FOREWORD

The "Social Economic Indicators of Sindh up to District level" report is a comprehensive document that serves as a crucial resource for a wide array of professionals, from demographers to policy makers. It offers a detailed analysis of various socio economic indicators, which are essential for assessing the effectiveness of policies and programs implemented in the province. The report's second edition, following the 2023 & 2017 population and housing census, marks a significant update from its predecessor published two decades ago. It reflects the changes and developments in key areas such as population dynamics, educational attainment, agricultural productivity, healthcare provision, and crime statistics, among others.

The meticulous efforts of the Pakistan Bureau of Statistics and the Social Statistics Section staff in compiling this report underscore their commitment to providing valuable data that can inform sustainable development goals. I would also commend the effort of all provincial and federal ministries and departments for provision of data for compilation of this report. The report not only aids in understanding the current socioeconomic landscape but also assists in shaping future policies to address the needs and challenges of Sindh's diverse districts.

The availability of this report on the Pakistan Bureau of Statistics website ensures that it is accessible to those who wish to utilize this wealth of information for research, planning, or economic analysis.

The invitation for comments and suggestions highlights openness to collaborative improvement, further enhancing the report's utility and relevance.

Dr. Naeem Uz Zafar, (SI)
Chief Statistician

Islamabad

PREFACE

The publication in question is a significant effort in gathering and presenting socioeconomic data for Sindh province at the district level. It contains socioeconomic indicators regarding Sindh province at district level covering six major areas (1) Population (2) Housing (3) Agriculture (4) Education (5) Health and (6) Miscellaneous Indicators, including crime, road Accidents and ICT etc.).

Social Indicators report provides the detailed information about the different social indicators, which are the needed for the formulation of policy making, future projections and comparison with the past policies at the district level. Every effort has been made to include the latest available data using secondary sources to make this report comprehensive informative and useful document for planners, economist and researchers. Pakistan Bureau of Statistics appreciates all kinds of the cooperation provided by the provincial departments/agencies and Federal Ministries for the timely supply of the requisite data.

I avail this opportunity to acknowledge the efforts of entire team of Social Statistics Section for compilation of the report. Any suggestion to improve the coverage and contents of the future update of publication is welcomed and highly appreciated.

Muhammad Sarwar Gondal, (SI)
Member SS/RM

Islamabad

ACKNOWLEDGEMENTS

This report provides an indepth analysis of the socioeconomic landscape across various districts of Sindh province, offering a granular view of the multifaceted factors that contribute to the wellbeing and development of regions. Drawing from a wealth of fragmented districtlevel data, we aim to present actionable insights by ensuring that data also remain compareable across provinces that can inform policy decisions and foster sustainable growth. This was not possible without extensive coordination and cooperation with the federal and provincial governments.

Our findings are designed to act as an important resource for stakeholders aiming to grasp and enhance their understanding of the socioeconomic dynamics within districts. The key data gathered is on population, housing, education, health, agriculture, Information Communication & Technology (ICT), crime and energy etc., which is essential for informed decision making, projections and comparisons of policies even at the district level (Note: No sooner had we finalized this report than PBS published Census 2023 results; therefore, we included data from latest Census 2023 to make it more relevant). PBS appreciates cooperation extended by the provincial departments/agencies and Federal Ministries for supply of the requisite data. The Honorable Chief Statistician, Dr. NaeemuzZafar (SI), provided strategic oversight while Member SS/RM, Mr. Sawar Gondal (SI), played a key role in supporting the initiative. Chief Statistical Officer, Mrs Aisha and Statistical Officer, Mrs Zahida were instrumental in coordination with stakeholders and finalization of tables. Finally, this initiative was supported by the administrative and technical efforts of my dedicated Statistical Assistants, Mr. Munir, Mrs. Munaza, Mrs. Shahla, and Mr. InamulHaq, along with steno typist, Mr. Shabbir.

Rizwan Bashir

Executive Summary

Sindh, the second most populous province of Pakistan with a population of 55.7 million according to the 7th Housing and Population Census 2023, faces significant challenges and opportunities in the sectors of education, health, and population management. This summary highlights the current status, progress, challenges, and strategic recommendations for improvement in these critical areas up to district level. All the indicators captured in this report are based on secondary data collected from different provincial & federal organizations such as Bureau of Statistics Sindh (Sindh Development Statistics), BISEs Sindh, Crime Branch, Central Police Office, Divisional Directorate of Excise & Taxation Lahore, Pakistan Film Exhibitor Association (Regd.) Lahore, Inspector General of Police Sindh, Pakistan Television Corporation, Islamabad, Pakistan Post Office Islamabad, Karachi Electric Supply Corporation and Sui Southern Gas Co. Ltd. (Formally Karachi and Indus Gas Company Limited) and various sections of Pakistan Bureau of Statistics.

Population Growth Overview: The population size in 2023 has experienced 16.38% increase as compared to the last population census. The average annual growth rate is reported as 2.57% in 2023, which is much higher than previous growth rate observed in census, 2017. This is alarming because population annual growth trend, which was showing decline for the past many years has reversed in the recent years. The rapid population growth exacerbates issues associated with education, healthcare and other facilities, which leads to overcrowded schools, pressures on healthcare facilities and food insecurity etc. It appears, family planning services are underutilized due to various reasons and concerted efforts are required to control higher birth rates.

Age Distribution: The population of Sindh is predominantly consist of youth 41.78% people are concentrated in age group less than 15, while 55.16 % of population falls in the age group of 15-64, and merely 3.06% is aged 65 and above as per Census, 2023. The age structure impacts workforce availability and social service needs. However, high population growth rate poses serious challenges for achieving many SDGs by 2030.

Urbanization and Housing: In Sindh 53.97% of the population resides in urban areas, reflecting ongoing urbanization trends. This shift has implications for infrastructure and housing demands. Housing indicators can help the policy makers to understand the housing landscape, identify areas for improvement, and inform policy decisions. Utilizing clear and effective visual representation of data can significantly enhance communication and engagement with the community. The total number of housing units in Sindh are reported as 9.87 million as per census, 2023 out of which 76.14% are 'owned housing units, 15.78% are 'rented', 5.36 % are 'rentfree' and 2.72% are 'others'. The share of rented unit is higher in big cities especially in Karachi Division, where it is reported as 35.50%. In the rural areas of Sindh 86.11% household are living in owned housing units as compared to urban area where 67% are owned housing units and 27.87% are rented.

Sources of cooking fuel used: It is observed that 47.37% of housing unit used gas as fuel for cooking as compared to 47.39% in 2017 and wood as fuel for cooking declined to 44.80% in 2023 as compared to 49.50% in 2017. However, there is big contrast in type of fuel used in urban and rural areas, in former 80.73% used gas as fuel for cooking while only 11.01% in later.

Agriculture: Sindh's agriculture sector characterized by a diverse range of crops. It contributes significantly in food security, rural employment, and poverty alleviation, while also supporting key industries such as textiles, food processing, and exports. The net area sown during 2022-23 was 2574 thousand hectares of total cultivated area which declined to 52.03% as compare to 52.94% in 2021-22. Agriculture sector has indicated an overall growth of 0.56% according to Pakistan Economic Survey 2024-25. The production of major crops such as wheat (3940.2 thousand Tones), rice (2011.8 thousand Tones), cotton (1586.29 thousand bales), and sugarcane (16171.73 thousand Tones) are major contributors in production with growth in wheat (10.8%), but decline in Sugarcane (16.9%) & Rice (29.69%) as compared to 2021-22. Rice and wheat are staple foods, while cotton is crucial for the textile industry. It has been observed that the yield per hectare of wheat and cotton are decreased due to erratic weather patterns, including floods water distribution, infrastructure inefficiency and reduced water availability due to climate change.

Education: Sindh has made strides in increasing access to education, and related facilities however, it continues to struggle with high dropout rates and gender disparities as well as education quality. Sindh represent 23.14% of Pakistan's total population. Out of total population of Sindh which is 55.64 million, 16.89 million are the children between the ages 5 to 16 years and account for nearly 30.36% of total population of Sindh. As per latest census 46% of children are reported as out of school children of age 5-16 in Sindh. There are more female out of schools children (51%) as compared to male (42%). Parity index calculated for gender at primary level is 0.87 and 0.83 for middle and high level respectively. The quality of education remains uneven, with many institutions lacking basic resources due to inadequate infrastructure, teacher shortages, and gender disparities, particularly in rural areas. To get the required outcomes government need to invest further in training of teachers and incentives to improve retention and quality, enhance infrastructure in underserved areas and implement inclusive education policies to address gender and socioeconomic disparities.

Health: Sindh's healthcare system faces significant challenges like other provinces, including a high burden of communicable and noncommunicable diseases. Despite many interventions, access to basic healthcare services is still limited, especially in rural regions. There are (101) hospitals, (1189) dispensaries, (146) RHC, (772) BHU and (107) MCH centers reported across districts.

Crime: Karachi is largest city and economic hub of Pakistan which faces widespread crime, particularly in the form of killing, violence and robberies. High level of poverty and lack of economic opportunities especially for the youth contributed to rising crimes which are reported as 108,951 in 2023 as compared to 96,599 reported in 2010 which is showing an increase of 12.79%. Heinous crimes like murder and attempted murder have been decreased in 2023 as compared to 2010 while robbery, motorcycle theft and kidnapping are increasing during this period due to various factors, including population size, congestion, poverty and unemployment etc among other factors.

The compilation of Social Economic Indicators at District level of Sindh owes to the efforts of the following officers/officials of the Pakistan Bureau of Statistics.

Sindh Population in Millions 2023

Chapter 1

Population

Sindh is the second largest province of Pakistan in terms of population. Topographically Sindh province can be divided into four main geographical parts. Kirthar range on the west a central alluvial plain bisected by the Indus river in middle, a desert belt in the east and Indus delta in the south. This chapter provides the detail information about population dynamics, population growth & density, total area, dependency ratio, marital status and distribution of population by gender and economic activity.

