Population and Composition

A household means a group of persons living together who have collective arrangements for cooking/eating. A person living alone was also considered to constitute a household. The distinguishing characteristics of a household is its common cooking arrangements.

Household Tenure

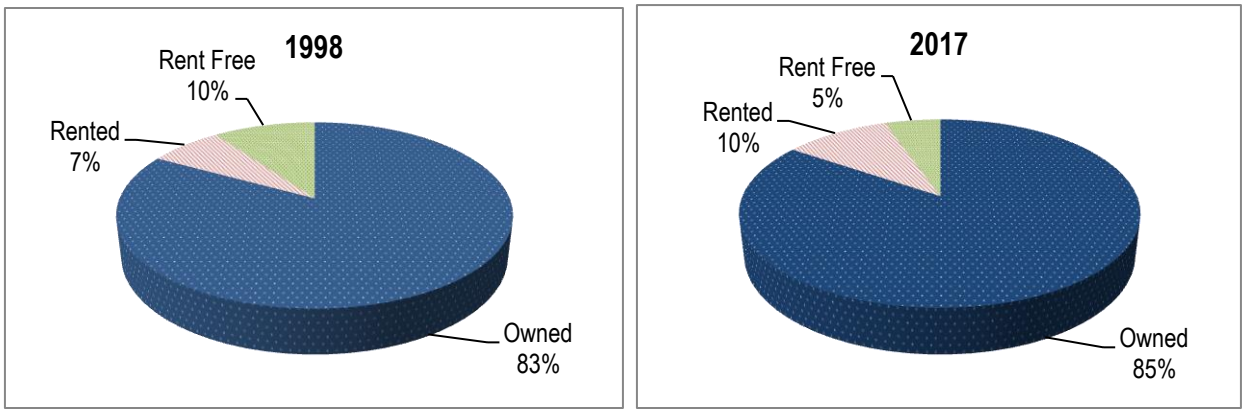

In Punjab majority of households are living in owned housing units. The share of owned housing unit in Punjab is 84.54%, rented units are 10.11% and remaining, 5.34%, are rent free housing units. Comparative census results reveal that the proportion of owned housing unit increased from 82.97% in census 1998 to 84.54% in census 2017. The rent free housing units have decreased from 9.92% in Census 1998 to 5.34% in Census 2017. However, it has been observed that share of rented units is higher in big cities and in urban areas. For example in Lahore 28% households are living in rented units. In Rawalpindi 40% are living in rented units in urban areas, which is much higher as compared to rural areas of Rawalpindi. This trend is found to be consistent for all districts in the Punjab, see table 2.01.

Table: 2.1 Percentage Distribution of Housing Unit by the Tenure in Punjab

Year/Housing Unit by Type	1998			2017		
	Overall	Rural	Urban	Overall	Rural	Urban
Owned	82.97	87.32	72.99	84.54	90.96	73.83
Rented	7.11	1.96	18.90	10.11	3.09	21.85