Population Size and Growth

According to the 7th Population and Housing Census, 2023, the total population of Sindh is counted as 55.70 million including headcount population population with detailed characteristics is 55.64 million which suggests an Inter Censual increase of 16.38% during the period of 2017 to 2023. Therefore, average annual growth rate is observed to be 2.57% between the period of 2017 to 2023; which is much higher than previous growth rate of 2.41%, indicating rapid growth rate, see table 1.1 for detail.

Table: 1.1 Population size and Growth Rate of Sindh Since 1951

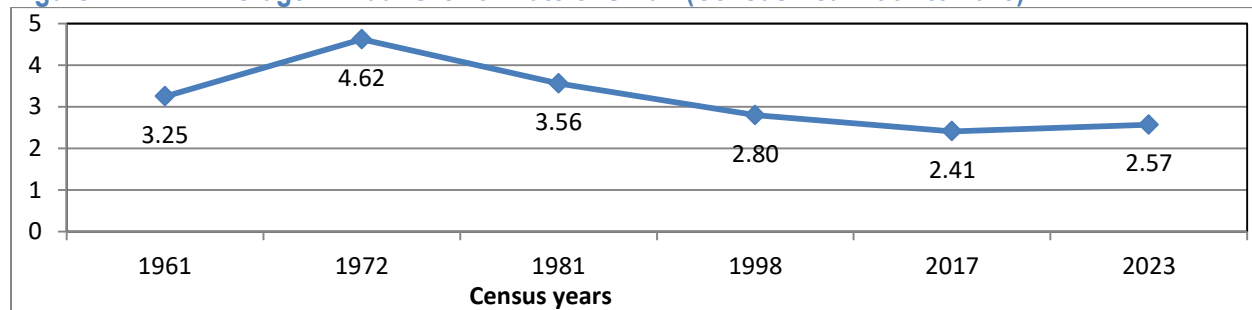

Year	Population (in "000")						Growth Rate (%)
	Overall	Urban	Rural	Male	Female	Transgender	
1951	6048	1768	4280	3350	2698		
1961	8367	3167	5200	4618	3749		3.25
1972	14156	5726	8430	7574	6582		4.62

2017	47855	24833	23022	24876	22972	6	2.41
2023	55638	30057	25639	29014	26677	4	2.57

Source: Pakistan Bureau of Statistics

Growth Rate

Population growth rate in 1961 was 3.25 which peaked to 4.62% in 1972 and then started to decline until 2017 where it reached lowest point 2.41% before rising to 2.57% in 2023.

Figure: 1.1 Average Annual Growth Rate of Sindh (Census Year 1961 to 2023)

Division Wise Population Distribution & District Wise Population Pyramids

Karachi Division has the largest population share (36.60%) among six (6) Administrative Divisions in Sindh. Second largest division is Hyderabad with 20.93% share, followed by Larkana 12.74%, Sukkur 10.79%, Shaheed Benazirabad 10.65%, and Mirpur khas 8.29% share (Table1.02) Census 2023. Stratified analysis by districts suggests that highest growth is observed in Karachi East District in Sindh with 5.32% average annual growth rate, followed by Karachi South 4.71%, and Karachi West District 4.35%. Lowest growth however, is observed in Tando Muhammad Khan 1.18%, followed by Ghotki 1.22% and Sujawal District 1.25%.

Population pyramids for fiveyear age cohorts are also given at the beginning of this chapter under key finding of Sindh population. Overall Karachi East pyramid in 2017 was moving toward the shape of stationary population, however, in six years it started to look like typical pyramid again, which alludes to high growth rate (5.32%). Further analysis gives more insights, for example, majority of 04 age group population in 2017 would be in age group 59 years by 2023. Data suggest that there were 323,085 kids in the 04 age group in 2017, however, by 2023, 438,144 kids were enumerated in this age bracket, over 115 thousand more kids found in this age group. This trend was observed up to the age 54. The population increase could be attributed to in migration or to better coverage. As far as districts with lowest growth rates are concerned their shape remained more or less similar for both Censuses, see population pyramids of Sujawal, Tharparkar and Umer Kot Districts.

Urban Rural Population

Rapid urbanization is one of the inevitable outcomes of the demographic transition. Currently, urban population is 30.06 million (53.97%) whereas rural population is 25.639 million (46.03%). Over the years, Sindh has witnessed urbanization; figure 1.3 shows data from 1951 to 2023. It can be observed that from 1951 to 1981 rural population was higher than urban but from 1998 this gap started to shrink and in 2017 urban area population surpassed rural population. The result also reveals that share of urban population indicating increased trend of migration of rural population to urban areas for getting better jobs, education and health facilities.

Figure: 1.2 Percentage Share of Rural & Urban Population in Sindh

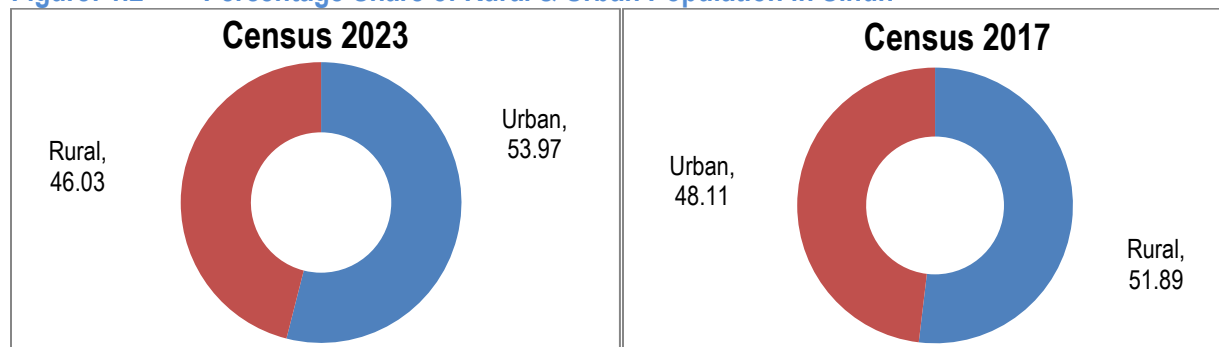

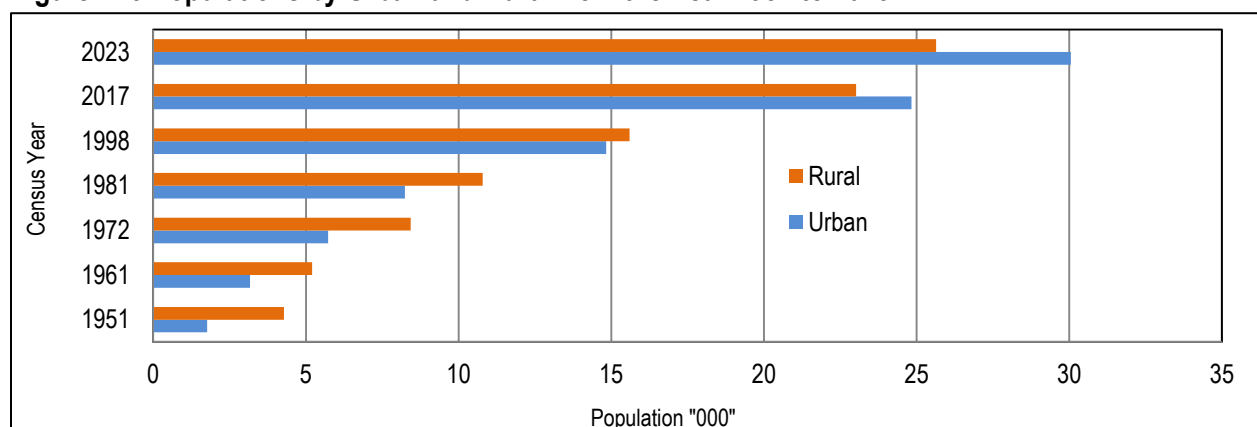

Figure: 1.3 Populations by Urban and Rural from the Year 1951 to 2023

Population Density

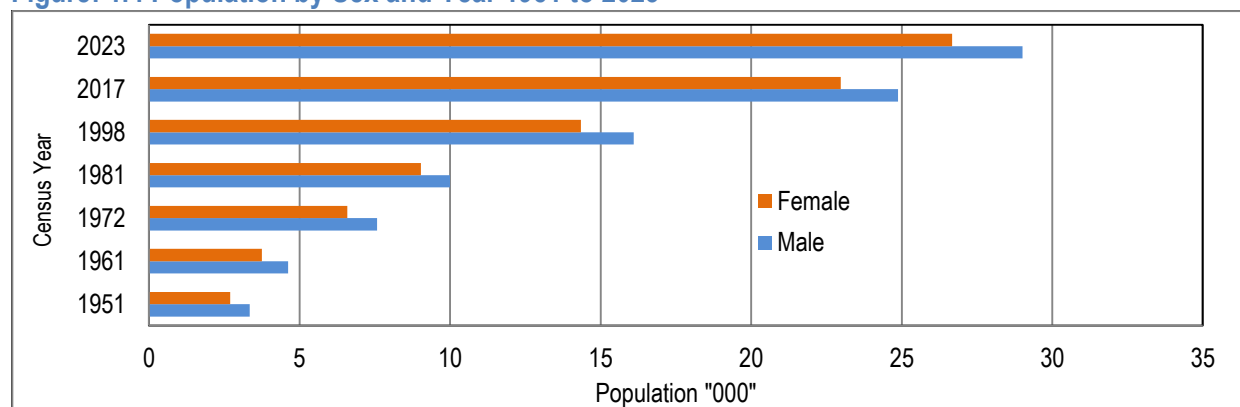

The population density has increased to 395.25 persons per square kilometer in 2023 as compared to 339.60 persons per square kilometer reported in Census 2017. Karachi central district is the most populated area having a population density of 55,396.01 persons per square kilometer followed by Korangi and Karachi East districts with 28,971.95 and 28,213.97 persons, respectively. Tharparkar district is the least densely populated district with a population density of 90.56 per square kilometer as per Census 2023. However, the average household size in Sindh increased from 5.55 persons per household to 5.60 in Census 2023.

Table: 1.2 Population Density, Sex Ratio and Average Household Size of Sindh

Indicators/Year	2017	2023
Population density (per sq.km)	340	395
Average household size	5.55	5.60
Sex ratio	108.28	108.76

Source: Pakistan Bureau of Statistics

Figure: 1.4 Population by Sex and Year 1951 to 2023

Dependency Ratio

The distribution of the population by age, sex, and residence is a primary demographic classification. It also provides information on trends on population growth based on the size of age brackets, including dependency groups. According to census 2023, 41.78 percent of the population is under the age of 15 and 3.06 percent is age 65 and above, with the bulk of the population falling in the 15-64 age bracket i.e. 55.16%, the age dependency ratio (the sum of the population under age '15' and the population age '65 and over' relative to the working age population age "15-64") is 81.31 percent. The dependency ratio appears to be higher among rural population compared to urban areas (Table 1.3).

Table: 1.3 Distribution of Population by Selected Age Groups Census 2023

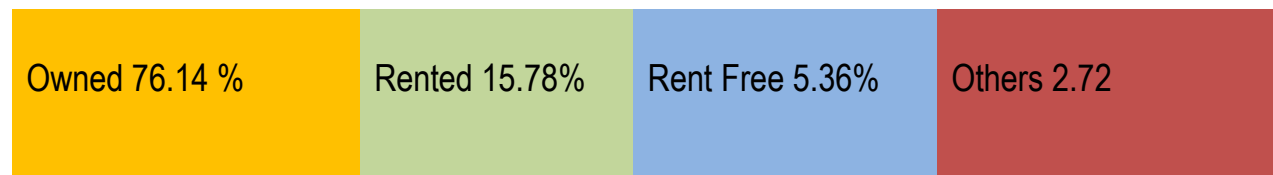

Age Groups	Total				Urban				Rural			
	Total	Male	Female	Transgender	Total	Male	Female	Transgender	Total	Male	Female	Transgender

HOUSING

KEY FINDINGS OF HOUSING UNITS

Housing Units by Tenure, Census 2023

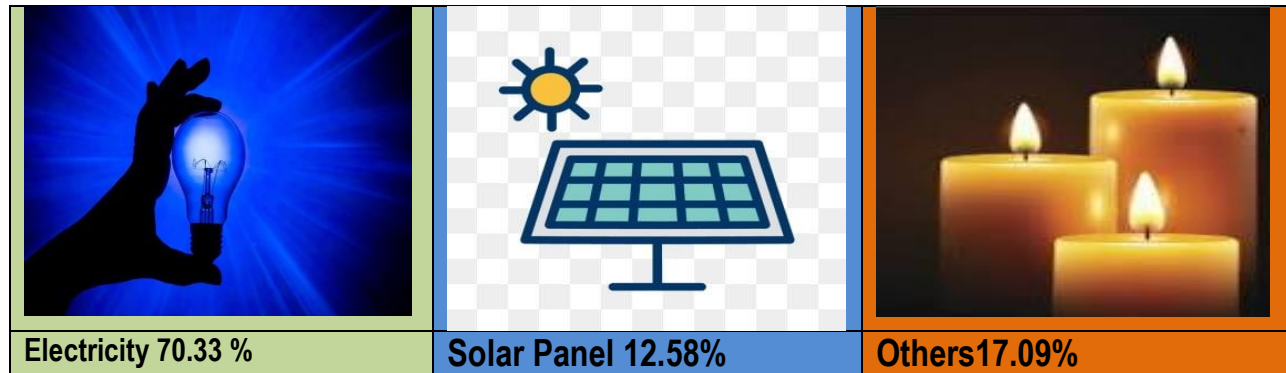

Number of rooms in the housing unit 2023

Source of Drinking Water, Census 2023

Source of Lighting

Source of Cooking Fuel Used

Chapter 2

Housing

This chapter presents information about housing facilities such as sources of drinking water, number of rooms, distribution of housing units by tenure, period of construction of owned housing unit, sources of fuel availability for cooking purposes and sources of lighting.

Household Size and Composition

A household means a group of persons living together who have collective arrangements for cooking/eating. A person living alone is also considered to constitute a household. The distinguishing characteristic of a household is its common cooking arrangements. Therefore, there could be more than one households in one housing unit. There are 9.87 million housing units counted in census 2023 against 8.48 million enumerated in census 2017, data suggests an increase of 16.38% during the intercensal period of 2017 to 2023.

Household Tenure

In Sindh majority of households are living in owned housing units. The share of owned housing units in Sindh are 76.14%, rented units are 15.78%, rent free are 5.36% and remaining 2.72%, are other housing units (Census 2023). Comparative census results reveal that the proportion of owned housing unit decreased from 77.11% in census 2017 to 76.14% in Census 2023. The rented housing units have increased from 14.50% to 15.78% in Census 2023 (Table 2.1, Figure 2.1).

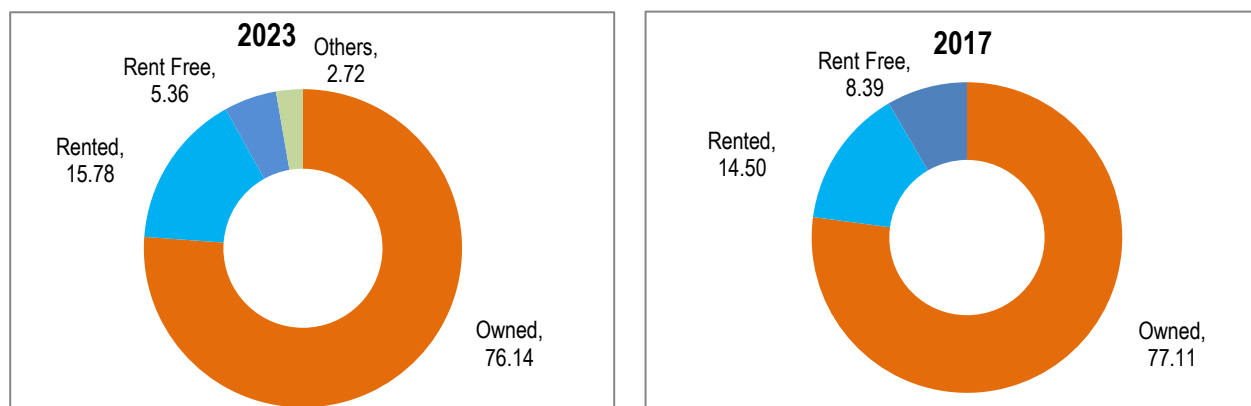

Further, it is observed that share of rented units is higher in big cities and in urban areas. For example, in Karachi Division 35.50% households are living in rented units, 60.29% in owned housing units. In contrast, in Mirpur Khas Division 0.71% are living in rented units in rural areas, which is significantly lower as compared to urban areas of Mirpur Khas Division which is estimated as 10%, table 2.01 Census 2023.

Table: 2.1 Percentage Distribution of Housing Units by the Tenure in Sindh

Year/Housing Unit by Type	2023			2017		
	Overall	Rural	Urban	Overall	Rural	Urban
Owned	76.14	86.11	67.00	77.11	86.79	67.84
Rented	15.78	2.59	27.87	14.50	2.09	26.39
Rent free	5.36	8.17	2.78	8.39	11.12	5.77
Others	2.72	3.13	2.35			

Source: Pakistan Bureau of Statistics

Figure: 2.1 Percentage Distribution of Overall Housing Units by Tenure

Housing Units by Lighting Facility

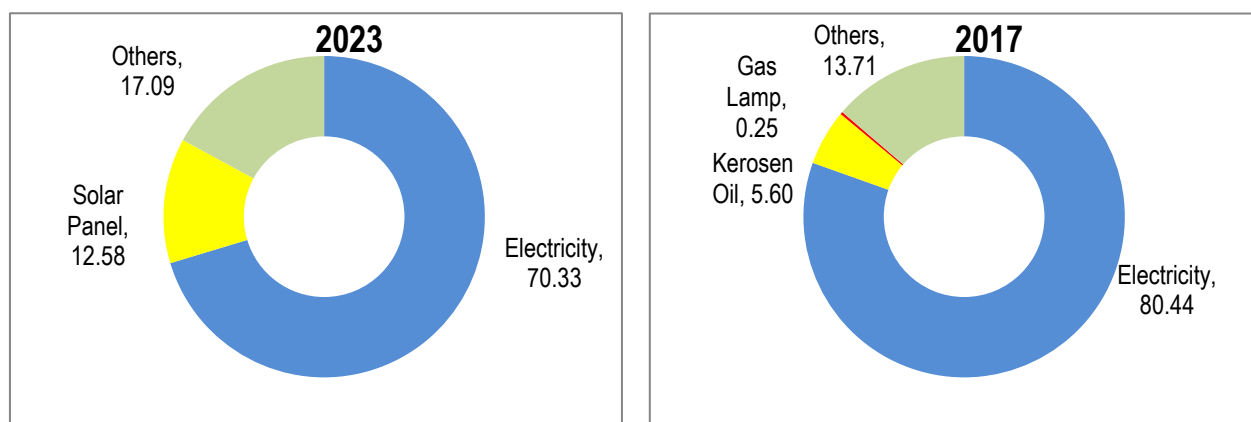

According to Census 2023, electricity is the major source of lighting in Sindh. However, in Census 2017, 80.44% of the housing units had reported electricity facility which decreased to 70.33% in Census 2023, indicating a decrease of nearly 10% points between the two periods. However, this number exceeds 82% if Electricity and Solar Panel are combined together. Similar trend is observed for Rural and Urban areas. Electricity as source of lighting facility has also shown decline in rural areas from 64.85% in Census 2017 to 46.22% in Census 2017 but if electricity and solar are combined then percentage becomes 68.26% as mentioned already. At district level it can be observed that 99.12% households in Karachi Central are using electricity for lighting followed by Korangi 98.96%, Karachi South 98.58%, and Karachi East 97.82% etc. on the other hand, in district Therparkar only 19.40% and in Sujawal 31.12% have this facility and found to be at bottom of the list.