Figure: 2.1 Percentage Distribution of Overall Housing Unit by Tenure

Housing Units by Lighting Facilities

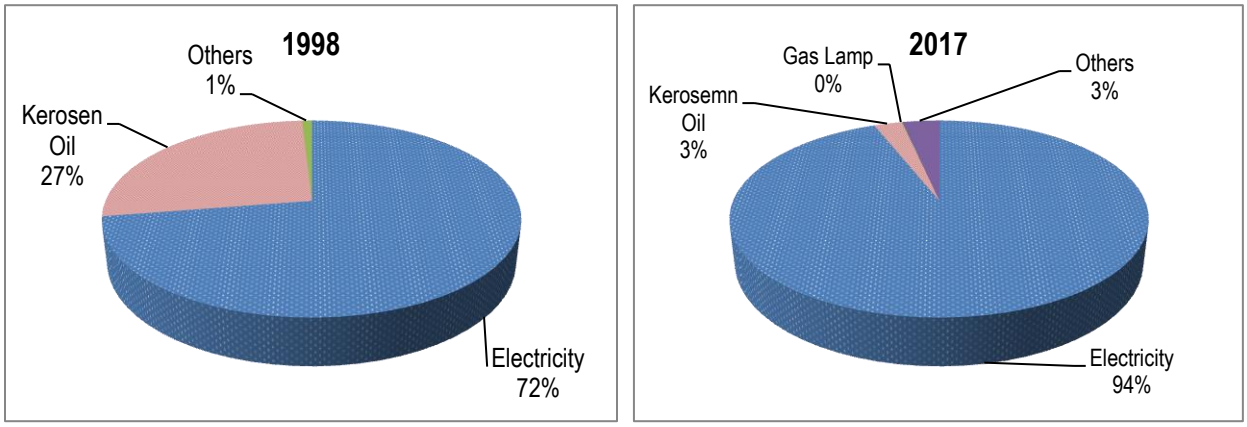

According to Census 2017, electricity is the major source of lighting in Punjab, 72.49% of the housing units had reported electricity facility in Census 1998 which increased to 93.95% in Census 2017, registering a propelled increase of over 21% in 1998. 26.61% of the housing unit used kerosene oil which dropped to 2.55% in 2017. The comparison also reveals that lighting facility has improved in rural areas from 63.34% in Census 1998 to 91.22% in Census 2017. Lahore and Gujranwala as well as their surrounding districts are top users of electricity; for instance 98.96% households in Lahore are using electricity for lighting followed by Gujranwala (98.90%), Narowal (98.9%), Gujarat (98.7%) etc. In contrast, the Rajanpur only 56.33% and in DG Khan 77.34% use this facility, see table 2.07. It is interesting to note that some household started using gas lamps, which could be due to load shedding or availability of gas in new areas.

Table:2.2 Percentage Distribution of Housing Unit by Source of Lighting Facilities

Source of lighting	1998			2017			Overall Percent Change
	Overall	Rural	Urban	Overall	Rural	Urban	
Electricity	72.49	63.34	93.45	93.95	91.22	98.50	21.46

Figure:2.2 Percentage Distribution of Housing Unit by Source of Lighting Facilities

Housing Units by Type of Cooking Fuel Used in Punjab

According to Census-2017, 57.85% of housing unit were using wood as cooking fuel which has dropped from 68.30% reported in Census1998. The use of gas as a cooking fuel is higher in urban areas as compared to rural areas across the Punjab, see table 2.08.

Table: 2.3 Percentage Distribution of Housing Units by Type of Cooking Fuel Used in Punjab

	1998			2017		
	Overall	Rural	Urban	Overall	Rural	Urban
Wood	68.30	82.14	36.56	57.85	80.70	19.70

KEY FINDINGS OF AGRICULTURE

Land Utilization 2019-20

Cultivated Area	Uncultivated Area
12,585 (000 Hectares)	4,950 (000 Hectares)

Area and Production by Crops 2019-20

	Wheat	Cotton	Sugarcane	Rice
Area (000 Hectares)	6,515	1,880	643	2,029
Production	19,402 (000 Metric Tones)	6,306 (000 Bales)	43,347 (000 Metric Tones)	4,144 (000 Metric Tones)

Chapter-3

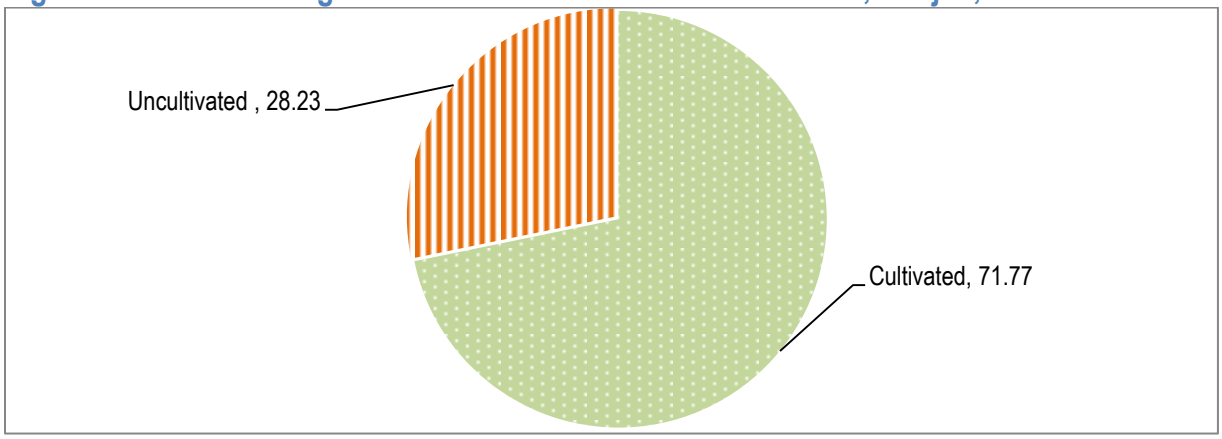

Agriculture

Agriculture is still the largest sector of the economy of Pakistan in terms of labour participation and as such livelihood of the majority of the population directly or indirectly depends on it. It is major contributor to the employment and foreign exchange earnings. In addition to that, it provides industrial raw material, hence growth in this sector has multiple linkages with overall economy. According to Economic Survey of Pakistan 2022-23, it contributes 22.9% to the GDP and provides employment to around 37.4% of Labour Force.