Table: 2.2 Percentage Distribution of Housing Units by Source of Lighting Facility

Source of lighting	2023			2017		
	Overall	Rural	Urban	Overall	Rural	Urban
Electricity	70.33	46.22	92.44	80.44	64.85	95.39
Solar Panel	12.58	22.04	3.89			
Kerosene oil				5.60	10.01	1.37
Gas Lamp				0.25	0.38	0.12
Others	17.09	31.74	3.65	13.71	24.75	3.12

Source: Pakistan Bureau of Statistics

Figure: 2.2 Percentage Distribution of Housing Units by Source of Lighting Facility Housing Units by Type of Cooking Fuel Used in Sindh

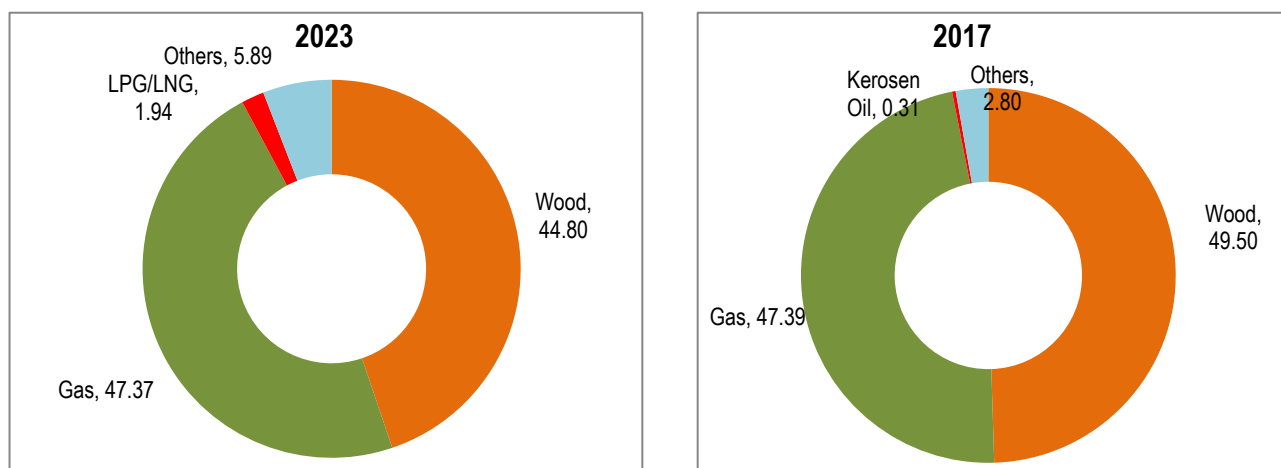

According to Census 2023, 47.37% of housing unit are using gas as cooking fuel which has dropped by 0.02% between two periods as it was observed to be 47.39% in Census 2017. The use of gas as a cooking fuel is higher in urban areas as compared to rural areas across the Sindh.

Table: 2.3 Percentage Distribution of Housing Units by Type of Cooking Fuel Used in Sindh

	2023			2017		
	Overall	Rural	Urban	Overall	Rural	Urban
Wood	44.80	77.94	14.40	49.50	83.76	16.68

Chapter3

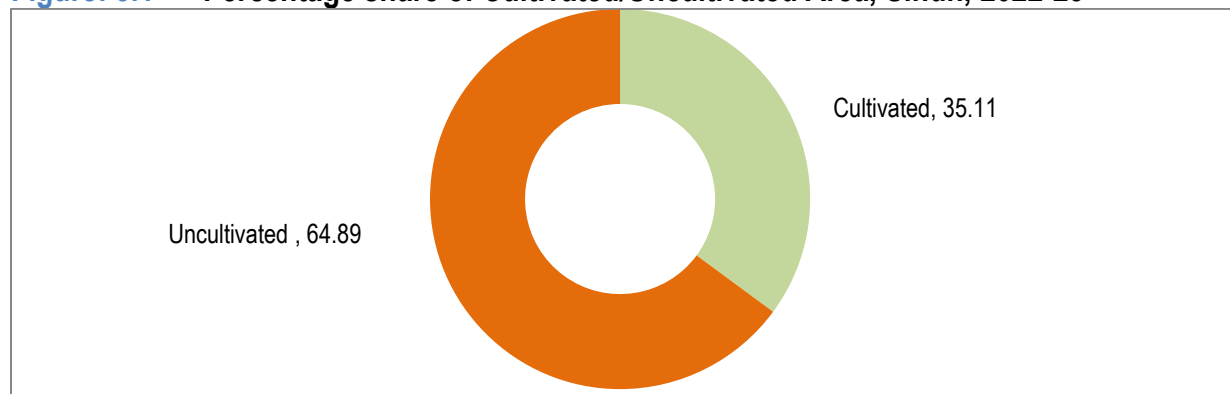

Agriculture

Agriculture is still the largest sector of the economy of Pakistan in terms of labour force participation and as such livelihood of the majority of the population directly or indirectly depends on it. It is a major contributor to the employment and foreign exchange earnings. In addition to that, it provides industrial raw material, hence growth in this sector has multiple linkages with overall economy.

Land Utilization

Sindh has 14,091 thousand hectares' area out of which 4,947 thousand hectares is reported as cultivated area and 9,144 thousand hectares is reported as uncultivated area in 2022-23. The net area sown during 2022-23 was 2,574 thousand hectares of total cultivated area. Trend analysis of data indicates that the area sown more than once is slightly decreased since 2011-12 as sited by (Sindh Development Statistics). The share of "Area sown more than once" was about 26.88% of total cropped area during 2022-23 whereas in 2010-11 it was estimated to be 24.6%.

Figure: 3.1 Percentage share of Cultivated/Uncultivated Area, Sindh, 2022-23

Area and Production of Agriculture Crops

The largest segment of the cultivated area 1238.2 thousand hectares went to wheat crop during 2022-23 followed by Maize 3070.0 hectares, Sugarcane 289.36 thousand hectares, Rice 603.3 thousand hectares, Tobacco 13.0 hectares, Gram 20.80 thousand hectares and Barley 5.8 thousand hectares (Table 3.04).

Figure: 3.2 Food Crops Area, 2022-23

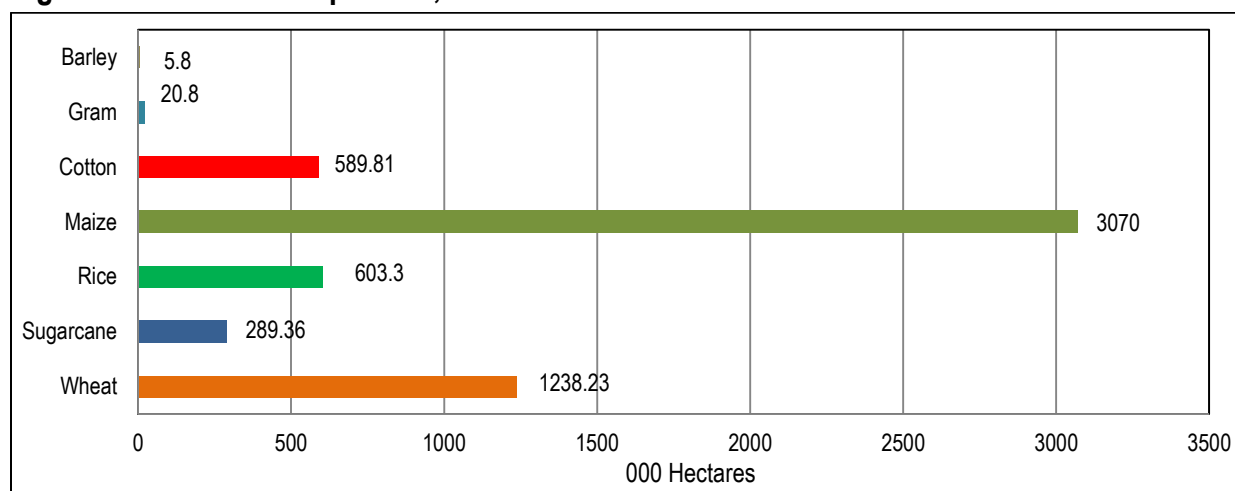

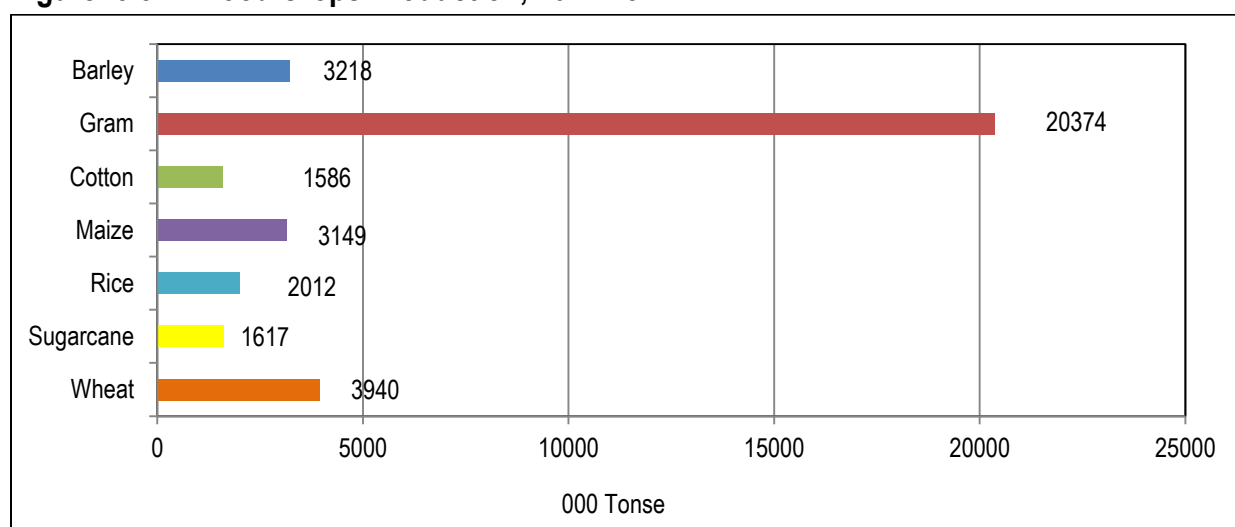

Figure: 3.3 Food Crops Production, 2022-23

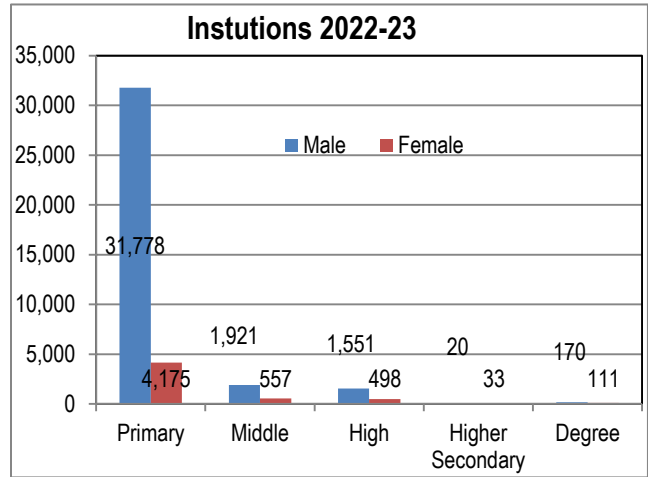

Major production clusters of wheat exist in Sindh due to large cultivation areas available in various larger districts. Shaheed Benazirabad is the largest wheat producing district contributing 9.1% of province's total production. It is followed by Sangher and Nosheroferoz that accounted for 8.8% and 8.6% share respectively (Table 3.09). For maize, Thatta is the largest district that supplied 25.3% of the province's total maize production in 2022-23 (Table 3.29). Mityari and Sangher were the next two largest maize producing districts accounting for 30.90% and 9.43% share of the total maize production of Sindh. Gotki, Thatta and Shaheed Benazirabad are the first, second and third largest sugarcane producing districts accounting for 23.26%, 12.50% and 12.13% share respectively of the provincial sugarcane production in 2022-23 (Table 3.24). In 2022-23 largest production clusters of Jowar is in district Khairpur (Table 3.39) whereas Barley are produced in the large quantities in districts Larkana and Thatta respectively (Table 3.44).

Tharparkar is the largest producing district of Bajra that contributed 97.47% of the Sindh's total production in 2022-23 (Table 3.64). It was followed by Badin which accounted for 0.42% shares of total bajra production in the province. The crop experienced significant increase in area under cultivation and yield. Jaccobabad was the largest rice producing district (Table 3.14), moreover, Kashmor district was the largest producer of Gram and Rapeseed & Mustered (Table 3.34 & Table 3.49).

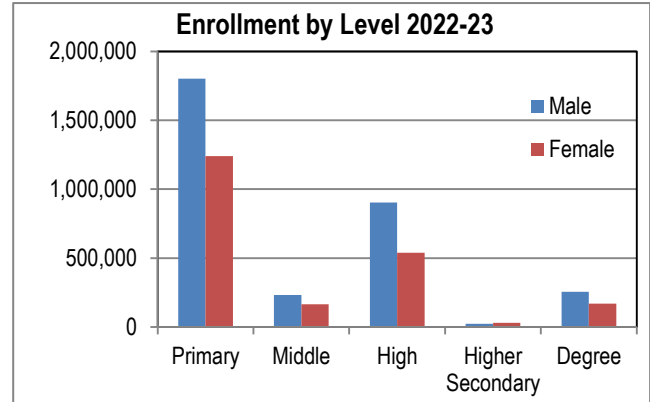

EDUCATION

KEY FINDINGS OF EDUCATION

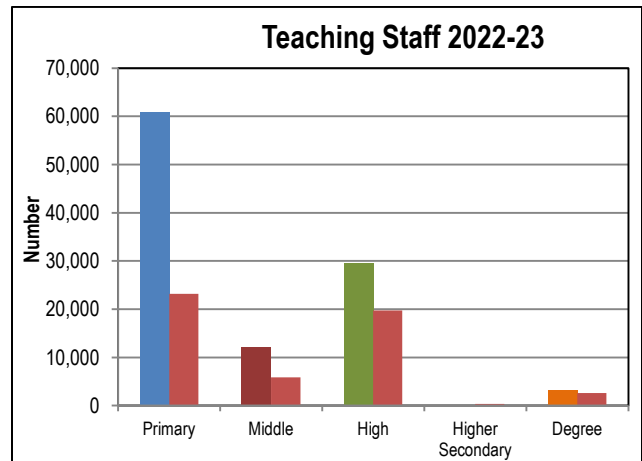

Institutions by Level (2022-23)

Enrollment by Level (2022-23)

Teaching Staff by level (2022-23)

Chapter4

Education

This section explores annual data relating to student enrolment and number of teaching staff working educational institutions, as well as output indicators like literacy rates. Education plays a vital role for social mobilization of household and the formation of developed society. It helps to improve the individual skills and capability; moreover, it also sets a path for the better future. Data relating to education are essential for monitoring the progress of the economic growth, living standards, and progress of Sustainable Development Goals (SDGs). SDG 4 calls for ensuring inclusive and equitable quality education and promote lifelong learning opportunities for all, which indeed is a critical goal and considered as a key enabler under the SDGs framework. School education is imparted in two types of schools i.e. formal and nonformal. Formal schools include all institutions run by the Secondary Education and Literacy Department, as well as other organizations of the provincial and federal governments within province. Nonformal schools or institutions are set up to give a second opportunity to children who have either missed schools or have been dropped out of them. Education data covers the following areas/institution:

- Primary School is an institution comprising first to fifth grades of educational system.
- Middle School is an institution comprising first to eight grades of educational system.
- High School is an institution comprising first to ten grades of educational system.
- Higher Secondary School is an institution comprising first to twelve grades of educational system.
- Intermediate College is an institution comprising of F.Sc./F.A/ICS of educational system.
- Degree College is an institution comprising of B.Sc./B.A/B.Com etc. of educational system.
- Result Statistics: Data regarding number of candidates appeared/passed by sex for matriculation and intermediate level has also been collected with the help of Boards of Intermediate & Secondary Education (BISE).

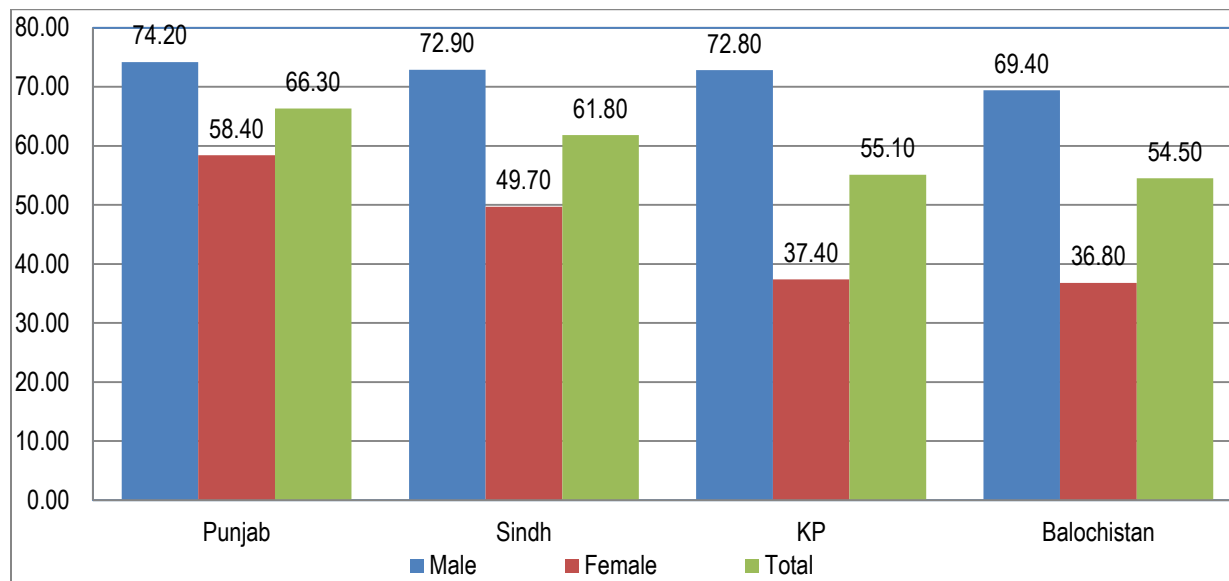

Article 25A of the Constitution of Pakistan¹ states that, “The State shall provide free and compulsory education to all children of the age five to sixteen years in such manner as may be determined by law”. In Sindh, The Sindh right of children to free and compulsory education Act, 2013 was enacted on 11th March 2013 to be compliant with the constitutional provision for ensuring access to free and compulsory education of all children of age 5 to 16 years. The Government of Pakistan has also ratified the implementation of SDGs 2030 in particular SDG4 which envisions to “Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all” as discussed already.

Sindh represents 23.14% of Pakistan’s total population according to Census 2023. Out of total 55.60 million population of Sindh, 16.89 million are the children between the ages 5 to 16 years, which accounts for nearly 30.36% of total population of Sindh. According to the LFS2020-21 total literacy rate in Sindh was 61.8% for men it was 72.9% while for women it was 49.7%. Comparison of literacy rate by

¹ The Gazette of Pakistan, Extr. Pt.1, Constitution (Eighteenth Amendment) Act 2010, Act No X of 2010, P 267, 20th April 2010.

Province is provided in graph given below which indicates that Sindh stands at second place in literacy as compared to other provinces.