Land Utilization

Punjab has reported 17,535 thousand hectares area out of which 12,585 thousand hectares is reported as cultivated area and 4,950 thousand hectares is reported as uncultivated area in 2019-20. The net area sown during 2019-20 was 10,756 thousand hectares of total cultivated area. Trend analysis of data shows that the area sown more than once is slightly increasing since 2008-09. The share of "Area sown more than once" was about 39% of total cropped area during 2019-20 whereas in 2008-09 it was estimated to be 35.5%. This is an encouraging trend and amounts to substantial expansion in productive capacity to the benefit of attaining food security.

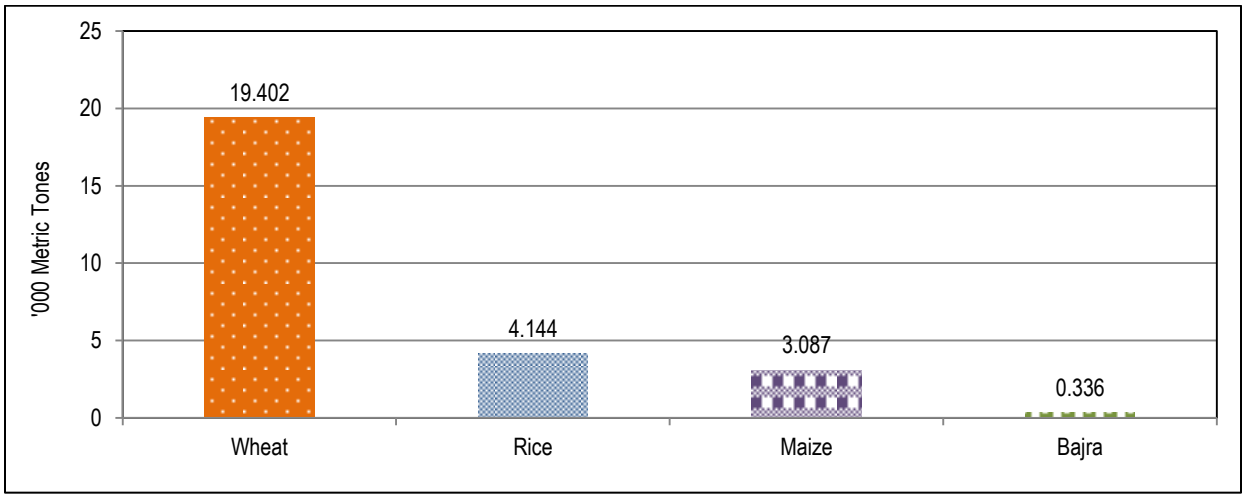

Figure: 3.1 Percentage share of Cultivated/Uncultivated Area, Punjab, 2019-20

Area and Production of Agriculture Crops

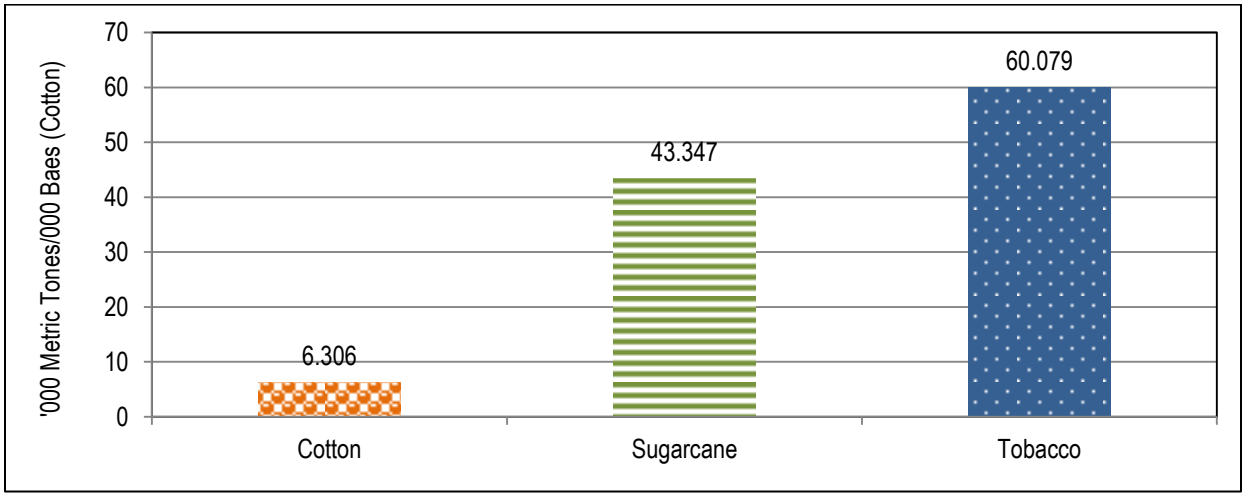

The largest segment of the cultivated area 6,515 thousand hectares went to wheat crop during 2019-20 followed by Rice 2,029 thousand hectares, Cotton 1,880 thousand hectares, Gram 850 thousand hectares, Maize 535 thousand hectares and Sugarcane 643 thousand hectares.