Figure: 4.1 Literacy Rate by Province (10 Years and Above)

Educational Institutions

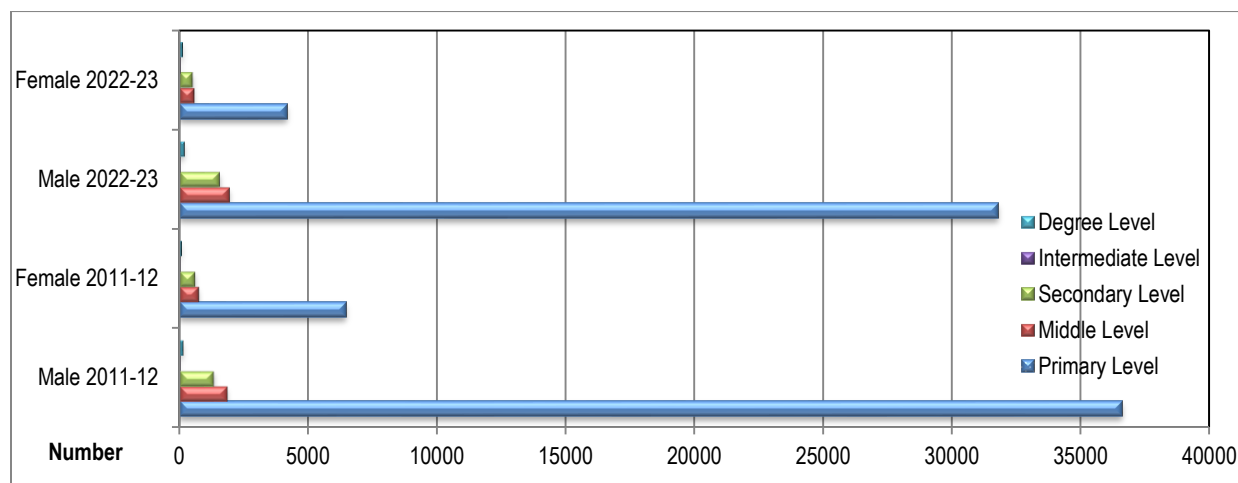

The number of male primary schools is reported as 31778 in 2022-23 as compared to 36,618 in 2011-12 indicating annual growth rate of -1.17%. Similarly number of female primary schools has decreased from 6,471 in 2011-12 to 4,175 in 2022-23, registering a negative annual growth of -3.58%. Middle schools for males are reported as 1,823 in 2011-12 which increased to 1,921 in 2022-23, while females middle school are reported to be 731 in 2011-12 compared with 557 in 2022-23.. Nevertheless, much more schools are needed to cater the needs of the province and to reduce out of school children. High level schools for males are reported as 1,315 in 2011-12 which rose to 1,551 in 2022-23, while female high schools reported as 599 in 2011-12 have decreased to 498 in 2022-23, which shows an annual growth rate of nearly -1.53% between two the periods for females' schools.

Table: 4.1 Institutions by Level & Gender

Level/Sex	Institution (Number)			
	2011-12		2022-23	
	Male	Female	Male	Female
Primary Level	36,618	6,471	31,778	4,175
Middle Level	1,823	731	1,921	557

Figure: 4.2 Number of Institutions by Level and Gender

Enrolment

Enrolment of male students at primary level is reported as 1.75 million in 2011-12 compared with 1.80 million in 2022-23, while female enrolment at primary level is reported as 1.23 million in 2011-12, while in 2022-23 it is reported as 1.24 million which shows positive trend over time for both male and female enrolment rates. Likewise middle and high school enrolment for both males and females is indicating upward trajectory positive trend is observed during 2022-23. At Inter level positive trend observed for both male and female enrolment. During 2022-23 degree colleges enrolment for both male and female is indicating positive trend over time.

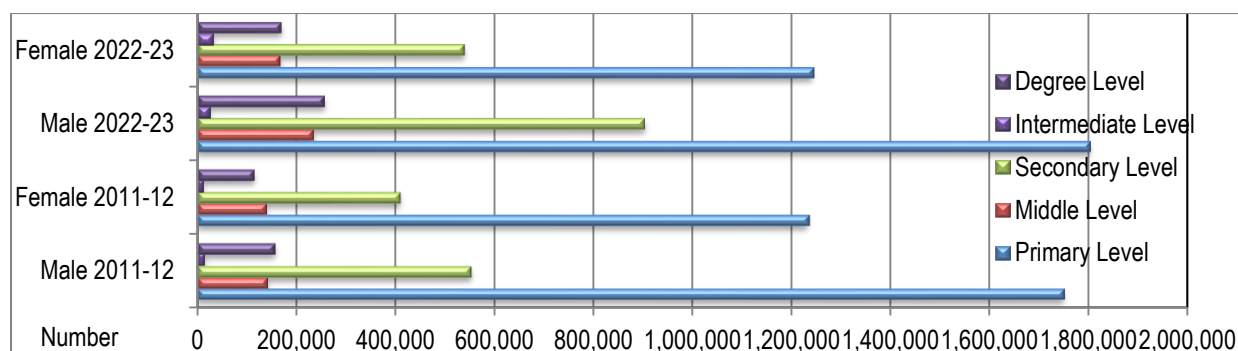

Table: 4.2 Enrolment of Student by Level & Sex

(Number)

Figure: 4.3 Number of Students by Level and Gender

Teachers

There are 157,814 teachers employed in the Sindh at district levels among these tenures 32.80% are women while 67.20% are men. In total, there are 17.48% less teachers in 2022-23 as compared to 2011-12, increasing trend was observed for all the levels with the exception of High and Degree Level schools. There are more male teachers as compared to women at every level (Table 4.3).

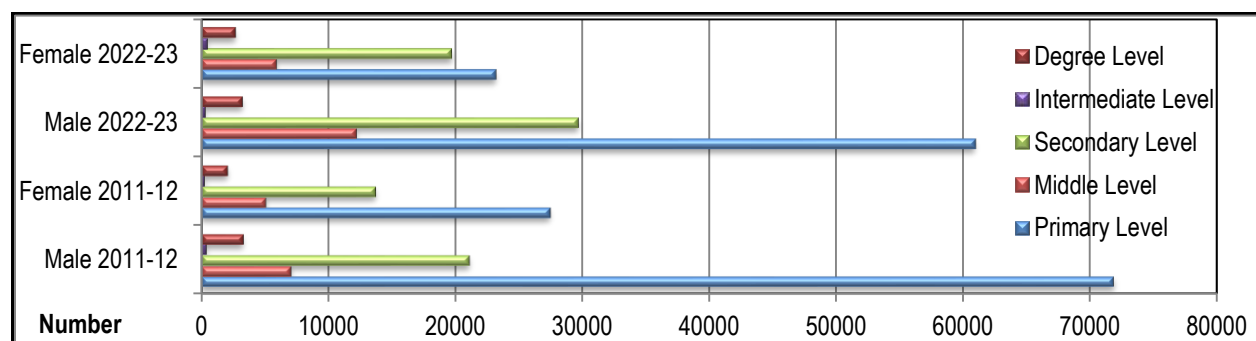

Table: 4.3 Number of Teachers by Level & Gender

(Number)

Chapter5

Health

This chapter covers the data in respect of the Number of Health Institutions, Number of Beds in Health Institutions, Hospitals, Dispensaries, T.B. Clinics, Rural Health Centers, Basic Health Units, SubHealth Centers and Maternity & Child Health Centers located in Sindh and administered by either Health Department or Home Department. It goes without saying that healthy population of a country is critical factor for its economic growth, whereas poor health adds to poverty due to the massive cost of illness which is sometimes estimated using disabilityadjusted life years (DALY). Poor health also diminishes learning capability during childhood and adversely affect cognitive development. This chapter also examines key indicators on health at provincial and district level to explore the progress made to scale up the coverage of health facilities as per the requirements.

Health is centrally positioned with agenda 2030, with one comprehensive GoalSDG 3. It calls for ensuring healthy lives and promoting wellbeing for all at all ages". It has explicit linkages with many other goals. The agenda 2030 thus has major ramification for the health sector, and its realization will entail the development of coherent, integrated approaches and an emphasis on equity and multisectorial action.

i) Health Institutions

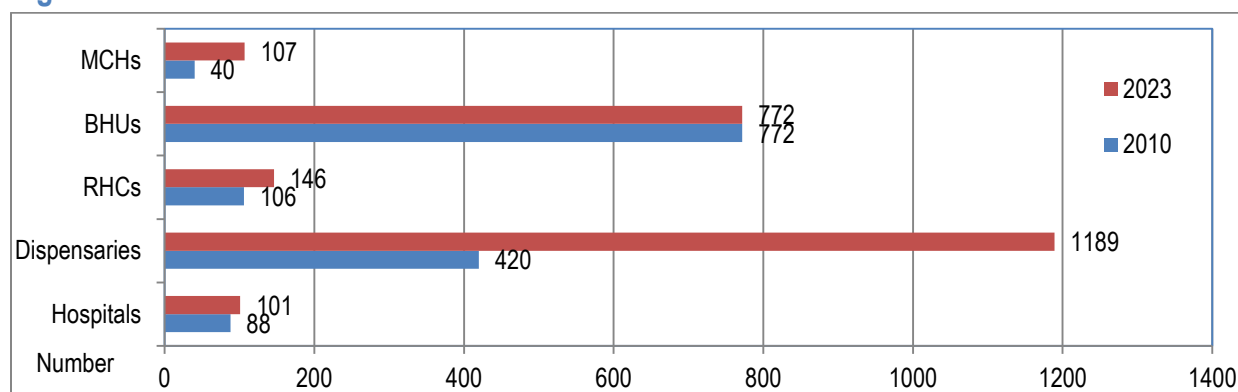

A health institution is defined as an institution which provides health services of curative and preventive nature to all or specific class of the public as outdoor/ indoor patients. In Sindh, basic health units and rural health units provide the basic health facilities at urban and rural level, respectively. Detail of health institutions of public sector is as under:

Table: 5.1 Number of Health Institutions in Sindh

Institutions/Beds	2010		2023	
	Institutions	Beds	Institutions	Beds
Hospitals	88	11677	101	18178
Dispensaries	420	6	1189	-

Basic Health Unit (BHUs)	772	1586	772	1606
Maternal and Child Health Centers (MCHs)	40	-	107	208

Source: Bureau of Statistics, Sindh

Figure: 5.1 Number of Health Institutions in Sindh

ii) Hospitals

Hospital is an institution having ten or more than ten beds. A hospital is an institution providing patient treatment with specialized health services, auxiliary healthcare staff, and medical equipment. The number of hospitals reported in the Sindh province was 88 in 2010 which increased to 101 in 2023 with as percentage increase of 14.77%. No doubt, the number of beds has been added but they are not enough to meet ever increasing needs of growing population of the province. Hyderabad division provides the maximum health facilities to the people in the province having 36 hospitals followed by Karachi division with 15 hospitals. However, districts in Sindh having least number of hospitals are Tando Allah Yar (1), Shikarpur (2), Kashmore (2), Shaheed Benazir Abad (2), Thatta (2) Khairpur (3), Jaccobabad (3), T.M Khan (3), Mirpur Khas (3), Sajawal (3) and Mityari (3) respectively as reported in 2023, see table 5.01.

iii) Dispensaries

A dispensary is an institution having less than ten beds. A dispensary is normally supervised by MBBS doctor and supported by a Lady Health Visitor, dispenser, midwife, aya, chowkidar and sweeper. The hospital and dispensaries have facility to admit the patients in need of continued medical care or surgical treatment. There were 1189 dispensaries in 2023 as compared to 420 dispensaries reported in 2010 in Sindh, boasting an increase of 183.10% between the two periods (Table 5.01).

iv) Basic Health Unit (BHUs)

It is the first level of health care and considered to be essential to maintain adequate health and protection against diseases. Typically, each union council has one BHU consisting of 2 beds but in some cases there are two BHU/UC for facilitating catchment population of union council.

v) Rural Health Centers (RHCs)

BHUs are present in almost all rural areas across Sindh. They have limited usefulness for patients who are seeking slightly advanced but not specialized care. To serve such patients, the health system has established a tier of facilities known as RHCs. The RHCs are better equipped than BHUs to manage minor emergencies and surgeries. This is envisaged as a health facility that is open 24/7. There are 146 RHCs and 772 BHUs reported in 2023 (Table 5.03).

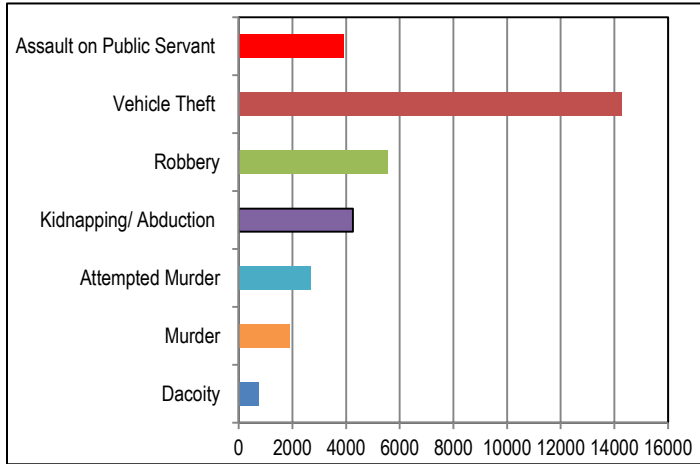

vi) Maternal and Child Health Centers (MCHs)

Maternal and child health centers are managed by Lady Health Visitors and assisted by a facility based trained traditional birth attendant, which provide neonatal and child health care services. These Health services including reproductive health and family planning are often located in urban and large rural areas. There are 107 MCHs reported in 2023 as compared to 40 reported in 2010 indicating an increase of roughly three times in MCHs over 13 years period in Sindh (see relevant years in table 5.01).

Other Indicators

This chapter covers the remaining socio economic indicators like Crime, Road Accidents, Police Station/Chowkies, Number of Post Offices and Electricity & Gas units sold etc. (See tables 6.1 to 6.11)

Public Safety

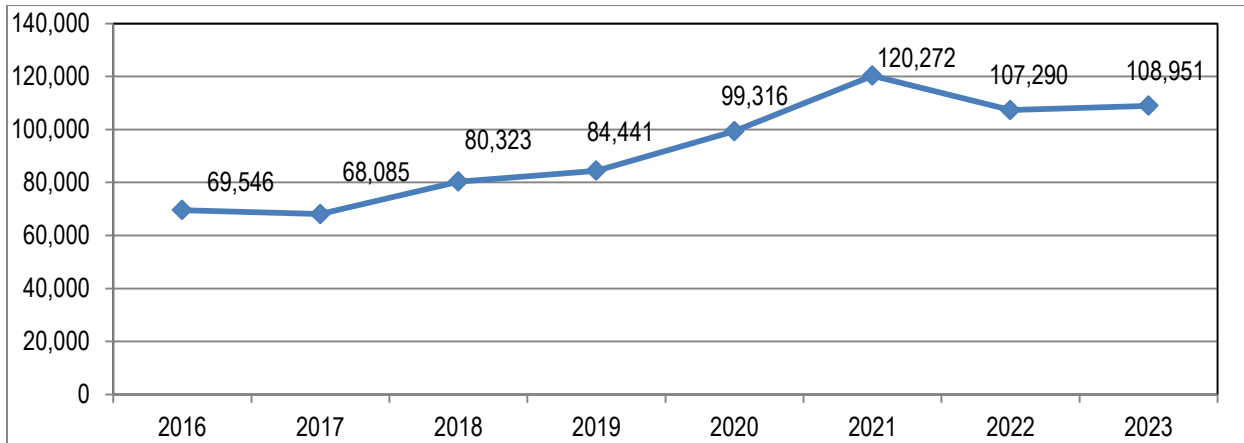

Crimes

Pakistan Bureau of Statistics collects data on crime statistics in order to make policy relevant information for future planning & programmes. Further, the crime information system aims to enhance the public safety measures in the country. Data captured is considered only for those persons who were brought into formal contact with police investigation. Number of crimes reported in the police stations during the year, however, does not capture the data in respect of the number of persons involved in the crimes, and there may be other crimes which may have gone unreported.

Number of registered crimes by districts is provided in table 6.02. Crime by types is given in subsequent tables. Division wise Karachi, Hyderabad and Shaheed Benazir Abad were particularly vulnerable to crimes in 2023. On the other hand, in 2016 number of reported crimes was 69,546 which increased to 108,951 in year 2023.

Crime can be classified into several categories based on their nature and severity. The four main categories of crime are crimes against persons, crimes against property, traffic offenses, and other crimes. Crimes against persons include offenses such as homicide, assault, and kidnapping. Crimes against property involve offenses such as theft, burglary, and vandalism. The category of other crimes includes offenses such as drug offenses, white-collar crimes, and public order offenses. Each of these categories has numerous subcategories that can further classify different types of crime. Murder which comes under category of 'crime against person' is a heinous crime. It has been observed in 2023 that maximum number of murders i.e. 119 (6.25%) were reported in Shikarpur district followed by Khairpur with 116 (6.10%) and 102 (5.36%) in Kashmore as far as top districts with most reported murder cases are concerned. However, these rates are not adjusted for various factors such as population size, crime reporting tendencies etc. In contrast districts with lowest reported murders are T. M Khan (10), Tharparker (14) and Umer Kot (17).

Figure: 6.1 Number of Crimes Reported years 2016 to 2023

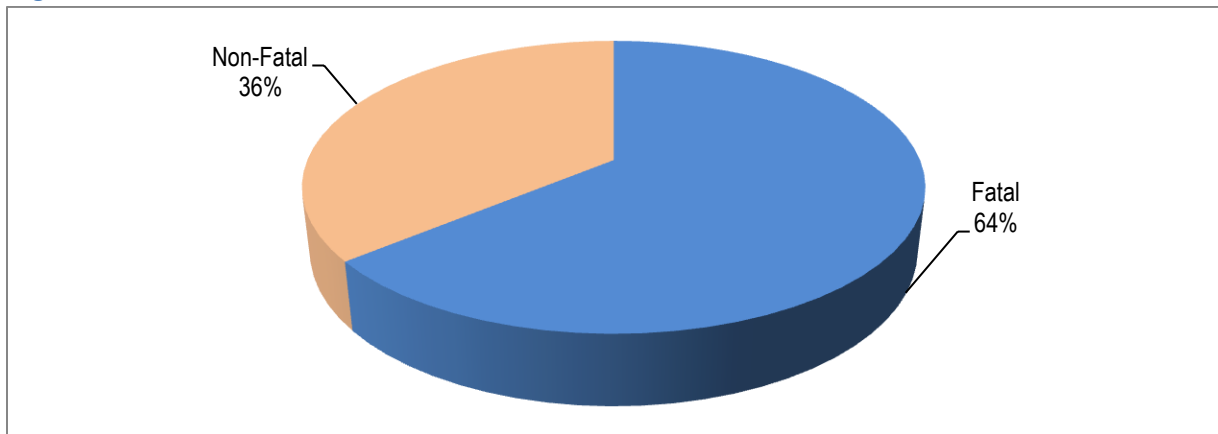

Fatal Accidents

Fatal accidents refer to those incidences where the death occurred on the spot or where the victim succumbed to injuries later on.

NonFatal Accidents

NonFatal accidents refer to those in which no person was killed but in which one or more persons were seriously or slightly injured.

Chapter 7

Data Sources & Methodology of Data Collection

Pakistan Bureau of Statistics (PBS) is the national statistical organization of Pakistan. It plays a pivotal role in collecting, analyzing, and disseminating data that supports policymaking, governance, and national development. PBS collects data on various socioeconomic and demographic indicators through surveys, censuses, and administrative records. It processes raw data into meaningful statistics and reports for the use of government, researchers, and the public alike. PBS shares its findings via publications, reports, and its online portal to ensure accessibility and transparency. PBS serves as the backbone of evidencebased governance in Pakistan. Its collaboration with other departments, various government ministries, provincial departments, and international organizations ensure data quality, timelines & relevance for datadriven decisions achieve sustainable development and national progress to fulfill its mandate.