Figure: 3.2 Food Crops Production, 2019-20

Major production clusters of wheat exist in southern Punjab due to large cultivation areas available in those larger districts. Bahawalnagar is the largest wheat producing district contributing 7.7% of province's total production. It is followed by Rahimyar Khan and Bhawalpur that accounted for 5.2% and 5.1% share respectively. For rice, Gujranwala is the largest district that supplied 11.7% of the province's total rice production in 2019-20. Sheikhupura and 0kara were the next two largest rice producing district accounting for 9.4% and 8.5% shares of the total rice production of Punjab. 0kara, Pakpattan and Vehari are the first, second and third largest maize producing districts; accounting for 16.4%, 13.4% and 10.6% share respectively of the provincial maize production in 2019-20. Largest production clusters of Jowar is in district Rawalpindi, whereas Bajra and Barley are produced in the largest quantities in districts Bhakar and Layyah respectively.

Figure: 3.3 Cash Crops Production, 2019-20

Bahawalpur is the largest cotton producing district accounting for 15.8% of province's total production in 2019-20, it was followed by Rahimyarkhan and Bahawalnagar as the second and third largest cotton producing districts, respectively-holding 13.1% and 13.0% shares of total provincial production. For

sugarcane, Rahimyar Khan is the largest district that contributed 27.0% of the Punjab's total production in 2019-20. It was followed by Faisalabad and Sargodha that accounted for 10.5% and 8% shares of total sugarcane production in the province. The crop experienced significant increase in area under cultivation and yield. It was achieved due to favorable weather conditions, better management, timely availability of quality inputs and higher economic returns. Rajanpur was the largest tobacco producing district, whereas district Bhakkar was the largest producer of Gram and for Rapeseed & Mustered. Bahawalpur held the largest share in the total provincial production.

Wheat

1st Largest Districts	2nd Largest Districts	3rd Largest Districts
Bahawalnagar	Rahim Yar Khan	Bahawalpur

Rice

EDUCATION

KEY FINDING OF EDUCATION

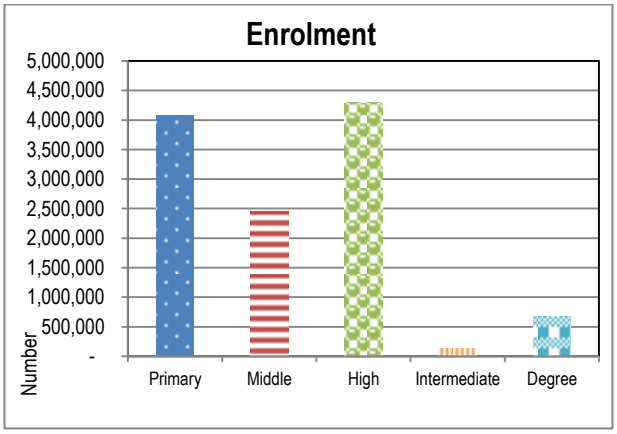

Institutions by Level (2019-20)

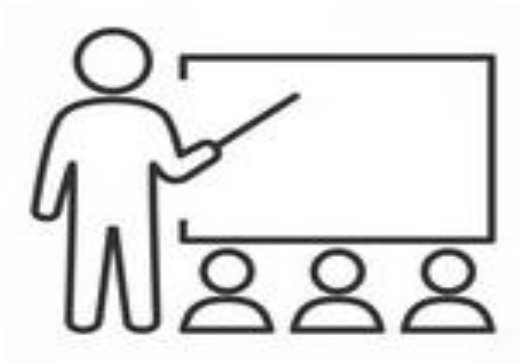

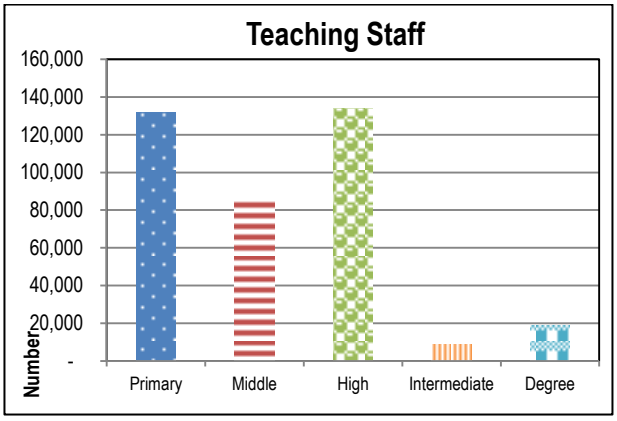

Enrolment by Level (2019-20)

Teaching Staff by level (2019-20)

Chapter-4

Education

This section contains annual data relating to student enrolment and number of teaching staff of educational institutions, as well as literacy rates. Education plays a vital role for social mobilization of household and the formation of developed society. It helps to improve the individual skills and capability also sets a path for the better future. Data relating to education are essential for monitoring the progress of the economic growth, living standards, and progress of Sustainable Development Goals (SDGs). SDGs 4 calls for ensuring inclusive and equitable quality education and promote the lifelong learning opportunities for all, which is a critical goal and considered as a key enabler under the SDGs framework. School education is imparted in two types of schools i.e. formal and non-formal. Formal schools include all institutions run by the Secondary Education Department (SED), as well as other organizations of the provincial federal governments within province. Non-formal schools or institutions are set up to give a second opportunity to children who have either missed schools or have been dropped out. Education data covers the following areas:-

- Primary School is an institution comprising first to five grades of educational system.
- Middle School is an institution comprising first to eight grades of educational system.
- High School is an institution comprising first to ten grades of educational system. Higher Secondary School is an institution comprising first to twelve grades of educational system.
- Intermediate College is an institution comprising of F.Sc/F.A/ICS of educational system.
- Degree College is an institution comprising of B.Sc/B.A/B.Com etc. of educational system.
- Result Statistics: Data regarding number of candidates appeared/passed by sex for matriculation and intermediate level has been collected with the help of Boards of Intermediate & Secondary Education (BISE).

Article 25-A of the Constitution of Pakistan1973[1] states that, "The State shall provide free and compulsory education to all children of the age of five to sixteen years in such manner as may be determined by law". In the province of Punjab, The Punjab Free and Compulsory Education Act, 2014 was enacted to be compliant with the constitutional provision for ensuring access to free and compulsory education[2] . The Government of Pakistan has also ratified the implementation of SDGs 2030 in particular SDG-4 which envisions to "Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all".

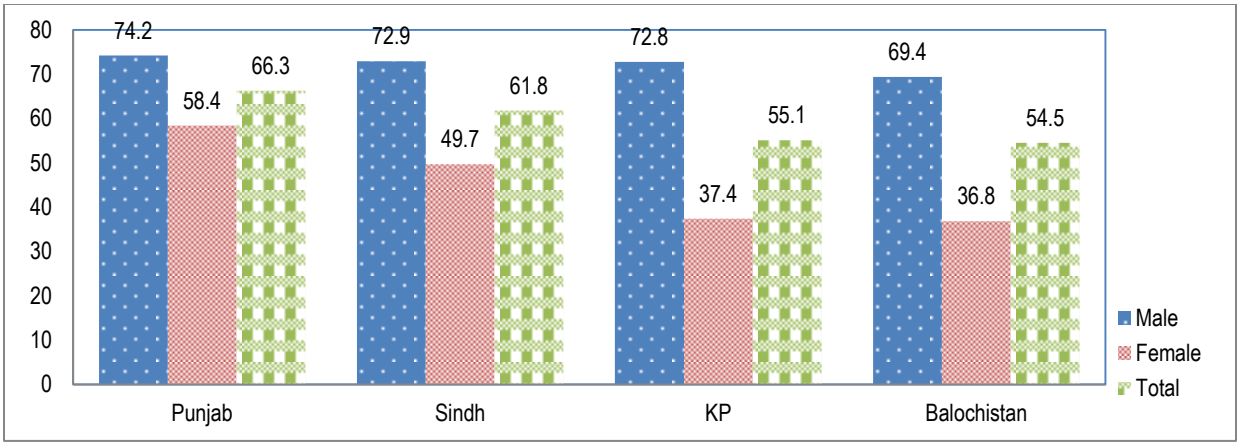

Punjab is the most populated province of Pakistan, which represents 53% of Pakistan's total population. Out of which, 31. 99 million are the children between 5 to 16 Years age, 7.65 million are

Out of School Children (OOSC), which represents 24% of total children[3]. According to the LFS-2020-21, literacy rate of Pakistan for male is 73.4% and 52% for female. Punjab has the highest literacy rate as compared to other provinces.

Figure: 4.1 Literacy Rate by Province (10 Years and Above)

Goal 4 of SDGs pertains to quality of education. Progress made so far is as follows. Primary and Upper Secondary Education Completion Rate stood at 67 % and 23 % respectively. Parity Indices is 0.89 and proficiency in literacy and numeracy skills is at 60 % now. However, SDG goals can't be achieved without proper infrastructure, Human Resource, access and provision of allied facilities. Various initiatives have been taken such as establishing new schools, upgrading the existing schools, digitization of educational institutions, promoting distance learning, capacity building of teacher etc.[4] The rest of chapter explores many of these statistics in detail.