Challenges and Recommendations

Challenges:

Recommendations:

Methodology

1. Quantitative Methods

- **Data Compilation and Integration**

Aggregating data from different sources to create a comprehensive database of indicators at the district level.

- **Statistical Analysis**

Techniques such as timeseries analysis, and crosssectional analysis to assess trends and relationships. Moreover, indicators are calculated in house to assess improvements.

2. GIS and Spatial Analysis

- **Mapping Data**

Using Geographic Information Systems (GIS) to visualize disparities in socioeconomic indicators.

- **Spatial Comparisons**

Comparing indicators across districts to identify patterns or clusters.

3. Mixed Methods

- **Integration of Quantitative and Qualitative Data**

Combining statistical findings with contextual insights to provide a holistic understanding.

- **Triangulation**

Crossverifying data from multiple sources for reliability.

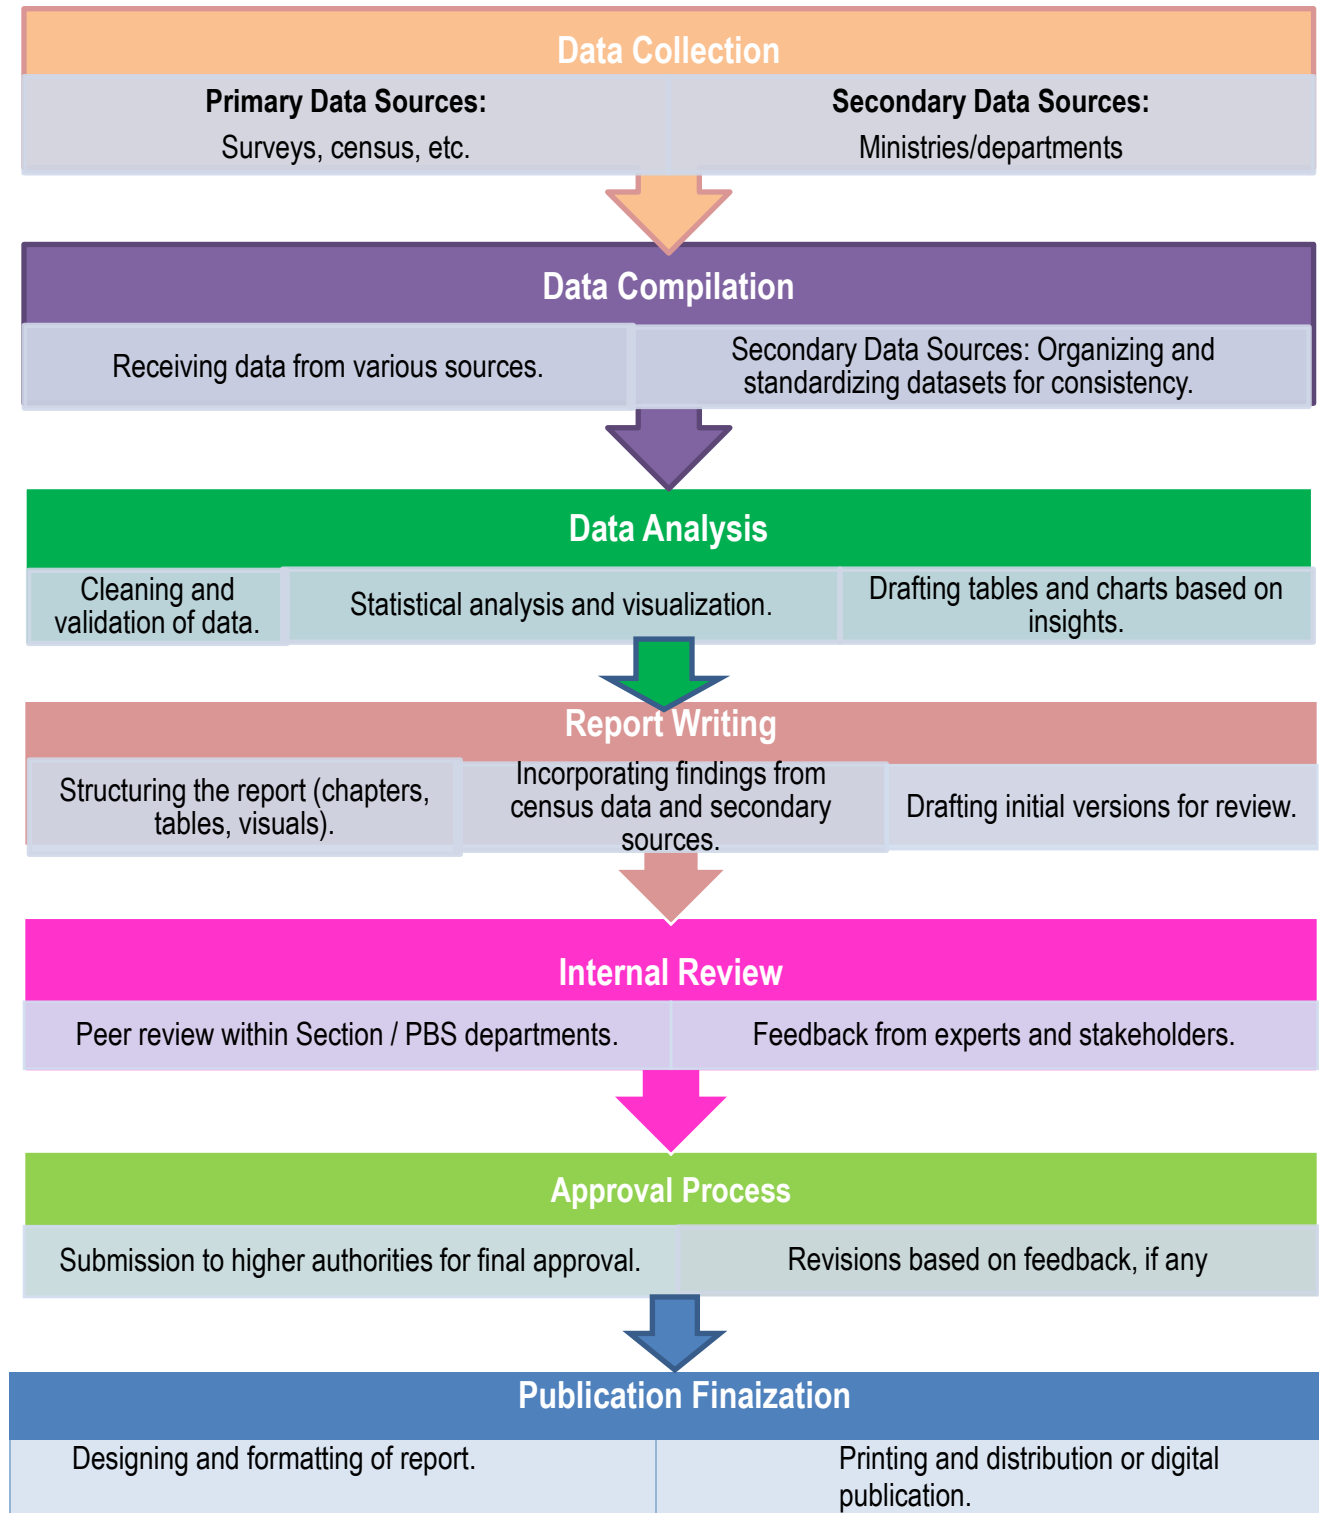

Data Sources & Coverage:

Source of Data	Stakeholders
<p>1. Primary Sources:</p> <p>Census Results 2017 & 2023</p> <p>2. Secondary Sources:</p> <ul style="list-style-type: none"> • Sindh Bureau of Statistics, Karachi. • Director General Pakistan Post, Islamabad. • Inspector General of Police, Sindh. • PWSS, Section, PBS, Islamabad. • Agriculture Section, PBS, Islamabad. • DD&SS Section, PBS, Islamabad. • GIS Lab, PBS, Islamabad. 	<ul style="list-style-type: none"> • United Nation Organization of Drugs and Crime (UNODC) • International Road Federation (IRF) • Asian Development Bank (ADB) • UNESCO • Pakistan Institute of Education (PIE) • Higher Education Commission (HEC) • Directorate (CRSC), Agriculture supply & prices department, Government of Sindh, Hyderabad. • Directorate of Agriculture Extension, Government of Sindh, Hyderabad. • Sindh Education Management Information System (SEMIS). • Concerned Directorate of Colleges Education, Sindh. • Sindh Technical Education & Vocational Training Authority (STEVTA). • Directorate General of Health Services, Hyderabad. • Additional Inspector General (Crime), Police Department Sindh • Crime Branch, Central Police Office. • Divisional Directorates of Excise & Taxation, Lahore. • Pakistan Film Exhibitor Association (Regd) Lahore. • Pakistan Post Office, Islamabad. • Pakistan Television Corporation, Islamabad. • Karachi Electric Supply Corporation. • Sui Southern Gas Co. Ltd. • Ministry of PD & SI, Islamabad. • PP Section PBS, Karachi publications (Statistical Year Book & Monthly Statistical Bulletin) • SS Section publications

Limitations:

- While these sources provide valuable insights, challenges like data fragmentation across ministries and coordination issues persist.
- Data integration is also a problem as different organizations are using customized software and in some instances data is provided hardcopies.
- Time lag from source agencies also pose problem to timely updating series.

MARITAL STATUS 2017

Legend

- Province Boundary
- District Boundary

**Population
(15 years or above)**

- Upto 500,000
- 50,001 - 1,000,000
- 1,000,001 - 1,500,000
- 1,500,001 or above

Marital Status

- Never Married
- Currently Married
- Widowed
- Divorced