Institutions

The number of male primary schools are reported as 21,941 in 2007-08 & 17,450 in 2019-20 indicating a growth rate of -20.5%. Similarly number of primary schools have declined from 22,676 in 2007-08 to 19,227 in 2019-20, registering a negative growth of 15.2%. This negative trend in both male and female schools is due to up-gradation of primary level schools into middle schools. Middle school for male are reported as 3,084 in 2007-08 which increase to 3,550 in 2019-20, while females middle school are reported as 4,373 in 2007-08 compared with 4,776 in 2019-20, indicating 15.1% growth for males and 9.2% females which is a good sign. Nevertheless, much more schools are needed to cater the needs of the province to reduce out of school children. High level schools for males are reported as 2,958 in 2007-08 which soared to 3,513 in 2019-20, while female high schools reported as 1,711 in 2007-08 jumped to 3,244 in 2019-20, which shows a growth rate of nearly 90% between two the periods for female schools. Lastly, intermediate and degree level schools are also showing increasing trend.

Enrolment

Enrolment of male students at primary level is reported as 2,871,706 in 2007-08 compared with 2,173,582 in 2019-20, while female enrolment at primary level is reported as 2,326,953 in 2007-08 & 1,906,858 in 2019-20 which shows decreasing trend over time for both males and females enrollment rate. Contrary to this, middle school enrolment for both males and females is indicating upward trajectory. Likewise, positive trend is observed at high, intermediate and degree level enrolment for both sexes except at degree level where men enrolment appears to be decreasing.

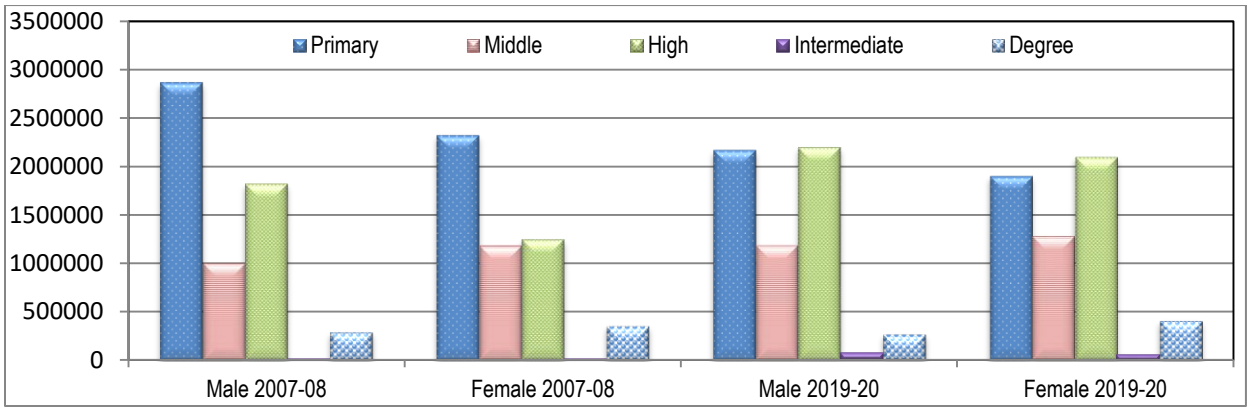

Table: 4.2 Enrolment of Student by Level & Sex

(Number)

Level/Sex	Enrolment			
	2007-08		2019-20	
	Male	Female	Male	Female

Figure: 4.3 Number of Students by level and Gender

Teachers

There are over 379,748 teachers employed in the Punjab. 50.8% of all teachers are women while 49.2% are men. There are 23% more teachers in 2019-20 as compared to 2007-08. At intermediate and high level school, there are more men teachers as compared to women with 61% and 54%, respectively. Parity indices has improved over time for high school (0.9 in 2019-20 vs 0.6 in 2007-08) but slightly reversed at intermediate level (0.6 in 2019-20 vs 0.7 in 2007-08). At degree level parity has been shifted in favor of women.

Chapter-5

Health

This chapter covers the data in respect of the Number of Health Institutions, Number of Beds in Health Institutions, Hospitals, Dispensaries, T.B. Clinics, Rural Health Centers, Basic Health Units, Sub-Health centers and Maternity & Child Health Centers located in Punjab and administered by Health Department, Home Department. Healthy population of a country is backbone for its economic growth, and poor health add to poverty due to the huge cost of illness, measured sometimes using disability-adjusted life years (DALY) and diminishes learning capacity and ability during childhood. This chapter also examining key indicators on health at provincial and district level to explore the progress to scale up the coverage of health facilities as per the requirements.

Health is centrally positioned with agenda 2030, with one comprehensive goal-SDG 3: Ensure healthy lives and promote well-being for all at all ages. It has explicit linkages to many other goals. The agenda 2030 thus has major ramification for the health sector, and its realization will entail the development of coherent, integrated approaches and an emphasis on equity and multi-sectorial action.

i) Health Institution

A health institution is defined as an institution which provides health services i.e. curative and preventive to all/specific class of the public as outdoor/ in-door patients. In Punjab, basic health units and rural health units provide the basic health facilities at urban and rural level. Detail of health institutions is as under.

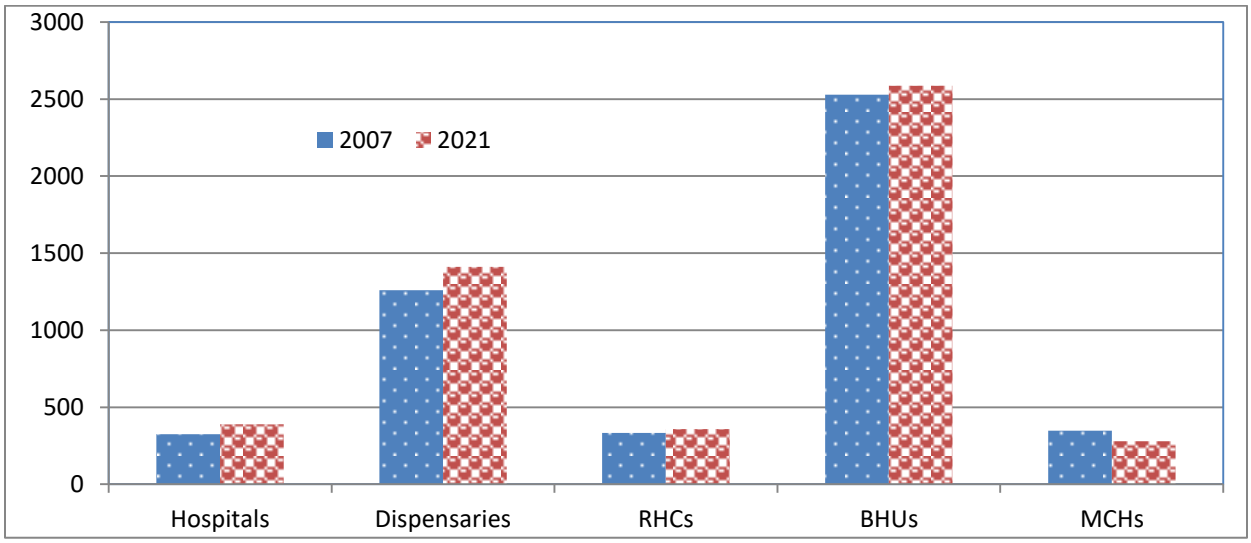

Table: 5.1 Number of Health Institutions in Punjab

(Number)

Institutions/Beds	2007		2020	
	Institutions	Beds	Institutions	Beds
Hospitals	325	36,851	390	59,574
Dispensaries	1,260	316	1,411	89
Rural Health Centers (RHCs)	333	5,866	358	7,182

Figure: 5.1 Number of Health Institutions in Punjab

ii) Hospital

Hospital is an institution having ten or more than ten beds. A hospital is an institution providing patient treatment with specialized health services, auxiliary healthcare staff and medical equipment. The number of hospitals reported in the Punjab province were 325 in 2007 which increased to 390 in 2021. Similarly, the number of beds have been added but not yet enough to meet ever increasing needs of growing population of the Punjab. Thus, population per hospital beds declined from 2,430 in 2007 to 1,983 in 2021 which indicates availability of more beds but still there is a need for more hospitals. Lahore district provide the maximum health facilities to the people in the Punjab province having 72 hospitals followed by Faisalabad district with 30 hospitals.

iii) Dispensaries

A dispensary is an institution having less than ten beds. The dispensary is normally supervised by MBBS doctor and supported by a Lady Health Visitor, dispenser, midwife, aya, chowkidar and sweeper. The hospital and dispensaries have facility to admit the patients in need of continued medical care or surgical treatment. There are 1,411 dispensaries reported in the Punjab in 2021 as compare to 1,260 dispensaries in 2007.

iv) Basic Health Unit (B.H.Us)

It is the first level of health care considered to be essential to maintain adequate health and protection from disease. Typically, each union council has a BHU which has 2 beds but in some cases there are two facilities per union council and serves a catchment population of about 10,000 to 25,000.

v) Rural Health Centers (RHCs)

BHUs are present in almost all rural areas across Punjab. They have limited usefulness for patients seeking slightly advanced but not specialized care. To serve such patients, the health system has established a tier of facilities known as RHCs. The RHCs are better equipped than BHUs to manage minor emergencies and surgeries. Typically, the RHC has 15-20 beds inpatient facility and each serves a catchment population of about 100,000. This is envisaged as a health facility that is open 24/7. There are 358 RHCs and 2587 BHUs reported in 2021.

vi) Maternal and Child Health Centers (MCHs)

Maternal and child health centers are managed by Lady Health Visitors and assisted by a facility based trained traditional birth attendant, which provide services to maternal, neonatal and child. These Health services including reproductive health and family planning are often located in urban and large rural areas. There are 280 MCHs reported in 2021 as compared to 347 reported in 2007 showing a decline of 19.3%.

Chapter-6

Other Indicators

This chapter covers the different socio economic indicators like Crime, Road Accident, Telecommunication, Gas, Post Office and Police Station etc.

Public Safety

Crimes

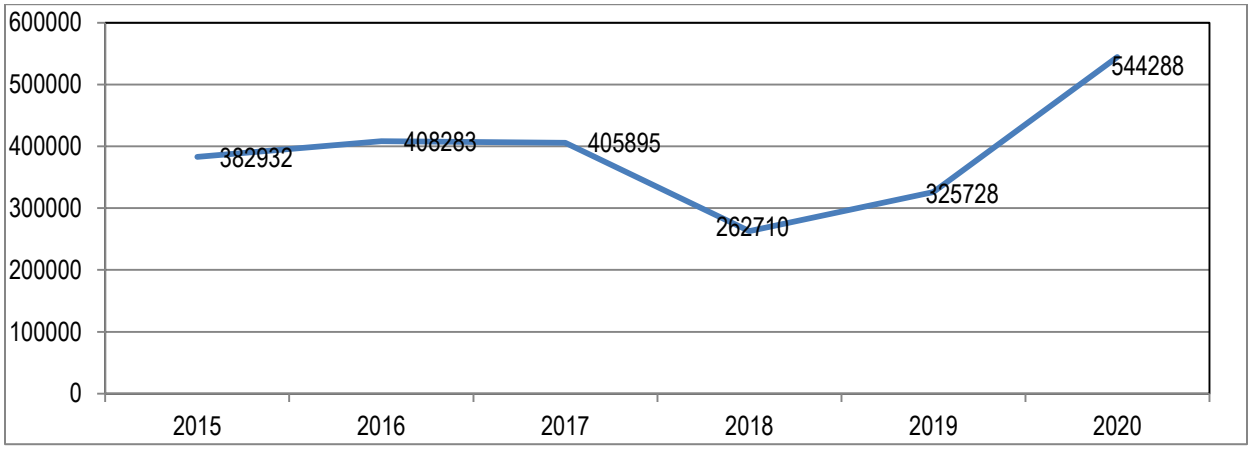

Pakistan Bureau of Statistics collects data on crime statistics in order to make policy relevant information for future plannings & programmes. Further, the crime information system aims to enhance the public safety measures in the country. Data captured through is considered only for these persons which are brought into formal contact with police investigation. Number for crimes reported in the police stations during the year, however, it does not capture the data in respect of the number of persons involved in the crimes, and there may be other crimes which go unreported.

Number of registered crimes by districts is provided in table 6.03. Crime by types is given in subsequent tables. Big cities like Lahore, Rawalpindi, Faisalabad, Multan, and Gujranwala are particularly vulnerable to crime. In 2020, 544,288 crimes were reported across Punjab compared to 325,728 crimes reported in 2019. Trend over time indicates that since 2015 crime rate seems to be increasing after declining in 2018 & 2019.

The crime rate between Districts varies significantly. Lahore and Faisalabad experienced highest crime rate followed by the Gujranwala and Rawalpindi. On the other hand, Khushab and Chakwal rank first and second with lowest incidence of crime.

Crime can be classified into several categories based on their nature and severity. The four main categories of crime are crimes against persons, crimes against property, traffic offenses, and other crimes. Crimes against persons include offenses such as homicide, assault, and kidnapping. Crimes against property involve offenses such as theft, burglary, and vandalism. The category of other crimes includes offenses such as drug offenses, white-collar crimes, and public order offenses. Each of these categories has numerous subcategories that can further classify different types of crime. Murder which comes under category of crime against person is a heinous crime. It has been observed that maximum number of murders i.e. 439 (10.29%) is reported in Lahore followed by Faisalabad with 325 (7.6%) and 291 in Rawalpindi as far as top districts with most reported murder cases are concerned. However, these rates not adjusted for various factors such as population size, crime reporting tendencies etc. In contrast districts with lowest reported murders are Layyah (32), Lodran (39) and Khushab (47).

Figure: 6.1 Number of Crimes Reported years 2015 to 2020

Fatal Accidents

Fatal accidents refer to those where the death occurred on the spot or where the victim succumbed to injuries later on.

Non Fatal Accidents

. Non-Fatal accidents refer to those in which no person was killed but in which one or more persons were seriously or slightly injured.
